Chapter 1. Introduction

Access Administration

Use the following procedure to access Online RMS Administration.

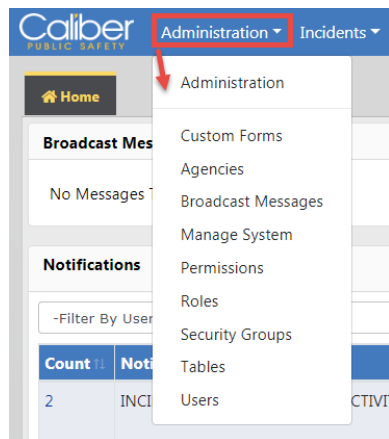

1. Open the RMS application to the *Homepage* to display the Navigation bar as shown.

Note: The icons/labels vary in the Navigation bar depending upon which areas your assigned roles allow you to access. For example, if none of your roles include working with incident reports, you would not have an Incidents icon-/label in your Navigation bar.

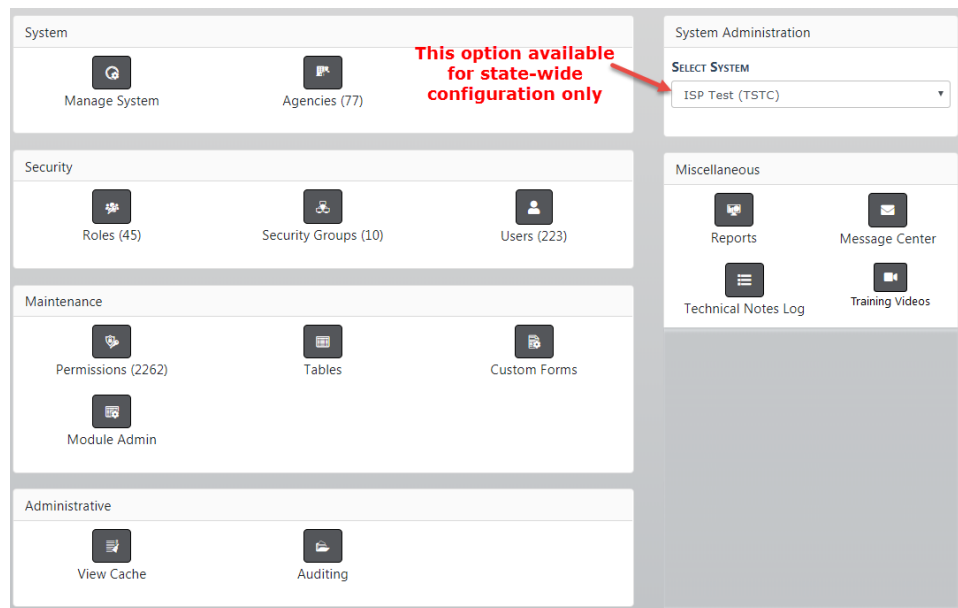

2. Perform one of the following steps:

- Click on the *Administration* label to display the drop-down menu and select the appropriate option.

Note: On the *Administrative Home* page the icons are arranged in functional groups as shown in the screen examples below.

- Click the *Administration* label, then click *Administration* again from the drop-down menu to display the *Administration Home* page as shown.

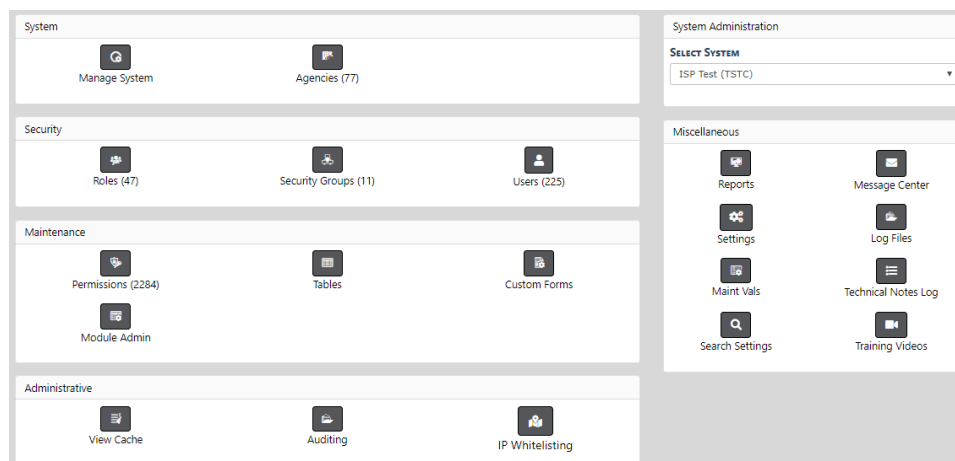

Note: The appearance of the menu and page varies depending upon your agency's set-up.

- Click the appropriate icon to open the portion of the program in which you want to work.

Levels of Administration

Company Level

The first and top level of administration is the company level. Only Caliber Public Safety personnel can administer application functionality at this level.

For agencies having security requirements to not allow access to Caliber Online RMS outside of approved networks, Caliber Public Safety personnel can define the following settings via the **IP Whitelisting** icon under the *Administrative* section:

- Define Authorized IP ranges for client network requests.
- Bundle with 2FA for access outside of IP ranges.
- Requires a system admin or Caliber DBA to configure.

The screenshot shows the 'IP Range' configuration form. It has a title bar 'IP Range'. Below it, there's a section for 'AGENCY' with a dropdown menu set to 'All Agencies' and an 'ACTIVE' checkbox that is checked. Below that is a section for 'ADDRESSES' with a text area containing the following text: 'Add individual IP addresses or ranges of IP addresses below, one per line. To specify a range, use a '-' (hyphen) to denote the range. e.g. 10.0.1.1 - 10.2.2.2'. The text area contains two lines of text: '10.0.1.1 - 10.2.2.2' and '10.19.152.2'.

Schema Level

Another level of administration is the Schema Level. Each agency has their own schema, unless they are a multiple agency schema. Another example might consist of administration of law enforcement agencies using Online RMS within a county or district; for example, the sheriff's office and all police departments within a specific county.

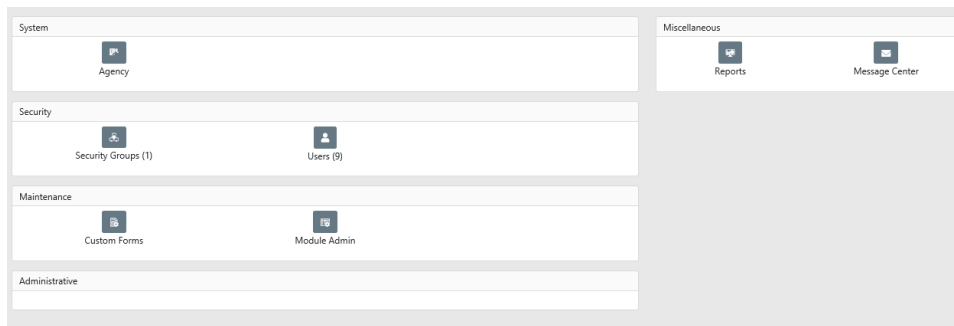

The screenshot shows the 'System Administration' page. It has a left sidebar with categories: 'System' (Manage System, Agencies (75)), 'Security' (Roles (39), Security Groups (10), Users (204)), 'Maintenance' (Permissions (2055), Tables, Custom Forms, Module Admin), and 'Administrative' (Auditing). The main content area has a 'SELECT SYSTEM' dropdown set to 'ISP Test (TSTC)'. Below that is a 'Miscellaneous' section with 'Reports' and 'Message Center' links.

Agency Level

The third level of administration is at the agency level. This level applies to administration of an individual agency that uses Online RMS. The following *Administrative Home* page shows

the features available to administrators with this level of access.

Within the system, all users, including administrative users, are defined by the roles and permissions assigned to them. The features and functions available to individual users vary considerably. "Roles and Permissions" below for more information.

Roles and Permissions

Once a user has been added to an agency, that user can log into the system but has no access to system features until his/her roles have been assigned. Caliber Public Safety develops roles for each type of personnel employed by an agency, and these roles consist of permissions or privileges. Several permissions are used to make up each of the various roles used by an agency.

Because system tasks performed by one user (for example, an officer) differ from those performed by another user (for example a patrol supervisor), the two roles also differ. Certain users are given permissions to perform specific tasks within the system by the Officer role while other users are given permissions to perform other tasks by the Patrol Supervisor role.

- A user must be assigned at least one role in order to perform tasks within the system.
- A user can be assigned more than one role.
- Two different roles may include one or more of the same permissions, but within a specific agency, each role is unique in its permissions make-up.
- Certain users may be able to delegate some or all their permissions/privileges to another user for a period of time.
- Users cannot modify roles that are above their maximum Role Access Level.
- Users cannot select a Role Access Level that is above their maximum role access level when creating a new role or modifying a role to which they have access.

Master Index Security

User access to master index data in Online RMS is controlled by **Master Index Security**, a hierarchical design where **Level 1** is the lowest and **Level 3** is the highest security. The Security Level exists on every master index record, and on each user account, to control data access. The **Master Index Security** applies to all master indices: Person, Address, Organization, Vehicle, Property, and Gang.

Master Indices Security Levels

SECURITY LEVEL	
Level 1 - Access to all Data	
Level 2 - Conditional Access to Data	
Level 3 - No Access to Data	

- **Level 1**
 - No security restrictions to the master index record.
 - The default level for new master indices records.
- **Level 2**
 - Conditional security in place to restrict viewing of involvement data from the indices summary page.
- **Level 3**
 - Restrict viewing of the master indices in searches and displaying on event records.

User Account Index Security Levels

INDEX SECURITY	
Level 1 - Access to all Data	
Level 2 - Conditional Access to Data	
Level 3 - No Access to Data	

- **Level 1**
 - View full details of master index records having **Security Level 1**.

- Only view the indices demographic information for master indices records having **Security Level 2**.
- And, Not see master indices records that have **Security Level 3**.
- The default level for all new user accounts.
- **Level 2**
 - View the full details for master indices records having **Security Level 1**.
 - View the details for master indices records having **Security Level 2**.
 - And, Not see master indices records that have **Security Level 3**.
- **Level 3**
 - View the full details for master indices records having **Security Level 1**.
 - View the full details for master indices records having **Security Level 2**.
 - And, view the full details for master indices records having **Security Level 3**.

Chapter 2. System Administration

The *Administrative Home* page has a **System** section which may contain one to three icons, depending on user privileges.

If a particular schema has more than one agency involved, there will be a **Select System** selection list in the upper right corner of the screen. If you are an administrator with permissions for multiple agencies, use this drop-down list to select an agency. Most administrators, however, only have permissions in one agency.

System Information

Use the following procedure to edit data on the **System Information** tab of the *Manage System* page.

1. From the *Administrative Home* page, click the **Manage System** icon to open the *Manage System* page. For details on accessing the Administration Home page, refer to "Access Administration" on page 1
2. If needed, click the **System Information** tab to bring it to the front as shown.

3. Make changes as needed to the fields in the **System Information** section. The County Code and County Name are read-only, they are not modifiable.
4. Select the **System Administrator** from the list.
5. Make changes as needed to the fields in the **Mailing Address** section.
6. Make changes as needed to the fields in the **Application Settings** section.
7. Click **Update** to display the message, *System updated successfully*.

Quick Links

Your agency administrator can preset **Internal Quick Links** and **External Quick Links** for the agency, making them available to all users with appropriate permissions who want them on their Home Page.

- **Internal Quick Links** provide quick access to areas within Online RMS.
- **External Quick Links** provide quick access to external URLs.

Use the following procedure to add or edit links on the **Quick Links** tab of the *Manage System* page.

1. Click the **Quick Links** tab to bring it to the front as shown.

Quick Link	Category	Agency	Actions

- Select and type changes in the fields as needed.

b. To Add New

- Click **Add Internal Quick Links** for an internal link, or click **Add External Quick Links** for an external URL to open the associated Quick Link window.
- Give the Quick Link a **Name**.
- Provide the remaining information.

3. Click **Save** to save the changes.

Note: The users with appropriate permissions can choose which available Quick Links they want to display on their Home Page. Refer to the *Caliber Online RMS User Guide* for more information.

Chapter 3. Attachments

Attachments Overview

Attachments are files that are accessed by other programs, such as a picture, document, spreadsheet, etc. These files are uploaded and saved to Online RMS modules that support attachments. For example, mugshot attachments could be uploaded and saved to person records, or mechanic hand-written quotes uploaded to Fleet Vehicle records.

Attachments appear in a grid, or columnar format.

Attachments				
Image Library Add Attachment				
Keyword	File Name	Description	Date of Info	Actions
Mugshot - Front	383_1		09/25/2012	  

You can edit and delete attachments that were only created by you. Users with administrator privileges have the ability to edit and delete attachments for any user.

Click on the **Image Library** link to access your personal RMS image library that contains images uploaded by you from a mobile device, or other devices. For more information on the **Image Library**, refer to the *Image Library* chapter of the *Online RMS User Guide*.

Add Attachments

Several Online RMS modules support **Attachments**. Access the module and record that contains the **Attachment** you need to add. For example, to add an Attachment tied to a person, go to that person record and page down to the **Attachment** section, then follow the directions below.

Attachments				
Image Library Add Attachment				
Keyword	File Name	Description	Date of Info	Actions
Mugshot - Front	383_1		09/25/2012	  

1. Click on the **Add Attachment** link to begin the upload process. For information on the **Image Library** link, refer to "Attachments Overview" above.

Note: By using the **Add Attachment** link, attachments are added to a temporary holding place or queue; you must then upload the files.

- a. **Drag** files to the **Queue** or click *Here* to add files from Windows Explorer.

The screenshot shows the 'Add Person Attachments' window. At the top right is a 'Go Back' button. Below the title bar is a section with a '▼ Instructions' button. A red arrow points to this button with the text 'Click to display instructions'. The instructions text reads: 'You may use this to upload pdf,jpg,jpeg,bmp,png,doc,docx,xls,xlsx,txt,ppt,vsf,pptx files. Files must be no greater than 10 megabytes. You may upload a maximum of 10 files at once. Once you have uploaded the files, you will be able to add descriptions / edit file names / etc..'. Below the instructions is a green 'Start Upload' button. At the bottom is a large white box with the text 'Drop Files Here, Or Click Here to Add Files'. A red arrow points to the word 'Here' with the text 'Option 2: Click on the word Here to add files'. To the left of this box, red text says 'Option 1: Drag and drop files into this box'.

- b. When all the files are in the **Queue**, click **Start Upload** button to add the attachments. Click on **Remove File** to remove from the Queue.

The screenshot shows the 'Add Person Attachments' window after the upload process. The 'Go Back' button is still at the top right. The 'Instructions' section now has a '► Instructions' button. The instructions text has changed: 'You may now modify the attachment details. If you want to make an image a mugshot, please choose an attachment type of Person Image. When finished, you may individually save each attachment by clicking Save & Close in each attachment area, or save all of them by clicking Save & Close All'. The green 'Start Upload' button is still present. Below the instructions is a large white box containing a preview of a dog's image. Below the image is a 'Remove file' button. A red arrow points to this button with the text 'Click to remove the'.

Note: To abandon the upload process and return to the previous window click the **Go Back** button.

- c. Modify the attachment details when the following dialog window appears.

The screenshot shows a form for adding an attachment. At the top right is a green button labeled "Save & Close All". The form has several sections: "TYPE OF ATTACHMENT" with a dropdown menu set to "Person Image"; "KEYWORD" with a dropdown menu set to "Image"; "FILE NAME" with a text input field containing "Fred_Flintstone.png"; "DATE OF INFO" with a date picker set to "06/14/2021"; "PHOTO TYPE" with a dropdown menu set to "Mugshot - Profile"; "PRIMARY IMAGE" with an unchecked checkbox; "PHYSICAL DESCRIPTION" with a text input field containing "Height: 5' 04\";

- d. Click **Save & Close** to save each attachment individually, or click **Save & Close All** to save all of them at once.
- e. The attachments then appear in the **Attachments** grid. You can view additional information, download, edit, or delete the attachment.

Note: Up to ten (10) items or a maximum of 10 megabytes per file can be uploaded at one time. Agencies may purchase a Rich Media Package that allows file uploads with a max of 50 MB per file and rich media file types.

Edit Attachments

Several Online RMS modules support **Attachments**. Access the module and record that contains the **Attachment** you need to update. For example, to update an Attachment tied to a person, go to that record and page down to the **Attachment** section, then follow the directions below.

1. Click the edit  icon on the record you need to update.

The screenshot shows a table titled "Attachments" with columns: Keyword, File Name, Description, Date of Info, and Actions. A red arrow points from the word "Edit" above the table to the edit icon in the Actions column. Another red arrow points from the word "Delete" above the table to the delete icon in the Actions column. A third red arrow points from the word "Download" below the table to the download icon in the Actions column. The first row of data has the following values: Keyword: "Mugshot - Front", File Name: "383_1", Description: (empty), Date of Info: "09/25/2012".

Keyword	File Name	Description	Date of Info	Actions
Mugshot - Front	383_1		09/25/2012	  

Note: You cannot update attachments created by another user.

2. Make the necessary updates in the **Edit** window.

Note: The content of the **Edit** window will vary by module and file type. The **Edit Person Attachment** is used for illustration purposes.

Update

3. Click **Update** to update the record, or click **Go Back** to return to the previous window without saving.

Delete Attachments

Several Online RMS modules support **Attachments**. Access the module and record that contains the **Attachment** you need to delete. For example, to delete an **Attachment** tied to a person, go to that record and page down to the **Attachment** section, then follow the directions below.

1. Click the delete icon  on the record you want to delete.

Keyword	File Name	Description	Date of Info	Actions
Mugshot - Front	383_1		09/25/2012	Edit Download Delete

NOTE: You cannot delete attachments created by another user.

2. A confirmation window appears. Click **Yes** to delete or **No** to return to the previous window without deleting.

Yes

Download Attachments

Several Online RMS modules support **Attachments**. Access the module and record that contains the **Attachment** you want to download. For example, to download an **Attachment** tied to a person, go to that record and page down to the **Attachment** section, then follow the directions below.

1. Click the download  icon on the record you want to download.

Attachments				
		Edit		Image Library Add Attachment
Keyword	File Name	Description	Date of Info	Actions
 Mugshot - Front	383_1		09/25/2012	Download   

2. The file downloads automatically to your local machine.
3. Click on the file to open.

Chapter 4. Manage Agencies

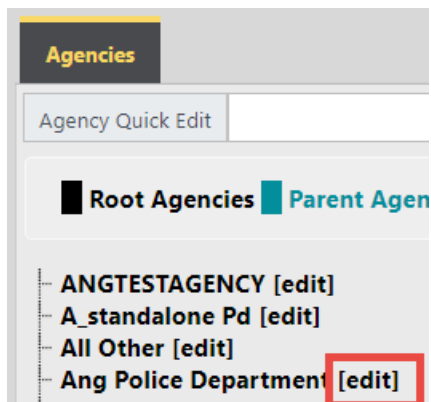

Manage Agencies Overview

To access this option from the Online RMS*Home* page, perform one of the following tasks:

- Click on the **Administration** top menu option to display the drop-down menu, then select the **Agencies** option.
- Click the **Administration** top menu option, then click **Administration** from the drop-down menu to open the *Administration* page, then click the **Agencies** icon.

To add an agency, refer to "Add Agency" on page 73 for more information.

To update an agency, click **[edit]** next to an agency name to open the existing *Agency Profile*.

Refer to "Agency Profile" below for agency profile details.

Agency Profile

From the *Manage Agencies* page, click **[edit]** next to an agency to open the *Agency Profile* page for that agency. The *Agency Profile* contains up to six tabs. You may or may see all tabs, depending on your permissions.

The screenshot shows the 'Agency Profile' page with the 'Agency Information' tab selected. The page has a blue header with 'Agencies / Agency Profile' and a navigation bar with tabs: 'Agency Information - Ang Police Department', 'Sub Agency', 'Agency Organization', 'Number Generation', 'Quick Links', and 'Agency Settings'. The 'Agency Information' tab is active. Below the tabs, there are buttons for 'Go Back', 'Update', and 'Manage Agency Credentials'. The main content area is divided into two columns. The left column contains fields for 'AGENCY INTERNAL CODE' (ANGPD), 'AGENCY DISPLAY CODE' (ANGPD), 'AGENCY CODE DISPLAY TEXT' (Ang Police Department), 'AGENCY TYPE' (Police Agency), and 'TIME ZONE' ((GMT-06:00) Central Time(US and Canada)). The right column contains fields for 'ORI NUMBER', 'WEBSITE', 'PHONE' (415-888-9999), 'FAX', and 'INCIDENT REPORT HEADER DISPLAY'. At the bottom, there is a section for 'Agency Administrators' with an 'Add User' button and a dropdown menu for selecting a user.

The **Agency Information** tab is the first tab (far left) on the *Agency Profile* page. If another tab is in front, click the **Agency Information** tab to bring it to the front. "Agency Information Tab" below for more information.

Agency Information Tab

The *Agency Profile* has five tabs, defaulting to the **Agency Information** tab.

This screenshot is identical to the one above, showing the 'Agency Profile' page with the 'Agency Information' tab selected. It displays the same navigation tabs, buttons, and form fields for agency information and administrators.

The **Agency Information** tab has twelve sections, depending on your permissions:

Agency Information

This section is used to record and maintain identification and other information data specific to the agency. The data recorded here is printed under the badge/logo on the incident reports.

Agency Administrators

This section is comprised of a grid or table listing all agency administrators. When agency administrators are listed, click  in the **Actions** column to open the *Manage User* page for the agency administrator listed in that row. The *Manage User* page allows you to enter/edit profile information, security settings, preferences, subscriptions, and employee information for the selected user. ("Manage Users" on page 93 for more information.)

To add an agency administrator, select a user from the drop-down box and click **Add**.

Agency User Subscriptions

Agency administrators can easily track end-user subscriptions by monitoring the allocation and usage of user subscriptions. Caliber Admins enter user subscription limits when a new agency is added to Online RMS, and subscription limits are updated when your agency purchases additional user subscriptions.

This section is read-only to agencies. The *Manage Subscription Counts* link is accessible to Caliber Admin staff only.

Agency User Subscriptions				Manage Subscription Counts
Subscription Type	Allocated	Actual	Difference	
Full Time	10	0	10	
Part Time	10	0	10	
Reserve	10	0	10	
Full Time Non-Sworn	10	0	10	
Part Time Non-Sworn	10	0	10	
View Only	10	0	10	
TOTAL	60	0	60	

Note: If your agency's user subscription allowed limit has been reached, you receive a warning stating the maximum number has been reached and to contact support to add additional subscriptions, or deactivate an existing user account. For more information on **User Subscriptions**, refer to "Agency Information Tab" on the previous page.

You have reached the maximum number of active named user accounts for your Organization. Please contact support to add additional user accounts or deactivate an existing user account.

Features

The section enables Online RMS personnel to enable the features.

Search Interfaces

This section allows the agency to select interfaces to use. The [Setup User Search Interface Access](#) link opens the *Setup User Search Interfaces* page where you can select screens from the drop-down selection list (or leave the default values as is) and select available search interfaces from the drop-down selection list. When setting up search interfaces, qualified admin users may select a role and add the search interface to all users with that role assigned to them.

Note: When a new user with the same role is added to RMS, they are not automatically added to the search interface and must be set up on an individual basis.

Attachment Interfaces

Jail Tracker - Facilities to Search

State Submissions Configuration

Miscellaneous

This section is used to set up LEA Security Level and LEA CASE Update Days and other miscellaneous information. It is also used to select NIBR City Indicators from the **Available** box and moved them to the **Selected** box. An administrator with the appropriate permissions can use the arrows to move available features

NIBR City Indicator

Address Information

This section is used to edit/maintain agency address information and set the Geo Code (latitude and longitude values) for the agency address.

Agency Logo

This section is used to upload and display an image of the agency logo. This logo appears on printed incident reports.

Enter the necessary data into this tab, then click the **Update** button.

If needed, click the **Manage Agency Credentials** button to add or update *Credentials*; the user name and password for a NIBRS Portal as an example.

Sub Agency Tab

A sub agency is one for which the primary agency dispatches in response to calls for service. The **Sub Agency** tab is used to add sub agencies and to delete them.

Use the following procedure to add a sub agency.

1. Access the *Agency Profile* page for the primary agency.
2. Click the **Sub Agency** tab, the second from the left tab.

The screenshot shows the 'Sub Agency' tab selected in the 'Agency Profile' page. The breadcrumb trail is 'Agencies / Sub Agencies'. The tab bar includes 'Agency Information - Ang Police Department', 'Sub Agency' (active), 'Agency Organization', 'Number Generation', 'Quick Links', and 'Agency Settings'. A 'Go Back' button is in the top right. Below the tabs, there's a 'Show 10 entries' dropdown and a 'Search:' field. A table with columns 'Sub Agency', 'Sub Agency Type', and 'Actions' is shown, but it contains no data. A message 'No data available in table' is displayed. At the bottom, it says 'Showing 0 to 0 of 0 entries' and has 'Previous' and 'Next' buttons. An 'Add Sub Agency' link is visible in the top right of the table area.

3. Click the Add Sub Agency link to open the *Add Sub Agency* window.

The screenshot shows the 'Add Sub Agency' window. It has a title bar 'Add Sub Agency'. Below it, there's a section 'SUB AGENCY' with a dropdown menu showing 'ANGTESTAGENCY'. Below that, there's a section 'TYPE' with a dropdown menu showing '- Select -'. At the bottom right, there are 'Cancel' and 'Save' buttons.

4. Click ▼ to the right of the **Sub Agency** field and select an agency.
5. Click ▼ to the right of the **Type** field and select an agency type.
6. Click **Save** to close the window and return to the **Sub Agency** tab of the *Agency Profile* page with the new sub agency listed.

Agency Organization Tab

Agency Organization is the third tab from the left on the *Agency Profile* page. If another tab is in front, click the **Agency Organization** tab to bring the *Agency Organization Entry* page to the front as shown in the following example.

The screenshot displays the 'Agency Organization' tab within a web application. The top navigation bar includes tabs for 'Agency Information - Ang Police Department', 'Sub Agency', 'Agency Organization' (highlighted), 'Number Generation', 'Quick Links', and 'Agency Settings'. To the right of these tabs are 'Go Back' and 'Update' buttons. The main content area is divided into three sections:

- Current Org Settings:** A table-like structure with fields for LEVEL, ID, PARENT, RESTRICT SELF ASSIGNMENT, and RESTRICT CASE SHARING. Each field has a corresponding input area with checkboxes or dropdown menus.
- Edit Org Settings:** A similar section to the current settings, but with dropdown menus for LEVEL, ID, and PARENT, and checkboxes for the restriction settings.
- Display Header:** A section with a text area for specifying a unique display header and a field for the active display header, which currently shows 'Ang Police Department'.

At the bottom of the form, there is a 'Route Settings' section with an 'Edit Route Settings' link. 'Go Back' and 'Update' buttons are also located at the bottom center of the form.

This tab is used for statewide configurations. To share data with agencies outside of your State, contact Caliber Support to configure this ability. The parent agency is made a root agency then the regions or districts are configured as child agencies. This function is configured by Caliber Admins only. Then the Header can be configured to show the agency's name.

Note: To share data with agencies outside of your State, contact *Caliber Support* to configure this ability.

The top panel is used to set and maintain organization settings.

Current Org Settings: Display the current settings.

Edit Org Settings: Provide fields and boxes to use for editing organization settings.

The bottom panel is used to specify a unique display header.

Display Header - This field is used to specify a unique display header that may appear on reports and screens for this organization unit.

Current Display Header (This Org Unit)

Edit Display Header: Use this text field to edit the display header.

