INTRODUCTION

This document provides an overview of the software changes being delivered in the 10.24.0 release of the InterAct RMS product. This document is intended to provide information to assist in release preparation activities including:

- Internal staff training
- Customer release training
- Customer release notes
- Release announcement and promotion
- Online help and eLearning updates
- Updates to web site product information and product collateral

RELEASE MILESTONES

The following table contains the high level release milestones.

Start Date	End Date	Milestone
Apr-4	Apr-4	10.24.0 Code Split
May-17	May-17	10.24.0 Feature Code Lock
May-16	May-16	Domain Updates Complete
May-17	May-24	10.24.0 Cycle 1 Testing / Fixes Complete
May-23	May-27	10.24.0 Reporting Domain Impact Analysis
May-24	May-31	10.24.0 Cycle 2 Testing / Fixes Complete
May-24	May-24	10.24.0 RTO
May-24	May-31	10.24.0 Cycle 3 Testing Complete
Jun-2	Jun-2	10.24.0 Final Build
Jun-7	Jun-7	10.24.0 Release Installs

NEW FEATURES & ENHANCEMENTS

The following are the new features and enhancements included in the release of InterAct RMS version 10.24.0.

ADMINISTRATIVE ENHANCEMENTS

IA-53544: *ODL -Agency Vehicles - Allow Sorting Based On Column Headings*

The Officer Daily Log Administration page has been enhanced to allow sorting and filtering via the column headings for the Agency Vehicles table and the Equipment table.

The screenshot shows the 'Officer Daily Log Administration' interface. A callout box states: 'Sorting can now occur via the column headings for Vehicles and equipment.' Three arrows point from this box to the 'Year', 'Make', and 'Description' column headers of the 'Agency Vehicles' table.

Year	Make	Model	VIN #	License	Description	Active	Actions
2009	CHEVROLET(CHEV)	COBALT	ABCDE12345	EASY-123		true	
2014	DODGE(DODG)	Ramcharger	1234567890kjhgfd	79A1234	Fast Dadge Charger	true	
1997	FORD/COURIER/FORD	GOLDLINE CAMPER(FORD)	12345OLD	OLD One	Unit with 2,375,477 miles	false	

INCIDENT ENHANCEMENTS

IA-54451: Incident Add Officer - Enhance Usability For Duplicate Entry

Previously, when adding Officers to an Incident Report, the Select Officer window was configured differently than other Search Persons screens, creating confusion for officers, particularly in a multi-agency client. This has led to duplicate entries being put in the Officers table.

In 10.24, we have enhanced the Select Officer screen to prevent duplicate officers being added. The locations of the 'Use Historical Data' and 'Show Other Agency Officers' checkboxes have been moved to closer to the search box. Also, the 'Add New Officer' link was renamed to 'Add non-Agency Officer'. This will better indicate it is for the non-Agency officers' creation only.

Incident Report

Quick Print | Print | Exit Report | Transfer | Exit Wizard | Submit for Approval

Summary | Header | Offenses | **Names** | Property & Vehicles | Narratives | Attachments | Incident Validations

Report Times & Type(s) | Report Location | **Officer(s)** | Agency Name: District 16, Peru - GA | Report#: 2016-0226 Supp#: 0

You may specify any additional officers and/or employees involved in this incident.

Officers: (1)

Last Name	First Name	ID#	Title	Agency	Supp#	Incident Role	Actions
Allen	Brenda (Cid Super)	20	CID Supervisor	District 16, Peru - GA		Reporting	

Employees: [Add Employee](#)

[Add Officer](#)

In an incident, the 'Add Officer' page has been enhanced.

These checkboxes have been moved under the search box.

Renamed to 'Add Non-Agency Officer'.

