INTRODUCTION

This document provides an overview of the software changes being delivered in the 10.22.0 release of the InterAct RMS product. This document is intended to provide information to assist in release preparation activities including:

- Internal staff training
- Customer release training
- Customer release notes
- Release announcement and promotion
- Online help and eLearning updates
- Updates to web site product information and product collateral

RELEASE OVERVIEW

This section includes an overview of major enhancements included in the 10.22.0 release. Items marked with an asterisk are released in a disabled state and may require agency configuration, deployment of multiple InterAct products, and/or additional training prior to the capabilities being enabled for an agency. Agencies that are interested in the below capabilities should inquire with InterAct's Operation/Support team by submitting a help ticket. Additional information is provided in the summary overview sections.

Enhancements to this release have been applied to the following functional areas and modules:

- Field Arrest Enhancements
- Incident Report Enhancements
- Data Submissions (IBR) Enhancements
- Mapping Enhancements
- Notifications Enhancements
- Property Entry Enhancements
- Various Other Enhancements and Fixes

RELEASE MILESTONES

The following table contains the high level release milestones.

Start Date	End Date	Milestone
Jul-13	Jul-28	10.22.0 Planning
Jul-29	Jul-29	10.22.0 Release Kick-Off
Jul-30	Aug-01	10.22.0 Code Split
Oct-27	Oct-27	10.22.0 Code Lock
Oct-28	Nov-03	10.22.0 Cycle 1 Testing / Fixes Complete
Nov-04	Nov-17	10.22.0 Cycle 2 Testing / Fixes Complete
Nov-18	Nov-18	10.22.0 Den Dup, Demo, & Training Installations
Nov-19	Nov-24	10.22.0 Cycle 3 Testing / Fixes Complete
Nov-25	Nov-25	10.22.0 Final Build
Dec-01	Dec-01	10.22.0 Release Installs

NEW FEATURES & ENHANCEMENTS

The following are the new features and enhancements included in the release of InterAct RMS version 10.22.0.

COLLAPSE RESOLUTIONS

IA-54436: *Collapse Organization – Match Count*

IA-54437: *Collapse Organization – Address Display*

When searching for potential Organizations to Collapse using the “Specify Organization Details” workflow, the “Possible Match Count” was incorrect. This was due to case sensitivity issues and has been corrected in this release.

When selecting the “Possible Match Count”, the list of Organizations are now displaying the business address so as to aid in the collapse decision process.

Select - Collapse Criteria Collapse Log

Select a criteria to process collapse:

☐ Select a Organization

☒ Specify Organization Details to search for potential duplicates

Exit Continue

Organization Collapse Exit Select Organization to Keep

Potential Duplicate Records: Back Refine Search New Search

Organization Summary	#Possible Matches
Organization Name: CASH AMERICA S	9
Organization Name: CASHLAND	9
Organization Name: PLANET FITNESS	9
Organization Name: SALVATION ARMY	9
Organization Name: AUTOZONE	9
Organization Name: MARSHALLS	9
Organization Name: ATT	9
Organization Name: FAMILY VIDEO	9
Organization Name: ARBYS	9

Potential Matches: Keep As Primary

Index Id	Organization Name	Organization Type	Organization #	Address	Not Duplicate	Comments
<input type="checkbox"/> 240017087	Autozone	Miscellaneous Retail Stores		3025 Kentucky Avenue Indianapolis, IN 46221	<input type="checkbox"/>	
<input type="checkbox"/> 240000173	Autozone	Miscellaneous Retail Stores		8350 Rockville Road Indianapolis, IN 46234	<input type="checkbox"/>	
<input type="checkbox"/> 240007885	AutoZone	Business/Personal Services		5050 West Washington Street IN	<input type="checkbox"/>	
<input type="checkbox"/> 240016954	Autozone	Business/Personal Services			<input type="checkbox"/>	
<input type="checkbox"/> 240004440	Autozone	Unknown			<input type="checkbox"/>

<input type="checkbox"/> 240016934	Autozone	Automotive & Service Station	4553		<input type="checkbox"/>	
<input type="checkbox"/> 240007843	Autozone	Miscellaneous Retail Stores		3710 MOLLER Road INDIANAPOLIS, IN	<input type="checkbox"/>	
<input type="checkbox"/> 240018593	Autozone	Business/Personal Services		3863 East WASHINGTON Street INDIANAPOLIS, IN 46201	<input type="checkbox"/>	

Possible Match Counts are now being correctly displayed.

Business Addresses are now being displayed.

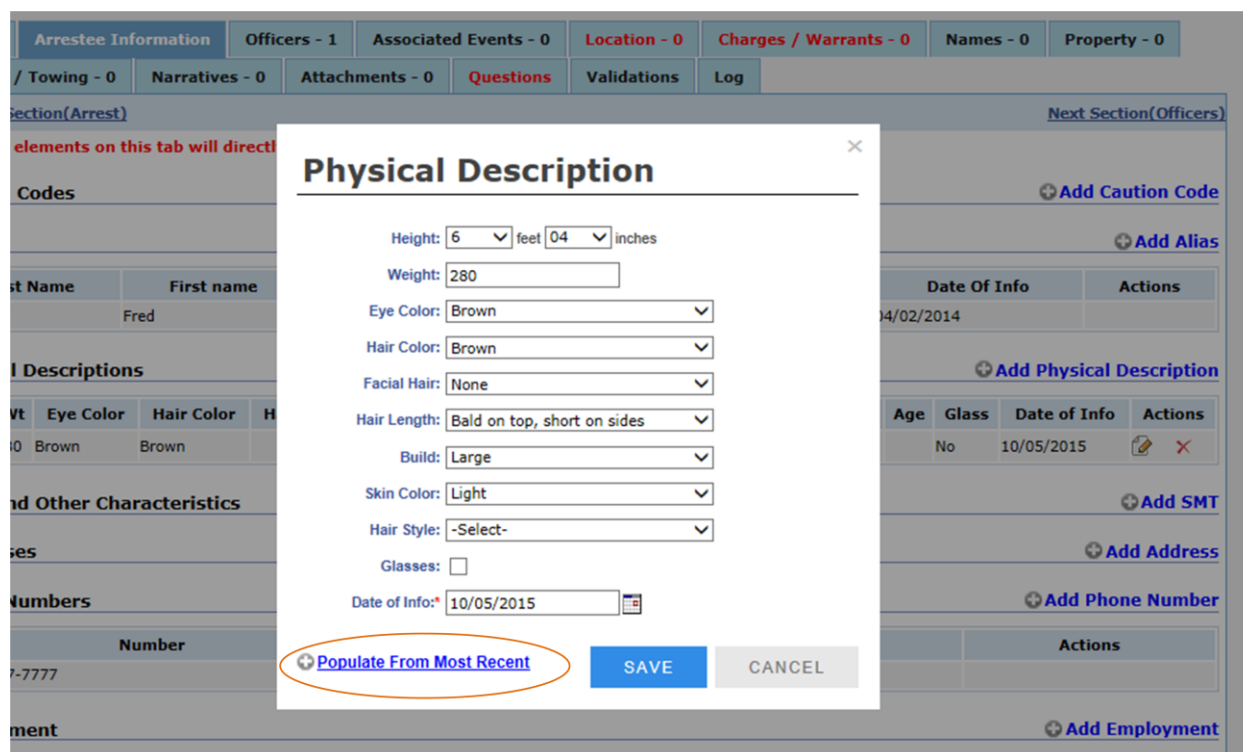

FIELD ARREST ENHANCEMENTS

IA-35223: *Physical Description Enhancement*

Every Field Arrest that is created requests that the officer populate the Arrestee “Physical Descriptors” pop-up so that as much information can be captured and documented regarding a known person for future use.

When arresting previously known persons, this process step can seem redundant and time consuming. In an effort to speed-up this very important data capture process step, we have added an enhancement that will allow the user the ability to import known physical descriptors from an existing master name. All the officer has to do is to select the “Populate From Most Recent” hyperlink and it will auto-populate the ‘Physical Description’ fields with the arrestee’s most recent physical description. Once imported, the officer will be able to review, modify or update any preexisting descriptors as needed.

In addition to the above import physical descriptors enhancement, we have also modified the message that is displayed during the Field Arrest process. The current message is triggered when a user edits an existing field arrest physical description and the date of Info of the last arrest is older than the hours set. The previous message would state that “One physical description at the time of the arrest is required.” This enhancement updates the validation message to read “A more recent physical description is required.”

OCN: 7902344

Arrest	Arrestee Information	Location - 0	Charges / Warrant
Vehicle / Towing - 0	Narratives	Validations	Log

Previous Section(Arrest)

The data elements on this tab will directly update the Arrestee's master person information

Caution Codes

Code	Comments	Date Of Info	Start Date	Expiration Date
Assaulted officer		06/05/2014	06/05/2014	
Threaten to kill Officer		06/05/2014	06/05/2014	
Suicidal tendencies		06/05/2014	06/05/2014	

Aliases [Add Alias](#)

Last Name	First name	Middle	Title	DOB	SSN	Type	Date Of Info	Actions
MIZELL	MICHAEL	ANTHONY		08/10/1971	587-430-074	Primary Name	01/18/2013	

Physical Descriptions [Add Physical Description](#)

Ht	Wt	Eye Color	Hair Color	Hair Style	Facial Hair	Hair Length	Build	Skin Color	Age	Glass	Date of Info	Actions
5' 06"	260	Blue	Brown		Beard		Large		42	No	06/04/2014	
5' 06"	200	Blue	Brown						42	No	11/23/2013	
5' 06"	250	Brown	Brown						41	No	03/16/2007	

The 'Arrestee Information' validation message has been updated to more clearly reflect the triggered validation, as the current validation message is confusing to users. The message was changed from "One physical description at the time of the arrest is required." to read "A more recent physical description is required".