Active Display Header (This Org Unit Or a Parent)

Route Settings:

[Edit Route Settings](#) link opens the *Agency Route Settings* page where you can select the appropriate value for **Case Management Review**, **Field Arrest Submit**, **Impound Submit**, and **Pending Approval**.

The screenshot shows the 'Agency Route Settings' page. At the top right are 'Go Back' and 'Save' buttons. Below are four sections, each with a dropdown menu currently set to 'User Agency':

- CASE MANAGEMENT REVIEW**
- FIELD ARREST SUBMIT**
- IMPOUND SUBMIT**
- PENDING APPROVAL**

Click **Save** to save new settings; click **Go Back** to return to the *Agency Organization Entry* page.

Number Generation Tab

The **Number Generation** tab is the fourth tab on the *Agency Profile* page. The **Number Generation** tab is used to set up and format automatic number generation for system forms and reports.

Add Number Generation

Beginning with Online RMS 11.3.2, agencies can create *Community Reporting* public forms using the *Custom Forms* module, making the forms available to the public via the agency's website. Publicly available custom forms require an active **Number Generation** format.

For more information about *Community Reporting* public forms, refer to “Community Reporting with Custom Forms” on page 273.

Use the following procedure to add a number generation for a type of form/report.

1. On the *Administrative Home* page, click the **Agencies** icon to display the *Manage Agencies* page.
2. Click **[edit]** in the same row as an agency listing to open the *Agency Profile* page for that agency.
3. On the *Agency Profile* page, click the **Number Generation** tab to bring it to the front as shown.

Type	Format	Next Number	Placeholder	Effective Date	End Date	Actions
Dispatch #	YYYY00000000	1	-	1/1/11 12:00:00 AM		
Dispatch #	YYYY00000000	1	-	1/1/11 12:00:00 AM		
Evidence Audit Report #	YYYYIR000	1	-	1/1/11 12:00:00 AM		
Evidence Audit Report #	YYYYIR000	1	-	1/1/11 12:00:00 AM		
Incident	YYYY00000000	1	-	1/1/11 12:00:00 AM		
Incident	YYYY00000000	1	-	1/1/11 12:00:00 AM		
LEA Case Number	0000YY	1	-	1/1/11 12:00:00 AM		
Officer Daily Log #	YYMMIR0000	1	-	1/1/11 12:00:00 AM		

4. Click the **Add Number Generation** link on the top right, immediately under the tab headers to open the Number Generation form.

Number Generation

TYPE: Warrant

FORMAT: 000YYYYMM

PLACE HOLDER: -

NEXT NUMBER: 1

EFFECTIVE DATE: 04/01/2019

END DATE:

Close Save

5. In the selection field under the **Type** column, click and select a type (for example, Dispatch, Incident, or Officer Daily Log #) from the list.

Note: If using the *Create Incident* option from publicly available custom forms, select *Incident* as the **Type**.

6. In the select format field under the **Format** column, click ▼ and select a format from the list.

Zeros represent the number of digits in each Next Number; the IR Value is whatever value you choose (one or more letters, numbers, symbols, and so forth - or nothing at all); YY indicates a two digit representation of the year; YYYY represents a four digit representation of the year; and MM represents a two digit representation of the month.

Note: If using the *Create Incident* option from publicly available custom forms and users manually enter the Incident Number from Caliber CAD, select a **Format** that matches the **Tracking Number** format configured in Caliber CAD.

7. Enter the **Place Holder**.

Note: If using the *Create Incident* option from publicly available custom forms, enter a **Place Holder** such as **CR**. This placeholder value replaces the **IR** value in the selected format.

8. In the **Next Number** field, type the beginning number for this series of numbers (e.g. 1).

Note: If using the *Create Incident* option from publicly available custom forms and users manually enter the Incident Number from Caliber CAD, enter **0** (zero) as the **Next Number**.

9. In the **Effective Date** field, use the calendar tool to specify a beginning date.

10. Optionally, use the calendar tool to specify an **End Date**.

11. Click **Save** to add this generation of numbers.

Note: You cannot create a number generation when a valid, unexpired already exists. You can edit an existing entry to add an expiration date, then create a new one to pick up where the last one left off.

Edit Number Generation

Use the following procedure to edit a number generation.

1. On the *Administrative Home* page, click the **Agencies** icon to display the *Manage Agencies* page.

- Click **[edit]** on the same row as an agency listing to open the *Agency Profile* page for that agency.
- On the *Agency Profile* page, click the **Number Generation** tab to bring it to the front as shown.

- Make changes as needed. (Use the drop-down selection lists and calendar icons where available to ensure consistency and accuracy.)
- Click **Save** to save the changes and refresh the display with the new values.

Delete Number Generation

Use the following procedure to delete a number generation record.

1. On the *Administrative Home* page, click the **Agencies** icon to display the *Manage Agencies* page.
2. Click **[edit]** the same row as an agency listing to open the *Agency Profile* page for that agency.
3. On the *Agency Profile* page, click the **Number Generation** tab to bring it to the front as shown.
4. Locate the listing of the number generation that you want to delete in the **Number Generation** grid.
5. Click  to the far left in the same row to display the prompt, *Are you sure?*
6. Click **Yes** to confirm deletion and close the window.

The listing no longer appears in the **Number Generation** grid.

Quick Links Tab

Access the *Agency Profile* page for any agency from the *Manage Agency* page. The Quick Links tab is the fourth (from the left) on the *Agency Profile* page. If another tab is in front, click the **Quick Links** tab to bring it to the front as shown in the following example.

- Click **Go Back** to close the *Assignment Codes* page and return to the *Agency Settings* page.

Agency Vehicles

Click the Agency Vehicles link to open the *Officer Daily Log Administration* page, then click on the **Agency Vehicles** tab.

The screenshot shows the 'Officer Daily Log Administration' page with a 'Go Back' button in the top right. Below the title bar is a 'State of Mark Configuration' section with tabs for Config, Assignment Codes, Activity Codes, Activity Templates, Time Category Codes, Shift Codes, **Vehicles** (highlighted with a red box), and Equipment. Under the 'Vehicles' tab, there are two sub-tabs: 'Agency Vehicles' and 'Effective Agency Vehicles'. The 'Agency Vehicles' sub-tab is active, showing a table with one entry. The table has columns: Year, Make, Model, VIN, License, Description, Active, and Actions. The entry is for a 2010 vehicle with VIN V123456234337HZK33, License 2HT4U, and Description 'Marked Patrol Unit - Black'. The 'Active' column shows 'Yes'. The 'Actions' column has an edit icon (pencil) and a delete icon (trash). Below the table, it says 'Showing 1 to 1 of 1 entries'. There are 'Previous', '1', and 'Next' pagination controls. An 'Add Vehicle' button is in the top right of the table area.

- Click  in the **Actions** column to open the *Update Agency Vehicle* window as shown.

The screenshot shows the 'Update Agency Vehicle' window. It has fields for YEAR (2010), VIN (V123456234337HZK33), MAKE, MODEL, LICENSE (2HT4U), and UNIT #. There is an 'ACTIVE' checkbox which is checked. The DESCRIPTION field contains 'Marked Patrol Unit - Black'. At the bottom right, there are 'Close' and 'Save' buttons.

- Change field content as needed.
- Check the **Active** box to activate the vehicle. (If a vehicle is active, **Yes** displays in the **Active** column to the right of that code listing on the *Agency Vehicles* page, if not, **No** displays.)
- Click **Save** to update the vehicle record and close the window; click **Close** to cancel changes and close the window.

- Click  in the **Actions** column to delete the record listed in the same line.

Note: A record that has been used cannot be deleted. It can only be edited or made inactive.

- Click the  Add Vehicle button to open the *Add Agency Vehicle* window to add a vehicle.

The 'Add Agency Vehicle' window is a form with the following fields and controls:

- YEAR**: Text input field.
- VIN**: Text input field.
- MAKE**: Text input field with a dropdown arrow.
- MODEL**: Text input field with a dropdown arrow.
- LICENSE**: Text input field.
- UNIT #**: Text input field.
- ACTIVE**: Checkmark box (checked).
- DESCRIPTION**: Text input field.
- Close** and **Save** buttons at the bottom right.

- Complete fields.
- Click **Save** to add the vehicle and close the window; click **Close** to cancel and close the window.
- Click **Go Back** to close the *Agency Vehicles* page and return to the *Agency Settings* page.

Agency Equipment

Click the Agency Equipment link to open the *Officer Daily Log Administration* page, then click the **Agency Equipment** tab.

The 'Officer Daily Log Administration' page features a navigation bar with tabs: Config, Assignment Codes, Activity Codes, Activity Templates, Time Category Codes, Shift Codes, Vehicles, and **Equipment** (highlighted with a red box). Below the tabs, there are two sub-tabs: **Agency Equipment** and **Effective Agency Equipment**. The 'Agency Equipment' sub-tab is active, showing a table with columns: Type, Serial #, Make, Model, Description, Active, and Actions. The table is currently empty, displaying 'No data available in table'. Above the table, there is a search bar and a dropdown for 'Show 10 entries'. At the bottom, there are 'Previous' and 'Next' buttons.

- Click  in the **Actions** column to open the *Update Agency Equipment* window.
 - Change field content as needed.
 - Check the **Active** box to activate the equipment. (If the equipment is active, *Yes* displays in the **Active** column to the right of that code listing on the *Agency Equipment* page, if not, *No* displays.)
 - Click **Save** to update the agency equipment record and close the window; click **Close** to cancel changes and close the window.
- Click  in the **Actions** column to delete the record listed in the same line.

Note: A record that has been used cannot be deleted. It can only be edited or made inactive.

- Click the  Add Equipment button to open the *Add Agency Equipment* window to add equipment.

- Complete fields.
- Click **Save** to add the equipment and close the window; click **Close** to cancel and close the window.
- Click **Go Back** to close the *Agency Equipment* page and return to the *Agency Settings* page.

Activity Tables

The **Activity Tables** panel contains three links, each of which is described below.

Activity Codes

Click the Activity Codes link to open the *Officer Daily Log Administration* page, then click on the **Activity Codes** tab.

The screenshot shows the 'Officer Daily Log Administration' page. The 'Activity Codes' tab is selected and highlighted with a red box. Below the tabs, there are sections for 'Exclusive Agency Codes' and 'Effective Agency Codes'. A table lists activity codes with columns for 'Activity Code', 'Description', 'Active', and 'Actions'. Two entries are shown: 'ANIMAL' (Animal Complaint, Active) and 'PARKING' (Parking Complaint, Active). The 'Actions' column contains edit and delete icons. A 'Go Back' button is in the top right corner.

Activity Code	Description	Active	Actions
ANIMAL	Animal Complaint	Yes	
PARKING	Parking Complaint	Yes	

- Click in the **Actions** column to open the *Edit Activity Code* window as shown.

The 'Edit Activity Code' window shows fields for 'CODE' (ANIMAL), 'DESCRIPTION' (Animal Complaint), and 'ACTIVE' (checked). At the bottom are 'Close' and 'Save' buttons.

- Change field content as needed.
- Check the **Active** box to activate the code. (If a code is active, **Yes** displays in the **Active** column to the right of that code listing on the *Activity Codes* page, if not, **No** displays.)
- Click **Save** to update the activity code and close the window; click **Close** to cancel changes and close the window.
- Click in the **Actions** column to delete the record listed in the same line.

Note: A record that has been used cannot be deleted. It can only be edited or made inactive.

- Click the  **Add Activity Code** button to open the *New Activity Code* window to add an activity code.

The **New Activity Code** window contains the following fields:

- CODE**: A text input field with a red vertical bar on the left.
- DESCRIPTION**: A text input field with a red vertical bar on the left.
- ACTIVE**: A checkbox.

At the bottom right are **Close** and **Save** buttons.

- Complete the **Code** and **Description** fields. The **Code** must be UPPERCASE.
 - Check the **Active** box to activate the code. (If a code is active, **Yes** displays in the **Active** column to the right of that code listing on the *Activity Codes* page, if not, **No** displays.)
 - Click **Save** to add the activity code and close the window; click **Close** to cancel and close the window.
- Click **Go Back** to return to the *Agency Settings* page.

Activity Templates

Click the Activity Templates link to open the *Officer Daily Log Administration* page, then click on the **Activity Templates** tab.

The **Officer Daily Log Administration** page features a **Go Back** button in the top right corner. Below the header is a **State of Mark Configuration** section with a tabbed interface. The tabs include **Config**, **Assignment Codes**, **Activity Codes**, **Activity Templates** (highlighted with a red box), **Time Category Codes**, **Shift Codes**, **Vehicles**, and **Equipment**.

Under the **Activity Templates** tab, there are two sub-tabs: **Exclusive Agency Codes** and **Effective Agency Codes**. The **Effective Agency Codes** sub-tab is active, showing a table of activity templates.

At the top of the table area is an **Add Activity Template** button. Below it is a search bar labeled "Search:" and a "Show 10 entries" dropdown.

Activity Code	Description	Active	Activities	Actions
10	Downtown Checks	Yes		  

At the bottom, it says "Showing 1 to 1 of 1 entries" and includes **Previous**, **1**, and **Next** pagination controls.

- Click  in the **Actions** column to the right of the activity template that requires another activity to open the *Add Activity To Template* window as shown.

Location Code

IMPOUND LOCATION CODE

DESCRIPTION

[Cancel](#) [Save](#)

Type an alphanumeric code in the **Impound Location Code** field, and type a description for the code in the **Description** field. Click **Save** to save the code and return to the *Vehicle Impound Location Code* page with the new code listed.

Add as many location codes as needed. The following page example shows four location codes.

To edit a code, click  in the **Actions** column to the far right of the code listing to open the *Edit Vehicle Impound Location Code* window where you can edit the code and/or description then click **Save**.

To delete a code click  in the **Actions** column to the far right of the code listing to open the message, *Vehicle Impound Code Deleted Successfully*. Click **Yes** to return to the page where the deleted code is no longer listed.

Narrative Templates

The Narrative Templates link opens the *Narrative Templates* page.

- Click  in the **Actions** column to the far right of a listing to open the *Edit Narrative Template* page.
 - Change content in all fields as needed.
 - Click **Save** to save changes to the record and return to the *Narrative Templates* page. Click **Cancel** to cancel changes and return to the *Narrative Templates* page.
- Click  in the **Actions** column to delete the record listed in the same line. The message, *Are you sure you want to delete this template?* displays. Click **Yes** to confirm deletion or click **Cancel** to keep the record.
- Click the Add Template button in the title bar of the grid to open the *Add Narrative Template* page to add another narrative template.

- Complete the fields at the top of the page appropriately.
- Type the content of the template in the large pane, using the tool bar at the top of the pane to format the text as needed.
- Click **Save** to save the new template as often as needed.
- Click **Go Back** to close the *Add Narrative Template* page and return to the *Narrative Templates* page.

- Click **Go Back** to return to the *Agency Settings* page.

Case Routing

Administrators with appropriate permissions can route cases to external agencies.

The Case Routing link opens the *Agency Case Routing* page.

- To *select* an available agency, click in the **Select Agencies** box then select one or more agencies from the list that appears.
 - To *deselect* an agency, click on the X to the left of the agency name to remove it from the **Select Agencies** box.
- Click **Save**. A successful message appears in green when the save is complete.
- Click **Go Back** on the upper right of the page to return to the *Agency Settings* page.

Search Options

Administrators of a multi-tier organization have the ability with appropriate permissions to set the Online RMS *Default Search Options* to control what agency data is searchable by default. For example, the *Search Option* default could be set to either allow users to search data within their agency, all agencies within an organization., or all agency schemas.

The Search Options link opens the *Agency Search Options* page.

- Click on the **down arrow** then select an option from the list.
- Click **Update** to save the change.
- Click **Go Back** on the upper right of the page to return to the *Agency Settings* page.

Maint Values

Maintenance Values provides administrators with proper permissions the ability to configure module behavior and restrictions for the agency.

For details, refer to “Maintenance Values” on page 345.

Notification User Groups

Provides the ability to configure user groups at the agency level to allow defined users to filter Notifications on their Home Page by that user group.

Agency Administrators

Enter data into the available fields in each section, then click **Save**.

The form saves and opens in edit mode with six tabs:

- "Agency Information Tab" on page 18 for information on the **Agency Information** tab.
 - "Sub Agency Tab" on page 21 for information on the **Sub Agency** tab.
 - "Agency Organization Tab" on page 22 for information on the **Agency Organization** tab.
 - See "Number Generation Tab" on page 23 for information on the **Number Generation** tab.
 - See "Quick Links Tab" on page 27 for information on the **Quick Links** tab.
 - "Agency Settings" on page 29 for information on the **Agency Settings** tab.
- b. Or, click the **AgencySetup Wizard** to guide you through the setup process. You can either manually enter data or upload setup data from an Excel spreadsheet using this method.

TO UPLOAD:

Click **Download Template** to download a formatted Excel spreadsheet.

Enter data into the *AgencySetup.xls* Excel spreadsheet and **Save**.

In Online RMS, click **Choose File** and select the *AgencySetup.xls* Excel spreadsheet.

Click **Upload**.

TO MANUALLY ENTER DATA:

Click **Manually Enter Data** to open the Wizard.

Enter data into the first tab then click **Next**. Repeat until all tabs are completed.

Click **Finish**.

Chapter 5. Roles

Once a user has been added to an agency, that user can log into the system but has no access to system features until his/her roles have been assigned. Caliber Public Safety develops roles for each type of personnel employed by an agency, and these roles consist of permissions or privileges. Several permissions are used to make up each of the roles used by an agency.

Because system tasks performed by one user (for example, an officer) differ from those performed by another user (for example a patrol supervisor), the two roles also differ. Certain users are given permissions to perform specific tasks within the system by the Officer role while other users are given permissions to perform other tasks by the Patrol Supervisor role.

- A user must be assigned at least one role in order to perform tasks within the system.
- A user can be assigned more than one role.
- Two different roles may include one or more of the same permissions, but within a specific agency, each role is unique in its permissions make-up.
- Certain users may be able to delegate some or all their permissions/privileges to another user for a period of time.

Access Roles Module

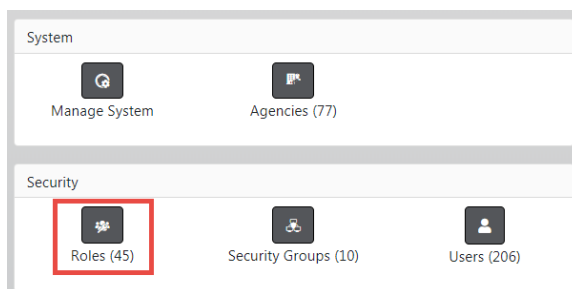

System roles used by an agency can be added and edited via the **Roles** module by certain users with administrative permissions.

From the *Home* page access the Roles module one of two ways:

- Click on the Administration menu option to display a drop-down menu and select the **Roles** option.

- Click on the Administration menu option, then click again on the Administration drop-down option to display the *Administrative Home* page. On the *Administrative Home* page, click the **Roles** icon located under the Security section.

The *Roles* page displays as shown.

6. Remove or add permissions to this role for your agency as follows:
 - In the panel to the left, click  (minus sign) to the far right in the same line to remove that permission.
 - In the panel to the right, click  (plus sign) to the far right in the same line to add that permission.
 - Repeat as needed until you have removed or added permissions to tailor this role to your agency's needs.
7. Click **Save** at the bottom of the page to save changes and return to the *Roles* page.

Add Role

Use the following procedure to add a role for your agency.

1. From the *Roles* page, click the Add Role button in the upper right corner to display the *Add Role* page as shown.

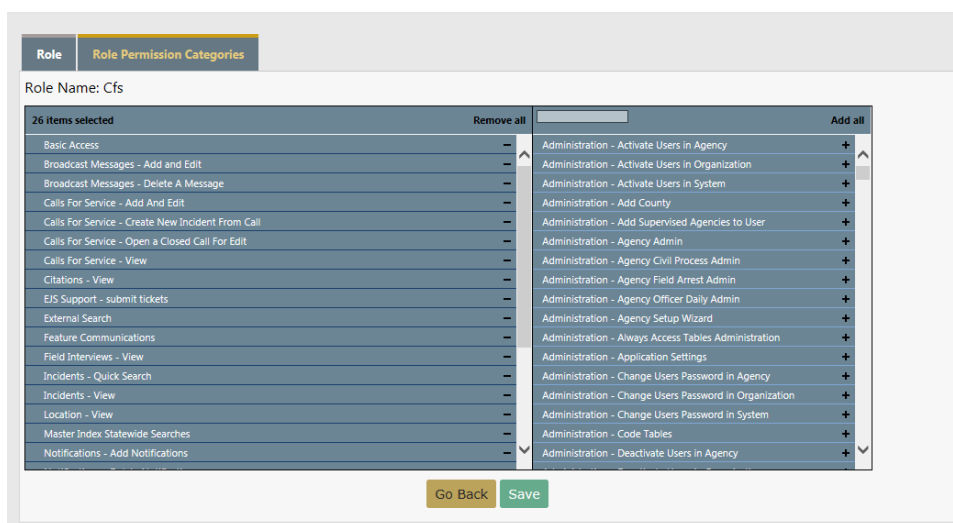

The screenshot shows the 'Add Role' form. It has a light gray background. At the top, there is a section labeled 'ROLE NAME' with a text input field. Below that is a section labeled 'ROLE DESCRIPTION' with a larger text input field. Underneath these are two dropdown menus: 'ACCESS LEVEL' and 'RESTRICT TO ORGANIZATION', both currently showing '-Select-'. At the bottom of the form are two buttons: 'Go Back' (yellow) and 'Save' (green).

2. Type the name you want to use for this role in the **Role Name** field. The name must be unique.
3. Optionally, type a **Role Description** you want to use.
4. Click  to the far right in the **Access Level** field to display a list of selections as shown in the following example. This list may vary by agency.

5. Select the appropriate level of access for this role.
6. If applicable, click  to the far right in the **Restrict to Organization** field to display a list of selections, and select the appropriate option.
7. Click **Save** to save this record and display the system message, *Role details added successfully*.
8. Click **Role Permission Categories** tab to display the *Role Permission Categories* page as shown in the example.

9. Add permissions to this role for your agency as follows:
 - In the panel to the right, click  (plus sign) to the far right in the same line to add that permission.
 - Repeat as needed until you have added permissions to tailor this role to your agency's needs.

- If you add a permission by mistake, click  (minus sign) in the left panel to the far right to remove that permission.

10. Click **Save** at the bottom of the page to save your changes.

11. Review permissions and continue as follows:

- If needed, make additional changes and click **Save** to return to the *Edit Role* page.
- If changes are not needed, click **Go Back** to return to the *Edit Role* page.

12. Continue as follows:

- If needed, make changes and click **Save** to return to the *Roles* page.
- If changes are not needed, click **Go Back** to return to the *Roles* page.

Copy Role

To save time setting up a new role, you have the ability to copy one role to another role if they have similar traits. During the copy process, you can update the new role as needed.

Note: Never edit Roles that came with the software; make a copy of the Role then edit the copy as needed. For details on how to edit a Role refer to "Edit Role" on page 79.

Use the following procedure to copy one role to another role for your agency.

1. From the *Roles* page, locate the role you want to copy then click the *Copy* icon under the *Actions* column to display the *Copy Role* page as shown.

9. Add permissions to this role for your agency as follows:

- In the panel to the right, click **+** (plus sign) to the far right in the same line to add that permission.
- Repeat as needed until you have added permissions to tailor this role to your agency's needs.
- If you add a permission by mistake, click **-** (minus sign) in the left panel to the far right to remove that permission.

10. Click **Save** at the bottom of the page to save your changes.

11. Review permissions and continue as follows:

- If needed, make additional changes and click **Save** to return to the *Edit Role* page.
- If changes are not needed, click **Go Back** to return to the *Edit Role* page.

12. Continue as follows:

- If needed, make changes and click **Save** to return to the *Roles* page.
- If changes are not needed, click **Go Back** to return to the *Roles* page.

Compare Role

Compare two or more roles to understand permission differences between them, and to identify potential duplicates.

Use the following procedure to compare roles for your agency.

1. From the *Roles* page, place a check mark on each role you want to compare, then click the **Compare** button on the top right of the window.

2. The *Compare Roles* page opens, listing the permissions each roles you chose to compare. The differences between roles are highlighted in red. You can also click the arrow button at the top of each role to change the permission sort order.

3. Click the **Back** button on the top right of the page to return to the *Roles* page.

Chapter 6. Security Groups

Within an agency, security groups can be created to provide additional security for certain kinds of records. For example, an agency might want to restrict access to open cases except for those individuals who are working on and/or supervising the progress of those cases.

Access Security Groups Module

Security Groups for an agency can be added, edited, and deleted via the Security Groups module. Users with the appropriate administrative permissions can access the Security Groups module as follows:

From the *Home* page,

- hover the cursor over the **Administration** menu/label to display a drop-down menu and select the **Security Groups** option, or
- from the *Administrative Home* page, click the **Security Groups** icon.

The *Security Groups* page displays as shown.

Show 10 entries				Go Back	Add Security Group
Search:					
ID	Security Group Name	Agency Description	Actions		
1	Admins	District 21, Toll Road - SC	 		
2	Case & Incident Dist 21 ONLY	District 21, Toll Road - SC

Go Back					

From this page, administrative users with the appropriate roles/permissions can edit existing security groups, delete security groups, and add new security groups for the agency.

- "Edit Security Group" below.
- "Delete Security Group" on page 90
- "Add Security Group" on page 90.

Edit Security Group

Use the following procedure to edit a security group.

1. From the *Security Groups* page, locate the record to be changed, using one of the following methods:
 - Scroll down the list of groups until you locate the one you want to edit.
 - Use the **Search** fields to return the record.

ID	Security Group Name	Agency Description	Actions
2	Case & Incident Dist 21 ONLY	District 21, Toll Road - SC	 
4	Dist 16 CID users	District 16, Peru - GA	 
5	Dist 21 CID Members Only	District 21, Toll Road - SC	 

2. Click  in the **Actions** column to display the *Edit Security Group* page as shown in the example.

The screenshot shows a web form for configuring a security group. At the top right is a "Go Back" button. The form has two main sections: "NAME" and "AGENCY". The "NAME" field contains "Dist 16 CID users". The "AGENCY" dropdown menu is set to "District 16, Peru - GA". Below these is the "Security Group Users" section, which includes a "SELECT USER" input field and a "SELECTED USERS" list. The "SELECTED USERS" list contains two entries: "Masterson,Bat (cid) R (District 16, Peru - GA)" and "Goodman,Charles (cid) H (District 16, Peru - GA)". At the bottom of the form is an "ENFORCE EXCLUSIVE ACCESS" checkbox, which is currently unchecked. There are "Go Back" and "Update" buttons at the bottom right of the form.

3. If needed, make changes to the **Agency** field. (The **Name** field cannot be changed.)
4. Change the users listed in the **Selected Users** field as follows:
 - a. To add users, click into the **Select User** field and begin typing the first or last name to display a list of users that match your entered text. Users can be selected from any agency within your schema; they do not have to be part of the agency selected when setting up the security group, nor do they have to be part of your agency (if they are still within your schema). Select one or more users from the list to add it to the **Selected Users** box.
- b. To remove a user from the **Selected Users** box, select the name and **double-click** on the name.
5. Click **Update** to save changes and return to the *Security Groups* page.
6. Click **Go Back** to return to the *Administrative Home* page

The screenshot shows the "Select User" dropdown menu. The search bar contains the text "ch". The dropdown list displays several user entries: "Chuck (evid) Albert - District 14, Lafayette" (highlighted in green), "Herman (cid) Chapman - District 22, Ft Wayne", "In Charge - District 52, Indianapolis", and "In Charge - Indiana State Police".