Use Historical Data Show Other Agency Officers

	Date	Last Name	First Name	Agency Name	Badge #	Title	Active
<input type="radio"/>	2016-06-03	Arnez	Julio (osuper)	District 16, Peru - GA	71	Officer Supervisor	Y
<input type="radio"/>	2016-06-03	Buffett	Jimmy	District 16, Peru - GA	702	Patrol	Y
<input type="radio"/>	2016-06-03	DeNoyer	Brian	District 16, Peru - GA	702Super	Supervisor	Y
<input type="radio"/>	2016-06-03	Evidence	Employee	District 16, Peru - GA	123456		Y

In addition, when the 'Add Non-Agency Officer' link is selected, the 'Add Officer' page has been updated to check for duplicates when adding for an incident report. When adding a new officer from an incident report, a check will be performed to see if officer data matches by the following criteria:

- Internal ID (Badge #). Or
- Last name, first name, middle name.

If the middle name is included and no results are found, it will relax the search to match just on middle initials. If no results are found there, it will remove the middle name altogether and do a search on just the first name and last name. While this can get false positives, it could help when a system officer has no middle name but the user entering the officer may know the middle name and it is not found in the system.

All searches are case insensitive.

If any matches are found, the column just to the left of 'actions' will indicate how that person was matched.

This page opens when 'Add Non-Agency Officer' is selected.

If a suspected duplicate is entered, it will pop-up and notify the user.

From the Case Search and Review screen, users can search for Field Contacts associated to a case.

© 2009-2016 InterAct®. All Rights Reserved.
 information it contributes to the Online RMS including but not limited to, the accuracy of the information. Receiving agencies will take
 out first verifying the current status of information with the contributing agency.

Only users with the View/Edit access to the associated case are allowed to view or edit the Field Contact once it is associated to a case. When a Field Contact is going to be associated to a case, a warning is displayed reminding the user they will stop other users from seeing the field contact information. This way if the field contact does NOT HAVE to be added to the case, and the user knows or suspects the field contact might contain information other might need to see, the user will be reminded that they are locking other users out.

New warning message to users.

Message from InterAct

Warning to User:
 By associating the Field Contact to a Case, you will be limiting access to a Field Contact. Only users with access to the Case will be able to view or edit the Field Contact.

Yes No

Additionally, when a field contact is added to a case, a user without access to the case can still see the existence of the field contact, but no detail. That way the user will know it's there and, if needed, they could contact someone who has access to the case. This feature is similar to the incident report security.

Clicking the View icon brings up the screen below.

Phone: 765-473-6666
POC: Peru District

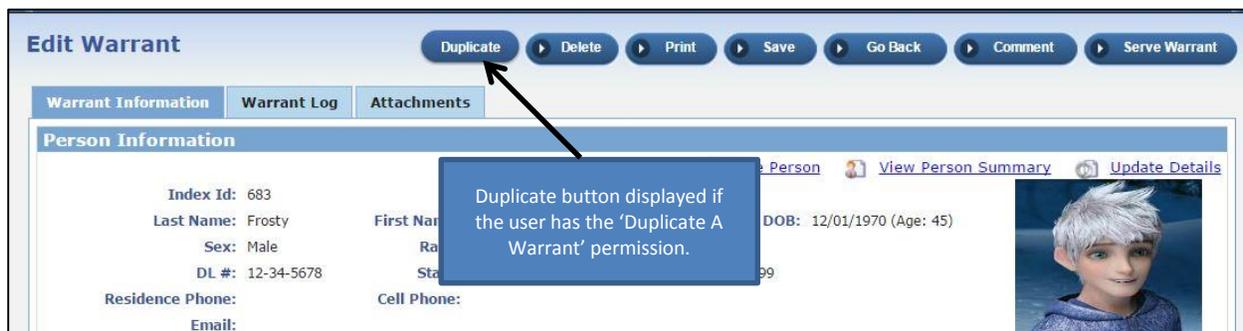

WARRANT ENHANCEMENTS

IA-56824: *Copy / Duplicate Warrant*

A new enhancement included in this release is the ability to duplicate a warrant. Often times multiple people are involved in the same situation where a warrant for the same charge is needed for each person. Currently, RMS users must create the entire warrant over and over again for each person. Likewise, situations arise where a single person is being brought up on multiple charges and a warrant for each charge for the same person is needed. Again, RMS users must recreate the entire warrant for the same person for each charge over and over.