INCIDENT REPORT ENHANCEMENTS

IA-33152: *Enhanced workflow for Associated Events*

Previously, the ability to enter associated field arrests or calls for service could only be performed via the incident 'Summary' tab. The location of this function was not conducive to users when completing an incident report. As a result, we have relocated this function to the "Header" tab so that it is now available during the normal Incident Report creation workflow.

Incident Report

Quick Print | Print | Exit Report | Transfer | Show Wizard | Submit for Approval

Summary | **Header** | Offenses | Names | Property & Vehicles | Narratives | Attachments | Incident Validations

Report Header | Report Times | Field Arrests | Calls For Service | Location | Officers | Employees

Associated Events sections (Arrests & Calls For Service) added to the incident "Header" tab.

IA-31023: IBR Data Quality Warnings Messages

Incident Report IBR Warning Message “Submit Incident Report for Approval”

In an attempt to aid in the new data quality review process identified below in the “State Reporting” section of this product release bulletin, the incident report approval process has been modified to display an IBR Warning Messages to the submitting officer. The officer will be made aware of any IBR Warning Messages on the ‘Submit Incident Report For Approval’ page.

This page contains a new section labeled ‘Verify Incident Warnings’. These are NOT Incident Validation errors that must be corrected prior to incident report “Submit for Approval” but IBR Warning Messages that should be review by the officer prior to submission. As required, the officer will be able to proactively verify and correct any warnings in questions.

Submit Incident Report For Approval

Incident Summary: 07/14/2015 1543 Hrs - 123 N ABBOTT ST MIDLAND CITY, MI 48640
Offense(s): 13003-INTIMIDATION/STALKING

Agency Name: Arlington ISD PD
Report #:15APD0007 Supp #:0

Supplement # (0) Summary	
Offenders: (1)	Victims: (1) Other Names: (0) Narratives: (1)
Properties: (0)	Evidence: (0) Vehicles: (0) Attachments: (0)
Attached Forms: (0)	

Verify Incident Warnings:

Audit warnings represent data situations that are commonly flagged by IBR authorities as uncommon or overly used that should be evaluated by the agency prior to submission. The goal of this process is to ensure the quality and accuracy of data submitted to the IBR authority. Corrections are NOT required for approval.

Type	Message
NIBRS	Incident is being reported with some unknown victim information. Generally, the victim information should be known. The age, sex, and race of victims provide important statistical information and every effort should be made to collect this data. If the age is unknown, an age range may be entered to approximate the victim's age.
NIBRS	Incident contains a Hate Bias Motivation. Please verify that Hate/Bias was a factor in the incident.

IA-54896: Configurable IBR Gender Validations for Victim/Offender

The rules requiring an opposite sex for person crimes such as rape and statutory rape continue to be in flux. In addition, these rules can vary per state and at the federal level. As such, we have moved away from hardcoded validation rules and have made these validation conditions configurable within the database.

From an officer perspective, they may see the following validation messages when completing an incident report which involved a crime against a person. Short of meeting the validation requirement, this is all that they will need to worry about.

The screenshot shows the 'Incident Report' form with tabs for Summary, Header, Offenses, Names, Narratives, Attachments, and Incident Validations. The 'Offenses' tab is active, showing 'Offense(s): 201-0201 : CAPITAL RAPE :'. A red box highlights a validation message: '201 - 0201 : CAPITAL RAPE :: At least one offender must have a sex of male or female AND the sex must be the opposite of at least one victim.' Below the message, a table lists offender information. The table has columns: Name, Age (Yrs) (Time of Incident), Role in Incident, Supp#, and Actions. The first row shows 'Offender Information Not Known' with a role of 'Suspect / Offender' and a support number of '0'. Navigation buttons include 'Back to Previous Section' and 'Finished - Go To Next Section'.

Name	Age (Yrs) (Time of Incident)	Role in Incident	Supp#	Actions
Offender Information Not Known		Suspect / Offender	0	

What this means:

NIBRS: NIBRS requires opposite sex Victim – Offender genders for Rape. However, this is not true for Statutory Rape.

SCIBRS, VIBRS: These require opposite sex Victim – Offender genders for Rape and Statutory Rape.

Going forward, standards will be established per state GOLD schema, but in the event that modification is required by RMS Operations, the following configuration options are available:

Users	Jobs	Types	Queue Tables	Queues	Directories
Profiles	Rollback Segments	Tablespaces	Materialized Views		
Roles	Favorites	Materialized View Logs	Resource Groups		
Resource Plans	Sys Privs	Clusters	Recycle Bin	Sched. Chains	
Sched. Programs	Sched. Schedules	Sched. Jobs			
Sched. Job Classes	Sched. Windows				
Sched. Window Groups	Invalid Objects	Transformations	Editions		
Tables	Views	Synonyms	Functions	Procedures	Packages

CODE_TYPE	CODE	DESCRIPTION	SYSTEM_RE
SEX_REQ_CODES	U	Require for an offense that at least one offender has a Male or Female Gender and that a victim has a opposite sex of that offender	Y
SEX_REQ_CODES	X	Require that all genders on the offense cannot be unknown.	Y
SEX_REQ_CODES	Y	Different Sex Enforced	Y

In the EJS_CODES Table, we've added a new code type: SEX_REQ_CODES.

The available values are:

U = Validate at least one of the Genders are different and not unknown. To be used for Rape for NIBRS, SCIBRS, VIBRS and Statutory Rape for SCIBRS, VIBRS...

Y = Validate Genders are different

X = Validate Genders are not unknown (This will support offenses where the genders can be the same however can't be unknown)

Null = No Validation (Statutory Rape for NIBRS)

Triggers	Indexes	Constraints	Sequences	Java	DB Links
Users	Jobs	Types	Queue Tables	Queues	Directories
Profiles	Rollback Segments	Tablespaces	Materialized Views		
Roles	Favorites	Materialized View Logs	Resource Groups		
Resource Plans	Sys Privs	Clusters	Recycle Bin	Sched. Chains	
Sched. Programs	Sched. Schedules	Sched. Jobs			
Sched. Job Classes	Sched. Windows				
Sched. Window Groups	Invalid Objects	Transformations	Editions		
Tables	Views	Synonyms	Functions	Procedures	Packages

CODE_TYPE	CODE	NIBRS_CODE	CREATOR_DATE	UPDATOR_ID	UPDATOR_DATE	CREATOR_ID	REC...
SEX_REQ_CODES	X	11B	11/10/2015 11:38:06 ...	MS24	11/10/2015 11:38:06 ...	MS24	54447
SEX_REQ_CODES	U	11A	11/10/2015 5:52:05 AM	MS24	11/10/2015 5:52:05 AM	MS24	54447
SEX_REQ_CODES	Y	36B	12/3/2013 1:38:19 AM	MS24	12/3/2013 1:38:19 AM	MS24	35575

The SEX_REQ_CODES can be mapped to NIBRS Offense Codes in the NIBRS_CODE_EJS_MAPPINGS table.

The available values are:

U = Validate at least one of the Genders are different and not unknown. To be used for Rape for NIBRS, SCIBRS, VIBRS and Statutory Rape for SCIBRS, VIBRS...

Y = Validate Genders are different

X = Validate Genders are not unknown (This will support offenses where the genders can be the same however can't be unknown)

Null = No Validation (Statutory Rape for NIBRS)

INTEGRATION ENHANCEMENTS

IA-54819: *Person Search Web Service Modifications (Address)*

IA-54820: *Person Search Web Service Modifications (Alias)*

Working with the Caliber Justice Offender Management Team (JMS/OMS), it has been communicated by customers that use both Caliber applications that it is often difficult to search on a name in an effort to identify a recent RMS Field Arrest. Our analysis of the workflow issue has caused us to modify the existing Person Search Web Service.

The Person Search Web Service has been modified to return only a "Single Address" for a person matching the search criteria. This address is the most recent residential address for a person based on the date of information of the person address.

The Person Search Web Service was reviewed and found to already support a FLAG to include/exclude the ALIAS name. The JMS/OMS team has been made aware of this support and will be looking to enhance the JMS/OMS person search results in the near future.

Both of these modifications are in an effort to limit undesirable query results hopefully leading to better query results. Please note that changes may still be pending from the JMS/OMS team.

INTERFACE ENHANCEMENTS

- IA-37426:** *Logisys CAD Phase II - Zip Code Support (TTI119674)*
IA-35008: *Logisys CAD Phase II - Improved Support for Dispatch Times (TTN117210)*
IA-35008: *Logisys CAD Phase II - CFS Incident Search Enhancement (TTN120467)*

When the initial integration with the Logisys CAD was designed and implemented, interface support from the 3rd party vender was limited. Since that time, improvements to the ICD have occurred. In this release, modification have been made to the existing Logisys CAD interface to improve Dispatch Date/Time fields, Address Zip Code fields and CFS search capabilities.