Delete Security Group

Use the following procedure to delete a security group record.

1. On the *Administrative Home* page, click the **Security Groups** icon to display the *Security Groups* page.
2. In the **Action** column, click  in the same row as a security group listing to display the prompt, *Are you sure you want to delete this Work Group?*
3. Click **Yes** to confirm deletion and close the window.

The listing no longer appears on the *Security Groups* grid.

Add Security Group

Use the following procedure to add a security group for your agency.

1. From the *Security Groups* page, click the **Add Security Group** button in the upper right corner to display the *Add Security Group* page as shown.

2. Type the name you want to use for this group in the **Name** field.
3. Add users to this group as follows:

- a. To add users, click into the **Select User** field and begin typing the first or last name to display a list of users that match your entered text, then select one or more from the list to add it to the **Selected Users** box. The agency to which the user belongs (provided the user is within the same schema) will populate automatically.

The screenshot shows a 'Security Group Users' dialog box. At the top, there's a title bar 'Security Group Users'. Below it is a section labeled 'SELECT USER'. Inside this section, there's a text input field containing 'ch'. To the right of the input field are 'x' and 'add' icons. Below the input field, a list of users is displayed. The first user, 'Chuck (eid) Albert - District 14, Lafayette', is highlighted in green. The other users are 'Herman (cid) Chapman - District 22, Ft Wayne', 'In Charge - District 52, Indianapolis', and 'In Charge - Indiana State Police'.

- b. To remove a user from the **Selected Users** box, select the name and **double-click** on the name.
4. Check the **Enforce Exclusive Access** box, if applicable.
5. Click **Save** to save and return to the *Security Groups* page.

Chapter 7. Manage Users

Users Overview

Administrators with the appropriate permissions can add and update users to an agency or schema.

- One user may be permitted to log into different schemas, depending upon the roles assigned to that user.
- A user has multiple roles, depending upon the tasks that user is expected to perform.
- User names cannot be deleted, only disabled (made inactive).
- A user name can only be used once within one database.
- An administrator with the appropriate permissions can emulate another user and view that user's screens to troubleshoot.

Manage Users

From the *Administration Home* page, click the **Users** icon to open the *Manage Users* page. (Alternatively, select **Users** from the **Administration** drop-down menu.) For details on accessing the *Administration Home* page refer to "Access Administration" on page 1.

The screenshot displays the 'Manage Users' interface. At the top, there are buttons for 'Go Back', 'Add User', and 'Mass User Entry'. Below these are tabs for 'User Accounts' (selected) and 'Log'. A search bar is present with filters for 'Status' (set to 'Active') and 'Subscription Level' (set to '-All-'). A 'Search' button is to the right of the filters. The main table lists user accounts with columns: First, Middle, Last, User Name, Title, Status, Subscription Level, Agency, User Role, Last Login Date, and Actions. Five users are listed: Charles Smith (STATE_OFFICER14, Chief), Christopher H Gordmanson (STATE_OSUPER1,), D21 User (D21_USER,), Dana External McMillan (DMM_EXT,), and Homer J Simpson (STATE_OFFICER1, SERGEANT-CAPTAIN-). An inset shows the 'Actions' menu with icons for Edit, Emulate, Change Password, and Delete, each with a red arrow pointing to it.

First	Middle	Last	User Name	Title	Status	Subscription Level	Agency	User Role	Last Login Date	Actions

Homer	J	Simpson	STATE_OFFICER1	SERGEANT-CAPTAIN-	Active	Full Time	District 42, Versailles	AGENCY_ADMIN AGENCY_AD_HOC_REPORTING_TOOL	07/31/2023 09:28 AM MST	[Edit] [Emulate] [Change Password] [Delete]

The *Manage Users* page contains buttons to add users, and two tabs: *User Accounts* and *Log*. The *User Accounts* tab opens by default.

Filter Results List

You can filter the results list by using the Search, Status, and Subscription Level search boxes. For example, to only list active user accounts, select *Active* in the Status field, or enter part of the person's name in the Search text box.

Click the **Search** button to display the search results based on the entries in the search fields.

Add User Buttons

You can add one user or enter multiple users by using the Add User or Mass User Entry button on the top right of the form.

To add one user, refer to "Add a User" on page 124.

To add multiple users, refer to "Add Mass Users" on page 125.

User Accounts Tab

From the *User Accounts* tab you can use the icons in the *Action* column to Manage User Accounts, Change Passwords, Deactivate or Activate Users, and Emulate Users.

- Edit  icon
 - Click the **Edit icon** under the *Actions* column to open the *User Details* page to update user roles, employee information, security settings, etc. See "User Details" on page 97 for more information.
- Emulate users  icon
 - Click the Emulate icon under the *Actions* column.
 - See "Emulate a User" on page 121 for instructions.
- Change passwords  icon

There are two ways to change a password: The Change Password or Edit Icon.

a. Change Password Icon

Click the **Change Password icon** under the *Actions* column to display the *Change Password* window.

A screenshot of the 'Change Password' window. It has a title bar 'Change Password'. Below it are two input fields: 'NEW PASSWORD' and 'CONFIRM PASSWORD'. Each field has a red vertical bar on the left side. At the bottom, there are three buttons: 'Cancel' (yellow), 'Change Password' (green), and 'Reset Via E-Mail' (green).

Enter **New Password** and re-enter to **Confirm**, then click **Change Password** or **Reset Via Email**.

b. Edit Icon

Click the **Edit icon** under the *Actions* column to open the *User Details* page, then click the **Change Password** link on the left sidebar navigation under *User Quick Links*. See "User Details" on page 97 for more information.

- Deactivate  and Activate  users icons
 - Click on the red or green person icon under the *Actions* column, whichever applies. (The example displays a red icon.)
 - See "Deactivate a User" on page 102 and "Activate a User" on page 101 for instructions.

Log Tab

Multi-tier organizations can temporarily assign a user to a different agency. Assignment changes are recorded automatically to a database log table. The *Log* tab allows you to view the assignment changes that have taken place.

Click on the *Log* tab to open the search screen.

Enter your **search criteria**, then click the **Search** button to list records that match your entered data.

- Select a specific **Agency**. To select all, leave the choice as **-Select-**.
- Select a specific **Old Agency**. To select all, leave the choice as **-Select-**.
- Select the **Date From** and **Date To**, or leave them blank to select all dates.
- Enter all or part of the **Assignee** name, or leave it blank to select all.
- Select the **Type** of assignment.

Note: The **Type Home** means the default agency association changed to another agency within the organization.

A photo of the employee can be uploaded via the Employee Management page. For details, refer to "Manage an Employee" on page 136.

Access User Details

1. Access the *Manage Users* page from the *Administration* menu on the top menu bar. For instructions, refer to "Manage Users" on page 93.
2. Access the *User Details* page from the *Manage Users* page by editing or adding new users.

The screenshot shows the "Manage Users" interface. At the top, there are buttons for "Go Back", "Add User", and "Mass User Entry". Below these are tabs for "User Accounts" and "Log". A search bar contains the text "hicks", and there are filters for "Status" (Active) and "Subscription Level" (-All-). A "Reset" button and a "Search" button are also present. A "Show 100 entries" dropdown is visible. The main table has columns: First, Middle, Last, User Name, Status, Subscription Level, Agency, SA, User Role, and Actions. The first row shows a user named Aaron Hicks with User Name ODL_USER, Status Active, Subscription Level Full Time, Agency District 42, Versailles, SA Default, and User Role OFFICER OFFICER_SUPERVISOR. The Actions column contains four icons: a pencil (Edit), a person (Emulate), a key (Change Password), and a trash can (Delete). Red arrows point from the text labels "Edit", "Emulate", "Change Password", and "Delete" to their respective icons. At the bottom, there is a "Go Back" button and a pagination bar showing "Previous", "1", and "Next".

"Account History" on page 120

Activate a User

Use the following procedure to activate a user.

1. Access the *Manage Users* page. For more information, refer to "Manage Users" on page 93.
2. Locate the user to *Activate* and click on the **green person** icon in the *Actions* column on the user record.

Note: The system does not allow you to create or reactivate an RMS user with a duplicate badge number.

Note: Agency administrators can easily track end-user subscriptions by monitoring the allocation and usage of **User Subscriptions**. If your agency's user subscription allowed limit has been reached, you receive a warning stating the maximum number has been reached and to contact support to add additional subscriptions, or deactivate an existing user account. For more information on **User Subscriptions**, refer to "Agency Information Tab" on page 18 of the Agency Profile.

You have reached the maximum number of active named user accounts for your Organization. Please contact support to add additional user accounts or deactivate an existing user account.

3. Enter a reason for activating the user and click **Activate** to confirm, or **Cancel** to return to the *Users Lookup* page.

Activate User

Please enter reason to activate this User:

Cancel
Activate

Deactivate a User

Use the following procedure to deactivate, or disable, a user record to make them inactive.

1. Access the *Manage Users* page. For more information, refer to "Manage Users" on page 93.
2. Locate the user to *Deactivate* and click on the **red person** icon in the *Actions* column on the user record.

Change Password

Administrators can change a user's password when the user has forgotten their password or is locked out.

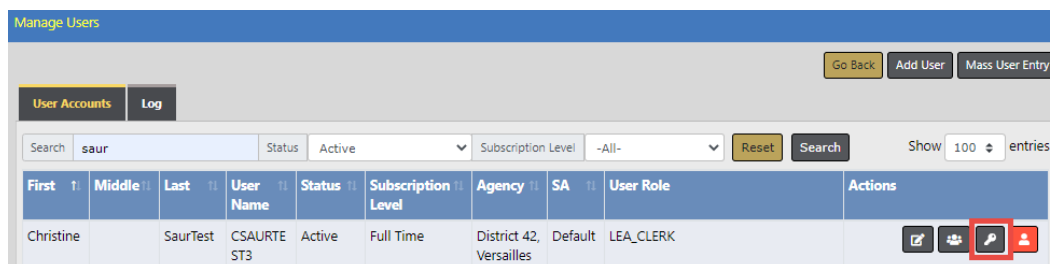

However, users are encouraged to reset their own password using the **forgot password** link on the login page. Refer to the *Forgotten Password Procedure* section in the *Online RMS User Guide* for instructions.

There are two ways to reset a user's password:

- From the Manage Users page.
- From the Users Detail page.

Reset from Manage Users Page

1. Access the *Manage Users* page from the Administration top menu bar and search for the user account. For instructions, refer to "Manage Users" on page 93.
2. Click on the **Change Password** icon.

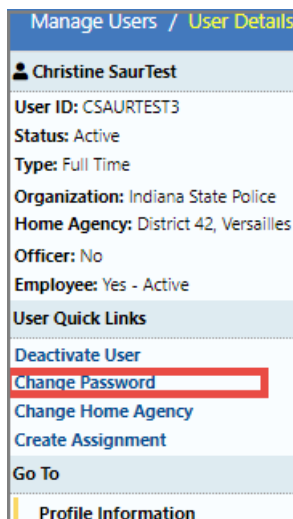

Reset from Users Detail Page

1. Access the *Manage Users* page from the Administration top menu bar and search for the user account. For instructions, refer to "Manage Users" on page 93.
2. Click on the **Edit** icon to open the *Users Detail* page.

3. Click **Change Password**.

Change Home Agency

Administrators can change a user's home agency from the *User Details* page.

1. Access the *Manage Users* page from the Administration top menu bar and search for the user account. For instructions, refer to "Manage Users" on page 93.
2. Click on the **Edit** icon to open the *Users Detail* page.

3. Click **Change Home Agency**.

10. Click the **Update** button on the top right of the window.

Profile Information Tab

The *Profile Information* tab of the *User Details* page contains basic user contact information.

The screenshot shows the 'Profile Information' tab of the 'User Details' page. It features a user profile icon on the left and a form with the following fields: 'FIRST NAME' (Christine), 'MIDDLE NAME' (empty), 'LAST NAME' (SaurTest), 'TELEPHONE' (5551112222), 'E-MAIL' (ccsa), 'E-MAIL ENABLED' (checked), and 'SUBSCRIPTION LEVEL' (Full Time). At the top right, there are buttons for 'Go Back', 'Emulate', and 'Update'.

For details on accessing the *User Details* page, refer to "User Details" on page 97.

Make any necessary changes then click the **Update** button to save changes.

To Emulate a user, refer to "Emulate a User" on page 121.

Security Settings Tab

The *Security Settings* tab of the *User Details* page contains settings, such as roles and security levels assigned to the user, two factor authentication, mobile integration, and Team Support login id.

Roles and Security Levels

1. Click ▼ in the **Incident Security Level** field and select the appropriate incident security level for this user.
2. Click ▼ in the **Index Security Level** field and select the appropriate index security level for this user.

Level 1 is the lowest security level; users with this security level have access only to data that has not been restricted. Level 3 is the highest level; users with this security level have access to all data.

3. Check the **Is Caliber Employee System Admin** box if this employee is an agency admin, or leave it blank.
4. Click on one or more **Roles** to *select* from the list of roles that appear on the left.

To *deselect* a role, click a **Role** on the right.

You can also shorten the roles list by using the **Search** text box. Enter part of the role name to shorten the list by your entered text.

Optionally, use the **Select All** or **Select None** button to quickly *select* or *deselect* all.

5. Click into the **Security Groups** text box, then select one or more security groups from the list of groups that appears. This feature is the same as that described for Roles.

Two Factor Authentication

1. Check the box to Enable.
2. Optionally, type the User Name.

Mobile Integration

1. Enter the **Mobile User Name**, if applicable.
2. Enter a **Terminal ID**, if applicable.
3. Enter the **Unit ID**, if applicable.
4. Enter the **One Time Password User Name**, if applicable

Team Support

If configured for your agency, users with a Team Support account can sign into Team Support from within Online RMS using the single sign-on feature.

The following criteria must be met to utilize this feature:

- The Team Support SSO feature must be enabled for the agency.
- And the agency admin must have the permission category *Support - Set Team Support SSO ID* to see and enter the Team Support Login ID on the User Admin page.
- And the user must have the following to submit tickets using SSO:
 - Permission category *Support - Access Team Support SSO* assigned to their role.
 - Permission category *EJS Support - submit tickets* assigned to their role.
 - Team Support Login ID.

Follow these steps to grant access to user:

1. Enter the user's **Team Support Login ID** or leave it blank.

- Suppose a login id exists and the user chooses to submit a ticket from within Online RMS. In that case, a new browser window opens, logging the user into the Team Support website automatically, where they can submit a ticket.
- Suppose the login id field is blank and the user chooses to submit a ticket from within the Online RMS. In that case, an Online RMS Support form opens, where they can submit a ticket or provide feedback to Caliber Staff without logging into Team Support.

For more information on submitting support tickets, refer to the *Caliber Online RMS User Guide*.

When finished updating the User, click **Update** on the top right of the window.

Preferences Tab

Administrators can update the user's preferences from the *User Details* page.

1. Access the *Manage Users* page from the Administration top menu bar and search for the user account. For instructions, refer to "Manage Users" on page 93.
2. Click the **Edit** icon on the *Manage Users* page.

The **Subscriptions** tab displays existing subscriptions for the user you are viewing.

Name	Type	Index Name	Reason	Creation Date	Actions
Vehicle	Index Accessed	, 336	Asdf	05/04/2017	
Property	Index Accessed	APPLIANCE 1588	Asdf	05/03/2017	

Click the edit icon  to edit the subscription, or click the trash icon  to delete the subscription.

With appropriate permissions, users can **Subscribe** to existing master index records (person, address, vehicle, etc.) to receive notification when someone views, updates or associates records to which they have interest.

For example, users can **Subscribe** to Williams Jones' master person record to receive notification when someone applies updates to his master person record.

For more information on creating a new subscription, refer to the Master Indices chapter in the *Caliber Online RMS User Guide*.

Agency & Assignments Tab

Administrators can update the user's agency and assignments from the *User Details* page.

1. Access the *Manage Users* page from the Administration top menu bar and search for the user account. For instructions, refer to "Manage Users" on page 93.
2. Click the **Edit** icon on the *Manage Users* page.

First	Middle	Last	User Name	Status	Subscription Level	Agency	SA	User Role	Actions

Emulate a User

Administrators, with appropriate permissions, can **Emulate** (act as) other users within their own agency. Emulation is a troubleshooting tool, allowing the administrator to look at a user account to determine the nature of a problem and facilitate solutions.

Note: Emulation activity is logged to the database for auditing and tracking purposes.

There are two ways to Emulate a user:

- From the *Manage Users* page.

- From the *User Details* page.

Manage Users Page

Use the following procedure to **Emulate** a user's account from the *Manage Users* page.

1. Access the *Manage Users* page and search for the user you want to emulate. For more information, refer to "Manage Users" on page 93.

2. Click on the emulate icon in the Actions column to display that user's Home page.

User Details Page

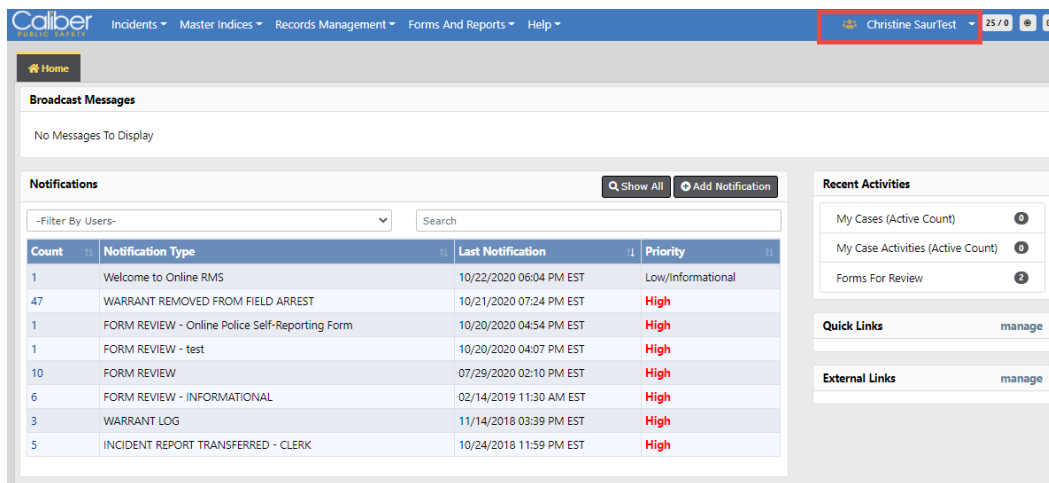

Use the following procedure to **Emulate** a user's account from the *User Details* page.

1. Access the *User Details* page for that user. For more information, refer to "User Details" on page 97.
2. Click the **Emulate** button on the top right of the window to emulate the user.

Navigate Online RMS as the Emulated User

1. Whichever method you use to emulate a user, the **Home Page** appears as if you are that user.

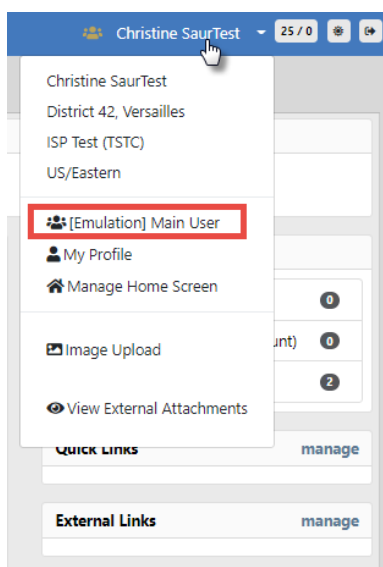

Notice that the name of the user you are emulating appears on the top right.

2. Navigate through Online RMS as if you were the user to locate the information you need.
3. To stop emulation, refer to "Stop Emulating User" below.

Stop Emulating User

Whichever method you use to emulate a user, the same process stops emulation.

1. To stop emulating the user, click on the **user's name**, then select **[Emulation] Main User** from the drop-down list.

2. Your own **Home Page** appears and your name displays on the top right of the window.

Add a User

Use the following procedure to add one user record.

Note: For instructions on adding multiple user records at once, refer to "Add Mass Users" on the facing page.

1. Access the *Manage Users* page. For details, refer to "Manage Users" on page 93.
2. Click the **Add User** button to open the *Add User* page.

The screenshot shows the 'Manage Users' page. At the top, there is a blue header bar with 'Manage Users' on the left and three buttons ('Go Back', 'Add User', 'Mass User Entry') on the right. Below the header, there is a grey bar with 'User Accounts' and 'Log' buttons on the left, and a red text label 'Add a New User' with a red arrow pointing to the 'Add User' button. The main content area is titled 'Manage Users / Add User' and contains a 'Go Back' and 'Save' button. The form is titled 'User Information' and includes a checkbox 'This is a Caliber RMS Admin User'. The form fields are organized into three columns: USER ID, PASSWORD, and CONFIRM PASSWORD; FIRST NAME, MIDDLE NAME, and LAST NAME; AGENCY, E-MAIL, and TELEPHONE; SEX, RACE, and SUBSCRIPTION LEVEL. The AGENCY, SEX, RACE, and SUBSCRIPTION LEVEL fields are dropdown menus. The E-MAIL field has a red vertical bar on the left. The SEX field has radio buttons for 'Sworn' and 'Not Sworn'. The RACE field has a checkbox for 'Agency Administrator'.

Note: Agency administrators can easily track end-user subscriptions by monitoring the allocation and usage of **User Subscriptions**. If your agency's user subscription allowed limit has been reached, you receive a warning stating the maximum number has been reached and to contact support to add additional subscriptions, or deactivate an existing user account. For more information on **User Subscriptions**, refer to "Agency Information Tab" on page 18 of the Agency Profile.

You have reached the maximum number of active named user accounts for your Organization. Please contact support to add additional user accounts or deactivate an existing user account.

Note: When First Name, Last Name, Sex, and Race are entered, the app will check for duplicate Employee records matching these values. If any are found, a button will appear allowing you to select an Employee match to associate to the new user rather than create a new employee record. Similarly, when Sworn is selected and First Name and Last Name are entered, the same as above will occur for Officer matches.

Note: Selecting an Employee record will add a field showing the Employee information and a button to de-select the record. Also, the Sex and Race fields will be disabled while an Employee is selected, as these fields now reflect an existing record's information (Sex and Race is stored solely in Employee records). Selecting an Officer record will also add a field showing the Officer information and a de-select button will appear. The Detective, Supervisor, Title, Badge #, and CAD ID fields will be disabled while an Officer is selected to reflect the selected officer's information. Selecting Not Sworn after selecting an Officer match will clear the selected Officer and all Officer fields.

3. Check **This is a Caliber RMS Admin User** if the user is an admin user, otherwise leave it blank.
4. Complete the form with the appropriate information.
 - You must choose either **Sworn** or **Not Sworn**. The user is automatically assigned roles to fit these needs.
 - Check the **Agency Administrator** box if applicable.
5. Click **Save** to save your entries to this tab.

Note: The system automatically creates an employee record.

6. The *User Details* page opens. Enter the necessary information in the applicable sections.

For more information on the *User Details* page and applicable sections, refer to "User Details" on page 97.

Add Mass Users

Use the following procedure to add multiple user records at once.

Note: For instructions on adding one user record, refer to "Add a User" on page 124.

1. Access the *Manage Users* page. For details, refer to "Manage Users" on page 93.
2. Click the **Mass User Entry** button to open the *Mass User Entry* page.

The screenshot shows the 'Manage Users / Mass User Entry' page. At the top, there's a blue header with 'Manage Users' and buttons for 'Go Back', 'Add User', and 'Mass User Entry'. A red arrow points to the 'Mass User Entry' button with the text 'Add Multiple Users'. Below the header, there's a sidebar on the left with 'Add Another User' and 'NEW USER' links. The main form area contains several fields: 'User ID' (text input), 'Password' (text input), 'Confirm Password' (text input), 'First Name' (text input), 'Middle Name' (text input), 'Last Name' (text input), 'Agency' (dropdown menu), 'E-Mail' (text input), 'Telephone' (text input), 'Sex' (radio buttons for 'Sworn' and 'Not Sworn'), 'Race' (dropdown menu), and 'Subscription Level' (dropdown menu). There are also checkboxes for 'This is a Caliber RMS Admin User', 'Agency Administrator', and 'Sworn'.

Note: Agency administrators can easily track end-user subscriptions by monitoring the allocation and usage of **User Subscriptions**. If your agency's user subscription allowed limit has been reached, you receive a warning stating the maximum number has been reached and to contact support to add additional subscriptions, or deactivate an existing user account. For more information on **User Subscriptions**, refer to "Agency Information Tab" on page 18 of the Agency Profile.

You have reached the maximum number of active named user accounts for your Organization. Please contact support to add additional user accounts or deactivate an existing user account.

Note: When First Name, Last Name, Sex, and Race are entered, the app will check for duplicate Employee records matching these values. If any are found, a button will appear allowing you to select an Employee match to associate to the new user rather, than create a new employee record. Similarly, when Sworn is selected and First Name and Last Name are entered, the same as above will occur for Officer matches.

Note: Selecting an Employee record will add a field showing the Employee information and a button to de-select the record. Also, the Sex and Race fields will be disabled while an Employee is selected, as these fields now reflect

an existing record's information (Sex and Race is stored solely in Employee records). Selecting an Officer record will also a field showing the Officer information and a de-select button will appear. The Detective, Supervisor, Title, Badge #, and CAD ID fields will be disabled while an Officer is selected to reflect the selected officer's information. Selecting Not Sworn after selecting an Officer match will clear the selected Officer and all Officer fields.

Note: Attempting to save a user add when a user has potential Employee/Officer matches, but for whom a match has not been selected, will display a dialog asking you if you wish to continue making new records despite matches to existing records. If multiple user records select the same Employee/Officer record, a validation error will occur.

3. Check **This is a Caliber RMS Admin User** if an admin user, otherwise leave it blank.
4. Complete the form with the appropriate information.
 - You must choose either **Sworn** or **Not Sworn**.
 - When you enter the person's first and last name, the NEW USER name on the left changes to the first and last name as shown below.

6. Repeat steps 3 and 4.
7. Repeat steps 5 and 6 until all the new users have been entered.
8. Click **Save** to save all new entries.
9. Click **Go Back** to return to the *Manage Users* page.
10. On the *Manage Users* page, search for the newly added records to update the roles, preferences, subscriptions.

For more information on searching and updating, refer to "Manage Users" on page 93.

Chapter 8. Personnel Management

The **Personnel Management** module provides the ability to manage employee information, regardless of whether employees have an Online RMS account.

Administrators with the appropriate permissions can add personnel to an agency or schema. **Personnel Management** is included in release 10.30 and above as a standard feature.

- *Master Employee* records cannot be deleted, only disabled (made inactive).
- An employee name can only be used once within one database.
- *Master Employee* records can be archived (saved) before applying updates.
- Three new permission categories for managing personnel are available to assign to roles:
 - Schema/System Level
 - Organization/Multi-tier Agency Level
 - Agency Level

Note: The new permission categories are assigned to the *System_Admin*, *Organization_Admin*, and *Agency_Admin* roles, respectively, for the initial 10.30 release.

This module also provides a method of tracking training and certifications of employees, providing the **Training Module** is activated for your agency. For more information about the **Training Module** refer to "Training Module" on page 151. Training

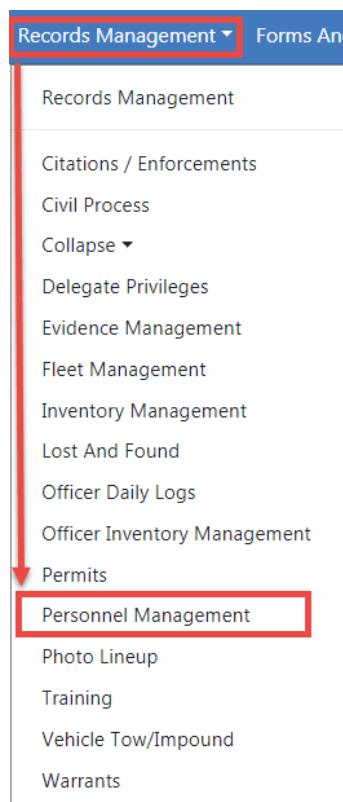

Access Personnel Management

Click the **Records Management** option on the top navigation bar, then click Records Management on the menu that appears to display the *Records Management* page. Click the **Personnel Management** icon to open the *Employee Search* page. Alternatively, select **Personnel Management** from the **Records Management** drop down menu.