In this release, the RMS user need only create the warrant one time and then duplicate that warrant for a list of people for the same charge or for the same person and add a new charge.

A new permission exists for Warrant – Duplicate A Warrant. Users with a role that is granted the new permission will see a “duplicate” button on the Edit Warrant screen.

Selecting the Duplicate button displays the new Duplicate Warrant screen. On this screen the user may choose to duplicate the warrant for the original person or select one to many new people. Next the user chooses which items on the original warrant are to be copied to the new warrants: charges, officers, reference numbers, service addresses, associated incidents, associated calls for service, and attachments. If the original warrant does not have data for an item, that item is not presented to the user on the duplicate screen.

Upon selecting the duplicate button, RMS creates a new warrant for each person identified on the duplicate warrant screen and copies all of the data from the original warrant along with the items selected by the user.

RMS displays a results screen listing all new warrants created. The user may further edit each new warrant created by selecting the edit icon.

A log entry is added to the original warrant as well as the newly created warrants for the duplication.

IA-56128, 57129, 57130: Associate Warrants With Incidents And Calls For Service

A new enhancement included in this release is the ability associate a warrant with an Incident and/or a Calls For Service.

Warrant Screen Changes

The View Warrant and Edit Warrant screens include new grids displaying associated incidents and associated Calls For Service. If Incidents or Calls For Service modules are not being used by the Agency, the grid will not be displayed on the warrant screens. The user may select the incident report number or the dispatch id to view the incident or calls for service record itself.

From the Edit Warrant screen the user may select the 'Add Incident' link to search for and select an existing Incident to associate to the warrant. If the selected Incident has associated Calls For Service, the user is presented with a list of those Calls For Service and may choose whether or not to also associate the Calls For Service to the warrant. The user may select the 'Add Calls For Service' link to search for and select an existing Calls For Service to associate to the warrant. If the selected Calls For Service has associated Incidents, the user is presented with a list of those Incidents and may choose whether or not to also associate the Incidents to the warrant. By selecting the delete icon, the association is removed from the warrant.

OFFICER DAILY LOG ENHANCEMENTS

IA-57584: Allow Reporting For Entire Organization

IA-57585: Add Equipment Information

IA-57586: Create Additional Export Options

Previously, users were restricted to running the Officer Daily Activity Report and the Officer Daily Statistics Report for officers within the user’s own agency. If the user wanted to run the reports for an officer in another agency, the user would have to change their profile to the officer’s agency prior to running the reports. This enhancement will now allow users to run the reports for officers in other agencies, while still logged into their own agency.

For the Officer Daily Activity Report, the user will be able to select any agency, including the parent organization, in the report parameters. The officer drop down menu will display any officer from the child agency selected. If the user reports on a parent agency and selects an officer, the report will show officer’s assignments across any agency they were assigned to.

Screenshot of the 'Officer Daily Activity Report' configuration page. The page title is 'Reports' and the user is logged in as 'Sgt. Collins[ISP Test (TSTC)] (District 42, Versailles) [Emulation][Main User]'. The report description states: 'Summarizes Officer Daily Activity and Work Summary Information * Denotes A Required Field'. The report parameters include: Date Range, Agency (Indiana State Police), Officer (Indiana State Police), Assignment (CAR and X Units), Shift (DL1), and Print Zero Activity (District 13, Lowell; District 14, Lafayette; Region 1; Region 2; Region 3; Region 4). The output type is set to 'Area Units-A2'. A callout box points to the Agency dropdown menu with the text: 'Users can now select the top level in the organization or any child agencies.'