IA-39618 *Citation Web Service – Name Matching Enhancement (TTN119476)*

In this release, our interface team has added some additional import logic in an effort to improve upon Master Name matches. Because this is an automated process and known information can vary from a 3rd party source, we have added the following routines identified below in an effort not to create duplicate name entries:

LNAME_FNAME_DOB_SSN_SEX
LNAME_FNAME_DOB_DL_SEX
LNAME_FNAME_DOB_MI_SEX_RACE
LNAME_FNAME_DOB_SSN_SEX_MI_RACE
LNAME_FNAME_DOB_DL_SEX_MI_RACE
LNAME_FNAME_DOB_SSN_SEX_MN_RACE
LNAME_FNAME_DOB_DL_SEX_MN_RACE
LNAME_FNAME_DOB_MN_SEX_RACE

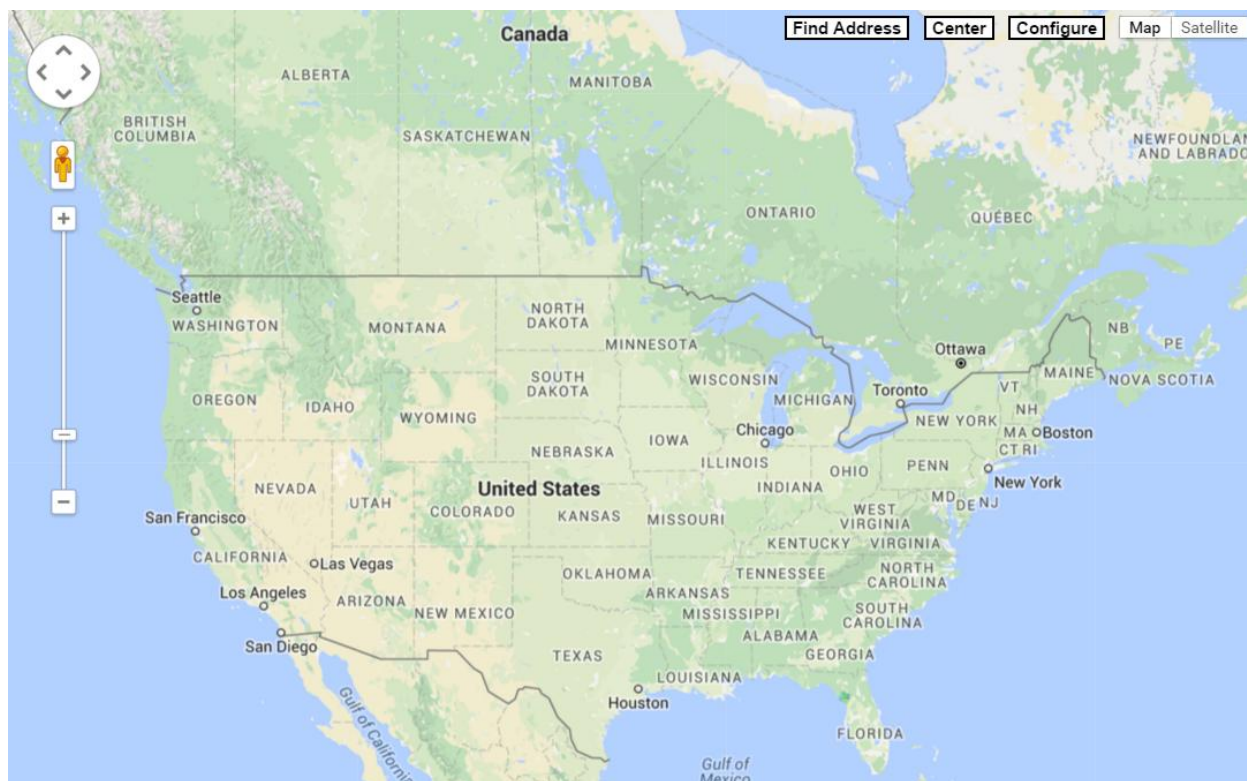

JASPER SERVER

- IA-54333:** *ATACRAIDS Narrative domain*
IA-33445: *CFS Super Domain*
IA-54802: *TOPICS to DOMAINS Conversion*

Resulting from the Jasper Server 6.1.1 upgrade that was performed in RMS 10.21.2, we have decided to eliminate the use of Jasper Topics. In this release we have migrated all existing Jasper Topics to Jasper Domains. Please be aware of this change as this will affect and of your customer agency reports that have been created.

MAPPING ENHANCEMENTS

IA-51979: *Dynamic Map Radius Adjustment*

Enhanced functionality has been added to the Incident Mapping that allows a user to “draw” a circle on the map and then edit the circle directly on the map to ensure the circle defines the desired area. To use the new functionality simply draw a circle on the map the same way it has done in the past, define date range, define circle area and click on the map.

Notice however after the circle has been drawn the user has 4 points on the circle. Using any one of the four points the user can enlarge or shrink the circle to ensure the circle covers the desired range. The user can also continue to “edit” the circle by modifying the circle radius and mile options and then selecting apply.

IA-33631: Improved Method of Selecting Defines Shapes

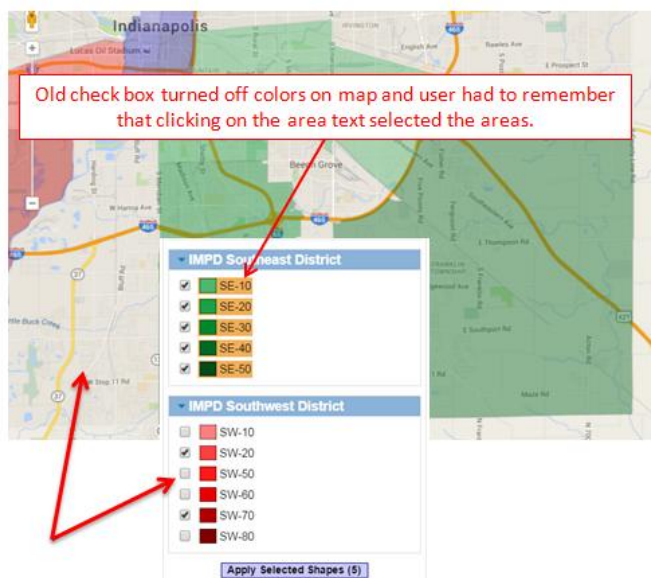

The way the user selected defined shapes on the map has been enhanced. Instead of the user having to click on the individual shape labels to “pick” the shapes the user now has an easy check option.

The old way the user could display the colors on the map by checking the box next to the area, but had to remember that to select an area to apply to the search results they needed to also click the area “label or Text” to select the desired areas.

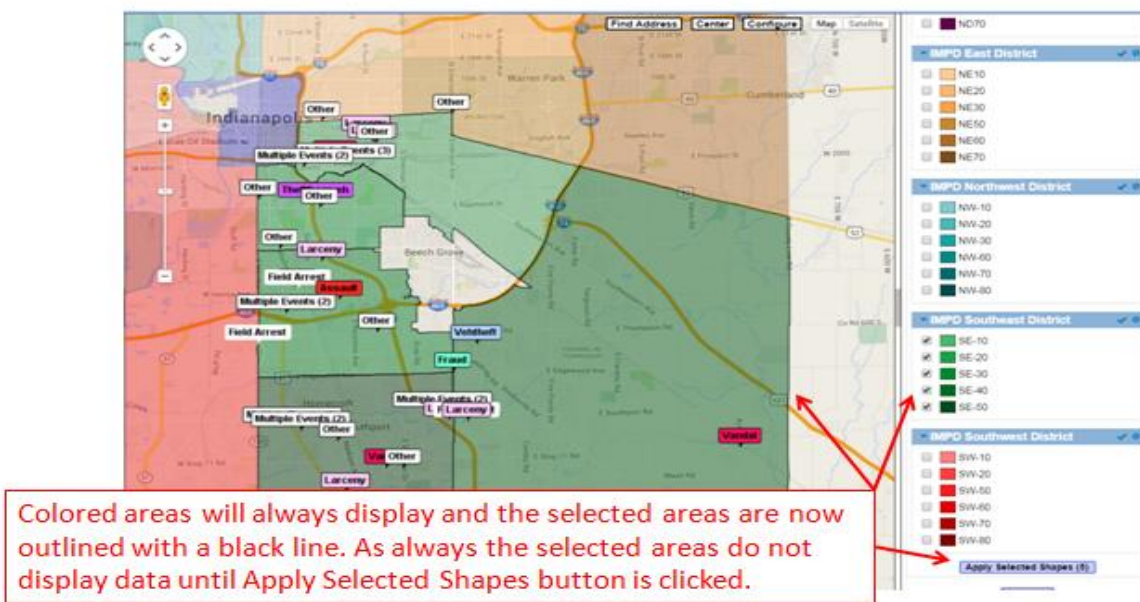

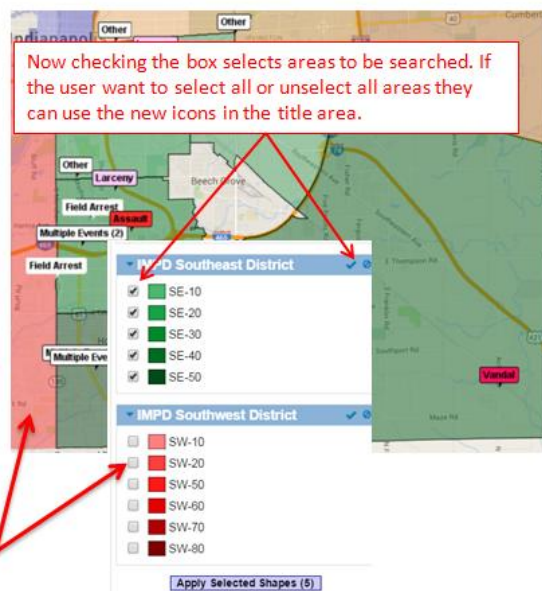

The new way allows the user to select and apply the desired areas by a simply checking the box next to the area. The user also has an additional option of select all icon or de-select all icon in the Header area.