Option 1

Option 2

Enter your search criteria in the *Employee Search* page to display a list of employees, or click the **Add Employee** to add a new employee.

See "Employee Search" below and "Add an Employee" on the next page for instructions on searching and adding employees, respectively.

Employee Search

Use the following procedure to search for specific employee records.

1. Access the *Personnel Management* page. (See "Access Personnel Management" on page 129, if needed.)
2. Enter the search criteria on the *Employee Search* page. Enter data into as many fields as you would like. The more information you enter, the shorter the search results, or leave all fields blank to return a list of all employees.

Go Back Reset Search

Additional search criteria is included in Online RMS 10.31 and above. Click on **Additional Criteria** and choose *Course* or *Certifications* from the list.

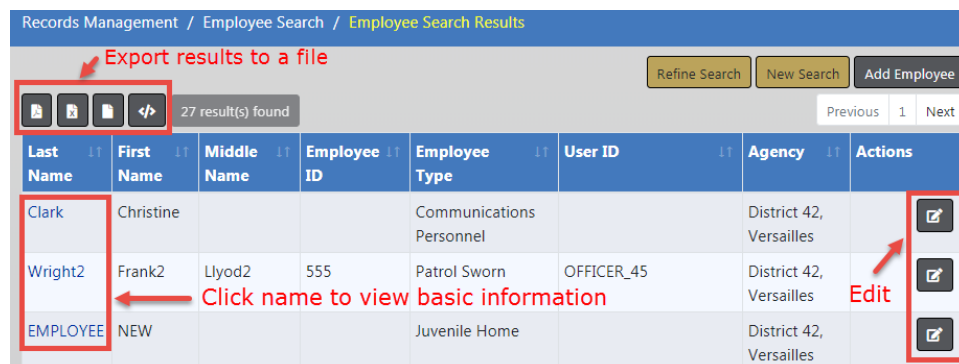

Note: Leave the **Is System User** Yes and No options **blank** to return a list of employees that match the search criteria, regardless of whether or not they are Online RMS users. Click **Yes** to return a list of employees that *are* only Online RMS users. Click **No** to return a list of only employees that *are not* Online RMS users.

- Click the **Search** button at the bottom of the page to display the *Employee Search Results*, or click the **Reset** button to remove the entered criteria to start the search over.

Users with proper permissions can edit employee records, export the search results to a file, or view basic employee information from the *Employee Search Results* page.

Employee Search Results Example

Click on the **Refine Search** button to update your criteria, or click either **New Search** to discard your current search and start a new one.

Refer to the *OnlineRMS User Guide* for instructions on exporting search results to a file.

Refer to "Manage an Employee" on page 136 for instructions on editing employee records.

Add an Employee

Use the following procedure to add an employee record.

1. Access the *Personnel Management* page. (See "Access Personnel Management" on page 129, if needed.)
2. Click the **Add Employee** button on the top right of the *Employee Search* page to open the *Employee* page.

The image shows two screenshots of a web application interface. The top screenshot is the 'Employee Search' page, which has a blue header bar with the text 'Records Management / Employee Search'. Below the header, there's a section titled 'Employee Search' with a red-bordered button labeled 'Add Employee' on the right. The form contains several input fields: 'ACTIVE STATUS' (a dropdown menu with 'Active' selected), 'USER NAME' (a text input), 'AGENCY' (a dropdown menu with 'All Agencies' selected), 'LAST NAME' (a text input), 'FIRST NAME' (a text input), and 'MIDDLE NAME' (a text input). The bottom screenshot is the 'Employee' page, which has a grey header bar with a 'Go Back' button on the right. The form is divided into three columns. The left column contains: 'ACTIVE STATUS' (dropdown with '-Select-' selected), 'LAST NAME' (text input), 'SUFFIX' (text input), 'SEX' (dropdown with '-Select-' selected), 'SSN' (text input), 'EMPLOYEE ID' (text input), 'HAND DOMINANCE' (dropdown with '-Select-' selected), and 'LONGEVITY DATE' (text input with a calendar icon). The middle column contains: 'AGENCY' (dropdown with 'District 42, Versailles' selected), 'FIRST NAME' (text input), 'MAIDEN NAME' (text input), 'RACE' (dropdown with '-Select-' selected), 'DOB' (text input with a calendar icon), 'EMPLOYEE TYPE' (dropdown with '-Select-' selected), 'BARGAINING UNIT' (text input), and 'HIRE DATE' (text input with a calendar icon). The right column contains: 'MIDDLE NAME' (text input), 'TITLE' (dropdown with '-Select-' selected), 'ETHNICITY' (dropdown with '-Select-' selected), 'PLACE OF BIRTH' (text input), 'EMPLOYEE LEVEL' (dropdown with '-Select-' selected), 'BLOOD TYPE' (dropdown with '-Select-' selected), and 'END DATE' (text input with a calendar icon). At the bottom of the form, there are two buttons: 'Go Back' and 'Save'.

3. Enter the applicable information in the fields provided.

The form contains the following fields:

- ACTIVE STATUS:** Active (dropdown)
- AGENCY:** District 42, Versailles (dropdown)
- LAST NAME:** Text input
- FIRST NAME:** Text input
- MIDDLE NAME:** Text input
- SUFFIX:** Text input
- MAIDEN NAME:** Text input
- TITLE:** -Select- (dropdown)
- SEX:** Female (dropdown)
- RACE:** -Select- (dropdown)
- ETHNICITY:** -Select- (dropdown)
- SSN:** ***-**-1214 (text input, masked)
- DOB:** Text input with calendar icon
- PLACE OF BIRTH:** Text input
- EMPLOYEE ID:** Text input
- EMPLOYEE TYPE:** Communications Personnel (dropdown)
- EMPLOYEE LEVEL:** -Select- (dropdown)
- HAND DOMINANCE:** -Select- (dropdown)
- BARGAINING UNIT:** Text input
- BLOOD TYPE:** -Select- (dropdown)
- LONGEVITY DATE:** Text input with calendar icon
- HIRE DATE:** Text input with calendar icon
- END DATE:** Text input with calendar icon

- All but the last four digits of the entered SSN is masked with asterisks for privacy purposes.

4. Click **Save** to display additional data options.

Note: The **Employee Info** data is shared with the *User Module* in instances when the employee has a corresponding Online RMS user record.

Additional Data

This area is used to capture other employee data such as, Service History, Education, Languages, Addresses, etc. You can also attach documents or photos, and add a picture of the employee.

Click on an individual link, complete the entry form that appears, then click **Save**. The entry form varies by individual link.

Example:

- a. Click on the **Add Education** link to display the **Education** entry form.
- b. Enter the appropriate data and click **Save**.

The image shows a modal form titled "Education" with a close button (X) in the top right corner. The form contains three sections: "TYPE" with a dropdown menu showing "Bachelor of Arts", "DATE OF INFO" with a date input field showing "03/20/2019" and a calendar icon, and "COMMENTS" with a text area. At the bottom right are "Cancel" and "Save" buttons.

- c. The saved data displays in the **Education** grid.

Education + Add Education			
Education	Comments	Date Of Info	Actions
Bachelor of Arts		02/26/2019	 

Note: The **Service History** data is shared with the *Officer Daily Log*.

5. Optionally click on the *Training* tab to register the employee for training. For details refer to "Manage an Employee" below.

Manage an Employee

You can update an existing employee record, and with proper permissions, you can delete certain existing details of that employee such as, Education, Skills, Phone Numbers, etc.

If the employee is also an Online RMS user, a **Manage User** button appears on the *Employee* page for easy access to the user record.

If your agency is using the **Training Module**, and you have proper permissions, you can also track training and certifications for the employee.

Update Existing Employee Record

Use the following procedure to update an employee record.

1. Access the *Personnel Management* page. (See "Access Personnel Management" on page 129, if needed.)
2. Search for the employee record you need to update. (See "Employee Search" on page 131, if needed.)
3. Click  in the **Actions** column to the far right of the user record to display the *Employee* page. There are two tabs: *Employee Info* and *Training*. The *Employee Info* tab opens by default.

Eligible Ranks

- The *Eligible Ranks* section is view only. Data cannot be changed or deleted from this section.
- Click **Update** or **Save** (Save and Archive).

Update

This option updates the current *Master Employee* record. Select this option if you want to overwrite the *Master Employee* record without archiving (saving) a copy prior to the update.

Save

This option creates a new *Master Employee* record with your changes, and archives (saves) a copy of the master record before the update. *Archived* data is an accumulation

of historical information that can be viewed later. Archived data is not changeable; it is meant to be a snapshot in time.

For example, if you add Kris LeClaire's middle name to her *Master Employee* record and click **Save**, then a new *Master Employee* record is created containing the middle name, and the record without the middle name is saved (archived) for later viewing under the *Employee History* grid of the *Employee* page.

Delete Additional Options

You can delete existing *Additional Options* (details) with the proper permissions.

1. Click the Delete icon  under to the *Actions* column to delete.

Education + Add Education			
Education	Comments	Date Of Info	Actions
GED Certification		02/28/2018	 
Certification		12/02/2017	 

2. Click **Yes** to confirm, or **No** to return to the *Employee* page without deleting.

Message From RMS

Are You Sure?

No Yes

If you chose to click **Yes**, then the *Additional Option* record is permanently removed and cannot be retrieved or viewed later.

Note: *Additional Options* are not *Archived* (saved).

Navigate to the User Record

If the employee is also an Online RMS user, a **Manage User** button appears on the *Employee* page for easy access to the user record, otherwise the button does not appear.

Chapter 9. Criminal Complaint

The Criminal Complaint module is for managing criminal complaints against arrestees and offenders, and approve or disapprove through a guided review process before submitting it to the state.

To utilize this module, it must be turned on for the agency.

Court Cases can be associated with Criminal Complaints.

Two Approval Levels

The agency has the option to utilize a 1 or 2 level approval for Criminal Complaints. Level 1 is the default.

Level 1

The creator of the complaint sends it to the supervisor for approval.

The supervisor can disapprove and send the complaint back to the creator.

The supervisor approves and submits the complaint data to the court in one action, or approves then submits later.

Level 2

The creator of the complaint sends it to the supervisor for approval.

The supervisor can disapprove and send the complaint back to the creator.

The supervisor approves the complaint.

The court officer can disapprove an approved complaint and send the complaint back to the creator.

The court officer submits the approved complaint data to the court.

Level 1 is the default setting. Your agency administrator can elect to turn on the 2-Level Approval Process using the **Maint Value** settings under the Administration menu.

Turn on Criminal Complaint Approval Level 2

With appropriate permissions, you can turn on 2-Level Approval for your agency using **Maint Value** settings:

1. Access the **Maint Value** table. For instructions, refer to “Access Maintenance Values” on page 346.
2. In the Search field, type **complaint_2** to display the record.

Show 10 entries

 - Values: Filed, Active, Denied, Closed

Notification Types

- COURT APPEARANCE ASSIGNED
- COURT APPEARANCE UPDATED
- COURT APPEARANCE CANCELLED

Chapter 11. Training Module

The **Training Module** provides administrators with proper permissions the ability to configure Training Courses and Certifications.

The **Training Module** is available with full subscription access to Caliber Online RMS 10.31 and higher. The Training Module is disabled by default but can be enabled, and additional user training is available for purchase. Contact Caliber Public Safety Support for more information.

Agency administrators have the ability to configure this module specific to your agency's needs, such as an eligible list of course types (i.e., gun safety, mobile training, etc.), classification levels, and other configuration settings as described later in this chapter.

There are two components to the **Training Module**:

- *Courses*
 - Courses are training classes with specific focus to refine skills (i.e., Online RMS training).
 - Configure courses by way of the *Administration* menu.
 - There are two components to Courses:

Template

A Course Template is a standard form that is used as a starting point when creating Course Instances. For example, users with proper permissions can create a Template that is pre-populated with a standard class description, prerequisites, and attached documents such as a class outline or handouts, that pull into a newly created Course Instance automatically.

Note: Templates are managed only through the *Administration* menu. For more information on managing Templates refer to "Manage Course Configurations" on page 155.

Course Instance

A specific course to which employees can be assigned. There could be multiple records of the same course, but with different dates or other information.

Note: Course Instances are managed through the *Training* option under the *Records Management* menu. For more information on Course Instances, refer to the *Caliber Online RMS User Guide*

- *Certifications*
 - Proof of achieving specific skills or knowledge level that are mandatory for specific job duties (i.e., gun safety certification).
 - Create and maintain certifications by way of the *Training* option under the *Records Management* menu.

Note: Certifications are managed through the *Training* option under the *Records Management* menu.

There are three new permissions categories beginning with the Online RMS 10.31 release:

- Training - Schema Level Management (System Level)
- Training - Organization Level Management (Multi-tier Agency Level)
- Training - Agency Level Management

Note: The new permission categories are assigned to the *System_Admin*, *Organization_Admin*, and *Agency_Admin* roles, respectively, for the initial 10.31 release.

Access Course Configuration

1. Click the **Administration** icon on the top navigation bar, then click again on Administration from the drop-down menu to open the *Administration Home* page. Then click on the **Module Admin** link to display the *Module Configuration* page.

MY TEMPLATE			Yes	 	

The *Training Administration* page contains a *Product Config* tab with four sub-tabs:

- Course Templates
- Maintenance Settings
- Course Types
- Course Classifications

Configure Courses

The *Course Templates*, *Course Types*, and *Course Classifications* tabs are empty by default until configured by your agency administrator to meet your agency's needs. For details on how to configure courses, refer to "Manage Course Configurations" on the facing page.

Number of Days Nearing Expiration

The *Maintenance Settings* tab contains a list of Courses and Certifications that are due to expire within a specified number of days. For details on how to configure the number of days nearing expiration, refer to "Maintenance Settings" on page 162.

Manage Course Configurations

There are four configurations associated with a Course:

- Course Types
- Course Classifications
- Course Template
- Number of days to notify users before Courses and Certifications are due to expire.

Note: The *Training Course Dashboard* and *Training Certification Dashboard* displays a list of Courses and Certifications that are due to expire within a specified number of days. For more information on the Training Dashboard refer to the *Training Module* section of the *Caliber Public Safety Online RMS User Guide*.

It is best practice to configure the courses in the order listed, as *Course Types* and *Course Classifications* must exist before assigning them to a *Course Template*. For more information on associating a Course Type and Course Classification with a Course Template refer to [#CourseTemplates](#).

Course Types

Add Course Type

1. Click on the **Course Types** tab on the *Training Administration* page. For details on accessing the *Training Administration* page refer to "Access Course Configuration" on page 152.
2. Click the **Add Course Type** button to open the *Course Type Code* window.

4. Click the **Back** button to return to the *Module Configuration* page.

Delete Template

1. Click on the **Course Templates** sub-tab on the *Training Administration* page. For details on accessing the *Training Administration* page refer to "Access Course Configuration" on page 152.
2. Click the Delete icon  in the *Action* column on the *Course Template* you want to delete.
3. Click **Yes** to confirm delete, or click **No** to return to the *Course Templates* sub-tab without deleting.

Message From RMS

Are You Sure?

No

Yes

- a. If the *Course Template* is associated with a *Course Instance*, a message appears at the top of the screen stating it cannot be deleted. For more information on *Course Instances* refer to the *Caliber Public Safety Online RMS User Guide*.

Maintenance Settings

The *Training Administration* page contains a **Maintenance Settings** tab that contains a list of Courses and Certifications that are due to expire within a specified number of days. Users with appropriate permissions can set the number of days nearing expiration.

Set Number of Days Nearing Expiration

1. Click on the **Maintenance Settings** tab on the *Training Administration* page. For details on accessing the *Training Administration* page refer to "Access Course Configuration" on page 152.
2. Click on the **Edit** icon in the Actions column to edit the number of days.

Chapter 12. Training Videos Module

Training Videos Overview

Beginning with Online RMS 11.4.0, agencies can enhance users' training and learning experience with the **Online Training** feature. The **Online Training** feature offers standard Caliber video-based learning to all users and, optionally, agency-specific videos. In addition, the agency administrator can enable a feature that pops up videos on a particular page, requiring users to watch the videos.

Video Rules and Requirements

- Agency must have the **Online Training** feature turned on and configured to get the pop up (required) videos. Contact Caliber Public Safety to turn on and configure this feature.
- Agency must enable this feature on the agency profile for users to have access to non-standard videos.
- No roles or permissions are associated with this feature; the **Online Training** feature controls access.
- Supports only MP4 files at this time.
- Contact Caliber Public Safety to upload videos.
- The agency administrator has the option to require user acknowledgment after viewing the video.
- The **date and time** watched by users are saved to the database on videos that **require acknowledgment**.

Benefits of Video-Based Learning

- A cost-effective training approach.
- Provides up-to-date training opportunities.

- Provides a **Training Video Library** where users can keep track of their videos.

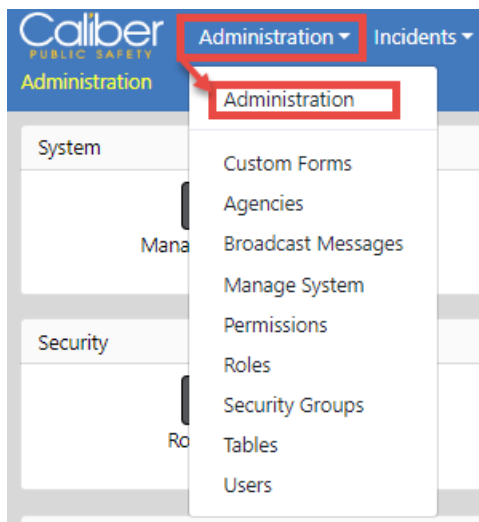

Note: For more information on the **Training Video Library**, refer to the *Online RMS User Guide*.

- Provides the ability to watch videos more than once.
- Enforces required training.
- Provides a history of e-training participation.

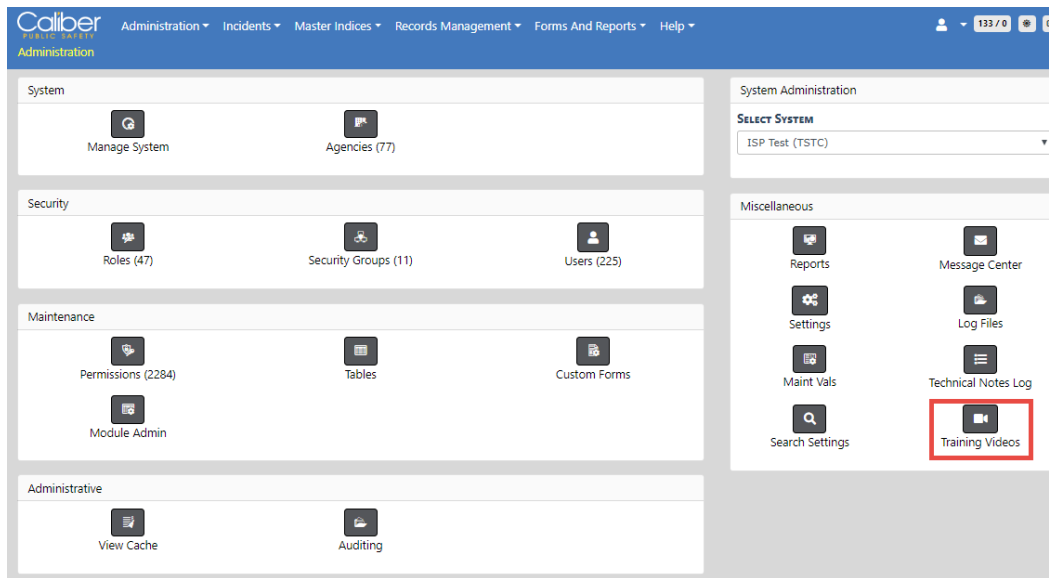

Access Training Videos

Follow these steps to access the **Training Videos** admin link:

1. Click on the **Administration** label on the top menu bar then click **Administration** again.

2. Click on **Training Videos** under *Miscellaneous*.

3. The *Training Videos Administration* grid appears.

The screenshot shows the Training Videos Administration grid. The grid has columns for ID, Video URL, Page Category, Application Page, Sort Order, Acknowledge Required, Description, and Actions. The grid displays 11 entries. The first entry is a video titled 'https://www.public-safety-cloud.net/public/InterActRMS-WebHelp/RMS_11.0_Introduction.mp4' with a category of 'Incidents' and a page of 'Data Submission'. The last entry is a video titled 'https://www.public-safety-cloud.net/public/RMSTrainingVideos/Delete.mp4' with a category of 'Incidents' and a page of 'Data Submission'. The grid also includes a search bar, a 'Go Back' button, and a 'Add Video' button.

Search Training Videos

Follow these steps to search **Training Videos** in Online RMS:

1. Access *Training Videos Administration*. For instructions, refer to “Access Training Videos” on page 166.
2. Click in the **Search** text box and enter a word or phrase to display results that match your entered text.

Home Page
Incident Names
Incident Narratives
Incident Offenses
Incidents Approval
Incidents Create
Incidents Header
Incidents Landing
Incidents Mapping
Incidents SmartSearch
Incidents Status
Incidents Summary
Master Indexes

Video Description

Enter a description for the video.

Acknowledge Required

Keep the box checked to require users to acknowledge having watched the video. The video continues to pop up automatically each time users log into Online RMS and access a page to which the video is associated until they acknowledge having watched it. The date and time watched by the user is saved to the database on videos that are required.

Uncheck the box if users are not required to acknowledge having watched the video.

Sort Order

The Sort Order defaults to 0. The Sort Order is used if you have multiple videos that you want to appear on the same page in a particular order.

For example:

If you want two videos to show on the Home Page, you associate each video to the Home Page, then assign a Sort Order to each video: Video 1 could be Sort Order = 0 and Video 2 could be Sort Order = 1.

If the Sort Order is 0 on all videos, then the videos sort in the order you added the videos.

6. Click **Save**.

Edit Training Video

Follow these steps to add **Training Videos** to Online RMS:

1. Access *Training Videos Administration*. For instructions, refer to “Access Training Videos” on page 166.
2. Optionally, search for specific training videos to ensure the video you want to edit. For instruction, refer to “Search Training Videos” on page 167.
3. Click on the **Edit icon**  on the video you want to update.

4. Click **Yes** to confirm deletion, or **No** to return to the previous screen without deleting.

Chapter 13. Permissions Module

This module provides access to features used by your agency/schema to comprise the various roles necessary for daily operations. Access within this module varies greatly, depending upon the users administrative roles/permissions.

Permission Categories

Permission Categories are assigned certain Roles, and Roles are assigned specific Permissions.

Click the **Permissions** icon on the *Administration Home* page to open the *Permission Categories* page. Alternatively, click the **Permissions** option on the **Administration** menu.

Category	Actions
Administration - Activate Users in Agency	
Administration - Activate Users in Organization	
Administration - Activate Users in System	
Administration - Add County	
Administration - Add Supervised Agencies to User	
Administration - Agency Admin	
Administration - Agency Civil Process Admin	
Administration - Agency Field Arrest Admin	
Administration - Agency Officer Daily Admin	
Administration - Agency Setup Wizard	

This page lists the various **Permissions Categories** that are available to your agency/schema. While Permissions Categories are managed by Caliber Public Safety personnel, agency personnel with proper permissions can view the available categories and details. **Permissions Categories** are listed in alphabetical order.

To view the Roles and Permission details of a particular Category, either click the View icon

in the **Actions** column or on the Category link to open the *Permission Category Details*

page. With appropriate permissions you can also add one or more roles directly to a Permission Category.

Permission Description	Dispatch To
Calls For Service - Create an incident from a call	createIncidentFromDispatch
Incidents - Get Header Fields for Incident Creation AJAX	getCreationFields
Ajax call for validating a report # client side	validateReportNumber

From this page, you can:

- View the Roles associated with this **Permission Category**.
- View a list of permissions that are associated with the Roles.
- Add one or more Roles directly to a permission category.

Click the **Edit Role** button then select one or more Roles.

- View a list of active users that have one or more of the Roles listed.

Click the **Active Users** link to view the active user list.

Note: For more information on Roles, see “Roles” on page 77 .

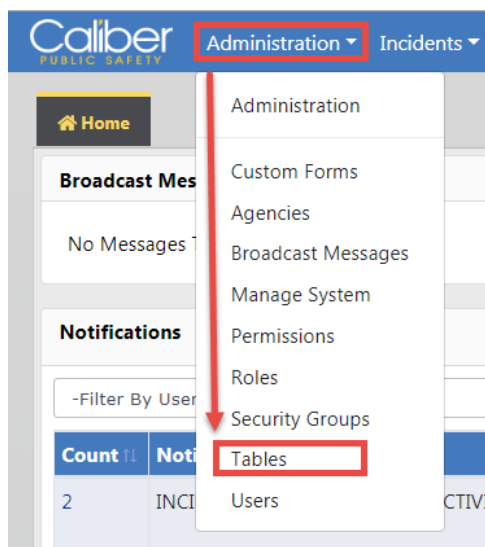

Chapter 14. Tables

Code Tables and RMS Tables are used throughout the Online RMS application by users with proper permissions and are maintained from the Tables page. Additional System Tables are available to Caliber Public Safety personnel only and are not available for general use.

Access Tables

Click the **Tables** icon on the *Administration Home* page to access the *Tables* page. For more information on accessing the *Administration Home* page, refer to "Access Administration" on page 1.

Alternatively, click on the **Administration** option on the top navigation bar to display the drop-down menu, then click **Tables**.

The **Tables** page opens with two tabs: *Code Tables* and *RMS Tables*.

Note: A *System Tables* tab is also available to Caliber Public Safety personnel only, for agency setup purposes.

- For information on **Code Tables** "Code Tables" below.
- For information on **RMS Tables** tab is the second tab. "RMS Tables" on page 184.

Code Tables

The **Code Tables** tab is open upon access of the *Tables* page.

S.NO	Code	Description	Actions
1	INCCASE_OFFICER_REASON_CODES	INCCASE_OFFICER_REASON_CODES	
2	DELEGATE_PRIVILAGES	DELEGATE_PRIVILAGES	
3	INCCASE_OFFICER_ROLE_CODES	INCCASE_OFFICER_ROLE_CODES	
4	SEARCH_EJS_CASEOFFICER	SEARCH_EJS_CASEOFFICER	
5	PERSON_COLLAPSE_SRCH_CODES	PERSON_COLLAPSE_SRCH_CODES	
6	SEARCH_DATASET	SEARCH_DATASET	
7	INCCASE_ACTIVITY_NOTES_CODES	INCCASE_ACTIVITY_NOTES_CODES	
8	BUSINESS_COLLAPSE_SRCH_CODES	BUSINESS_COLLAPSE_SRCH_CODES	
9	REPORTS_CATEGORY	REPORTS_CATEGORY	
10	SEARCH_EJS_REPORTS	SEARCH_EJS_REPORTS	
11	VEHICLE_COLLAPSE_SRCH_CODES	VEHICLE_COLLAPSE_SRCH_CODES	
12	ADDRESS_COLLAPSE_SRCH_CODES	ADDRESS_COLLAPSE_SRCH_CODES	
13	SUBMIT_APPROVAL_GROUP	SUBMIT_APPROVAL_GROUP	

The **Code Tables** tab displays a list of code tables that RMS uses to populate Lists of Values (LOV), or pick lists.