For the Officer Daily Statistics Report, the user is also able to select the highest level within the organization to run a report. If no other parameters are set, the report will display the cumulative totals for all child agencies in the organization. If desired, the user of the report could select an officer, assignment, or shift, to filter the results that will return in the report. As with the Officer Daily Activity Report, all officers within any of the child agencies will be listed in the Officer drop down menu if the user selects the highest level within the organization.

EVIDENCE ENHANCEMENTS

IA-53464: Enhancement To Managing Evidence For All Agencies In Organization

Previously, when Change Ownership or Change Location for another agency is attempted in an agency other than your home agency, the Changed by menu was blank when it should default to the logged in user.

In this release, the 'Changed By' field on Change ownership and Change Location screens defaults to the logged in user for evidence owned by an agency that is not the agency of the logged in User.

IA-31725: Default To Last 'Checked-In' Location

When a piece of Evidence is checked-out, and then later checked back in, the Evidence location will now default to the previous location (where the evidence was when it was checked out) on both the evidence Check-IN page and the evidence Mass Check-IN page. The user is still allowed to change locations from the drop-down menu.

Evidence that is just created will not have a previous location and should default to "-Select-".

IA-57364: Default Last 'Checked-In' When Navigating From Home Page Notification

Similar to IA-31725, an Evidence Custodian taking action on an 'EVIDENCE PENDING CHECK-IN' notification will default the location to the previously checked in location if the status is set to 'Check-In'.

If the user is in a multi-tier organization, the status LOV will default to Pending check in. Changing this LOV to 'Check-In' will change the location LOV to the previously checked in location if it exists.

If the user is not in a multi-tier organization, the Status LOV will be locked to 'Check-In' and the location will be defaulted to the previously checked in location if it exists.

IA-54467: Create Mass Change Ownership

In this release, we have added the ability to conduct a Mass Change Ownership in the Evidence module. There is a new permission 'Evidence Management - Mass Change Ownership Search'. This permission is in the Evidence Custodian permission category, so users with the Evidence Custodian role will get this out of box.

On the search page, the current status should be 'Checked-In' by default. User may change the status to 'Checked-Out' as well.

On the Mass Change Ownership page, the Evidence Custodian is presented with the list of evidence items and are able to select an 'Ownership To' agency. The blue, down arrow will propagate the selected agency to any items below.

Required fields are Date, Changed By, and Comments. The user may also enter a Description and Signature (if feature enabled).

Selecting 'Save' will perform the Change of Ownership and remain on the same page where the user may print the chain of custody, receipt, or label reports. Selecting 'Save & Exit' performs the Change of Ownership and redirects the user to a success page.

IA-37294: Evidence Label - New Formatting Options

The following changes have been made to evidence labels:

1. "Barcode" is now a field that can be dragged and dropped into the label, and sized with the other cells on that row according to preference. The barcode has a fixed height but will take up the width of the cell.
2. The legacy "barcode" checkbox still exists and has been renamed to "barcode at top". This will allow existing labels to stay as they are, however if a customer chooses they can now include the barcode as a smaller portion of the label as per (1).
3. Cell padding is now an option. When selected, it will dictate the cell padding for the top and left boundaries of the labels and values. It makes things a bit more readable but can also cause extra space to be used.
4. Label and value font sizes are now an option. The configured options are 1-15. The default for all labels is 5 for label size and 7 for value size.

The screenshot displays the configuration interface for evidence labels, divided into three main sections:

- Label Properties:** Includes fields for Agency (District 42, Versailles), Description (D42 Test Label), Width (5 inches), Height (3 inches), Barcode At Top (checked), Active (checked), Cell Padding (2), Label Font Size (5), and Value Font Size (7).
- Field Properties:** A list of fields with expandable options, including Agency Display Code, Report Date, Recovery Date, Incident Report #, Supp #, Owner, Item #, Location, Seized By, Property Description, Property Detail, Evidence Description, Suspect Detail, Evidence ID, and Barcode.
- Available Fields:** A list of fields that can be added to the label, including Arrestee Detail and Incident Offenses.
- Label Design:** A table for configuring the layout of the label fields. It includes buttons for Add Row, Preview PDF, Save Design, and Exit. The table shows fields like Agency Display Code, Report Date, Recovery Date, Incident Report #, Supp #, Owner, Item #, Location, Seized By, Property Description, Property Detail, Evidence Description, Suspect Detail, Evidence ID, and Barcode arranged in a grid.