Old

New

IA-54405: Map Export – Warrant Data

Additional data has been added to the Warrant export to provide users additional information they can export and take into the field. The export now exports citation numbers and charges as well as wanted person information.

IA-36778: Enhancement to Print Map Sector Overlays (TTN118879)

Prior to this release, the MAP sectors or shapes where not displayed when the map was printed. Now when the user clicks on the "Print Icon" located next to the Excel export icon the user can print the current map view.

Before: No Reporting Area in output

After: Reporting Areas are displayed in Color

MASTER INDEX ENHANCEMENTS

IA-53539: Master Index – View Mode PDF Download

We allow Image and PDF attachments to all Master Index records, however when in view mode only the attached images could be easily recalled for review. To aid in this shortcoming, we have added the ability to download an attached PDF file in view mode for all Master Indices. Previously, the user would have to switch to edit mode in order to download and view the PDF.

NOTIFICATION ENHANCEMENTS

IA-32126: Delete Notifications in Mass (TTN111936, 00146655, 00151102, TTN118958)

Customers wanted the ability to quickly delete notifications directly from 'Show All' and 'Notification Type' screens. With the new Mass Delete Notification option any notification that does **NOT** require some type of action from the user can be deleted in mass. The Mass delete option is available from both the Home Screen and the Show All Screen.

By selecting the "Show All" or by selecting the individual "Notification Type", the user will have the ability to select individual notifications or "Select All" for deletion.

Type	Description	Sent On
<input checked="" type="checkbox"/>	INCIDENT REPORT OPENED FOR EDIT	Joe

PROPERTY ENHANCEMENTS

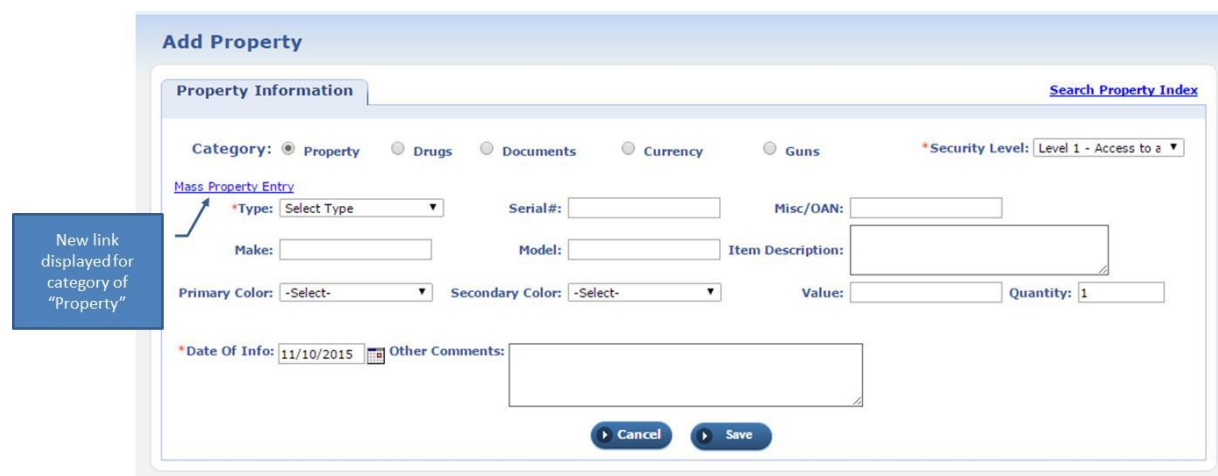

IA-52471: Incident Property – Mass Property Data Entry

Until now, entering large amounts of property into the incident report could be a time consuming task. Take for example an officer responding to a burglary incident of a home invasion or store where numerous pieces of property were stolen. The officer could spend several minutes per property item entering the stolen property information into RMS.

In an effort to reduce the amount of time and effort involved in entering such property to an incident report, we have designed a new property data entry screen that we hope will greatly reduce this time consuming task. Included in this release is the ability to add property to an incident report in mass. This feature allows the user to enter multiple pieces of similar properties quickly and easily in an effort to speed up the creation time for an incident.

Adding Property in Mass

From the Incident Report, the user selects the Property / Vehicles tab and the “Add Property” link as they normally would today to enter property into the incident report. RMS will also continue to display the Add Property screen as it does now. However, when the user selects the “Property” radio button, RMS will display a link for “[Mass Property Entry](#)”.

Once the user selects the [Mass Property Entry](#) link, RMS will display the new Add Property in Mass screen defaulting to a single blank row for a piece of property.

The user can now enter property values as needed by selecting the return or tab key which will move the user through the property fields in order of left-to-right. Selecting return or tab after the last data field in the row will move the user down to the next blank row.

To add more rows, the user may either enter a number at the top and select “add rows” in which case RMS will display as many new blank rows as the number entered or the user may select “add” at the bottom of the displayed rows to add a single new blank row, one at a time. The user may only add 99 additional rows at one time. The user may add an additional 99 rows after the first set of 99 has been added if needed. The property count in the upper left corner will display the total number of rows being displayed.

InterAct Property Count: 1 [Add More Rows](#)

Enter a number and select "Add More Rows" to add multiple blank rows

Select Add button to add a single blank row

Mass Property Entry

*Type	Make	Model	Value	Quantity	Serial#	Misc/OAN	Item Description	Property Owner
<input type="button" value="Add"/> <input type="button" value="Reset"/>								

Comments, Offense Association, and the Offense Status' will be applied to ALL property added from this screen!

* Date Of Info: 01/10/2015 Comments:

Only associate a piece of property to an offense if that property was a "target" or incurred a loss resulting from that offense (i.e., the property was Stolen & Recovered, Burned, Counterfeited/Forged, Destroyed/Damaged/Vandalized, or for drug seizures)

Offenses in RED require at least one property.

Available: 35-43-2-1 809-BURGLARY-BUILDING Selected:

*Current Status:

To reset the screen the user selects "reset" button under the displayed rows. RMS will discard ALL data entered and return the screen to the default display of a single blank row. The user will then be asked to confirm before the screen is reset.

InterAct Property Count: 3 [Add More Rows](#)

Select Reset button to discard entered data and return the screen to the default single blank row

Alternate Data Entry Scenario

Say for example, an officer is responding to a burglary where 20 pieces of property were stolen and 10 pieces were recovered; there are a few ways this could be entered using the new Mass Property enhancement. First, the officer could enter all 30 pieces on the mass property screen and save and then individually edit the 10 pieces that were recovered and update the status of each. Or, the officer could enter the first 20 pieces of property that were stolen and save and then select the Mass Property link a second time and enter the 10 pieces that were recovered.

Please Note: At this time, RMS only supports adding property in mass for type “Property”. Mass entry for the remaining types such as drugs, guns, documents, etc. will be supported in later releases pending user feedback and acceptance.