From this tab, administrative users with the appropriate roles/permissions can perform the following tasks:

- Search existing code tables. "Search Code Tables" on the facing page for instructions.
- Edit a code in a code table. For more information, refer to "Edit a Code Table" on the facing page for instructions.

Search Code Tables

Use the following procedure to search the **Code Tables**.

1. Click  in the **Search By** field.
2. Select from the drop-down. (Available options include: Code, Description, and Table Name.)
3. Click in the **Search** text field and type in a keyword.
4. Click the **Search** button to redisplay the table as shown below for a search for *codes* with the key word *INCIDENT*.

S.NO	Code	Description	Actions
1	INCIDENT_TYPE_CODES	INCIDENT_TYPE_CODES	
2	INCIDENT_STATUS_CODES	INCIDENT_STATUS_CODES	
3	SEARCH_INCIDENT_NARRATIVE	SEARCH_INCIDENT_NARRATIVE	
4	INCIDENT_VALIDATION_TAB_CODES	INCIDENT_VALIDATION_TAB_CODES	
5	INCIDENT_WORKGROUP_CODES	INCIDENT_WORKGROUP_CODES	
6	INCIDENT_ACTION_CODES	INCIDENT_ACTION_CODES	
7	INCIDENT_CASE_STATUS_HISTORY	Xref for History_Id_Seq	
8	INCIDENT_CASES	Xref for Inc_Case_Seq	
9	INCIDENT_PROPERTIES	Xref for INCPRO_SEQ	
10	INCIDENT_VEHICLES	Xref for INC_VEH_SEQ	
11	Incident XML Extract	Incident XML Extract	
12	INCIDENT_AUDIT_ACTIVITY_CODES	INCIDENT_AUDIT_ACTIVITY_CODES	
13	INCIDENT_AUDIT_CODES	INCIDENT_AUDIT_CODES	
14	INCIDENTS	Incidents	

Codes containing the keyword display.

5. Navigate to the Next page as needed until you locate the specific code.

Edit a Code Table

Use the following procedure to edit a code table.

1. Locate the code table on the *Tables* page. Refer to "Code Tables" on page 180 for details.
2. Click  in the **Actions** column to display *Code Table Details*.

3. Make changes as needed.

4. Click **Save**. A successful save message briefly appears at the top of the page.
5. Click **Go Back** to return to the *Officers* table.

Delete a NIBRS Code

Use the following procedure to delete a NIBRS code from the *NIBRS Codes* table.

1. Locate the NIBRS code record you need to delete from the table.
2. Click  in the **Actions** column.
3. Click **Yes** to confirm deletion, or click **No** to cancel deletion, and return to the *NIBRS Codes* table.

State Offense Codes

From the **RMS Tables** tab of the *Tables* page, click the State Offense Codes link to display the *State Offense Codes* table as shown in the following example. For details on how to access the *Tables* page refer to "Access Tables" on page 179.

Show 10 entries		Go Back Add State Code			Search:
State Offense Code	NIBRS Code	Description	Status	Actions	
10-14-3-29.5	90Z - All Other Offenses	Public Safety- Violation Of Local Travel...	Inactive		
11-8-8-15	90Z - All Other Offenses	CORRECTION- SEX OFFENDER FAIL TO POSSESS...	Active		
11-8-8-17	90Z - All Other Offenses	Correction- Sex Offender Registration Vi...	Active		
11-8-8-18	90Z - All Other Offenses	Correction- Sexual Violent Predator Duty...	Active		
1111555	90Z - All Other Offenses	Test	Active		

Search State Offense Codes

Use the following procedure to search the *State Offense Codes* table.

1. Click in the **Search** text field and type in a keyword.

2. Click **Search** to redisplay the table with the search results.

Add a State Offense Code

Use the following procedure to add a state offense code to the *State Offense Codes* table.

1. Click **Add State Code** button in the upper right corner of the *State Offense Codes* table to display an *Add State Offense Code* page as shown below.

The screenshot shows a web form titled "State Code" with a "Go Back" button in the top right corner. The form contains several sections: "STATE OFFENSE CODE" with a text input field, "NIBRS CODE" with a dropdown menu showing "-Select-", and "DESCRIPTION" with a text input field. Below these is a "DETAILED DESCRIPTION" section with a larger text area and an information icon. The "ACTIVE" section has a checked checkbox. The "IBR CODE" section has a text input field. The "ARREST CODES" section is empty. The "OFFENSE GROUPS" section has a "Click To Select" button. The "INCIDENT TYPE" section has a "Click To Select" button. At the bottom are "Go Back" and "Save" buttons.

2. Complete all required fields and applicable optional fields.
3. Leave the **Active** button checked.
4. Enter the **IBR Code**.
5. Optionally, select the **Offense Groups**.
6. Optionally, select the **Incident Type** to relate incident types to offenses.

Relating one or more Incident Types to an offense requires at least one related offense on the Incident Report when that Incident Type is added to an Incident Report.

7. Click **Save** to save the record and return to the *State Offense Codes* table.

Edit a State Offense Code

Use the following procedure to edit a state offense code in the *State Offense Codes* table.

1. Locate the state offense code you need to edit in the table.

- Click  in the **Actions** column in the same row as the record listing to display the *Edit State Offense Code* page as shown.

- Make changes as needed.
- When changes are complete, click **Save** to save the record and return to the *State Offense Codes* table.

Delete a State Offense Code

Use the following procedure to delete a state offense code from the *State Offense Codes* table.

- Locate the code you need to delete from the table.
- Click  in the **Actions** column.
- Click **Yes** to confirm deletion, or click **No** to cancel deletion, and return to the *State Offense Codes* table.

Local Offense Codes

From the **RMS Tables** tab of the *Tables* page, click the Local Offense Codes link to display the *Local Offense Codes* table as shown in the following example. For details on how to access the *Tables* page refer to "Access Tables" on page 179.

Caution Codes

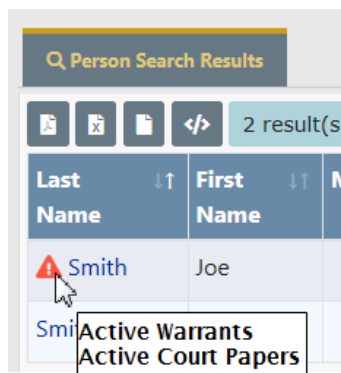

The **Caution Codes** table provides a method to create and maintain a customized set of warnings that can be used on Master Person and Master Address records to inform personnel, with access to Master Indices, of potential dangers or problems specific to those persons and addresses.

Caution examples

Persons with active warrants, on probation, known to carry firearms, or suicidal tendencies.

An address that has a violent dog or an unusually tall fence.

A red Alert icon appears next to the person's name or address in the *Search Results* window, indicating active Caution Codes or Warrants. Hover your mouse over the Alert icon to view a summary of the all the active alerts, or click on the Alert icon to open details of all active alerts in a pop-up window.

You may also search person or address records by Caution Code and date range. Refer to the *Caliber Public Safety Online RMS User Guide* for details.

Agency administrators with appropriate permissions can create **Caution Codes**, Caution Categories, and assign Caution Category Roles, allowing administration of **Caution Codes** by specified user Roles and Categories. For example, you could have a specialized unit that keeps track of persons on probation, and only agency administrators or users assigned to this Role can add, edit or delete these codes on person records.

From the **RMS Tables** tab of the *Tables* page, click the Caution Codes link to display the *Caution Codes* table. For instructions on accessing the *Tables* page refer to [AccessTables.htm](#).

Two tabs are associated with the **Caution Codes** page: *Caution Codes* and *Caution Category Codes*.

Caution Codes Tab

The *Caution Codes* tab lists the Category Codes and associated Caution Category Codes and Roles, if any.

Note: Caution Category Codes are optional. Refer to the "Caution Category Codes Tab" on page 216 section for more information.

Add Caution Code

Code	Caution Type	Description	Category	Category Roles	Active	Actions
BOD	Address	Beware of Dog			Yes	
BF	Address	Big Fence			Yes	
PVA	Person	Armed at prior arrest	Gang Task Force	CID_SUPERVISOR, GANG ALWAYS EDIT AGENCY	Yes	
AST	Person	Assaulted officer			Yes	
ASC	Person	Assaultive/Combative			Yes	

Associating a Category Code and Role to a Caution Code allows designated users exclusive access to administer the Category Code on a person record.

Category Code	Description	Category Roles	Active	Actions
GTF	Gang Task Force	CID_SUPERVISOR, GANG ALWAYS EDIT AGENCY	Yes	 

Only users with these roles can add, edit, or delete this caution code on the person record, while all others users can only view the code.

Note: If a Caution Category Role is not associated with a Role, or a Caution Category Code is not associated with a Caution category, then every user has access.

Add Caution Codes

Use the following procedure to add a caution code to the *Caution Codes* tab of the Caution Codes table.

1. Click the **Add Caution Code** button in the upper right corner of the *Caution Codes* table to display a *New Caution Code* page.

Use the following procedure to delete a caution code from the *Caution Codes* table.

1. Locate the record you need to delete from the table.
2. Click  in the **Actions** column in the same row as the record listing.
3. If a confirmation prompt displays, click **Yes** to confirm deletion, or click **No** to cancel deletion, and return to the *Caution Codes* table.

Caution Category Codes Tab

Caution Category Codes group similar Caution Codes and control who has access to administer the Caution Code by the Category Roles based on User Roles.

Note: It is not unusual to create new User Role(s) for Caution Code administration purposes. Refer to "Roles" on page 77 for more information on Roles.

Caution Categories are optional. You can have a few or as many that makes sense for your agency.

Incident Status/Offense Status Mapping

The **Incident Status / Offense Status Mapping** page allows *Incident Status* codes to be mapped to *Offense Status* codes to prevent mismatches.

During the approval process, if the user sets an *Incident Status* to something other than what has been mapped to an *Offense Status*, an error displays disallowing that selection and prompts them to verify the information and make any necessary changes.

From the **RMS Tables** tab of the *Tables* page, click the [Incident Status/Offense Status Mapping](#) link/icon to display the *Mappings* table. For instructions on accessing the *Tables* page refer to [AccessTables.htm](#).

- Click  in the **Actions** column in the same row as the record listing.
- If a confirmation prompt displays, click **Yes** to confirm deletion, or click **No** to cancel deletion, and return to the *Mappings* table.

Court Locations

Agencies using the *Civil Process* and *Warrant* modules have the ability to manage Court Locations. Only agency administrators with proper permissions can add, edit, and delete *Court Locations*. The *Civil* and *Warrant* modules display the *Court Locations* as a list of values when adding court papers and warrants. You can only select a court location that appears in the list of values; as *Court Locations* change, the list of values from which to choose also automatically change.

There are up to three ways to access the *Court Locations* table, depending on your permission level:

- From the Main Menu select Administration, Module Admin, then Civil Process. For more information refer to "Civil Process Agency Settings" on page 294.
- From the Main Menu select Administration then Agencies. Find the appropriate agency from the listed agencies then click the edit link next to the agency name. For more information refer to the *Other Tables* section of "Agency Settings" on page 29.

- Click the [Court Locations](#) link on the **RMS Tables** tab of the *Tables* page to display the *Court Locations* table. For instructions on accessing the *Tables* page refer to [Access Tables.htm](#).

2. Click  in the **Actions** column in the same row as the record listing.
3. Click **Yes** to confirm deletion, or click **No** to cancel deletion, and return to the *Judges* table.

Common Place Names

The **Clery Act** requires that higher education institutions report campus crimes associated with the institution. Many universities have only one address, yet the campus complex could have hundreds of buildings and locations that are either on or off the main campus, are residential facilities, or adjacent to campus; all of which share the same address. Online RMS provides the ability to associate any *Common Place Name* associated with an address and map it to any pre-defined location code.

For example, an officer taking a report for an incident that occurred in a classroom receives the option of choosing from a list of Clery locations like *On Campus* or *Residential Facility*; in this case the officer selects, *On Campus*.

Click the [Common Place Names](#) link on the **RMS Tables** tab of the *Tables* page to display your agency's *Common Place Names* table. For instructions on accessing the *Tables* page refer to [AccessTables.htm](#).

Name	Agency	Active	Actions

Edit the value in the **Local Code** field and select a difference schema as needed.

Click **Save**.

Chapter 15. Custom Forms

The Custom Forms feature must be enabled by Caliber Public Safety personnel in order for an agency to use it. In addition, only administrative user who have been assigned the appropriate role with the custom forms privileges (including the "always edit" permission for custom forms) can create or edit custom forms, and only users who have been assigned roles with the custom forms privileges can use the forms.

- "Set Up Agency" below for more information on enabling the feature.
- "Set Up Roles" on the next page for information on setting up roles with custom form privileges.

Community Reporting, a new Online RMS 11.3.2 feature (for minor crime, tips, and other police-related events), leverages the power of Online RMS Custom Forms, allowing agencies to create and manage their publicly available forms.

- See "Community Reporting with Custom Forms" on page 273 for information on Community Reporting.

Set Up Agency

Caliber Public Safety personnel has the ability to enable the Custom Forms feature for an agency; once it is enabled, agency users with the proper permissions can give appropriate access to other agency users.

The Agency Profile displays available and enabled features in a read-only format.

This section is read-only.

Note: For instructions on accessing the Agency Profile refer to "Manage Agencies" on page 17.

Note: As of RMS 11.15, the Scheduling feature has been removed.

Set Up Roles

An administrator with the appropriate permissions must set up specific roles with permission to use Custom Forms. It is up to the agency as to which roles are assigned Custom Form privileges.

The administrator uses the following procedure to add Custom Forms rights to a role.

1. Access the Roles page and locate the Role you want to give Custom Forms rights to.

Note: For details on accessing the Roles page refer to "Roles" on page 77.

2. Click  in the **Actions** column in the same row as the role to open the *Edit Role* page.

Note: Never edit Roles that came with the software; make a copy of the Role then edit the copy as needed. For details on how to copy a Role refer to "Copy Role" on page 83.

Note: Beginning with RMS 11.15, the roles of CAL_ADMIN and CAL_MANAGER are no longer displayed on **Roles** page.

Compare?	Role Name	Role Description	Actions
<input type="checkbox"/>	COPY_DL_TEST	IA-52785	
<input type="checkbox"/>	COPY_USER_ADMIN	Role for User Admins	

3. Click the **Role Permission Categories** tab to open the *Role Permission Categories* page where you can add or remove permissions for the selected role.

Go Back Save

- Click **+** to add permissions from the available list on the right, or click **-** to remove permissions from that role on the left.

Note: Custom Forms permissions include anything with the prefix *User Form Admin*.

- Click **Save** to save changes.
- When changes are complete for this role, click **Go Back** to return to the *Roles* page.
- Log out or continue working in the Roles module as needed.

Form Administration

Click the **Administration** label to display the *Administration Home* page. From the *Administration Home* page, click the **Custom Forms** icon to open the *Form Administration* page.

Form Administration	
Create New Form	Create and design a new form
Upload a Form Design	Create a new form by uploading an XML design file. The layout of the fields will be determined by this XML.
Manage Forms	Preview / Edit / Download or Delete Forms.
Manage Custom Fields	Manage custom fields for various application screens.
Manage Sub Forms	View / Modify Sub Forms
Add Sub Form	Create a new Sub Form.
Manage Form Code Tables	Manage Form Code Tables Used By All Forms.
Form Delete Log	Show log of deleted forms, custom fields, and sub forms.

From here, an administrator can create a new custom form, upload a form design, manage forms, manage custom fields, manage sub forms, add sub form, manage code tables, and show the form delete log. When an administrator adds a new form, certain information is required, such as Name, Title, Default Security Level, Officer Entry, Roles, and Form Types. The agency administrator decides how to fill out the required fields. This information may be changed later if the administrator chooses to edit the forms.

Create (Add) New Form

Use the following procedure to create a new form.

1. From the *Administration - Custom Forms* page, click the Create New Form link to open the *Add Form* page as shown.

<div> <div>Caliber</div> <div>PUBLIC SAFETY</div> </div> <div> Administration ▾ Incidents ▾ Master Indices ▾ Records Management ▾ Forms And Reports ▾ Help ▾ </div> <div> Administration / Form Administration </div>	
Create New Form	Create and design a new form
Upload a Form Design	Create a new form by uploading an XML design file. The layout of the fields will be determined by this XML.
Manage Forms	Preview / Edit / Download or Delete Forms.
Manage Custom Fields	Manage custom fields for various application screens.
Manage Sub Forms	View / Modify Sub Forms
Add Sub Form	Create a new Sub Form.
Manage Form Code Tables	Manage Form Code Tables Used By All Forms.
Form Delete Log	Show log of deleted forms, custom fields, and sub forms.

Please start by entering basic form information. Once the form is saved, you will be able to design the forms fields. Note that the form will not be available to users until you publish and activate it.

2. Type a name for the form in the required **Title** field. This should be a name easily related to the form's function because it is what the user sees when searching for a form.
3. Type a brief description of the form in the optional **Description** field, including information for intended users about the forms purpose. The title is visible on the custom form within RMS but not on the printed form.
4. Type a header for the printed form in the optional **Print Header** field. The Printer Header appears only on the printed form.
5. Click in the **Restrict to Agency** field then select one or more agencies to give them the ability to view and edit the form. Usually this field is not used.
6. Click ▼ in the **Default Security Level** field and select to change the security level so that only users with a security level as high or higher than the selected security level can view and edit the form. The person who created the form can always view the form regardless of security level.
7. Click ▼ in the **Officer Entry** field and select the appropriate option. This selection determines whether an officer entry is required, optional, or unspecified when completing the form.

8. Check the **Review Required** box, if appropriate. A notification appears in a yellow box at the top of the *Submit for Review* page requesting a user review a PDF copy of the form before the creator submits it.
9. Check the **Restrict Edit** box, if appropriate.
10. Click in the **Roles** field and select one or more Roles to limit use of this form to those specific Roles.
11. Click in the **Form Types** field and select one or more Form Types to limit this form to specific Form Types.
12. Click **Save** to save.

The designer opens the new form in the Form Editor. "Form Editor" on page 253 for more information.)

The screenshot displays the 'Form Editor' interface with the 'Form Details' tab selected. The interface includes a top navigation bar with tabs: 'Form Details', 'Field List', 'Designer', 'Reports', 'Code Tables', 'Routing', and 'Status'. The 'Form Details' tab is highlighted with a red box. The main content area contains the following fields and controls:

- PUBLISH STATUS:** Not Published (in red text)
- ACTIVE STATUS:** Inactive
- TITLE:** Ang Test Custom Form 3
- DESCRIPTION:** Ang Test Custom Form 3
- PRINT HEADER:** Ang Test Custom Form 3
- RESTRICT TO AGENCY:** Click To Select
- DEFAULT SECURITY LEVEL:** Patrol Supervisor (dropdown menu)
- OFFICER ENTRY:** Officer is Required (dropdown menu)
- REVIEW REQUIRED:** ☒
- RESTRICT EDIT:** ☒
- ROLES:** CASE_SUPERVISOR (selected)
- FORM TYPES:** Vehicles (selected)
- FORM ADMINS:** (empty list)
- SELECTED FORM ADMINS:** Double Click To Remove
- RESTRICT VIEW ACCESS USERS:** (empty list)
- SELECTED USERS:** Double Click To Remove

A 'Save' button is located at the bottom center of the form editor.

Note: From the *Administration Home* page, you can click on the Custom Forms icon to open the *Form Administration* page then click the Manage Forms link to open the *Manage Forms* page at any time. From the *Manage Forms* page, you can edit, view, print, and/or delete forms.

Note: Forms are now configurable for a number of options using the check boxes that appear in either the *Create New Form* or *Manage Forms/Edit Form locations*. These include the options to require review, to make it possible (or not possible) to duplicate the form, restrict or allow editing, or to audit changes to fields (which makes edits to entries in form fields visible in the form of an edit history).

The screenshot shows a configuration panel with four options, each with a question mark icon:

- REVIEW REQUIRED**: ☒
- RESTRICT EDIT**: ☐
- ALLOW DUPLICATION**: ☐
- AUDIT FIELD CHANGES**: ☐

The **Publish Status** is listed in red text for forms that are not published.

Upload Form Design

Use the following procedure to upload a form design.

1. From the *Form Administration* page, click the Upload a Form Design link to open the *Upload Form* page as shown.

The screenshot shows the 'Form Administration' page. In the top right corner is a 'Go Back' button. Below it is a section titled 'SELECT A FILE' with a red arrow pointing to a 'Choose File' button. To the right of the 'Choose File' button is the text 'No file chosen'. At the bottom of this section is an 'Upload' button.

2. Click the **Choose File** button in the **Select a File** field to open the *File Explorer* window listing your local directories.
3. Navigate to the folder containing form design documents.
4. Click to select a file then click the **Open** button to pull the path into the **Select a File** field.
5. Click **Upload** to upload the file.

Manage Forms

Use the following procedure to manage forms.

1. From the *Form Administration* page, click the Manage Forms link to open the *Manage Forms* page as shown.

Form Administration / Manage Forms

You can

If you choose to add fields from existing forms, the following forms are available:

- Incident Offender
- Incident Victim Person
- Incident Offense
- Field Arrest
- Field Contact
- Case
- Warrant
- Citation
- Field Arrest Vehicle
- Incident Header
- Calls For Service
- Impound
- Court Paper
- Fleet Vehicle
- Case Activity
- Criminal Complaint

2. Click the appropriate  Add...Fields link to open a page similar to the one shown.

3. Select an agency from the drop-down list if not already populated.
4. Click **Create Fields** to display a page similar to the one shown.

5. Click the  Add Fields link to open the *Add Fields* page as shown.

A screenshot of the 'Add Fields' page. At the top right are two buttons: 'Go Back' and 'Add Another Field'. The main area contains three columns of form configuration options. The first column, labeled 'FIELD TYPE', has a dropdown menu currently showing '-Select-'. The second column, labeled 'LABEL', has a text input field. The third column, labeled 'FIELD ID', has a text input field. Below these are two rows of checkboxes: 'REQUIRED' with an unchecked checkbox, and 'DISPLAYED' with a checked checkbox. At the bottom is a large text area labeled 'HELP TEXT'. At the very bottom of the page are two buttons: 'Remove Field' and 'Save'.

6. Complete the fields and select appropriate buttons and click **Save**.
7. Click **Add Another Field** to add another field, if needed.
- Note:** If you want to remove the newly added field, click the **Remove Field** button.
8. Repeat Steps 6 and 7 until you have added all the fields needed.
9. Click **Go Back** to return to the previous page and click **Exit from Editor**.
10. Optionally click the **Designer** tab to open the Form Designer. This is used to position the fields on the form. For more information on the Form Designer, refer to "Designer Tab" on page 261.
11. Optionally click on the **Code Tables** tab to add a code table.
12. Click on the **Status** tab to activate or inactivate the form.
13. Click **Exit form Editor** to return to the *Custom Fields* home page.
14. Click **Go Back** to return to the *Form Administration* page.

Upload Custom Fields

1. From the *Form Administration* page, click the Manage Custom Fields link to open the *Custom Fields* page.

Form Editor

The Form Editor opens as shown below, displaying the **Form Details** tab, when you save a new form.

The screenshot displays the 'Form Editor' interface with the 'Form Details' tab selected. The interface is organized into a top navigation bar, a right-hand action bar, and a main configuration area. The 'Form Details' tab is highlighted in red. The right-hand bar contains 'Exit Form Editor' and 'Preview' buttons. The main area contains several sections: 'PUBLISH STATUS' (Not Published), 'ACTIVE STATUS' (Inactive), 'TITLE' (Ang Test Custom Form 3), 'DESCRIPTION' (Ang Test Custom Form 3), 'PRINT HEADER' (Ang Test Custom Form 3), 'RESTRICT TO AGENCY' (Click To Select), 'DEFAULT SECURITY LEVEL' (Patrol Supervisor), 'OFFICER ENTRY' (Officer is Required), 'REVIEW REQUIRED' (checked), 'RESTRICT EDIT' (checked), 'ROLES' (CASE SUPERVISOR), 'FORM TYPES' (Vehicles), 'FORM ADMINS' (empty), 'SELECTED FORM ADMINS' (empty), 'RESTRICT VIEW ACCESS USERS' (empty), and 'SELECTED USERS' (empty). A 'Save' button is located at the bottom center.

The Form Editor also displays when you select a form to edit from the *Manage Forms* page after accessing it from the *Form Administration* page.

Note: The only field that cannot be changed once a custom form is published is the **Restrict to Agency** field. All other fields may be modified as long as the form's status is set to *Inactive*.

The Form Editor has seven tabs:

- The **Forms Details** is shown above. It opens upon initial creation of a form when a user saves a new form from the *Add Form* page. It also allows users to change form details after a form has been created.

- The **Number Generation** tab allows the user to configure number generation formats much like the number generation in other modules in Edit Agency. It also allows the user to enable or disable automatic number generation for custom forms. When enabled, a new Instance Number field containing the generated number displays on the view and edit screens. This number is unique to each customer form.
- The **Field List** tab displays a list of custom fields to be used on the form. From this tab, you can add additional fields and edit existing fields.
- The **Designer** tab is used to position the fields on the form.
- The **Reports** tab is used to specify a report for a form type with which the form is associated, including Incidents, Field Arrests, and Contacts.
- The **Code Tables** tab displays a list of Code Tables that the form uses.
- The **Routing** tab is used to specify the who, what, where, and when of form routing details. It also has a setting to allow the creation of an incident during the review process.
- The **Status** tab is used to publish and activate/deactivate forms. The current status of a form is always displayed on this tab.

Click on the **Exit Form Editor** button on the top right to exit the form editor at any time.

Form Details Tab

The **Form Details** tab of the Form Editor is used to manage the form title, define what prints as the header on the printed copy, manage form security, require review, and more.

Use the following procedure to complete the information on the Form Details tab.

1. Enter a unique **Title** for the custom form.
2. Optionally, enter a **Description**. This displays to users who are viewing or editing an instance of this form.
3. Optionally, enter the **Printer Header**. This appears on the top of the first page when printing this form.
4. Optionally, **Restrict To Agency**. Leave blank, or select as many as needed.
5. Select the **Default Security Level** from the list provided.
6. Select the **Officer Entry** from the list provided.

7. Optionally, check the **Review Required** box. A notification appears in a yellow box at the top of the *Submit for Review* page requesting a user review a PDF copy of the form before the creator submits it.
8. Optionally, check the **Restrict Edit** box to restrict the creator of an instance of this form from putting it back into edit mode once it has been approved and finalized. Only a user with special permissions is allowed to do so.
9. Select one or more **Roles**.
10. Select one or more **Form Types**.

Note: If you wish to use this form without having to attach it to a specific record, select **Freestanding Forms** from this list. This allows users to add new instances of this form in the Forms & Report page.

11. Optionally, select **Form Admins**. Users added to this list can administer this form regardless of agency.
12. Optionally, select **Restrict View Access Users**. Only users added to this list can view, print, and search on this form.
13. Click **Save**.

Number Generation Tab

The **Number Generation** tab of the Form Editor is used to configure number generation formats (a unique number) much like the number generation in other modules in Edit Agency, or to enable or disable automatic number generation. When enabled, a new Instance Number field containing the generated number displays on the view and edit screens.

Enable Number Generation

Use the following procedure to enable number generation.

1. From the Form Editor, click on the **Number Generation** tab.

Form Details **Number Generation** Field List Designer Reports Code Tables Routing Status

Enable Number Generation for this form

☐

Save

2. Check **Enable number Generation for this Form** to display additional fields.

EFFECTIVE DATE
10/21/2020

END DATE

Save

- a. Select a **Format** from this list.