VEHICLE TOW / IMPOUND ENHANCEMENTS

IA-32611: Associate Vehicle Tow/Impound to Incidents

A new enhancement included in this release is the ability associate a vehicle tow/impound with an Incident.

Incident Screen Changes

The Summary Tab and the Property and Vehicles Tab on an Incident now includes a grid displaying associated Vehicle Tow/Impounds. If Incidents or Vehicle Tow/Impound module is not being used by the Agency, the grid will not be displayed on the Incident screens. The user may select the Impound Id to view the Impound Details.

New grid for associated Tow/Impounds.

From the Edit Incident screen the user may select the Add Existing Impound link on either the Summary or the Property & Vehicles tabs to search for and select an existing Impound to associate to the Incident. Upon selecting an Impound, RMS displays the Associated Incident to Vehicle Tow/Impound screen and the user must select a role and a status for the vehicle being added to the Incident. Selecting Save on the new screen will associate both the Impound and the Vehicle to the Incident.

Searching for Incidents by Tow/Impound information has not been implemented at this time.

Tow/Impound Screen Changes

Creating an association between a Tow/Impound and an Incident is not bi-directional at this time. The user must edit the Incident and select the Tow/Impound. The View and Edit Tow/Impound screens did change by renaming the “Incident Report / Case #” editable field to “Other Reference #”. A new view-only field for “Associated Incident Report #” was also added that will list all of the Incidents the Tow/Impound is associated to.

County:

Comments:

Field relabeled "Other Reference #"

New field added listing all associated Incident Report Numbers.

A user can search for a Tow/Impound by an associated Incident Report Number. The “Incident Report /Case #” search field has been relabeled to “Other Reference #” and a new search field for “Associated Incident Report #” has been added.

The screenshot shows the 'Vehicle Tow/Impound' search interface. At the top right, there is a link '+ Add Vehicle Tow/Impound'. Below this is the 'Vehicle Tow/Impound Search' section. The form includes the following fields:

- Impound ID: [Text input]
- Towing Agency: [Dropdown menu, currently 'District 42, Versailles']
- Associated Incident Report #: [Text input]
- Other Reference #: [Text input]
- Disposition: [Dropdown menu, currently '-Select-']
- Towed From: [Text input]
- City: [Text input]
- Tow Date: [Date range selector]
- Vehicle ID: [Text input]
- Year: [Text input]
- Make: [Text input]
- Model: [Text input]
- VIN #: [Text input]
- Vehicle Type: [Dropdown menu, currently '-Select-']
- Vehicle Style: [Dropdown menu, currently '-Select-']
- License #: [Text input]

At the bottom of the form are three buttons: 'Records Management', 'Reset', and 'Search'. Two blue callout boxes with arrows point to specific fields:

- One callout points to the 'Associated Incident Report #' field with the text: 'New search field added for Associated Incident Report Number.'
- Another callout points to the 'Other Reference #' field with the text: 'Field relabeled "Other Reference #"'.

NOTIFICATIONS ENHANCEMENT

IA-53222: *Include Offenses in Notification Description*

In 10.24, the 'INCIDENT APPROVED' and 'INCIDENT APPROVED - FOLLOW UP CASE DECISION NEEDED' notification types will now include up to the top 3 offenses in the notification description. The offenses included are offenses that reside on the Incident Supplement and will be based on the offense number with the assumption that offenses are added to a supplement in order of severity with the most severe being added first.

For example, supplement 0 has 4 offenses and is approved. The notification for supplement 0 will include the first 3 offenses only. An officer creates supplement 1 for the incident and modifies the status of offense number 2 and adds a 5th offense. The notification for supplement 1 will include offense 2 and 5.