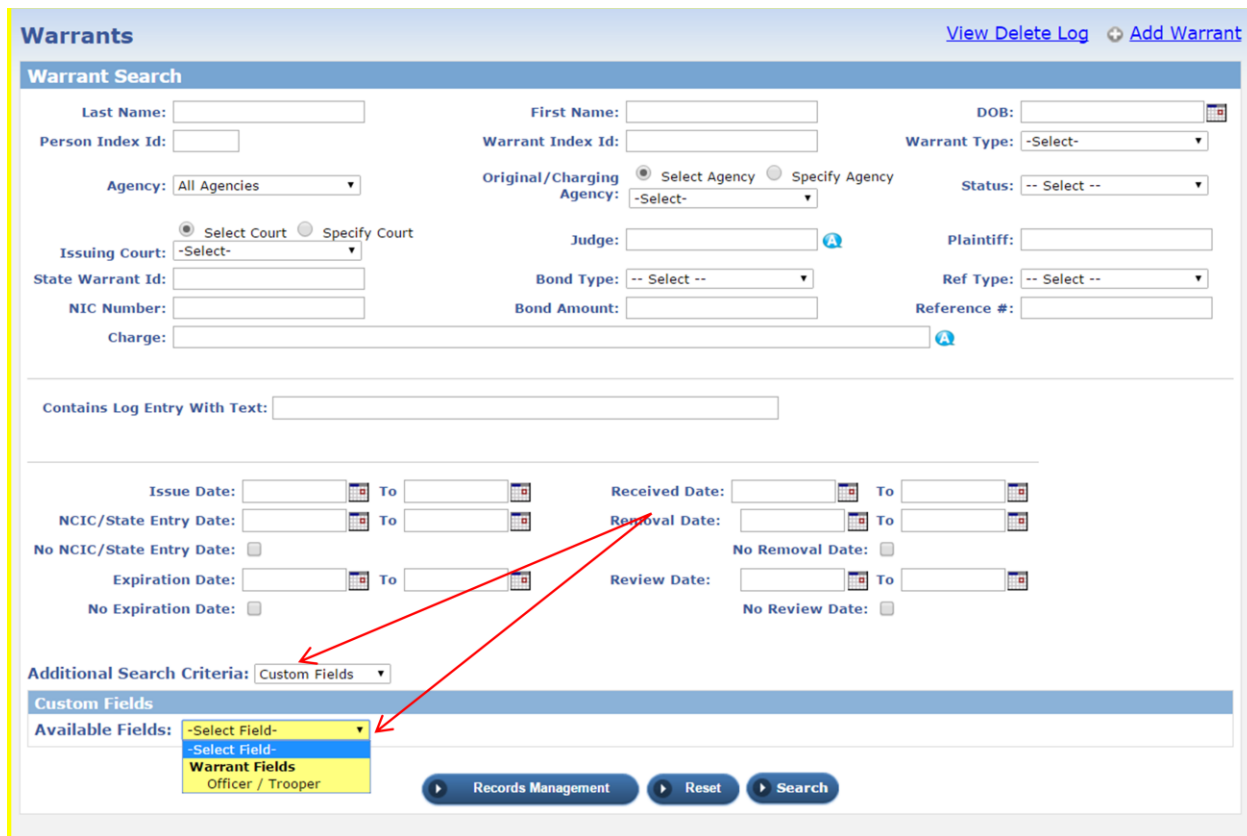

SEARCH ENHANCEMENTS

- IA-32952:** *Search Court Paper Custom Fields*
IA-32950: *Search Field Arrest Custom Fields (TTN119692)*
IA-32953: *Search Warrant Custom Fields*

In prior releases, we added the ability to create agency specific “Custom Fields” for the Court Paper, Field Arrest and Warrant modules. In this release we have enhanced the ability for agencies to retrieve Court Paper, Field Arrest and Warrant information based on upon agency specific custom field values that they have created.

Below is an example of how to search for a Warrant based upon agency specific custom fields. The process is the same for all search modules where this function is supported.

STATE REPORTING ENHANCEMENTS

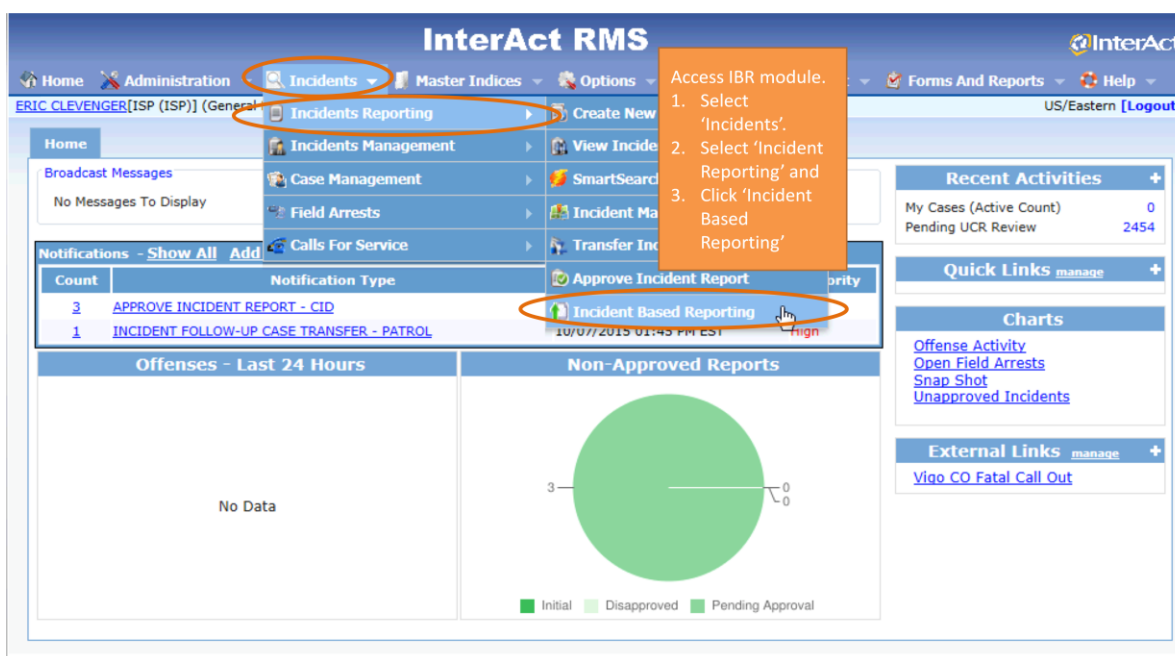

IA-31023: IBR Data Quality Review (Warning and Notifications)

IBR Warnings & Notifications

In an effort to continue to improve incident data submission rates to the IBR authorities, a data audit warnings tab and the ability to send notifications has been added to the incident based reporting (IBR) module. The data audit 'Warnings' tab provides the opportunity for an agency to self-audit incident reports included in the data submission, that may be at risk of a data quality audit by the IBR authority.

Data audits represent data situations that are commonly flagged by the data authorities as uncommon or overly used, that should be evaluated by the agency prior to submission. The goal of this process is to ensure the quality and accuracy of data submitted to the IBR authority. This enhancement will allow IBR/UCR clerks the ability to review incidents that have triggered warnings and allow the clerks to fix these incidents or send a notification to the appropriate person to fix the warning.

To see all warnings for a given submission timeframe, the IBR/UCR clerks need to access the IBR module and generate a data set by selecting 'Incidents', 'Incident Reporting' and finally the 'Incident Based Reporting'.

The screenshot displays the InterAct RMS web application. The navigation menu on the left includes 'Home', 'Administration', 'Incidents', 'Master Indices', and 'Options'. The 'Incidents' menu is expanded, showing 'Incidents Reporting', 'Incidents Management', 'Case Management', 'Field Arrests', and 'Calls For Service'. An orange callout box with the text 'Access IBR module. 1. Select 'Incidents'. 2. Select 'Incident Reporting' and 3. Click 'Incident Based Reporting'.' points to the 'Incident Based Reporting' link in the 'Incidents Reporting' sub-menu. Below the navigation menu, there is a 'Notifications' section with a table showing counts for 'APPROVE INCIDENT REPORT - CID' (3) and 'INCIDENT FOLLOW-UP CASE TRANSFER - PATROL' (1). To the right, there are sections for 'Recent Activities', 'Quick Links', and 'Charts'. The 'Charts' section includes a pie chart for 'Non-Approved Reports' with a legend for 'Initial', 'Disapproved', and 'Pending Approval'.

To generate the list of submission candidates and associated warnings, the clerk will need to select the agency from the LOV, click on the paper/pencil icon next to the 'Open Data Set' section and then enter the desired 'Submission Date' followed by the 'Next' button.

InterAct

ERIC CLEVELAND [ISP (ISP)] (General Headquarters) [Emulation][Main User]

Select Agency: **Indiana State Police**

Data Set: 201509-201

Data Set	Total Incidents	Actions
072015-1	760	
062015-1	622	
052015-1	601	

Submission Date: **Next**

Create a data set.

1. Select an Agency
2. Click the paper/pencil icon on the 'Open Data Set' section.
3. Enter the 'Submission Date'.
4. Click the 'Next' button.

Once the data set is generated, the new 'Warnings' tab is activated, allowing the clerk to perform the following actions for those incidents that have triggered a warning:

- View the incident report.
- View the IRB data capture elements for a given incident.
- Send a notification to reporting officer or appropriate person to review and possible fix the incident warning.
- Remove the incident from the submission candidate list, prior to generating the submission file.

Data Set: 022014-1

Warnings

After reviewing any warnings (if applicable), click NEXT to generate the submission file. **Next**

The Data Audit Warnings tab provides the opportunity for an agency to self-audit incident reports included in the data submission that may be at risk of a data audit by the IBR authority. Data audits represent data situations that are commonly flagged by IBR authorities as uncommon or overly used that should be evaluated by the agency prior to submission. The goal of this process is to ensure the quality and accuracy of data submitted to the IBR authority.

# of Affected Incidents	Type	Message
> 3	NIBRS	Drug Property Mes (reported), please verify that property has been sent to lab awaiting measurement value.
> 1	NIBRS	Incident is being reported with unknown victim information. Generally, the victim information should be known. If an exact age cannot be determined, an age range may be entered to approximate the victim's age. The age, sex, and race of victims provide important statistical information and every effort should be made to collect this data
> 2	NIBRS	Not all 35A offenders are under the influence at the time of the offense (For example, dealers). For drug offenses, at the time the offense occurred, was the offender suspected or known to be using drugs? If not, the entry should be N (Not Applicable).
> 1	NIBRS	Incident contains a Hate Bias Motivation. Please verify that Hate/Bias was a factor in the incident.
> 2	INCIDENTS	Traffic Offenses (DUI, traffic violations, etc) should have an associated vehicle

1. Click on the 'Warnings' tab.

2. Click on the '>' to view the incidents.

In order to view the affected incidents, the clerk must expand the warnings message, by clicking on the greater than symbol '>' within the '# of Affected Incidents' column in order to see the list of affected incidents.