Note: If the format you want is not listed, refer to the Number Generation tab of "Agency Profile" on page 17.

- b. Enter the **Next Number**; the beginning number of this series of number. For example, if you want the beginning number to be 1, enter 1.
- c. Enter the **Place Holder**. It could be letters or perhaps a hyphen (-). For example, if the number format you are using is YYYYIR000 and place holder is CF, then CF replaces the IR in the format.
- d. Select the **Effective Date**.
- e. Select the **End Date**, if applicable.
- f. Click **Save**.

Note: When Number Generation is enabled, a read-only field with the name **Instance Number** appears on the form containing the auto-generated number upon saving the form.

Note: The **Instance Number** also prints on standard Custom Form printouts.

Disable Number Generation

Use the following procedure to disable number generation.

1. From the Form Editor, click on the **Number Generation** tab.
2. Uncheck **Enable Number Generation for this form**.
3. All formatting fields no longer appear.
4. Click **Save**.

Field List Tab

The **Field List** tab of the Form Editor is used to create fields to be used on a custom form.

Public facing forms support the following *Custom Form Field Types*:

- Date
- Date & Time
- Text - Single Line
- Text - Multiple Line
- Checkbox
- Radio Buttons
- Select LOV - Single Value
- Auto Complete

For more information on *Public facing forms*, refer to “Community Reporting with Custom Forms” on page 273.

Use the following procedure to set up fields for a form. Keep the above in mind if you are creating a *Public facing form*.

1. From the Form Editor, click on the **Field List** tab to display the **Name Form**.

Save

- Type values in the **Label** field and select to complete the **Field Type** field.

Note: Additional parameters may appear based on the chosen Field Type. For example, if you select the Field Type *LOV*, the required field **Field Code Type** appears and the user must select a value. You may flag a field on a custom form and have it displayed as an additional detail when the custom form is displayed in various tables throughout the application. These pages include My Forms (initial and rejected), Forms for Review, Form Search Results, and Notifications. Sub Form fields cannot be set as additional details.

- Enter a value in the **Field ID**.
- Check the **Required** box if this field is to be a required field.

6. Check the **Displayed** box if this field is to be displayed on the form on screen.
7. Select a **Comment**.
8. Add content to the **Help Text** box if you want to provide instructions about completing this field.
9. You can also perform the following tasks:
 - Click the Add Another Field link to add additional fields so that you can quickly add multiple fields without having to leave the page.

The screenshot shows a web interface for configuring custom form fields. At the top right, there are two buttons: 'Go Back' and 'Add Another Field'. Below these are two identical field configuration cards. The top card has a 'Remove Field' button at its bottom. The bottom card is outlined with a red border and also has a 'Remove Field' button. Each card contains the following fields:

- FIELD TYPE**: A dropdown menu with '-Select-' selected.
- REQUIRED**: A checkbox that is currently unchecked.
- DISPLAYED**: A checkbox that is checked.
- COMMENT**: A dropdown menu with 'Don't Specify Comment' selected.
- HELP TEXT**: A large text area for entering help text.

At the bottom of the interface is a 'Save' button.

- Click **Remove Field** to remove a field.
10. When the required fields have been filled out and all the information is correct, click **Save** to save the new custom fields.
 11. The **Field List** tab displays with the new field listed which has **No** displayed in the **Positioned** column.

Field ID	Label	Field Type	Positioned	Required	Displayed	Comment	Actions

RANDOM_FIELD	Random Field	Text - Single Line	Yes	No	Yes	Don't Specify Comment	 

Showing 1 to 2 of 2 entries

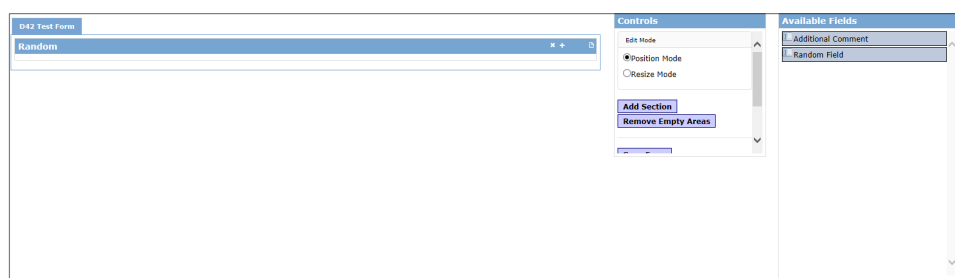

Designer Tab

The fields that were set up on the **Field List** tab are positioned and sized on a form using the **Designer** tab of the Form Editor. The **Designer** tab allows you to layout a form using a drag/drop user interface.

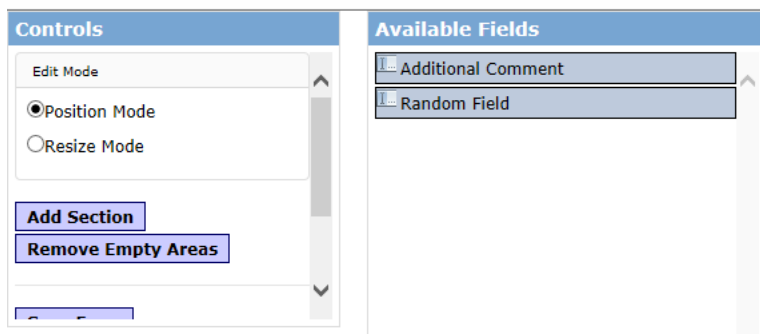

- Use the Position Mode to design the visual layout of a form.
- Use the Resize Mode to adjust the position and size (width) of fields in a row based on a percentage of the total form width.

Use the following procedure to position fields on a form.

1. From the Forms Editor, click the **Designer** tab to open it.
2. Click the Launch Form Designer link to display the form designer page as shown in the example.

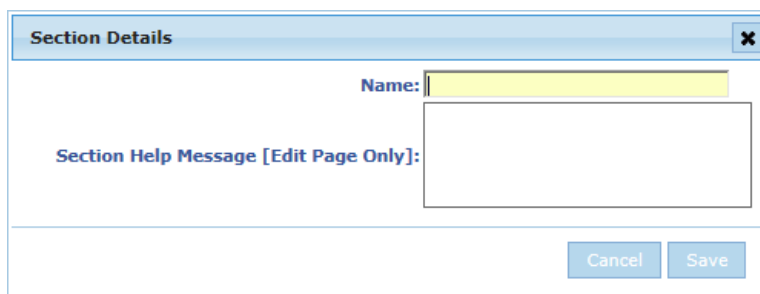

Note: This page does not adjust to the size of the browser window. Scroll to the right to see the **Available Fields** list.

You can drag and drop the **Controls** pane and the **Available Fields** list anywhere on the screen. For example, you might want to drag the **Available Fields** list so that it is located below the **Controls** to make it easier to see all the elements of the screen at once. However, should you close the Form Designer then reopen it, the elements appear in their default positions once again.

- Click **Add Section** in the **Controls** pane to display the *Section Details* window as shown.

- Type a name for the section in the **Name** field and a **Section Help Message**. Click **Save** to redisplay the page as shown in the example.

- Adjust a section as follows:
 - Click **+** in the far right of the new section to add a row, then drag and drop one or more fields into the row.
 - Click **X** to remove a section.
 - To delete a row from a section, click **X** in to the left of the row in the left margin of the section.

- Rows can hold multiple fields horizontally; however, if you want to add fields vertically, you must add another row.
 - Both sections and rows can be repositioned. Use the drag and drop method or the up and down arrows.
6. Repeat Steps 3 through 5 to add and adjust as many sections as you need for the form.

Note: You can remove empty sections if you decide you need fewer sections. You can move sections and/or fields as needed by dragging and dropping, and you can revert at any time to return to the form to the state it was at the time you last saved.

7. Click **Save Form** at any time to save the work you have. If the form is not complete, a *Design Validation* box appears giving you the option to save or cancel your design.

- It is important to save often to avoid losing work.
 - If needed, the **Revert** button allows you to return the form as it was the last time you saved.
 - The **Save Form** button label displays in red if any changes have been made since the last save.
8. Click the **Resize Mode** radio button and adjust the horizontal alignment of fields as needed.

Fields appear where you can enter alignment values. The values in each box represent a percentage of the total form width. To increase the width of a field or label, type a higher number in the box; to decrease the width of a field or label, type a lower number.
 9. When you think the form is complete, save and click **Exit Designer** to return to the **Designer** tab of the Forms Editor.
 10. Click **Preview** to review your form.

- Use the **Switch to...** button to toggle between **View Mode** and **Edit Mode**.

- Click the **Print** button to open a pdf version of the form to see it as it will appear when printed.
- If the form needs changes, click **Exit Preview** then click the Launch Form Designer link to display the form designer page again where you can make changes.

Reports Tab

The **Reports** tab of the Form Editor is used to specify a report for any Form Type with which a form is associated. Form Types include Incidents, Field Arrests, Field Contacts, and Vehicles. Available options are based on Form Type selections made on the **Form Details** tab. Multiple types may be associated with a form simultaneously.

You have the ability to generate form letters and reports by integrating fillable PDFs.

Use the following procedure to download .jrxml template files.

1. From the Form Editor, click the **Reports** tab to open it.

The screenshot shows the 'Reports' tab selected in the Form Editor. The interface includes a top navigation bar with tabs: Form Details, Field List, Designer, Reports (highlighted), Code Tables, Routing, and Status. On the right, there are buttons for 'Exit Form Editor' and 'Preview'. Below the navigation bar, a message states: 'For each type this form is associated to, you may specify reports for it.' followed by a link 'Generate Domain for ALL form types'. The main content area is divided into sections for different form types: Cases, Citations, Court Papers, Field Arrests, Field Contacts, and Freestanding Forms. Each section contains a list of actions: 'Generate Domain for [Form Type]', 'Get [Form Type] Report Template', 'Create New [Form Type]', and 'Upload Fillable PDF'.

Report Types that were selected on the **Form Details** tab are reflected here.

Note: The link titles that appear in blue vary and may not appear exactly as shown in the example.

2. Use the [Get...Report Template](#) links to download .jrxml template files of the selected association types. Once they are downloaded you can save the templates then edit them as needed.
3. Optionally use the [Upload Fillable PDF](#) link to locate and upload an existing fillable PDF file that has at least one fillable field on it.

Note: The agency is responsible for procuring the appropriate PDF license that supports the creation of fillable PDFs.

- Click **Browse** to locate the PDF file, then click **Upload**.

- Enter a report **Name** and select **Default** to display this report on the Custom Form for users to print. Multiple fillable PDFs can be associated to one Custom Form. If only one PDF exists, it prints by default regardless if the **Default** option is checked.
- Click the [Add Field](#) link to map the Custom Form fields to the Fillable PDF fields.

A Format String (Token) can be entered for how the data should print, or leave it blank for the default.

For example, for a person the string {FULLNAME} {DOB} could be specified. Labels may also be included by entering the string {TOKEN|Optional label}.

Click on the Blue Info Bubble to view available format options.

Note: Tokens are case sensitive.

- Optionally use the individual Generate Domain for... links to select the fields on which to report.

Note: Click the Generate Domain for ALL Form Types link to generate them all at once.

- Optionally select agencies on the Configuration tab to include in the report. If no agencies are selected, the report includes all agencies.

Go Back

Configuration D42 Test Form

Select which fields you would like to report on. The page is organized based on the form and sub forms. One tab will be displayed for the main form, and a tab for each sub form will be displayed.

For fields which have comments enabled, you may also choose to report on the comments.

For more complex fields such as master index people, you will have to select exactly which information you want displayed.

Important things to remember

- The more fields you select, the slower the report can get. Only select what is absolutely needed. Remember you can create multiple domains for the same form.
- The domain created will only be valid for this schema you are currently in. If you want to create a domain for the exact same form in a different schema, you will have to log into the RMS on that schema and repeat this process

Below you may select which agencies will be reported on. If selected, the domain will be restricted to only these agencies forms.

RESTRICT TO AGENCY

× Ang Police Department × Indiana State Police |

Generate

- Click on the second tab and select the fields to include. The title of the second tab is the title you gave the report.

Go Back

☒ Include Comments

☐ Random Field

Generate

- Click **Generate** to generate and download an XML file.
 - In the pop-up window click **Save** to save the XML file to your computer or network, or click **Open** to view the file.
 - Click **Go Back** to return to the previous window.
- Use any Create New... link to open the *Add Report* page as shown.

The screenshot shows the 'Add Report' form with the following fields:

- Report Type:** Custom Form Report (read-only)
- Report Name:** (empty text box)
- Description:** (empty text area)

Below the form fields, it states: "This report will be associated with the **D42 Test Form** custom form."

At the bottom are buttons for "Save" and "Go Back".

- The **Report Type** field always has the value *Custom Form Report*. This field value cannot be changed.
 - The **Report Name** field is for a name of your choosing used to differentiate between multiple reports of the same report type.
 - The **Description** field allows you to add a description to define the report's purpose.
 - At the bottom of the page is a reminder of the form with which this report is associated.
6. When you have completed the fields, click **Save** to open the *Edit Report* page as shown in the following example.

The screenshot shows the 'Add Report' form with the following fields filled in:

- Report Type:** Custom Form Report (read-only)
- Report Name:** October Incidents
- Description:** This is a list of incidents reported in October 2018.

Below the form fields, it states: "This report will be associated with the **D42 Test Form** custom form."

At the bottom are buttons for "Save" and "Go Back".

7. If needed, make changes and click **Save**.
8. Click **Exit** to return to the Form Editor as shown in Step 1 with the new report listed in the appropriate grid.

Code Tables Tab

The **Code Tables** tab of the Form Editor is used to list code tables used by the form for specified lists of values (LOV) fields, or pick lists, fields and to add code tables.

Use the following procedure to add and edit code tables associated with a form.

1. From the Form Editor, click the **Code Tables** tab to open it.

If the form has been set up to use one or more code tables for LOVs fields, the tables are listed here. The **Code Table ID** and, if entered, the **Description** of each table display, and the edit icon  in the **Actions** column provides the ability to edit the table.

2. To add a custom code table, continue as follows:
 - Click the Add Code Table link to open the *Code Table* page as shown.

- Complete fields as follows:
 - **Table Identifier** - Enter a label to assign to the code table to differentiate it from other code tables. This label must be all upper case alpha-numeric characters with no spaces. Underscores are allowed. `_CS_` must be added to the label as a prefix to conform to the naming convention for code tables. **Note:** This is a required field, and the record is not saved properly without a valid label.
 - **Description** - Enter a description of the custom code table.

- **Sort Alphabetically** - Check the box if you want codes to be sorted alphabetically regardless of how they are entered.
 - Click **Save**.
3. To add a code to the table, continue as follows:
- Click Add New Code to open a **Code** field, a **Label** field, an **Active** box and a delete icon across the bottom of the page as shown.

Go Back

Save

+ Add New Code

- Complete the **Code** and **Label** fields.
 - Click **Save**.
4. To edit a code table, click  in the **Actions** column (see example in Step 1 above) to display the *Code Table* page.

Note: Code tables can be used by more than one form. A list of forms that use this code table display in the yellow banner in the middle of the page.

5. Continue as follows:
- Make changes to any field or box except the **Table Identifier** field. To change this value, you must delete the table and start over.
 - Use the delete icon to delete any unneeded codes.
 - Click Add New Code to add a new code. (See Step 3.)
 - When changes are complete, click **Save**.

Routing Tab

Custom forms can be routed in a way similar to Incident Report routing. Notifications are sent to designated users, roles, and/or - in a statewide organization - agencies. From the Form Editor, the administrator can set up one or more levels of routing as needed, entering comments that are included in the notifications sent to routing recipients.

Use the following procedure to set up routing for a custom form.

1. From the Form Editor, click the **Routing** tab to open the tab as shown.

The screenshot shows the Form Editor interface. At the top right are buttons for 'Exit Form Editor' and 'Preview'. Below these is a horizontal tab bar with the following tabs: 'Form Details', 'Number Generation', 'Field List', 'Designer', 'Reports', 'Code Tables', 'Routing' (highlighted with a red box), and 'Status'. Below the tabs is a checkbox labeled 'Enable Routing For This Form' which is currently unchecked. To the right of the checkbox is a 'Save' button.

2. Check the **Enable routing for this form** box to enable and display the tab as shown.

The screenshot shows the Form Editor interface with the 'Routing' tab selected and highlighted with a red box. The 'Enable Routing For This Form' checkbox is now checked. To the right of the checkbox are buttons for 'Add Level' and 'Save'. Below the checkbox is a text instruction: 'Use this screen to add/edit as many route levels as you would like. When you are done, click the save button'. Below this instruction is a table with the following columns: 'Name', 'Options', 'Agencies', 'Roles', 'Users', and 'Actions'. The table currently displays 'No Levels To Show'.

Note: If routing is not enabled for a form, review submission is not required.

Note: Multi-tier routing has been added to route a form through multiple levels of review.

3. Select the **Add Level** button on the right to open the *Route Level* form.

4. In the **General Route Options** section:
 - a. Check the **Require Comment On Submission** box if you want to require a comment when the user submits it.
 - b. Check the **Disable Addition of Users** box if you want to prevent users from adding additional users.
 - c. Check the **Disable Removal of Users** box if you want to prevent users from removing users.
 - d. Check the **Disable Addition of Roles** box if you want to prevent users from adding additional roles.
 - e. Check the **Disable Removal of Roles** box if you want to prevent users from removing roles.
 - f. Check the **Require One User** box to require the selection of a user at time of route generation.
 - g. Check the **User may not cancel next level (Does not apply to first level)** box if you do not want users to cancel the next level.
5. In the **User Route Options** section, specify which users are to receive notifications. Click into the **Add User** box and begin typing a user's name, then select the appropriate user

from the list. The selected user appears in the **Selected Users** box automatically. **Double-click** on a **Selected User** to remove them from the selected list.

6. In the **Role Route Options** section establish which users are to receive notification by role.
 - a. Choose **Roles**.
 - a. Choose **Agencies**.

Note: Statewide organizations also have the ability to choose route to specific agencies. If no agency is selected, the form automatically routes to the form creator's agency.

7. Click **Ok** to add the route to the Routing tab.

Name	Options	Agencies	Roles	Users	Actions
Level 1	Comment Required: Yes Disable Add: No Disable Remove: No Can Cancel: No	District 21, Toll Road - SC District 42, Versailles	LEA_CLERK OFFICER OFFICER_SUPERVISOR	Benjamin (cid) Harrison Ralph Lauren	<input type="button" value="Ok"/> <input type="button" value="Cancel"/>

Note: Clicking **Ok** creates your route level only. To save your changes to the database, you must also click the **Save** button when finished adding route levels.

8. Optionally, click the **Add Level** button again to add an additional level, and repeat until all desired levels are complete.
9. Optionally, check the **Allow Create Incident During Review...** checkbox.

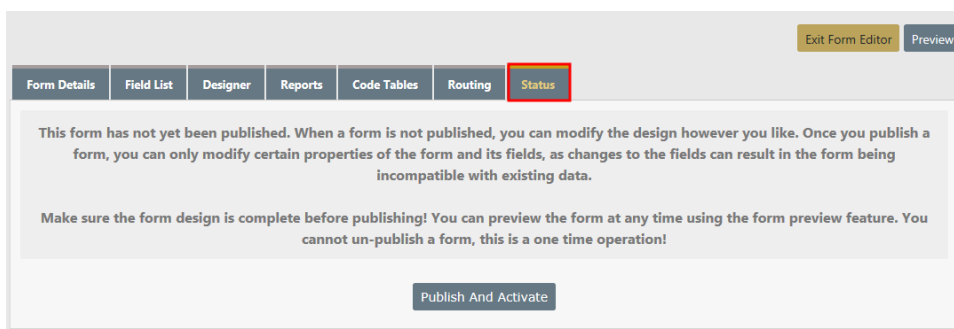

Name	Options	Agencies

Checking this box allows users with appropriate permissions to create an incident during the form review process.

10. Click **Save** to commit your changes to the database.

Status Tab

From the Form Editor, click the **Status** tab to open it. The **Status** tab is used to publish and activate the form. Current status of the form is always displayed on this tab. It is important that the form is 100% complete and ready to be used before publishing it because some details cannot be changed after the form has been published.

The **Publish and Activate Form** button is available only if the form has not yet been published. Click it to set the Published Status to *Published* and the Active Status to *Active*.

The following buttons appear once the form has been published:

Community Reporting with Custom Forms

In response to COVID-19, Caliber Public Safety is offering a new product feature with Online RMS 11.3.2 to support **Community Reporting** of minor crimes, tips, and other police-related events. The **Community Reporting** feature leverages the power of Online RMS *Custom Forms* for your agency to embed a public form in an existing website using only a couple lines of HTML code.

With this enhancement, your agency can create their **Community Reporting** public forms using the *Custom Forms* module and make the forms available to the public via your agency's website.

Benefits of **Community Reporting**:

- Promote social distancing by reducing officer to public interactions for minor police reports.

- Better service your community by reducing non-essential contacts to ensure officers are available to provide help when emergencies arise.
- Keep officers on patrol and protecting communities by offering an alternate method for the public to report minor police reports without the need to dispatch an officer.

This section provides instructions on how authorized Caliber Online RMS users administer and configure the **Community Reporting** feature.

Agency Responsibilities

The following are the responsibilities of the agency when requesting the **Community Reporting** feature and implementing *Public Custom Forms*:

- Contact your *Caliber Customer Success Manager (CSM)* or enter a support request to sign-up for **Community Reporting**.
 - Caliber will add the **Community Reporting** (*Public Custom Form*) feature to your agency setup.
- Agency administrators are responsible for creating and managing *Custom Forms* or assigning privileges to other agency personnel to create and manage *Custom Forms* for public availability.
- Maintain and manage your agency's existing public-facing agency website.
- Modifications to your agency's website to add **Community Reporting**.
 - Caliber recommends that a system or website administrator perform the modifications.

Once your agency has access to the **Community Reporting** feature, follow these steps to implement *Public Custom Forms*:

1. "Permissions and Settings" on page 275.
2. "Number Generation" on page 276.
3. "Maintenance Values" on page 278.
4. "Make Custom Forms Publicly Available" on page 280.
5. "Add Publicly Available Forms To Your Website" on page 285.

For an example of what the implemented *Public Custom Form* looks like on the website, refer to “Sample Public Custom Form Website Display” on page 288.

Note: If you are interested in using the **Community Reporting** feature or have questions about creating and managing *Custom Forms* for *Public Availability*, please contact your CSM or Caliber Support.

Permissions and Settings

There are two permission categories for public form access and management:

- *User Form Admin - Make Publicly Available*
- *User Forms - Create Incident Form From*

User Form Admin - Make Publicly Available

This permission category controls which Online RMS user roles have permissions to make a *Custom Form* publicly accessible (e.g. **Manage Public Access** button for *Custom Form*).

The *Agency Admin* role has this new permission category by default. Assign the **User Form Admin - Make Publicly Available** permission category to other roles as needed.

Note: For more information on Permission Categories, refer to “Permission Categories” on page 175.

Note: For more information on Roles, see “Roles” on page 77 .

User Forms - Create Incident From Form

This permission category controls whether the **Create Incident** option appears to Online RMS users when reviewing publicly available *Custom Forms* submitted by the public.

Permission Description

User Forms - Create Incident From Form

COMMENT

☒ **CREATE INCIDENT**

Save

Number Generation

The **Create Incident** option from publicly available *Custom Forms* requires that your agency has an active *Number Generation format* configured.

Note: For more information on the **Create Incident** option, refer to “Permissions and Settings” on page 275.

If your agency does not have an active *Number Generation format* configured, select one of the following options to generate an incident report from a publicly available custom form:

Generate Incident Number from Online RMS (Recommended)

1. On the Number Generation tab of the *Agency Profile*, create a *Number Generation format* with **Incident** as the *Type*.

Note: For detailed instructions on creating a *Number Generation format*, refer to “Add Number Generation” on page 23.

2. Once configured, users see that the Report Number auto-generates when selecting **Create Incident** from a publicly available custom form.

Manually enter Incident Number from CAD

This option is for agencies that use a CAD System to generate Incident and Case Report numbers for Online RMS.

Note: With this option, you need to request a case number from CAD or self-generate from Caliber Mobile.

1. An additional setup is required to configure Online RMS to avoid the creation of an RMS incident report from a CAD spill. This prevents the Case number from generating an incident report in Online RMS before the officer has a chance to generate the incident report from the publicly available *Custom Form*.
 - a. In *Caliber CAD*, create a **Tracking Number Generator for Community Reports Submitted by the public** and configure a **Type Code**.
 - b. In *Online RMS*, update **XML Doc Options** for the **CAD Interface** to ignore the **Case Tracking Number generator Type** configure for *Community Reports*. Option code of **IGNORE_INCIDENT_TYPES**.

Note: If you need assistance, please call *Caliber Customer Support*.

2. In *Online RMS*, create a *Number Generation format* on the Number Generation tab of the *Agency Profile*, following [#GenerateIncidentNumberFromRMS](#) with two exceptions:
 - a. Select a **Format** that matches the **Tracking Number** format configured in *Caliber CAD*.
 - b. Enter **0** (zero) in the **Next Number** field.

- Once configured, users are required to type the number provided from *Caliber CAD* when selecting **Create Incident** from a publicly available custom form to generate the incident report in *Online RMS*.

EJS_CODES

- CODE_TYPE = FORM_REJECT_REASON_CODES
 - Out of the box values: Bad Address

Maintenance Values

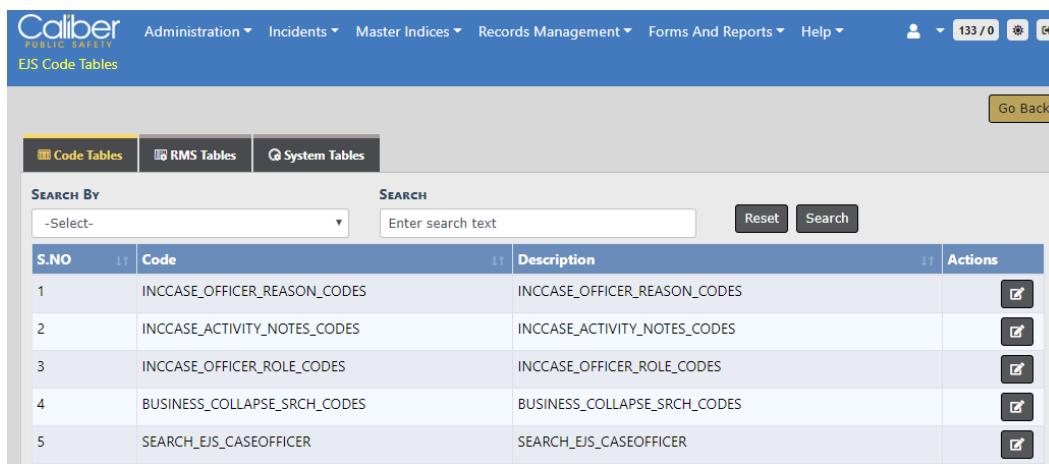

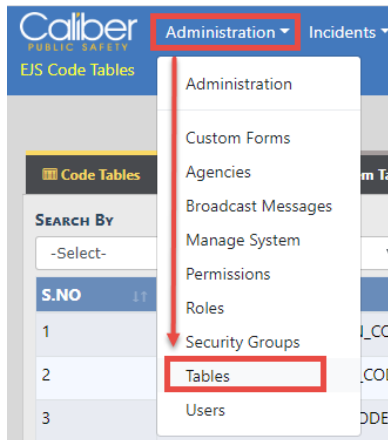

Set the Default Incident Type for Incident Reports

For agencies using **Incident Report Types**, a new **Agency Maintenance** setting is available to default the **Incident Type** for Incident Reports created from a publicly available *Custom Form*.