Please note that all previous notifications of this type that were created prior to this change will remain unchanged.

APPENDIX: 10.24.0 DETAILED JIRA LISTING

TABLE A: RELEASE ENHANCEMENTS AND PRODUCT DEFECT FIXES

This table contains the major product defect JIRAs resolved in the 10.24.0 release along with additional enhancement not documented above.

JIRA ID	Summary	Type of Issue
IA-57306 160802	<p>Search - Offense: When performing a search for an Offense, the results were limited to the first 200 records. This limitation has been removed. Now a search on the word "THEFT" should return all possible results.</p> <p>This change affected the following function areas:</p> <ul style="list-style-type: none"> - Citation edit screen - Field Arrest add charge screen. - Field arrest search screen - Warrant Edit Screen - Warrant Search Screen 	Bug/Defect
IA-57232 160670	<p>Search - Civil Process (Sort): Added the ability to sort the civil process search results by 'Reference #s' and 'People/Organization'. We did performance tuning in 10.23.0 on this search and part of the performance improvement was to remove this sort. This capability has been added back to the product.</p>	Bug/Defect
IA-56821	<p>Custom Field Duplication: Resolved an issue where custom field data entry values were being duplicated. This appeared to be due to the fact that the incident wizard "type and times" page was not blocking the user interface soon enough, and on slower connections the user could potentially click "save" multiple times, causing form data to be duplicated.</p>	Bug/Defect
IA-56599	<p>Performance - Home Screen: The "Recent Activities" Grid on the home screen originated with the intent of displaying My Incidents. Over time this has grown to include many more activities such as My Cases, Warrant, Civil Process, etc. In this release, we have separated out some of the more complex queries so that they run asynchronously. The goal was to improve general performance for the more simple queries.</p>	Performance
IA-56597	<p>Performance - Person Edit & View Pages: The query to fetch data on the person edit & view pages was one very large blocking query that was trying to fetch person information from many different database locations all at one time. This resulted in performance delays on the page. In an effort to improve performance and the user experience, we have broken many of these queries out into individual asynchronous database calls.</p>	Performance
IA-56595	<p>Performance - Search Person: The Person Warnings were integrated into the person search results page to give immediate indication of cautions, warrants, etc. We've noticed over time that this has caused slowing of the search results page. To improve the user experience, we've made some performance improvements to the person search page when searching via additional search criteria. We also refactored alerts that show up on the search results page.</p>	Performance

IA-56505	Performance - Notifications: Removed unnecessary database calls in an effort to speed-up the Notification Action on the home page.	Performance
IA-57766	Evidence - Review: When selecting the "Evidence Review" link under 'Recent Activities', property that was associated to multiple supplements or multiple offenses was being listed multiple times. This issue has been resolved.	Bug/Defect
IA-57464 161565	Field Arrest - View: The arrestee "Age" at time of arrest is displayed on the Field Arrest in both the Person Detail section at the top of the page and the Arrest Information section. This was an age calculation error in the person details section that has been resolved.	Bug/Defect
IA-56754 160045	Evidence - Label: Resolved an issue where the evidence label was not printing the CASH Description. In addition, we added a warning message so that if evidence label print option is invoked without an evidence selection, the user will be notified so that an error does not occur.	Bug/Defect
IA-56555	Person Report: The SSN redact function was only redacting the first (5) numbers. We modified the logic to now redact all (9) SSN numbers.	Bug/Defect
IA-56503	Performance - Login: We refactored the way we get User Permissions during login in an effort to speed up login performance.	Performance
IA-57752 162639	Incident - Navigation: From the Incident Summary page in Wizard & Non-Wizard mode, selecting the CFS link and then Go Back was taking the user to the Master Index Address page. Issue resolved.	Bug/Defect
IA-57723 161132	Incident - Smart Search: Resolved a minor smart search display issue when using Internet Explorer.	Bug/Defect
IA-57626	Print - Person Report: When printing a person involvement report, the modus operandi was printing an internal "Incident Id" rather than the actual incident report number.	Bug/Defect
IA-57620	Quick Search: Updated the quick search function on the Tow/Impound & Court Papers pages to use the new function introduced on the field arrest search several releases ago.	Enhancement
IA-57601	Performance - Civil Process: We refactored the search query by removing a number of unused fields, unnecessary joins and date formatting to improve Civil process search performance.	Performance
IA-57582 161532	Incident Report - Names: View of person relationships worked fine, but when editing a person on an incident report and selecting relationships, the results were returning incorrect records. Issue resolved.	Bug/Defect
IA-56612 159028	Field Arrest - Print: Modified the Field Arrest Report to also display captured information such as phone number and email.	Bug/Defect
IA-56436 158754	Incident Types: Incident Type descriptions with a '\$' could not be deactivated, issue resolved.	Bug/Defect
IA-55647 154955	Citation - Delete: Unable to delete a Citation with an Attachment. Issue has been resolved.	Bug/Defect
IA-55634 154887	Incident Report - Evidence Label: Unable to print evidence label when the evidence was added to the system prior to the Incident Occurrence Date. Modify the logic to resolve.	Bug/Defect
IA-53444 146432	Incident Report - Vehicle Information: Added the ability to print Vehicle Insurance information to the printed report. This is controlled by a print template flag.	Enhancement