When an IBR warning condition has been reviewed and follow-up action is required, the IBR/UCR Clerks now have the ability to generate a notification to the reporting officer, other responsible user(s) and the approving supervisor(s) by selecting the notification type of 'Incident NIBRS Follow-Up Action'. This will send a notification message that an IBR Warning message has been triggered for the incident in questions and that it may require their attention prior to data submission.

The 'Comments' field is a required field that will be auto-populated with the original warning message. Additional comments may also be entered by the clerk to provide further direction or clarification. Finally, the clerk will also be required to select individual who is to receive the IBR warning notification.

If for any reason the IBR/UCR Clerk decides not to submit an incident report for the time period in question due to the IBR warning messages, they may exclude the affected incident(s) from the submission candidate list prior to generating the official IBR 'Submission File'.

Exclusion Process:

- The clerk can individually check on the 'Remove' checkbox to the left of the 'Report #', click 'Remove Selected' button and then click the 'Next' button to remove those selected incidents from the data set.
- Another way would be to remove all affected incidents from the data set candidate list for a given warning at one time by clicking on the "Remove All" hyperlink which is location above the 'Remove' column and then by clicking the 'Next' button once all the incidents for each warning have been removed.

Data Set: 022014-1

Remove selected incidents from a given warning from the data set:

1. Click on the 'Remove' checkbox to the left of the 'Report #'.
2. Click the 'Remove Selected' button
3. Click the 'Next' button.

After reviewing any warnings (if applicable), click NEXT to generate the submission file. **Next**

Remove Selected

3 NIBRS Drug Property Measurement value is XX (Not Reported), please verify that property has been sent to lab awaiting measurement value.

Remove All

Remove	Report #	Actions
<input checked="" type="checkbox"/>	14ISPC001477	
<input type="checkbox"/>	14ISPC000873	
<input checked="" type="checkbox"/>	14ISPC001373	

'Remove All' affected incidents for a given warning from the data set:

1. Click on the 'Remove All' hyperlink, above the 'Remove' column
2. Click the 'Next' button.

1 NIBRS Incident is being reported with some unknown victim information. Generally, the victim information provides important statistical information and every effort should be made to collect it. If the victim's race or ethnicity is unknown, the entry should be N (Not Applicable).

2 NIBRS Not all 35A offenders are under the influence at the time of the offense (For example, dealers). For drug offenses, at the time the offense occurred, was the offender suspected or known to be using drugs? If not, the entry should be N (Not Applicable).

1 NIBRS Incident contains a Hate Bias Motivation of Unknown. The state and federal IBR authorities will expect this to be updated as the investigation of an incident continues. Failure to update can trigger an audit in the future.

**List of NIBRS Warnings within RMS:**

1. Case Management status is updated to 'Cleared by Arrest', please update Incident Status.
2. Incident contains 1 Arrest Record, Incident Status should be updated to 'Cleared by Arrest'.
3. Drug Property Measurement value is XX (Not Reported), please verify that property has been sent to lab awaiting measurement value.
4. Incident is being reported with unknown victim information. Generally, the victim information should be known. If an exact age cannot be determined, an age range may be entered to approximate the victim's age. The age, sex, and race of victims provide important statistical information and every effort should be made to collect this data.
5. Aggravated Assault - The victim of this incident of Aggravated assault sustained no injuries or only minor injuries. The weapon used was personal weapons. Please verify this was not a Simple assault.
6. Not all 35A offenders are under the influence at the time of the offense (For example, dealers). For drug offenses, at the time the offense occurred, was the offender suspected or known to be using drugs? If not, the entry should be N (Not Applicable).
7. Incident contains a Hate Bias Motivation. Please verify that Hate/Bias was a factor in the incident.
8. Incident contains a Hate Bias Motivation of 'Unknown'. The State and Federal IBR authorities will expect this to be updated as the investigation of the incident continues. Failure to update can trigger an audit in the future.
9. Incident was listed as being a Cargo Theft. Please review the incident and verify that a cargo theft actually occurred.
10. Incident has both Burglary and Theft offenses. Because larceny/theft is an element of Burglary, agencies should not report the larceny as a separate offense if it is associated with the unlawful entry of a structure. Please verify that the larceny is a separate offense. If not, remove it from the incident.
11. Incident has both Fraud and Theft offenses. Often, questions arise as to whether or not the facts of a case describe a fraud or a larceny. Though both offenses can involve theft, it is the method used to steal which differentiates the two. Fraud is achieved through deceit or lying, whereas larceny is the physical taking of something. Please verify these are separate offenses.
12. Incident contains a Justifiable Homicide offense and other offenses. Agencies must report the crime that was being committed when the justifiable homicide took place as a separate incident.

List of Incident Warnings within RMS:

1. Field Arrest is linked to Incident without Incident Arrestee information
2. Incident contains an offender 10 years old or younger. Please verify this for accuracy.
3. Incident contains the offense of Incest. Please verify the victim to offender relationship for reasonableness.

Incident Report IBR Warning Message “Submit Incident Report for Approval”

In an attempt to aid in this new data quality review process so that it does not just become a backend function, the incident report approval process has also been modified to display the same IBR Warning Messages to the submitting officer. The officer will be made aware of any IBR Warning Messages on the ‘Submit Incident Report For Approval’ page.

This page contains a new section labeled ‘Verify Incident Warnings’. These are NOT Incident Validation errors that must be corrected prior to incident report “Submit for Approval” but IBR Warning Messages that should be review by the officer prior to submission. As required, the officer will be able to proactively verify and correct any warnings in questions.

Submit Incident Report For Approval

Incident Summary: 07/14/2015 1543 Hrs - 123 N ABBOTT ST MIDLAND CITY, MI 48640

Statistics Tab:

The last IBR Data Submission modifications that is worth mentioning is that we renamed the IBR 'Charts' tab to read as the 'Statistics' tab.

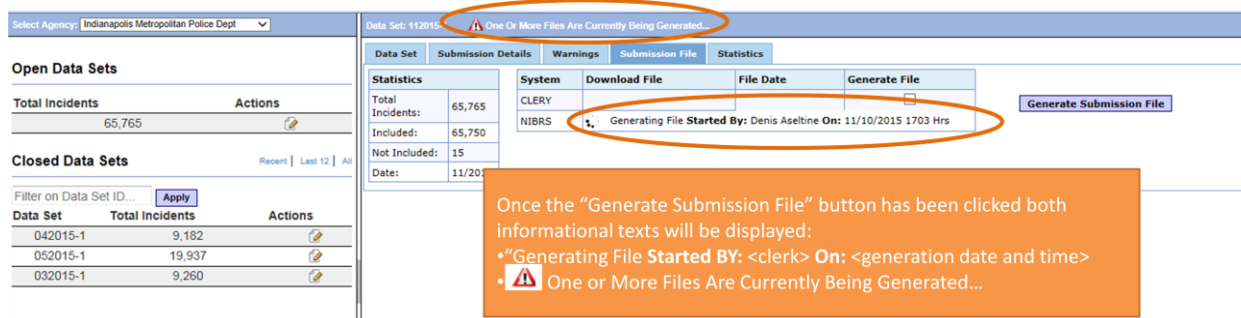

IA-54759: Asynchronous IBR File Generation

Prior to this release, the IBR file generation process was a synchronous task function. This resulted in the data submission clerk's application being locked until the file generation process completed. We found that the larger the open dataset the longer this process took to complete. In fact, depending on the amount of incidents that need to be processed for a given time period, it could take tens of minutes for this file generation process to finish which ultimately resulted in lost productivity.

In this release, we have change the IBR file generation process to an asynchronous or non-blocking process. This process modification will allow the IBR/UCR clerk the ability to perform other tasks within RMS while the submission file is being generated. Net result, they will no longer have to wait until the submission file(s) are complete before performing other RMS functions.

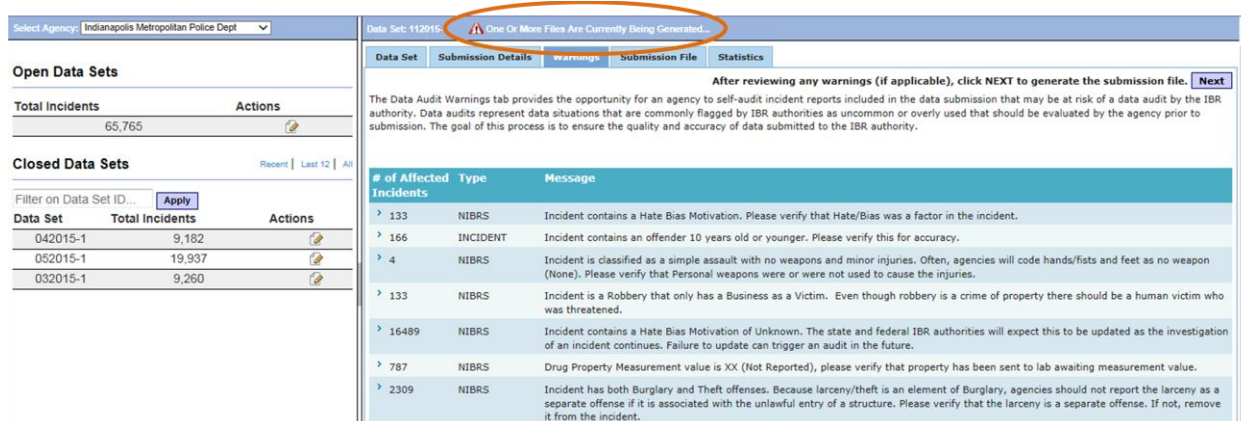

To let the clerk or anyone with access to the data submission module know that files are in the process of being generated, A caution sign followed by a message will be displayed on top of the screen and across the entire IBR module while the submission file(s) are in the process of being generated.

