RUNNING QUERIES:	4

INTRODUCTION

Caliber Embedded Accurint queries enable one step access to public data for identity resolution and intelligence-driven policing decisions that improve investigative outcomes, free up valuable staff, and minimize costs.

This document provides an overview for Caliber Online RMS End Users on how to run Accurint public data queries from within Online RMS.

ONLINE RMS ACCURINT QUERY INTEGRATION

Accurint End User Overview

Accurint queries are available from the **Person Search**, **Address Search**, and **Vehicle Search** pages and from the **Person**, **Address**, and **Vehicle Master Indices** pages.

1. **Person Search:** The LexisNexis query option appears under “**Search External Systems**” for authorized users having access to a **LexisNexis: Person Search**. User can search using the below data combinations.
 - a. Last Name, First Name, and DOB
 - b. Last Name, First Name, and SSN
 - c. Last Name, First Name, and Age Range
 - d. Last Name, First Name, and Address (Street, City, State or Zip)
 - e. Phone
2. **Address Search:** The LexisNexis query option appears under “**Search External Systems**” for authorized users having access to a **LexisNexis: Address Search**. User can search using the below data combinations.
 - a. Street Number, Street Name, City, and Zip.
3. **Vehicle Search:** The LexisNexis query option appears under “**Search External Systems**” for authorized users having access to a **LexisNexis: Vehicle Search**. User can search using the below data combinations.

- a. **VIN or License Plate.**
4. **Person, Vehicle, and Address Master Indices Detail Pages:** The LexisNexis search option appears for Authorized users when clicking the **SmartSearch** button.

Running Queries:

Running a LexisNexis Accurint query subtracts from the balance of queries purchased by your agency. To avoid redundant queries for the same person, vehicle, and address, Online RMS caches the last 15 days of query activity and will display that information when a matching query is run. Users can take action to initiate another query for the same data within the cached timeframe, as needed.

1. From the Person, Vehicle and Search pages, users simply click on the **“Search External Searches”** button. LexisNexis Queries require the user to **acknowledge the intent to run** a LexisNexis Accurint public data query by clicking the checkbox to **“Select”** a **LexisNexis Search**.

3. Awareness of query results display to users on the **Person, Address, and Vehicle Search Result** pages via the **green and white “SmartSearch” lightning bolt**  indicator

The yellow “Loading SmartSearch Results”  indicates a search is in progress. A **blue and white SmartSearch lightning bolt** Indicator  displays if there are no matching search results found.

- a. More than one type of **External Search** may display depending on agency configure external interfaces and user access. When the indicator displays green with a count, simply click the **SmartSearch** icon and choose the **External Search** result set to view records. Select “**LexisNexis Person**” from the Person Search, “**LexisNexis Vehicle**” from a Vehicle Search, or “**LexisNexis Address**” from an Address Search.

Figure 7: Search Results Page – SmartSearch Indicator

- b. A new tab “**LexisNexis**” displays for the **External Search** results. A summary of the potential matches’ display for evaluation by users with appropriate actions for each type of search result.
 - i. **Import Record** – Select to create a new person record in the Online RMS Master Indices. Person demographic data, address, phone, and IDs automatically import to the **Person Create Page** to save time and reduce data entry typos.
 - ii. **Export XML Details** – Select to save and view a copy of the person results in the native **XML** return, **XML** is a data exchange type that is human readable and importable into other applications.
 - iii. **View PDF Details** - Select to save and view a PDF report of the person search results.
 - iv. **Run Comprehensive Report** – This option runs a Comprehensive Accurint Public Data Person Details Report for the person selected. This report counts as an additional LexisNexis query. A new tab will

display with the search results and available options to Export PDF, View PDF Details, and Import Record.

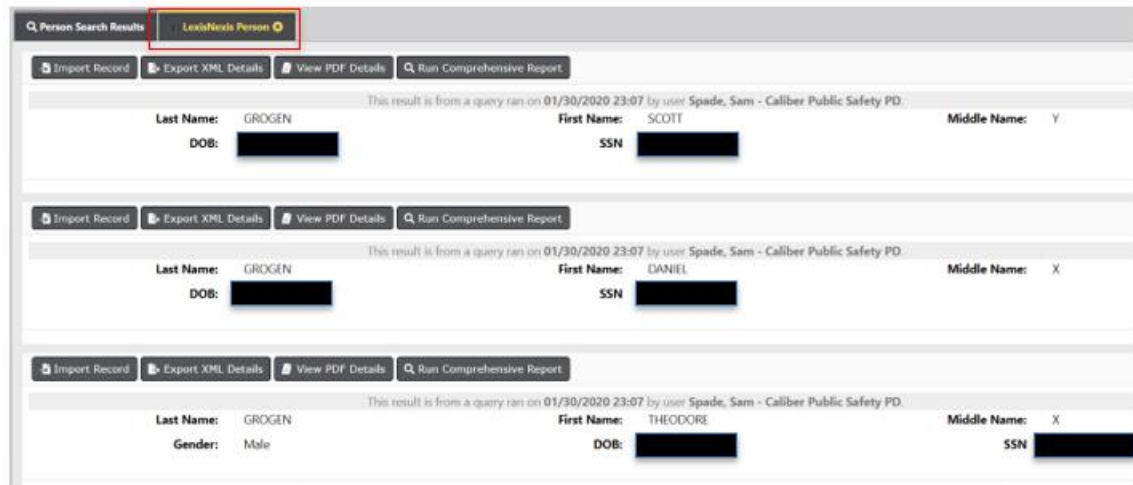

Figure 8 : LexisNexis Person Query Results.

- c. **Person Search Page – Run Comprehensive Report:** Returns a full detailed comprehensive report for the person selected. The following actions are available for each record returned.
 - i. **Import Record** – Select to create a new person record in the Online RMS Master Indices. Person demographic data, address, phone, and IDs automatically import to the **Person Create Page** to save time and reduce data entry typos.
 - ii. **Export XML Details** – Select to save and view a copy of the person results in the native **XML** return, **XML** is a data exchange type that is human readable and importable into other applications.
 - iii. **View PDF Details** - Select to save and view a PDF report of the person search results.
 - iv. **Quick Search buttons** - allow for additional searches to easily be run for related Addresses, Vehicles, and Persons.

This result is from a query ran on 05/13/2022 12:17 by user Caliber, Admin - (ID #: 123) - Caliber Public Safety PD.