Schema Maintenance Values		
Show 10 entries		
Keyword	Value	Description
FORM_INCIDENT_DEFAULT_TYPE	BLANK	Default Incident Type When Creating an Incident from a Custom Form. BLANK is used as a default value when no setting is desired

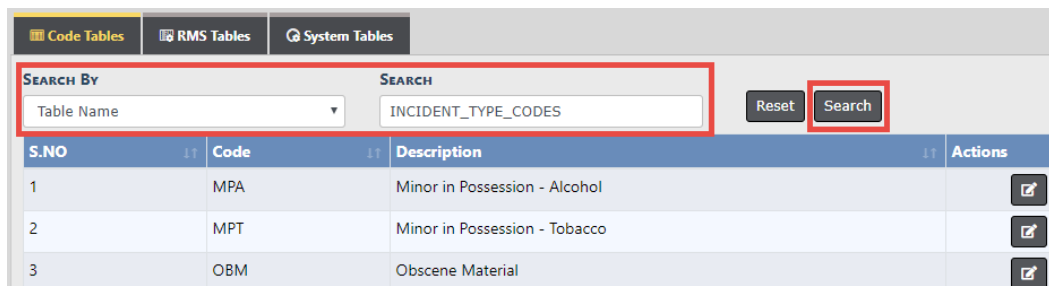

With appropriate permissions, you can apply settings by following these steps:

1. Click on **Administration** on the top menu, then click **Tables** to open *EJS Code Tables*.

There are three tabs. The *Code Tables* tab opens by default.

2. Select **Table Name** as *Search By*, enter **INCIDENT_TYPE_CODES** in the *Search text box*, then click the **Search** button to display the **INCIDENT_TYPE_CODES** list.

3. Locate the **Incident Type** or **Code** you want to associate with the *Public Custom Form*.
 - a. If the **Incident Type** *exists*, make note of the Code and proceed to the next step.

- b. If the **Incident Type** *does not exist*, and you have the proper permissions, add a new **Incident Type**, then proceed to the next step.
4. Enter the **Code** as a *Maintenance Value*.
 - a. Access the *Maintenance Value* table through the Agency Profile.
For instructions, refer to “Access Maintenance Values” on page 346.
 - b. Click the **Add Maint Value** button to open the *Add Maintenance Value* dialog box.

- c. In the *Add Maintenance Value* dialog box, select the **Keyword** *FORM_INCIDENT_DEFAULT_TYPE*, and enter the Code as the **Value**.

- d. Click **Save**.

Make Custom Forms Publicly Available

Community Reporting leverages the power of Online RMS *Custom Forms*, allowing agencies to create and manage their publicly available forms.

Follow these steps to make *Custom Forms* publicly available:

1. Create a *Custom Form* containing fields you wish to present to the public.

For more information on *Custom Forms*, refer to “Custom Forms” on page 237.

Publicly Displayed Data

In addition to *Custom Form* data fields, the following appears on the agency's web page when the *Custom Form* displays to the public:

- Custom Form **Title** and **Description** fields from the *Form Details* tab.

- **Help Text** for each Field Type.

- Form **Section Groups** from the *Designer* tab.

2. Configure **Default Security Level**, **Roles**, and **Form Types** on *Form Details* tab.

- Set the **Default Security Level** at a level equal to the lowest level of the user security you want to access the form.

- b. Set the user **Roles** that will have access to view the *Public Custom Forms* within Online RMS. It is suggested these **Roles** be the same as **Roles** configured on the *Routing tab* to *Review Forms* submitted by the public.

The screenshot shows a 'ROLES' configuration window with a search icon. Below the search bar, there are two buttons labeled 'OFFICER' and 'OFFICER_SUPERVISOR', both with an 'x' icon, indicating they are selected.

- c. For *Publicly Available* forms that you want to *Create Incidents* from the submission, you must set the **Form Types** to **Freestanding Forms** and **Incidents**.

The screenshot shows a 'FORM TYPES' configuration window with a search icon. Below the search bar, there are two buttons labeled 'Freestanding Forms' and 'Incidents', both with an 'x' icon, indicating they are selected.

3. Configure **Routing** on the *Routing* tab.

- a. Check the **Enable Routing for this form** checkbox.

The screenshot shows a tabbed interface with 'Routing' selected. Below the tabs, there is a section titled 'Enable routing for this form' with a checked checkbox.

- b. The **Routing Options** checkboxes do not apply to publicly submitted forms. Checking these do not have an impact on publicly available *Custom Forms*.

The screenshot shows a 'Routing Options' configuration window. It contains three sections, each with a title and an unchecked checkbox: 'REQUIRE COMMENT ON SUBMISSION', 'MANDATORY - USER MAY NOT REMOVE THE SELECTED USERS/ROLES', and 'USER MAY NOT ADD ADDITIONAL USERS/ROLES'.

- c. Select **User Routing Options**. Select individual users to notify when a public form is submitted.

The screenshot shows a 'User Routing Options' configuration window. It has an 'ADD USER' input field and a 'SELECTED USERS' list. The list contains two entries: 'Benjamin (cid) Harrison' and 'Ralph Lauren'. A note says 'Double Click To Remove'.

- d. Select **Role Routing Options**. Select user **Roles** to notify when a public form is submitted.

Role Routing Options

ROLES

☒ LEA_CLERK
 ☒ LEA_RECORDS_MGMT
 ☒ OFFICER
 ☒ OFFICER_SUPERVISOR

e. Select **Agencies**.

Leave blank to route to the agency defined on the Token for the public available *Custom Form* (**recommended**).

Add an agency if you wish to route to a different agency than designated on the Token for the public available *Custom Form*.

AGENCIES No Agency Selection will route the form to the agency it was created in.

Click To Select

4. Configure **Manage Public Access** on the *Status* tab.

a. Select the **Manage Public Access** button.

Note: This button only appears for users having a role with the *User Form Admin - Make Publicly Available* permission.

Form Details | Field List | Designer | Reports | Code Tables | Routing | **Status**

This form is published and active. If you wish to make changes to the forms fields or layout, you must first deactivate it. The form will not be deleted, rather it will be made unavailable to users while you make changes to it. Once you are done making changes, you can activate the form once again. You can also set the form to view only mode, which means forms already entered can be viewed and printed, but new forms cannot be added.

Deactivate | Set to View Only
Manage Public Access

b. Select the **Create Token** button on the upper right.

c. Select the **Agency** as the agency to **Save** for this *Custom Form*.

The form routes to this agency, unless a different agency is specified on the *Routing Options* tab.

d. Enter **Allowed Domain(s)**.

This is the domain of the agency's website, where the public form is available. For example, if your website is www.myagency.com, you would enter *www.my-agency.com* for **Allowed Domains**.

- e. Click **Save**.
- f. A unique **Token ID Number** generates for the agency and form combination upon saving.
- g. **Copy** the Token by **using your mouse to highlight the Token**, then pressing **Ctrl + C** keys on your keyboard at the same time.

Agency	Token
Caliber Public Safety PD	a21e1d1d-e578-4fe1-a57a-ed7868173b46

- h. For **multi-tenant sites or agencies** configured as an Organization with sub-agencies, the same *Custom Form* can be made publicly available on different websites or web pages within the same website to route public submissions of the form to various agencies.

Select the **Create Token** button and enter the information to generate a unique Token for each agency and website/page combination, then enter the Token on the appropriate web page.

When the public completes and submits the form from your website, a *Custom Form* submission generates for the agency associated to the Token ID used to embed the public form on that web page.

Agency	Token
Burlington Police Department	59c40c00-ea85-40a6-96d6-503ea1549459
Caliber Public Safety PD	b27fdfe7-fecc-4686-97a9-dc6c98c91317
Model County	37acd52f-7ec2-4749-9573-20d7e2ffb95b

5. When finished with the *Custom Form*, click on the *Status* tab and select the **Activate** button.

Note: *Public Custom Forms* are not accessible from your website until the form is activated.

Note: If a *Public Custom Form* is not activated, the public will see the below error when navigating to the web page you configured to display the Public Form:

ERROR RETRIEVING FORM: 404

Form ID: b27fdfe7-fecc-4686-97a9-dc6c98c91317

Environment: demo

Is the form active for Public Access?

Is 'community.public-safety-cloud.com' an Allowed Domain?

Add Publicly Available Forms To Your Website

Community Reporting easily displays within your agency's existing website, creating a consistent online experience for your community to submit report online. **Publicly Available Custom Forms** inherit the look and feel of its surroundings on your website, making it appear as if it were an original part of your web page.

Caliber recommends that a system or website administrator perform the following modifications to your existing website, as the specific way your website works may vary significantly from that of other agencies.

Web Page Modifications

The source of an existing web page is typically structured with an invisible **<head>** section (which contains many of the needed resources, such as JavaScript and CSS), and the **<body>** section that is displayed in the end user's internet browser. **Community Reporting** requires the addition of one line to the end the **<head>** section, and one line within the **<body>** section *where the custom form information should display*.

Below is a simplified example of a web page and how it should be modified to enable **Community Reporting**.

- The **id** is the **Token ID** generated for the *Custom Form* in Online RMS.

- The `id="12345678-abcd-1234-abcd-1234567890ab"` in the `<caliber-custom-form` section must be changed to use the **Token** generated for your *Custom Form* in Online RMS.

For more information on the generated **Token ID**, refer to “Make Custom Forms Publicly Available” on page 280.

- The yellow highlighted lines must be added to your existing website.

```
<html>
  <head>
    <!-- (Existing content) -->
    <!-- ... -->
    <!-- Add the following line for Caliber Community Reporting -->
    1 <script src="https://community.public-safety-cloud.com/assets/custom-form-bundle.js"
      crossorigin=""></script>
  </head>
  <body>
    <!-- (Existing content) -->
    <!-- ... -->
    <!-- In the desired location, add the following line for Caliber Community Reporting -->
    2 <caliber-custom-form id="12345678-abcd-1234-abcd-1234567890ab">
      </caliber-custom-form>
    <!-- ... -->
  </body>
</html>
```

1. Modification labeled **1** tells the internet browser where to find the JavaScript that displays the *Custom Form* from Online RMS.

Note: Do not modify the contents of this line. Any changes to this line may cause the *Custom Form* not to display and may break other functionality of your web page.

2. Modification labeled **2** identifies the location in your existing website where the *Custom Form* should display.

Note: You **MUST** update the `id="12345678-abcd-1234-abcd-1234567890ab"` to use the **Token** generated for your *Custom Form*. For more information on the generated **Token**, refer to “Make Custom Forms Publicly Available” on page 280.

Display Configuration Options

There are four (4) *optional* configuration settings that can be added to the `<caliber-custom-form...></caliber-custom-form>` line.

Configuration options with their default values:

Configuration Options	Description
<code>hide-images="false"</code>	Hides the section of the form that allows the end-user to submit a JPEG image which will be attached to the Custom Form in <i>Online RMS</i> .
<code>hide-title="false"</code>	Removes the Custom Form's Title from the form when displaying on your website. This may be useful if the web page has an existing title/heading that you prefer to use.
<code>hide-description="false"</code>	Removes the Custom Form's Description from the form when displaying on your website. This may be useful if the web page has an existing description that you prefer to use.
<code>hide-section-headers="false"</code>	Removes the Custom Form's Section Group label from the Custom Form field designer when displayed on your website.

If you desire different display options than the default values, you can override the default values by adding the appropriate configuration option to the `<caliber-custom-form...</caliber-custom-form>` line and setting the value to `"true"`.

Example 1

If you do not want to display the **Custom Form Title** on the web page, use `hide-title="true"`. The `id` is the **Token ID** generated for your *Custom Form*.

```
<caliber-custom-form
  hide-title="true"
  id="12345678-abcd-1234-abcd-1234567890ab">
</caliber-custom-form>
```

Example 2

Example of all available configuration options. The `id` is the **Token ID** generated for your *Custom Form*.

```
<caliber-custom-form
  hide-images="false"
  hide-title="false"
  hide-description="false"
  hide-section-headers="false"
  id="12345678-abcd-1234-abcd-1234567890ab">
</caliber-custom-form>
```

For more information on the generated **Token**, refer to “Make Custom Forms Publicly Available” on page 280.

For an example of how a *Public Custom Form* display on your agency website, refer to “Sample Public Custom Form Website Display” on page 288.

Sample Public Custom Form Website Display

Publicly Available Custom Forms inherit the look and feel of its surroundings on your website, making it appear as if it were an original part of your web page.

Below is an example of how a *Public Custom Form* displays on your agency website:

The screenshot shows a web browser window with the address bar displaying 'Community Reporting | Caliber P...'. The website header features the Caliber Public Safety logo and navigation links: Solutions, Services, About Caliber, Contact, and a Request A Demo button. The main content area displays the 'Online Police Self-Reporting Form'. On the left, four red boxes with arrows point to specific parts of the form: 'Title' points to the form title, 'Description' points to the introductory text, 'Section Headers' points to the 'Questions' section header, and 'Questions' points to the first question. The form itself includes a title, a description, a note about emergencies, a list of questions with radio button options, and a text input field for suspect information. A sidebar on the right contains contact support information, including a phone number, a link to the Caliber Wiki, and a 'CONTACT SALES' button.

Title → **Online Police Self-Reporting Form**

Description → IF THIS IS AN EMERGENCY PLEASE DIAL 911 NOTE: In the event that this involves shoplifting, you may be asked to come to the Police Department at a later date to file charges and you may also be asked to provide additional documentation regarding the statement or receipt of the stolen items. Once submitted, you will be contacted by a representative of the Police Department within 5 business days. If you have not heard from someone within 5 business days, please call 662-393-8652 to check the status of your report.

Chapter 16. Module Admin

The Module Admin feature must be enabled by Caliber Public Safety personnel in order for an agency to use it. In addition, only administrative users who have been assigned the appropriate role can access and manage the Module Configuration page.

Access Module Admin

Click on the **Administration** label, then **Administration** again, to access the *Administration Home* page.

Click the **Module Admin** link to open the *Module Configuration* page.

The column on the left of the *Module Configuration* page contains links to individual topics. Click on an individual link to open a unique configuration page for that topic.

Note: For multi-level agencies, administrators with appropriate permissions can choose a specific agency within their organization when managing *Incident Rules* and *Lost & Found Locations* configurations.

Civil Process, *Fleet Management*, and *Training* are used for illustration purposes; the remaining configuration setting options follow a similar process only with different data requirements.

Note: On ending the last active assignment on a vehicle, the status is updated to the default status configured in the *Module Admin > Fleet > Vehicle Status* tab.

Incident Rules and Validation Settings

Authorized users can configure Incident rules and validations.

Manage these options from the *Module Configuration* page. For instructions on accessing the *Module Configuration* page refer to "Access Module Admin" on page 289.

You can Select Agency to manage its configuration, or you click on the Configure Rules For All Agencies link to open the Rules & Validations page.

My Agency Conditions

- No Conditions

Select each tab to add any necessary rule and validations.

You can set up a rule to trigger a set of questions to appear when a specific Incident Type is chosen. For example, Incident Type of Civil Dispute would trigger the Yes or No question of "Was a Civil Citation Issued?"

Civil Process Product Settings

Product configuration options include the following:

- Court Paper Types
- Court Paper Sub-Types
- Reference Types
- Other Party Roles
- Party/Org Roles
- Payment Types
- Log Action Types

To manage these options from the *Module Configuration* page, click the Civil Process link with *product and agency settings* in the description. For instructions on accessing the *Module Configuration* page refer to "Access Module Admin" on page 289.

Civil Process	Configure Civil Process for product and agency settings.

The Configuration page appears.

Check the **Fee Collections** box to enable, or uncheck to disable, then click **Save**.

Click **Zero Fees** to zero out existing court paper fees.

Click **Manage Court Locations** to manage Court Locations. For detailed instructions refer to "Court Locations" on page 220.

Click the **Go Back** button on the upper right of the page to return to the *Module Configuration* page.

Fleet Management Settings

Configuration options include the following:

- Equipment Types
- Vehicle Status, Vehicle Category, Vehicle Assignments, Vehicle Groups, Vehicle Repairs, and Vehicle Ratings
- Category Roles
- Misc IDs
- Vendors and Funding Vendors
- Service Request Types and Service Request Status
- Storage Locations
- Budget Codes
- Fuel Types and Fuel Payments
- Fluid Types
- Inspection Types and Inspection Status
- Insurance Claim Types
- Crash Hours Groups
- Crash Damage Codes
- Crash Cause Codes
- Crash Reference Types
- Crash Types Codes

To manage these options from the *Module Configuration* page, click the Fleet Management link. For instructions on accessing the *Module Configuration* page refer to "Access Module Admin" on page 289.

Fleet Management	Configure Fleet Management for product and agency settings.
Training	Configure Training.

The *Product Config* table opens with the configuration options in separate tabs across the top, resting on the **Equipment Types** tab by default.

Click on the individual tabs to access the different options. With the appropriate permissions, you can add, edit, and delete settings within each tab. While the data differs with each configuration option, the functionality remains consistent.

The **Equipment Types** option is used for illustration purposes.

Add Equipment Types

1. Click on the Add Equipment Type button to display the *Equipment Type* entry form.

A screenshot of a web form titled "Equipment Type". It contains three input fields: "CODE", "DESCRIPTION", and "ACTIVE". The "CODE" and "DESCRIPTION" fields have red vertical bars on their left sides. The "ACTIVE" field is a checkbox that is checked. At the bottom right of the form are two buttons: "Close" (yellow) and "Save" (green).

2. Enter the **Code** and **Description**.
3. The **Active** box is active by default. Deselecting this button allows you to save the information entered and activate the Equipment Type at a later date.
4. Click **Save** to save the record and return to the *Product Config* table., or click **Close** to cancel without saving.

Edit Equipment Types

1. Locate the record you need to edit in the table.
2. Click  in the **Actions** column in the same row as the record listing to display the *Equipment Type* page.
3. Make changes as needed.
4. Click **Save** to save changes and return to the *Product Config* table.

Delete Equipment Types

1. Locate the record you need to delete from the table.
2. Click  in the **Actions** column in the same row as the record listing.
3. If a confirmation prompt displays, click **Yes** to confirm deletion, or click **No** to cancel deletion, and return to the *Product Config* table.

Training Settings and Configuration

Configuration options include the following:

- Course Templates
- Maintenance Settings (List courses and certifications that are about to expire within a set number of days)
- Course Types
- Course Classifications

To manage these options from the *Module Configuration* page, click the [Training](#) link. For instructions on accessing the *Module Configuration* page refer to "Access Module Admin" on page 289.

Fleet Management	Configure Fleet Management for product and agency settings.
Training	Configure Training.

For details on settings and configurations refer to "Training Module" on page 151.

Chapter 17. Collapse Duplicate Master Indices

Master Indices are centralized pieces of data that are accessed from different modules of the system for consistency. Each index is represented only once, such as a person, address, vehicle, and organization. For example, all Caliber Public Safety Online RMS modules access the same person record for Joe Smith with SSN 123-12-1234 and the same vehicle record for VIN ABC1235223DE45455.

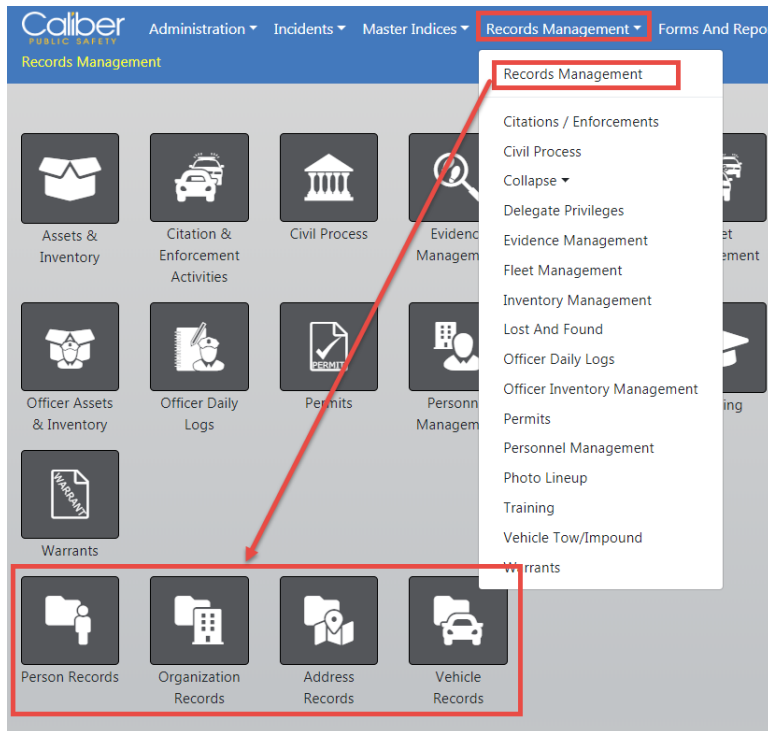

There may be times when users inadvertently create a duplicate master person, address, vehicle, or organization in Caliber Public Safety Online RMS. The agency administrator, with proper permissions, can identify and collapse duplicates records, creating one master person, address, or organization record.

Access Collapse Process

There are two ways to access the **Collapse** process.

Option 1

Click on the *Records Management* label and *Records Management* again, then click the appropriate icon that corresponds to the Master Index you want to collapse.

Option 2

Select **Person Records**, **Address Records**, **Organization Records**, or **Vehicle Records** from the **Records Management** drop down menu.

Search for Duplicate Master Indices

Use the following procedure to search for potential Master Index duplicate records. While the instructions are specific to Master Person, follow the same general process for Address, Vehicle, and Organization using different search criteria.

1. Access **Person Records** to open the *Select - Collapse Criteria* page to search for potential duplicates. (See "Access Collapse Process" on page 299, if needed.)

A screenshot of the 'People Collapse' form in the Caliber Public Safety software. The form has a title bar with 'People Collapse' and a 'Collapse Log' button. Below the title bar, there is a section titled 'SELECT A CRITERIA TO PROCESS COLLAPSE'. This section contains two radio buttons: 'Select a Person' (which is selected) and 'Specify Person Details to search for potential duplicates'. At the bottom of the form, there are two buttons: 'Go Back' and 'Continue'.

2. You must select one Master Person record as the *primary* record, and at least one Master Person record as the *duplicate*.

You can either manually search for and identify the duplicates, or you can let the system search for potential duplicates based on the search criteria you enter.

Select one option then follow the applicable steps below:

Select a Person

- a. Select this option to manually search for and identify duplicates, then click **Continue** to open the *Master Index Search* page.

The screenshot shows a web form titled "Person" with a tabbed interface. The "Person" tab is selected. The form contains the following fields and controls:

- LAST NAME:** Text input with "Clark" entered and a clear button (X).
- FIRST NAME:** Text input.
- MIDDLE NAME:** Text input.
- TITLE:** Dropdown menu with "-Select-" selected.
- DOB:** Text input with a calendar icon.
- AGE:** Text input with "To" and another text input.
- RACE:** Dropdown menu with "-Select-" selected.
- SEX:** Dropdown menu with "-Select-" selected.
- INDEX ID:** Text input.
- DRIVERS LICENSE:** Text input.
- DRIVERS LICENSE STATE:** Dropdown menu with "-Select-" selected.
- SSN:** Text input.
- NAME TYPE:** Dropdown menu with "-Select-" selected.
- CREATOR:** Text input with a user selection icon.
- CREATION DATE FROM:** Text input with a calendar icon.
- CREATION DATE TO:** Text input with a calendar icon.
- PHONETIC:** Checkbox.
- SOUNDEX:** Checkbox.
- STATEWIDE SEARCH:** Dropdown menu with a downward arrow.
- SEARCH PREFERENCE:** Two buttons: "ALL" and "ANY".
- ADDITIONAL SEARCH CRITERIA:** Dropdown menu with "- Select -" selected.
- Buttons:** "Search External Systems" (bottom left), "Go Back", "Reset", and "Search" (bottom right).

- b. Enter your search criteria then click **Search** to display the *Person Search Results*, then select the *Master Person* you want to use as the *primary* record.

- h. Click on the delete icon  to remove records from the *Duplicates To Be Collapsed* list that should not be included in the collapse process, or click the not duplicate icon  to flag the record as *Not Duplicate* and enter a comment as to why it is not considered a duplicate. Both methods remove the record from the *Duplicates To Be Collapsed* list.
3. Click **Next** to run the collapse process. For more information about running the collapse process refer to "Run Collapse Process" below for instructions on collapsing Primary and Duplicate Master Index Records into one Master Record.

Note: Before running the collapse process, double check the *Duplicates To Be Collapsed* list to ensure the only records that appear are those you want to collapse with the *Primary Person* record

Run Collapse Process

Use the following procedure to collapse Primary and Duplicate Master Index records into one Master Record. While the instructions are specific to Master Person, follow the same general process for Address, Vehicle, and Organization using different criteria.

1. Select the Primary and Duplicate Master Person Index records to collapse. (For more information on accessing the collapse process and searching for duplicates see "Access Collapse Process" on page 299 and "Search for Duplicate Master Indices" on page 301, respectively.)

The screenshot shows the 'Person Collapse' interface. At the top right are 'Go Back' and 'Exit' buttons. Below is a 'Person Collapse' tab. The 'Primary Person Details' section contains a table with one record:

ID	Last Name	First Name	Middle Name	Race	Ethnicity	Sex	DOB	SSN	DL #	Creator Agency	Actions
1080	Clark	Ranelle	Marie	White		Female	03/16/1959	123991234		Indiana State Police	[icon]

Below this is the 'Primary Filters' section with checkboxes for 'LAST NAME', 'FIRST NAME', and 'MIDDLE NAME'. The 'Optional Filters' section includes checkboxes for 'RACE', 'SEX', 'DOB', 'SSN', 'DL #', and 'CREATOR AGENCY', followed by a 'Search Matches' button. At the bottom is the 'Duplicates To Be Collapsed' section, which includes a warning: 'Any undesired records should be removed from this list before collapse.' and a table with one record:

ID	Last Name	First Name	Middle Name	Race	Ethnicity	Sex	DOB	SSN	DL #	Creator Agency	Actions
1082	Clark	Ranelle		White		Female	03/16/2010		T12344AA10	Indiana State Police	[icon] [icon] [icon]

Below the table is the text 'Showing 1 to 1 of 1 entries' and a 'Next' button.

Note: You must select one Primary Person and at least one Duplicate to run the collapse process.

2. Double check the *Duplicates To Be Collapsed* list to ensure the only records that appear are those you want to collapse with the *Primary Person* record; remove any that should not be included.
3. Click **Next**
4. A warning message appears when the duplicate record is associated with other records in the system such as, incidents, arrests, etc. Hover the mouse over the **red triangle** for a summary of the associations.

In the example below, the duplicate person is associated with one incident.

Collapse

5. Select the box to the left of the person you want to transfer to the primary person.

6. Click the **Collapse** button to continue with the collapse process, click **Exit** to abort without collapsing, or click **Go Back** to return to the *Person Collapse* screen.

By choosing **Collapse**, the name on the associated records becomes the primary person name.

7. A warning and comment box appears. Enter a **Comment** and click **Save** to continue the collapse process, or click **Cancel** to abort without collapsing.

Collapse People

Warning: All Duplicates selected will be collapsed into the selected primary Person.

COMMENTS

Cancel Save

8. The *Person Collapse* screen appears when the Collapse process is complete.

The screenshot shows a web interface for 'Person Collapse'. At the top right are buttons for 'Perform Another Task' and 'Exit'. Below is a 'Person Collapse' header. The main section is titled 'Primary Person Details' and contains a table with the following information:

LAST NAME	FIRST NAME	MIDDLE NAME	DOB	SEX	RACE
Clark	Ranelle	Marie	03/16/1959 (Age: 59)	Female	White

DRIVER'S LICENSE #	DRIVER'S LICENSE STATE	SSN	ALIASES
T12344AA10	Indiana	123-99-1234	Ranelle Clark(Alias)

ADDRESS (RESIDENCE)	INDEX ID
6081 East 82nd Street #415 INDIANAPOLIS, IN 46250	1080

An 'Edit Person' link with a pencil icon is located to the right of the 'Primary Person Details' header.