The screenshot shows the IBR system interface for the Indianapolis Metropolitan Police Dept. The 'Open Data Sets' section lists a total of 65,765 incidents. The 'Closed Data Sets' section lists three data sets with their respective incident counts. The 'Generate Submission File' button is highlighted. A warning message is displayed at the top: 'One Or More Files Are Currently Being Generated...'. Below the button, a message states: 'Generating File Started By: Denis Aseltine On: 11/10/2015 1703 Hrs'.

Once the "Generate Submission File" button has been clicked both informational texts will be displayed:

- "Generating File Started BY: <clerk> On: <generation date and time>
- ⚠ One or More Files Are Currently Being Generated...

The screenshot shows the IBR system interface for the Indianapolis Metropolitan Police Dept. The 'Warnings' tab is selected, displaying a list of affected incidents. The table includes columns for '# of Affected Incidents', 'Type', and 'Message'. The messages provide details about the incidents, such as 'Incident contains a Hate Bias Motivation' and 'Incident contains an offender 10 years old or younger'.

# of Affected Incidents	Type	Message
133	NIBRS	Incident contains a Hate Bias Motivation. Please verify that Hate/Bias was a factor in the incident.
166	INCIDENT	Incident contains an offender 10 years old or younger. Please verify this for accuracy.
4	NIBRS	Incident is classified as a simple assault with no weapons and minor injuries. Often, agencies will code hands/fists and feet as no weapon (None). Please verify that Personal weapons were or were not used to cause the injuries.
133	NIBRS	Incident is a Robbery that only has a Business as a Victim. Even though robbery is a crime of property there should be a human victim who was threatened.
16489	NIBRS	Incident contains a Hate Bias Motivation of Unknown. The state and federal IBR authorities will expect this to be updated as the investigation of an incident continues. Failure to update can trigger an audit in the future.
787	NIBRS	Drug Property Measurement value is XX (Not Reported), please verify that property has been sent to lab awaiting measurement value.
2309	NIBRS	Incident has both Burglary and Theft offenses. Because larceny/theft is an element of Burglary, agencies should not report the larceny as a separate offense if it is associated with the unlawful entry of a structure. Please verify that the larceny is a separate offense. If not, remove it from the incident.

Please note that links or buttons that allow the current data set to be "edited" will be disabled while the file(s) are being generated.

TECHNOLOGY STACK UPGRADES

IA-54030:	<i>Jasper Server 6.1.1 (10.21.2)</i>
IA-53648:	<i>Online RMs Stack Upgrade - JAVA 7 --> 8</i>
IA-53650:	<i>Apache Tomcat 6 --> 8</i>

The upgrades identified here have been applied to our NLETS infrastructure and were necessary to comply with Industry best practices with regards to security and performance in addition to additional enhancements and fixes that they provide.

APPENDIX: 10.22.0 DETAILED JIRA LISTING

TABLE A: RELEASE ENHANCEMENTS AND PRODUCT DEFECT FIXES

This table contains the major product defect JIRAs resolved in the 10.22.0 release along with additional enhancement not documented above.

JIRA ID	Summary	Component/s	Type of Issue
IA-53164	Administration - Tables: Resolved an issue trying to add a "Tow Company" to the LOV.	Admin	Bug/Defect
IA-37677 TTI119880	Agency Setup - Number Generation: resolved issue where Next Number column was actually the current number, which caused the next number to always be off by one.	Admin	Bug/Defect
IA-54748 150594	Attachments: Resolved issue uploading PDF files.	Plug-in	Bug/Defect
IA-54632 150093	Calls for Service: Corrected an import issue that caused the "Incident Notes Times" to be different in RMS than they were in CAD. Historical records were not corrected.	CallsForService, Interface	Bug/Defect
IA-52710 138380	Case Management - Print: Resolved a print issue where the detective information was printing with both the Badge # and SQL #.	Cases, Printing	Bug/Defect
IA-54161 148334	Civil Process - Log Entry: When manually adding a TIME value to the log entry, it was being saved but was incorrect by one hour, issue resolved.	Civil Process	Bug/Defect
IA-54959	Civil Process: Resolved issue where the "Adding" of a service address would erase the "role" of the person.	Civil Process	Bug/Defect
IA-54625	Civil Process: The "Specify Court" location will not save, issue resolved	Civil Process	Bug/Defect
IA-54114 148264 148472	Collapse - Master Name: Resolved Name collapse issue caused by the promotion of an Alias name.	Admin, Master Indices	Bug/Defect
IA-37811 TTN120255	Collapse - Organizations: Resolved an issue caused by Org Collapse where the Phone numbers could not be deleted.	MasterIndices	Bug/Defect
IA-54266 IA-37278	Collapse - Person: Resolve numerous person collapse issues.	Incident Report, Master Indices	Bug/Defect

JIRA ID	Summary	Component/s	Type of Issue
IA-55006	Collapse - Person: Resolved an issue found during "Un-Collapse" that occurred when an Alias Name was promoted to a Primary Name.	Collapse	Bug/Defect
IA-54474 149527	Custom Forms: When a DBA User created a "Sub-Form" and then a normal system user with permissions tried to edit the sub-form, the system would return a grey screen, issue resolved.	CustomForms-SubForms	Bug/Defect
IA-54758	Data Submissions: Modified the File generation procedures in an effort to improve performance	Data Submissions, Incident Report	Performance
IA-34972 TTN117704	Evidence - Mass Change Location: Enabled the Barcode Search function on this screen.	Barcode Scanner, Evidence	Enhancement
IA-32316 TTN112601	Evidence - Report: Resolved Page numbering issue with the Evidence Receipts report.	Evidence, Printing	Bug/Defect
IA-34764 TTI117175	Evidence - Role: Resolved Evidence Barcode Search permission issue.	Admin, BarCodeScanner	Usability
IA-36766 TTN118554 TTN118885	Evidence - Times: Resolved an issue where the Check-In and Chain of Custody Times were off by one hour. This was caused by a time zone conversion issue.	Evidence	Bug/Defect
IA-36662 TTN118426	Evidence Receipt - Print: Resolved an issue where the property was printing multiple times on the Evidence Receipt report.	Reporting_ApplicationReports	Reports-Defect
IA-33028 TTN114715	Field Arrest - Bond: Resolved an issue where the System Warrant Bond Amount was dropping the RIGHT Ending Zeros (i.e. Change).	FieldArrest, Warrants	Bug/Defect
IA-37715 TTN120018 00151114	Field Arrest - Print: Resolved an issue where the External Warrant Charge Description was not showing up on printed field arrest.	FieldArrest, Printing	Bug/Defect
IA-53663	Field Arrest - Print: Resolved minor formatting issues on the field arrest PDF output.	Field Arrest, Printing	Bug/Defect
IA-32583 TTN113466 TTN119456	Field Arrest – Tow: Resolved an issue where the Vehicle Tow function of "No Towing" would not stay set.	FieldArrest, UI_UserInterface	Bug/Defect
IA-53661	Field Arrest: Resolved minor issue where the "Blue Info Bubble" was not displaying all offense information	Field Arrest	Enhancement

JIRA ID	Summary	Component/s	Type of Issue
IA-54375 149100	Field Arrest: When associating a FA to the IR, the validation logic was requiring ALL Offenses listed on the FA to also be on the IR. We modified this validation logic to only require ONE Matching Offense.	Field Arrest, Field Validation, Incident Report	Enhancement
IA-53884 147734	Field Contact: Added additional buttons to the bottom of the screen to improve navigation.	Field Contact	Enhancement
IA-54147	Field Contact: Added Caution Icon to the field contact person record.	FieldContact	Bug/Defect
IA-54147	Field Contact: The Person Alert Icon was not being displayed next to a field contact name, issue resolved.	Field Contact	Bug/Defect
IA-54572 149773	Incident - Citation Association: Citation Charges were not being displayed when hovering over the blue information bubble of a linked citation, issue resolved.	Incident Report	Bug/Defect
IA-54506 149648 TTN117677	Incident Mapping: Modified export logic to write the GPS coordinates in the same way in which they are displayed on the map. Previously they were exported as DMS and now they are exported in DD.ddddd format.	Incident/EventMapping	Bug/Defect
IA-54506 149648	Incident Mapping: The GPS "Latitude" coordinates were being incorrectly converted and exported, issue resolved	Incident/EventMapping	Bug/Defect
IA-54198 148496	Incident Printing: Narrative formatting was not being retained when using the "Quick Print & Print" feature, issue resolved.	Printing	Bug/Defect
IA-36850 TTN118946	Incident Report - Print: Added new Redaction option to only print the name of the person being redacted.	AgencyPrintOptions, Printing	Enhancement
IA-32902 TTN114108	Incident Report - Print: Added Vehicle Damage to the printed output of the vehicle section.	Incident Report, Master Indices, Printing	Enhancement
IA-35126 TTN117920	Incident Report - Print: Enhanced the Vehicle section of the IR output to include (License Type, Misc ID, Odometer, Motorcycle CCS, License Month and Year)	Incident Report, Master Indices, Printing	Enhancement
IA-54167 147957	Incident Report - Print: Resolved issue where the last page of a printed incident report was missing the Footer information.	Incident Report, Printing	Bug/Defect