IA-34631	Quick Search: Updated the quick search function on the Field Contact page to use the new function introduced on the field arrest search several releases ago.	Enhancement
IA-32440 TTN112990	Officer Daily Logs - Reports: Resolved issue with Duplicate Assignments and Miscalculated Total Hours.	Bug/Defect
IA-57624 162118	Print - Person Report: Resolved minor formatting issue where the Agency name was overwriting the court paper received date	Bug/Defect
IA-54079	Password - Change: Added new functionality that will Email a User their new password when their previous password has been reset by an administrator.	Enhancement
IA-53540 145727	Evidence: When selecting the Mega Menu to change evidence location or change evidence ownership, the save button was missing and has been added.	Bug/Defect
IA-53517	CJIS-InterDex: add driver's license state to Master Person search	Enhancement
IA-49532 TTN120580	Civil Process - selecting an Organization to be served does not display service address	Enhancement
IA-37011 TTN119162 00145382	Civil Process - Ability to Delete Court Paper	Enhancement
IA-2992 TTI115516	SCR23354 Field Arrest - SSN and other info not shown on printed report	Reports
IA-37419 TTX119400	System not recognizing Inherited Number Generation. The original issue was with the Evidence Location Discrepancy Audit Reports. This report should now be using the parent number generation if there is no number generation set up for the child agency. If there is no number generation at all, the user gets a failed to save error message.	Bug/Defect
IA-54446	New Offenses Effective January 1, 2016. The following two offense codes need to be added to the RMS and available to customers beginning January 1, 2016. Operations will need to work with customers to ensure that any State Offense Codes are mapped to these new NIBRS Codes. 1. Identity Theft - NIBRS offense code of 26F - Mapped to Crimes Against Property. 2. Hacking/Computer Invasion - NIBRS offense code of 26G - Mapped to Crimes Against Property.	Enhancement
IA-57923 00163034	When searching on a person, the external searches (LEAP, InterAct, and JailTracker) are now done asynchronously. When the page loads, only the internal person search will be performed, and an asynchronous call will be kicked off to get external search results. The text "Loading External Search Results." will display at the top right corner of the screen (right of the pagination). When the results do come back, if any, they will be displayed.	Bug/Defect
IA-57800 00162745	Civil Process : Print - Resolved issue with Printed log not matching RMS log tab.	Bug/Defect
IA-57195 160358	Made a fix allowing incident supplements with validation errors to be disapproved and sent back to the officer.	Bug/Defect
IA-56160	State Reporting - IBR Kansas	Epic