Click **Perform Another Task** to Collapse other records, click the **Edit Person** link to edit the person details, or click **Exit**.

9. Data is collected and logged during the collapse process for auditing and tracking purposes. The *Collapse Log* also provides a way to reverse the results of the collapse process, to *UnCollapse* the duplicate master index from the primary record.

For more information about the *Collapse Log* or the *UnCollapse* process, refer to "Collapse Log" below.

Collapse Log

Basic Master Index data is collected and logged during the collapse process for auditing and tracking purposes. The *Collapse Log* also provides a way to reverse the results of the collapse process, to *UnCollapse* the duplicate master index from the primary record.

The Collapse Date, Collapsed By, Master Index Name and other information depending on the Master Index are tracked in the *Collapse Log*. For example, for the Master Person Index, Race, Sex, DOB, SSN, and Driver's License Number of both the Primary and Duplicate Person records are logged.

Use the following procedure to access the *Collapse Log*. While the instructions are specific to Master Person, follow the same general process for Address, Vehicle, and Organization.

1. Access the **Collapse** process through the *Records Management* menu, then select *Person Records* for Master Person. For more information on accessing the **Collapse** process refer to "Access Collapse Process" on page 299.
2. Click the **Collapse Log** button to open the *Person Collapse Log*.

Chapter 18. Inventory Administration

Inventory Administration allows users with proper permissions to configure and maintain settings for office supplies, fixed assets, weapons, equipment, vendor list, locations with assigned managers, clothing, and others.

Access Inventory Administration

Click on the **Records Management** label then click on **User Inventory Management**.

Click the **Administration** button to open the **Inventory Administration** page containing up to four tabs depending on your agency setup.

- Inventory Setup
- Locations
- Organizations
- Vendors

Inventory Setup

The *Inventory Setup* tab of the **Inventory Administration** page contains configuration settings of clothing, equipment, fixed assets, office supplies, vehicles, and weapons.

To the left of each category is a sideways **funnel**. Click on the **funnel** to drill-down for sub-categories, and sub-categories may also have funnels. You can keep drilling-down until no more funnels appear.

Locations

The *Locations* tab of the **Inventory Administration** page contains configuration settings for various types of locations such as a warehouse, closets, rooms, parking lots, and managers assigned to the locations.

There are two sub-tabs, *Add/Edit Locations* and *Location Managers*. Locations are configured and managed through the *Add/Edit Locations* tab and managers are assigned to locations through the *Location Managers* tab.

Organizations

The *Organizations* tab of the **Inventory Administration** page contains organization configuration settings, particularly useful for multi-agency users.

Organization Name	Actions
County Jail1

Chapter 19. Reports

Online RMS reports consist of five report types: Ad Hoc, Custom Field, Custom Form, and Standard Menu.

- Ad-Hoc reports are created via Jasper Reports or iReports. Once a user with the appropriate permissions has created and saved ad hoc reports, other users within the agency/schema who have been the appropriate roles/permissions, can then use them.

Note: iReport allows for a detailed and specific set of design options. A user who wants to alter the form beyond the capabilities of the Custom Form Designer would do so in iReport. They can download the template, make the changes in iReport, then re-upload it here. This will require the user to know how to use iReport.

- Custom field reports are built from user-defined fields that have custom labels.
- Custom forms reports are based on an agency's needs and are designed to gather specific information to meet those needs.
- Standard menu reports are those that are delivered with the system. They are basic, out-of-the-box reports for statistics and such.

For information on how basic users access and use the various RMS reports, refer to the *Caliber Online RMS*.

Report Administration

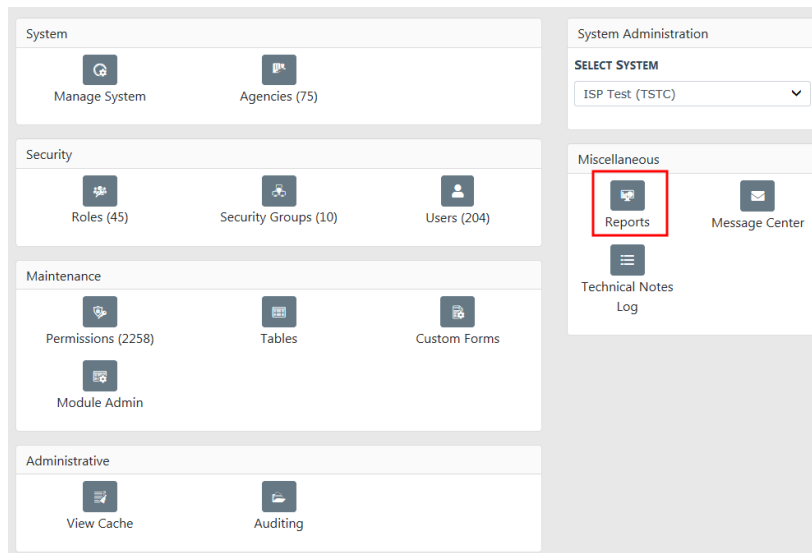

The *Report Administration* page provides administrators ways to manage the various reports.

Note: For information on how basic users access and use the various RMS reports, refer to the *Caliber Online RMS User Guide*. The **Forms And Reports** menu provides access to existing reports.

You can access, add, and update reports from the *Report Administration* page.

From the *Home* page, click the **Administration** menu label to open the *Administration Home* page, then click on the **Reports** icon to display the *Report Administration* page. For more

information on accessing the *Administration Home* page, refer to "Access Administration" on page 1.

Showing 1 to 10 of 172 entries

Previous 1 2 3 4 5 ... 18 Next

This page displays both custom created reports and product reports.

To edit a product report, click the edit icon to display an *Edit Report* page. Here, you can change the report name, category, description, agencies if applicable, and roles. In addition, Operations can control who has access to which reports.

Ad Hoc Reports

As the name implies, an ad hoc report is one created for a specific purpose. Online RMS agencies can create reports that perform specific functions within their agencies. To create ad hoc reports, a user (sometimes referred to as a *superuser*) must have the appropriate permissions and have access to the Jasper Server.

Ad Hoc Tool Access

For a user to access the Open Ad Hoc Tool, an agency administrator must set up that user with the appropriate access permissions.

Use the following procedure to set up ad hoc tool access.

1. From the *Home* page, open the **Administration** menu then click on **Users** to open the *Manage Users* page. The page opens to the *User Accounts* tab by default. For more information on accessing the *Administration Home* page, refer to "Access Administration" on page 1.
2. Use the **Search** fields to locate the user by typing a search parameter in the **Search** field, in the Status field select *Active*, then click the **Search** button to display a list of users that match your criteria.

Ad-Hoc Reporting

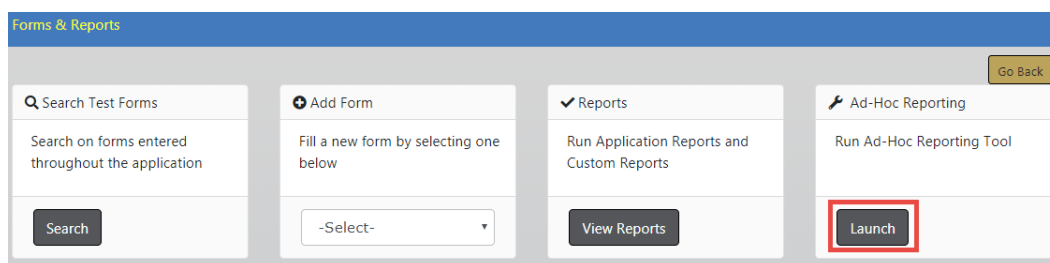

With appropriate permissions you can create Ad-Hoc reports and, using the Repository, you can group them into custom categories or topics.

Create an Ad-Hoc Report

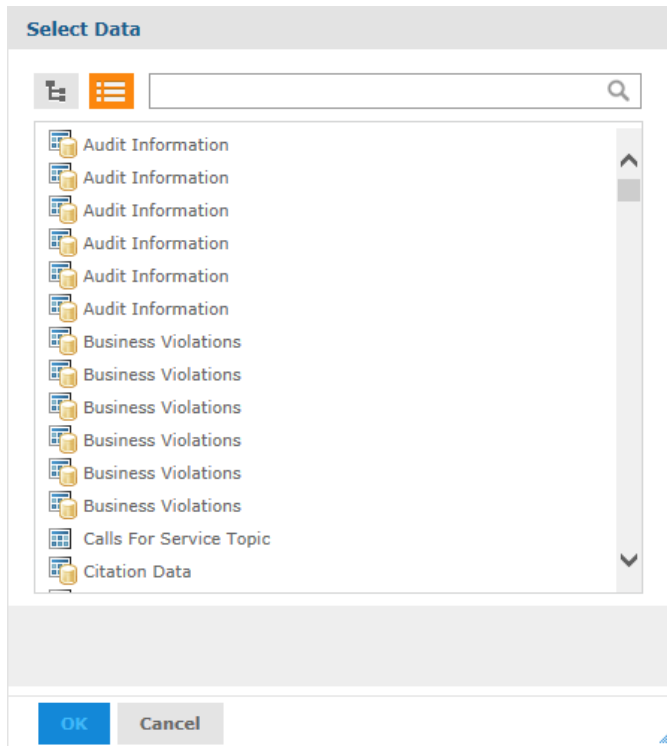

The following example steps you through the process to create an Ad-Hoc report and group by reporting areas.

Use the following procedure to select an ad-hoc topic that contains the **Reporting Area** field.

1. From the *Forms and Reports* page, click the **Launch** button under the Ad-Hoc Reporting section.

2. Click **Create** under Ad Hoc Views to open the *Select Data* window.

Click on the appropriate icon to view the source in *Tree* format or in *List* format, respectively. The *List* format is selected by default.

3. To choose using the *Tree* format:
 - a. Click + to the left of the **Public** folder to open the folder.
 - b. Click + to the left of **Ad Hoc Components**.

- c. Click **+** to the left of **Topics**.
- d. Select a topic.

Note: The following topics have been modified as follows:

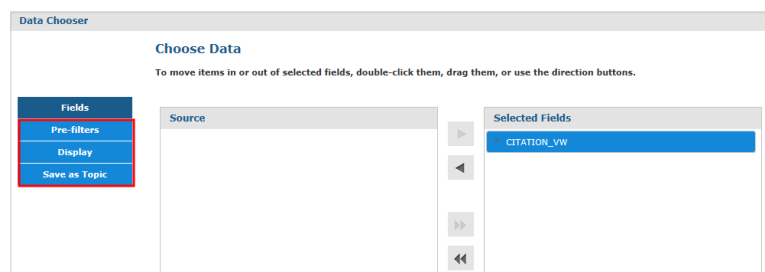

- Calls for Service Topic has been modified as follows:

BEAT and SUB_BEAT is labeled Reporting Area.

Officer Information is labeled Primary Officer.
 - Evidence Topic has the additional fields: Property Summary, Location Remarks, Reporting Area, and Status description.
 - Field Arrest Charges Topic has the additional fields: Person Summary, Address Summary, Impound ID, Vehicle Seized, Vehicle Stored, Currency Seized, Currency Total, Discharge Date, Status Code, Status (to reference new columns), Case Number, Reporting Area, Longitude, and Latitude.
 - Field Arrest Topic has the same additional fields as the Field Arrest Charges Topic (see above).
 - Field Contact Topic has the additional fields: Notes, Address, Location Reporting Area and general summary information for Officer, Gang, Person, Organization and Vehicle.
 - Incident Topic has the additional fields: Status (description), Address (summary), Reporting Area, Incident NIBR City, Incident County, Incident Township.
 - Incident Offender Evidence Topic has the additional fields: Property Summary, Status (description), Address (summary), Location Remarks, Reporting Area, Location Agency, Incident NIBR City, Incident County, Incident Township.
4. To choose using the *List* format:
 - a. Scroll down and click on the source you want, then click the **Choose Data...** button to open the *Data Chooser* page.

- b. Click on items under the *Source* section then click the **right arrow** to move them into the *Selected Fields* section. Or **double-click** on selected *Source* items to move them automatically into the *Selected Fields* section.
- c. The **Pre-Filters**, **Display**, and **Save as Topic** buttons on the left become active. Click through each button to define the report.

- **Pre-Filters:** Create filters to limit the data available in the editor. For example, you can limit the report to list citations with a specific citation type.
 - **Display:** Change the display name for fields, re-order fields, and choose whether the fields are listed in groups or not.
 - **Save as Topic:** Save the topic for later use.
5. Click **OK** to open the *New Ad Hoc View* page.

6. Click on titles on the left and drag and drop them into the Columns and Rows fields on the upper right.
7. Give your report a title in the designated text box.
8. Use the tool bar to apply other functions. Hover your mouse over each icon on the tool bar for a description of its function.

For more information on Ad Hoc Views, click on the [View Tutorial](#) link.

Group Ad-Hoc Reports using the Repository

With Online RMS 11.7.0 and above, you can add folders, or categories, to the report repository to better group your Ad-Hoc reports. Previously, all new Ad-Hoc reports were grouped under *Other Reports* automatically for the users who have permissions to run reports.

The example below illustrates how Ad-Hoc reports can reside in their own categories, separate from *Other Reports*.

Menu for users with permissions to run reports

Numbers 2, 3, 4 in the above example contains Ad-Hoc reports that have been categorized outside of *Other Reports* (number 1).

Before Online RMS 11.7.0, Ad-Hoc reports would all reside under the *Other Reports* category. To create new categories, see "To Create new categories" below.

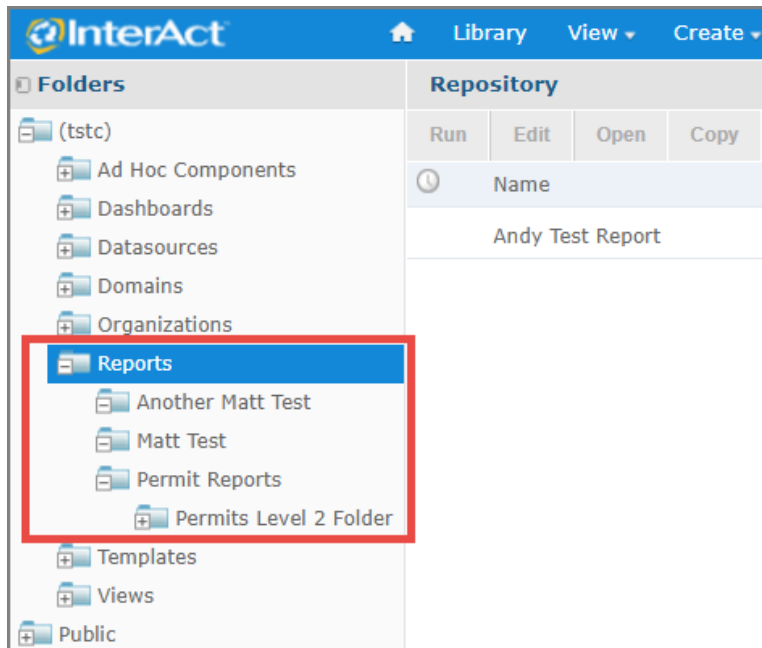

For more information on how users run reports, refer to the *Caliber Online RMS User Guide*.

To Create new categories

1. From the *Forms and Reports* page, click the **Launch** button under the Ad-Hoc Reporting section as shown in Step 1 under "Create an Ad-Hoc Report" on page 325.
2. Click **View** on the top menu, then **Repository** to open the Repository.

3. Click + next to the **Reports** folder to expand subfolder categories that may exist, and repeat for any subfolders.

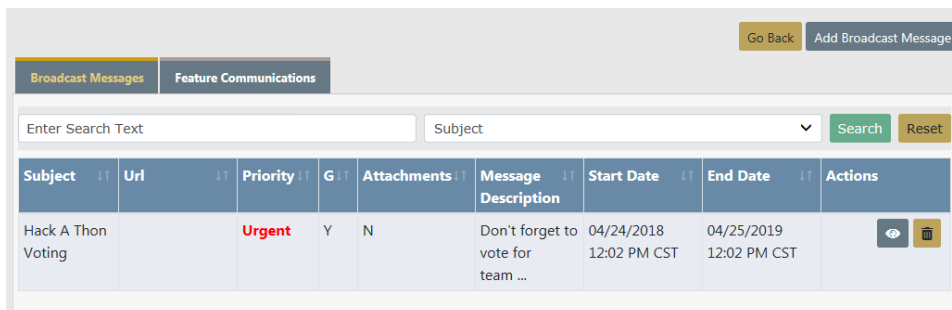

4. To create a new subfolder category, **right-click** on a folder then click **Add Folder**.
 - a. Enter the folder **Name**.
 - If you enter a unique name that does not exist, that new folder appears as its own category to the user, rather than under *Other Reports*. Refer to numbers 2 and 3 shown under "Menu for users with permissions to run reports " on the previous page.
 - If you wish to add Ad-Hoc reports to a category that already exists, enter that exact category name when creating the subfolder. *Permit Reports* is used in the example. Name the new subfolder *Permit Reports*, then Ad-Hoc reports added to that new subfolder will display under the existing *Permit Reports* category. Refer to number 4 shown under "Menu for users with permissions to run reports " on the previous page.
 - b. Optionally enter a **Description**.
 - c. Click **Add**.

Note: You cannot delete folders. Submit a support ticket and Caliber staff will delete the folder for you.

Chapter 20. Message Center

This module allows administrators to setup and maintain broadcast messages for users. From the *Administration Home* page, click the **Message Center** icon to open the *Message Center* page as shown. (Alternatively, select **Broadcast Messages** from the **Administration** drop down menu on the top navigation bar.)

This page has two tabs: **Broadcast Messages** and **Feature Communication**. Depending upon roles, some users see only the **Broadcast Messages** tab; others see both.

- "Broadcast Messages" on the next page for more information and instructions on the first tab.
- "Feature Communications" on page 340 for information and instructions on the second tab.

Broadcast Messages

The **Broadcast Messages** tab is used to manage administrative messages to users. These messages relay information concerning mandatory meeting or firearms qualification notices as well as time sensitive information such as an Attempt to Locate notice for a stolen vehicle or reckless driver. Administrators set up these messages to be displayed to recipients according to their agency affiliation and/or role designation. Each message includes a start and end date/time. Administrators can select from various message types (informational, web sites, Amber Alerts, warnings, training tips, and so forth) and set a specific priority level for each message.

Use the **Search** fields to search for a specific message as follows:

1. Type a string of characters in the first **Search** text field.
2. Select from the drop-down list in the subject field to specify where the string can be found.
3. Click **Search** to return search results.

Add Message

Use the following procedure to set up and post a broadcast message.

1. From the **Broadcast Messages** tab on the *Message Center* page, click the **Add Broadcast Message** button in the upper right corner to open the *Add Broadcast Message* page.

2. Enter a **Subject**.
3. Optionally enter a **URL**.
4. Select the **Global** checkbox if you want to send the notification to schemas rather than agency recipients.

Note: This option is only available to users with *c_admin* permissions.

- a. A **Schemas** field appears. Select one or more Schemas.

GLOBAL ☒ **LOGIN NOTIFICATION** ☐

SCHEMAS 🔍

✕ ISP Test (TSTC) ✕ Texas County, TX (TSTB) |

5. Select the **Login Notification** checkbox if you want the notification to display to users upon login.

The screenshot shows the 'Edit Message' interface in the Online RMS system. At the top, there are two dropdown menus: 'MESSAGE TYPE' set to 'Informational' and 'PRIORITY' set to 'Low'. Below these are three checkboxes: 'GLOBAL' (unchecked), 'LOGIN NOTIFICATION' (checked), and 'REQUIRE ACKNOWLEDGMENT' (checked). A rich text editor is open, displaying a message about Online RMS maintenance. The editor includes a toolbar with various formatting options like bold, italic, underline, and text color. The message text reads: 'Online RMS maintenance is scheduled at 1:00 AM - 1:15 AM CST on Sunday, June 28, 2020. You will not have access to Online RMS during this maintenance window.'

- a. When you select the **Login Notification** checkbox, a text editor opens, where you can enter a message and format the content.
 - b. Select the **Require Acknowledgment** checkbox if you want to require users to acknowledge the message. If this option is checked, the message appears every time a user logs in, until the user acknowledges the message.
6. Select one or more **Agency Recipients** for your message by selecting from a list.

Note: If **Global** is checked, skip this step.

7. Select one or more **Role Recipients**.
8. Edit the **Start Date** and **Time** if needed (default setting is current date and time) and set an **End Date** and **Time**.

The message automatically expires on the specified end date and time, unless you delete it before that time, or you edit the message and extend the date and time.

9. Click **Save** to save the message. The *Edit Message* page opens with two tabs: *Message Details* and *Attachments*.

Chapter 21. Maintenance Values

Maintenance Values provides administrators with proper permissions to configure module behavior and restrictions for the agency or schema.

Examples:

- Determine if incidents always require approval, regardless of whether or not an offense exists.
- Allow agency to select specific charge violation related to an offense code.
- Enable level 2 approval for criminal complaints.
- Turn email notifications on or off at the application level.
- Set max file size for attachment uploads.
- Set number of days to increment case activity review date.
- CAD IP Address.
- Allow officers to select another agency within their organization when creating evidence.
- Enable fee collections of court papers.
- Require at least one narrative for a field arrest.
- Set a default warrant status when it is added to a field arrest.
- Display criminal complaints under recent activities that were submitted within a specified number of days.
- Require Off Duty and Service Interval when entering fuel/oil.
- Set max number of allowed pinned records per user, if different than the default of 50.
- Optionally require at least one evidence processing record, if applicable to your agency.
- Default chain of custody to print in ascending order.
- Require Judge on warrant creation.

Access Maintenance Values

There are two ways to access Maintenance Values, depending on your permissions:

- Agency Profile - Settings Tab.
 - Settings for a specific agency.
- Administration top menu.
 - Schema-level settings (all agencies).

Agency Profile Settings Tab

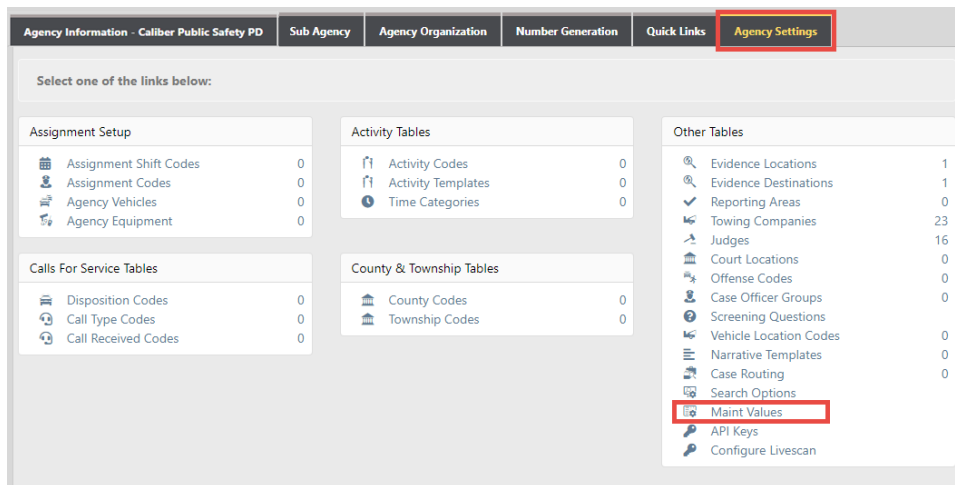

1. Click on the **Administration** top menu, then **Agencies** to open *Agencies*.

2. Click **[edit]** next to the appropriate agency to open the *Agency Profile*.

3. Click on the **Agency Settings** tab to display setting options, then click on **Maint Values** under the *Other Tables* section.

4. The *Agency Maint Values* table opens.

Agencies / Agency Settings / Agency Maint Values

Show 10 entries

Go Back Add Maint Value

Search:

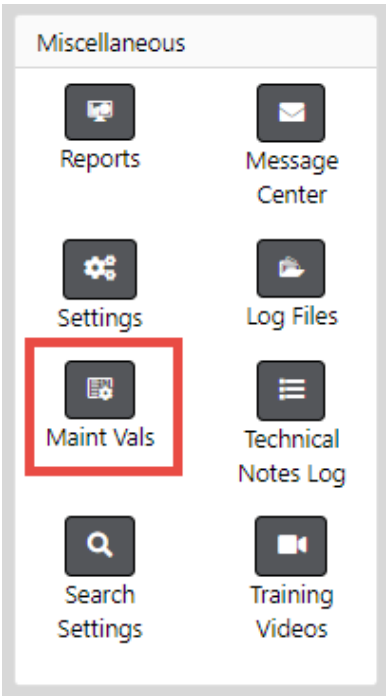

Keyword	Value	Description	Effective Date	End Date	Actions
CID_CASE_ADMIN	Y	Have CID users create cases from approved incidents,	11/21/2011		
CP_PARTY_ROLE_REQUIRED	Y	Whether at least one role is required when adding a person/org to be served on a court paper. Values Y or N Only.	12/18/2014		
ENABLE_INC_LOCATION_CATEGORIES	Y	Y = Enable Common Place Name And Location Category (e.g. Clery) fields for the incident address page. N= disable	06/25/2015		

Administration Top Menu

1. Click on the **Administration** top menu, then click **Administration** on the drop-down list.

2. Click the **Maint Vals** button under the *Miscellaneous* section.

3. The *Schema Maintenance Values* table opens.

Schema Maintenance Values						
Show: 10 entries		Search: <input type="text"/>				
Keyword	Value	Description	Effective Date	End Date	Actions	
ADDR_COMMON_NAME_FREE_TEXT	N	Y=Allow free-text entry for common place name on master address, N=Must select from pick list.	06/15/2015			
ADDRESS_COLLAPSE	06/08/2020	Start date used in Address Collapse	09/24/2009			
ALWAYS_REQUIRE_LOC_CATEGORY	Y	Y or N. When enabled, will require a common place category even if no common place names are available. Only applies when ENABLE_INC_LOCATION_CATEGORIES is enabled	08/02/2016			
APPROVAL_REQ	Y	Determines if incidents require approval all the time regardless if offenses exist or not.	01/01/2010			
ARREST_CHARGE_CODES	Y	Allow agency to select specific charge violation related to an Offense code	04/02/2010			

Chapter 22. Delegate Privileges

The Delegate Privileges feature allows users with certain administrative functions to transfer their privileges (roles) to other RMS users. For example, a user going away on vacation for two weeks might delegate certain of their roles to another user during that period of time. The next time the delegated user logs into the application, he will have the privileges associated with the delegated roles.

- It is up to the agency to decide whether to use this functionality or not.
- A user is only able to delegate the privileges (roles) that have been assigned to them.

Use the following procedure to delegate privileges.

1. Click the **Records Management** label on the top navigation bar, then click the **Delegate Privileges** option to open the *Delegate Privilege* page as shown.

2. Click the **Add Delegate Privilege** button in the upper right corner to display the *Add Delegate Privilege* page.

3. Select the **Role** for which you wish to delegate privileges. (It may already appear in the field by default, but can be changed.)
4. Enter the **Expiration Date**.
5. Select the **User** by entering in the user's name then selecting the appropriate user(s) from the displayed list, or click on the search icon  to open the search window.
6. Click **Delegate** to delegate the privileges associated with the specified role to the specified users and redisplay the *Delegate Privilege* page with the delegation listed in the grid.