JIRA ID	Summary	Component/s	Type of Issue
IA-54230 148529	Incident Report: Resolved minor spelling issue with the "Occurrence Date".	Incident Report, Printing	Bug/Defect
IA-35175	Incident Reports - View & Print: Added "Select All/Uncheck All" check box function to aid in incident selection.	Incident Report	Enhancement
IA-54774	Interface - CJIS: Added security layer requiring Officer to acknowledge that the application was in a secure location prior to JCIS use.	Admin	Enhancement
IA-53589	Master Gang: Resolved issue where new Gang entry was auto defaulting to existing Gang Name and should not have been.	Master Indices	Bug/Defect
IA-53518	Master Name - Involvements: Resolved issue where Person Summary page was not showing all associated role involvements	Master Indices	Enhancement
IA-55023	Master Name - Mug Shot: Resolved issue where a collapsed Alias name was not displaying the mug shot.	Master Indices	Bug/Defect
IA-54948	Master Organization: Resolved an issue that prevented a "Collapsed Person" from being added as an Employee of an Organization.	Collapse	Bug/Defect
IA-54080 147963	Master Organization: Resolved error viewing employee on pages 2 thru X caused by pagination issue.	Master Indices	Bug/Defect
IA-53822 147719	Master Person: Resolved spelling issue with the word Country when in view mode.	MasterIndices	Bug/Defect
IA-37090 TTN118747	Master Vehicle: Resolved application display issue were the Odometer reading and Value fields were swapped.	MasterIndices	Bug/Defect
IA-54313 149022	Narrative - Find: Selecting the Binoculars "Find Icon" was causing the application to lock-up. We had to remove this function as it is no longer supported by the FCKeditor.	Incident Report	Bug/Defect
IA-35302 TTN118351	Property Evidence: Modified the Officer field to display the Officer Name in lieu of the Officer_ID.	Officer	Bug/Defect
IA-55175 152380	RMS Help: New Caliber Web Site was missing link for "RMS - Live Assistance", issue resolved.	ADMIN_DBA	Bug/Defect

JIRA ID	Summary	Component/s	Type of Issue
IA-55100 151998	Search - Field Arrest: Resolved search by "Reporting Area" issue caused by only the "Beat" being searched.	FieldArrest	Bug/Defect
IA-53891 147712	Search - Master Name: When performing a person search by caution codes, the caution code "comments" were not being displayed in the search results grid, issue resolved.	Master Indices	Enhancement
IA-33165 TTN115089	Search - Records Management: Resolved an issue where the Evidence Management search under Records Management did not function when the enter key was selected.	RecordsManagement, Searching-General	Usability
IA-53505	Search - Warrant: Resolved issue where the "Refine" search function was erasing the original search criteria.	Searching-General, Warrants	Bug/Defect
IA-53631 147422	Search - Warrants: Resolved Bond Search issue caused by non-numeric values being entered as data. Modified the logic to prevent this condition going forward.	Warrants	Bug/Defect
IA-54336 149128	State Reporting - IBR: Added additional backend logic to prevent multiple instances of the same incident from being reported in the IBR Open dataset.	DataSubmissions	Bug/Defect
IA-55130	State Reporting - IBR: Resolved an issue where the Estimated Drug Quantity of "Dosage Units" was not being correctly reported.	DataSubmissions	Release Defects
IA-54549	State Reporting - MO-IBRS: Resolved 3-digit formatting issue of the Entity Identification Number (EIN) contained within the data submission file.	Data Submissions, Reporting_MIBRS	Bug/Defect
IA-53915	State Reporting – NIBRS/SC-IBRS: Error 364, resolved issue where fractional quantities of drugs were being reported as zero.	Reporting_NIBRS, Reporting_SCIBRS	Bug/Defect
IA-34069	State Reporting - NIBRS/UCR: Added New Hate Crime Bias and Offense Codes	Reporting_NIBRS	Enhancement
IA-54336 149128	State Reporting - NIBRS/UCR: Modified logic to allow only a single "OPEN" dataset. Prior to this change, it was possible to have multiple open datasets each containing copies of the same Incident Report.	Data Submissions	Bug/Defect

JIRA ID	Summary	Component/s	Type of Issue
IA-53690	State Reporting - NIBRS: Added validation logic when and additional offense circumstance code of 'Other Felony Involved' would clear the validation for any other Group A offense.	Reporting_SCIBRS	Bug/Defect
IA-54459	State Reporting - NIBRS: Error 358: Number of Stolen Vehicles must be reported. Resolved data submission issue where we were not writing this information to the submission file when another offense was listed as the primary offense.	Data Submissions, Reporting_NIBRS	Bug/Defect
IA-51983	State Reporting - NIBRS: Error 361, resolved error where the number of recovered vehicles was not being written to the data submission file.	Data Submissions, Reporting_NIBRS	Bug/Defect
IA-54226	State Reporting - NIBRS: Error 81, Resolved data submission issue where "Possession of Stolen Property" was being incorrectly reported as "Stolen" which is not a valid status for this offense.	Data Submissions, Reporting_NIBRS	Bug/Defect
IA-53304	State Reporting - NIBRS: Improved validation logic involving "Lesser Offenses", "Injury Type Codes" and "Unfounded Offenses".	Data Submissions, Incident Report, Offenses, Reporting_NIBRS	Enhancement
IA-54459	State Reporting - NIBRS: Resolved Error 358 cause by the number of stolen vehicles not being reported.	DataSubmissions, Reporting_NIBRS	Bug/Defect
IA-54731 150102	State Reporting - NIBRS: Resolved issue where Gaming Establishment code of "47" was being reported as "90".	Reporting_NIBRS	Bug/Defect
IA-53442	State Reporting - NIBRS: Resolved logic workflow issue where Supplemental Incident Reports in "Pending Approval" status were prematurely effecting previously approved Incident data in the Open Dataset.	Data Submissions, Reporting_NIBRS	Bug/Defect
IA-43013	State Reporting – SC-IBRS: Added validation to require Special Circumstance code of 'P' - "Assault victim is a Police Officer" if LEOKA Activity and Assignment codes are entered.	Field Validation, Reporting_SCIBRS	Enhancement

JIRA ID	Summary	Component/s	Type of Issue
IA-53683	State Reporting - SC-IBRS: When there are multiple offenders with an 11A or 36B offense, at least ONE Offender must be of the opposite sex than the Victim. Validation logic was requiring ALL Offenders to be of opposite sex which was not correct.	Reporting_SCIBRS	Bug/Defect
IA-54553	State Reporting - TX-IBRS: Corrected data submission issue involving Segment 8 "Family Violence".	Data Submissions, Reporting_TIBRS	Bug/Defect
IA-54553	State Reporting - TX-IBRS: Corrected reporting issue with Segment 8 Family Violence Indicator.	DataSubmissions, Reporting_TIBRS	Bug/Defect
IA-54200 148523	State Reporting - UCR: Resolved issue with the Juvenile ASR Report were MALE Arrestees were not being displayed on the Juvenile ASR report when run without Show Details.	Reporting_UCR-FBI standard	Bug/Defect
IA-53116 144891	State Reporting - UCR: Resolved issues with the "Adult & Juvenile ASR Report" where Drug totals and totals for Age, Sex and Race at the bottom were incorrect.	Reporting_UCR-FBI standard	Bug/Defect
IA-53300 146074 146786	State Reporting - UCR: Resolved Return-A report issue where UCR was reporting offenses and other UCR information as new when a Supplement is created in RMS. This was caused by a "Replace" function resulting in a resubmission of Incident Data that had already been reported to the State/FBI.	Reporting_NIBRS	Bug/Defect
IA-54068 148057	State Reporting - UCR: Resolved Return-A Supplement issue where the Property Values were being counted twice.	Reporting_UCR-FBI standard	Bug/Defect
IA-54197	State Reporting - VA-IBRS: Errors 388 and 389, resolved data submission issue were the value of "Stolen Property" was higher than the original "Property Quantity" value.	Reporting_VIBRS	Bug/Defect
IA-54720	State Reporting - VA-IBRS: Resolved Error 40A issue caused by the Victim/Offender Relationship not being written to the submission file.	Reporting_VIBRS	Bug/Defect
IA-54444	Tow/Impound - Print: Resolved issue where the "Impound #" was missing on the printed report. Dup of IA-54167.	VehicleTow&Impound	Bug/Defect

JIRA ID	Summary	Component/s	Type of Issue
IA-54704 150347	Warrant: Resolved issue where a "Duplicate Serving Officer" entry caused an error on the warrant and would not allow the warrant to be associated to field arrest.	Field Arrest, Incident Report, Warrants	Bug/Defect
IA-55013 151872	Warrants - Logs: Resolved an issue where the "Modify Warrant" activity was being logged twice. One of the log entries was correct and one was in the reverse incorrect status.	Warrants	Bug/Defect
