APPENDIX: 10.28.0 Product Change Notice (PCN) - Detailed JIRA Listing 51

 Table A: Release Enhancements and product Software Issue Resolutions 51

INTRODUCTION

This document provides an overview of the software changes being delivered in the 10.28.0 release of the Online RMS product. This document is intended to provide information to assist in release preparation activities including:

- Internal staff training
- Customer release training
- Customer release notes
- Release announcement and promotion
- Online help and eLearning updates
- Updates to web site product information and product collateral

RELEASE MILESTONES

The following table contains the high level release milestones for the Online RMS 10.28.0 release.

End Date	Milestone
28 Mar 2017	10.28 Sprint 1 Starts
30 Mar 2017	10.27 Code Branch
04 Apr 2017	10.27 Release Available
10 Apr 2017	10.28 Sprint 1 Ends
11 Apr 2017	10.28 Sprint 2 Starts
24 Apr 2017	10.28 Sprint 2 Ends
25 Apr 2017	10.28 Sprint 3 Starts / 10.27.1 Code Lock
02 May 2017	10.27.1 Service Pack Available
08 May 2017	10.28 Sprint 3 Ends
09 May 2017	10.28 Sprint 4 Starts
22 May 2017	10.28 Sprint 4 Ends
23 May 2017	10.28 Sprint 5 Starts
30 May 2017	10.27.2 Code Lock
05 Jun 2017	10.28 Sprint 5 Ends
06 Jun 2017	10.27.2 Service Pack Available
06 Jun 2017	10.28 Sprint 6 Starts
19 Jun 2017	10.28 Sprint 6 Ends
20 Jun 2017	10.28 Sprint 7 Starts
03 Jul 2017	10.28 Sprint 7 Ends
05 Jul 2017	10.28 Feature Lock / Stabilization Sprint Starts
05 Jul 2017	10.27.3 Code Lock
11 Jul 2017	10.27.3 Service Pack Available
19 Jul 2017	Release to Training
24 Jul 2017	Stabilization Sprint Ends
25 Jul 2017	10.29 Sprint 1 Starts
27 Jul 2017	10.28 Code Branch / 10.28 Final Build
01 Aug 2017	10.28 Release Available

NEW FEATURES & ENHANCEMENTS

The following are new features and enhancements included in the release of Online RMS version 10.28.0.

USER INTERFACE ENHANCEMENTS

CSS Webpage Improvements & Day / Night Mode

Web page style sheet and **chart updates** bring new colors and a fresh modern look and feel to make the Online RMS more pleasing to the eye.

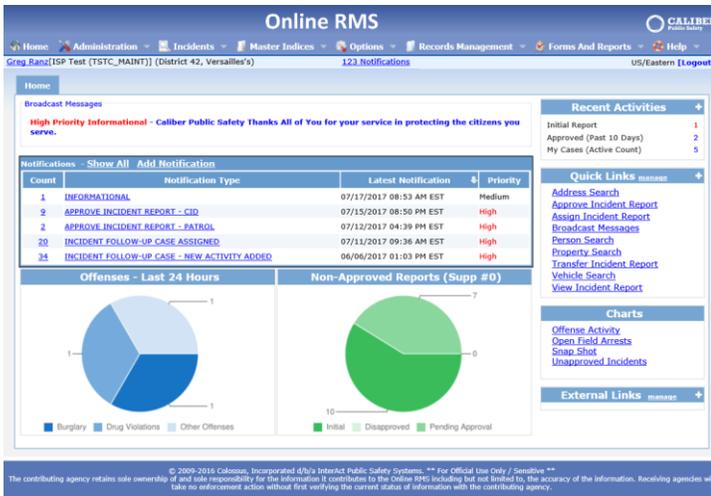

Figure 1: Home Page - Before CSS Style Sheet Update

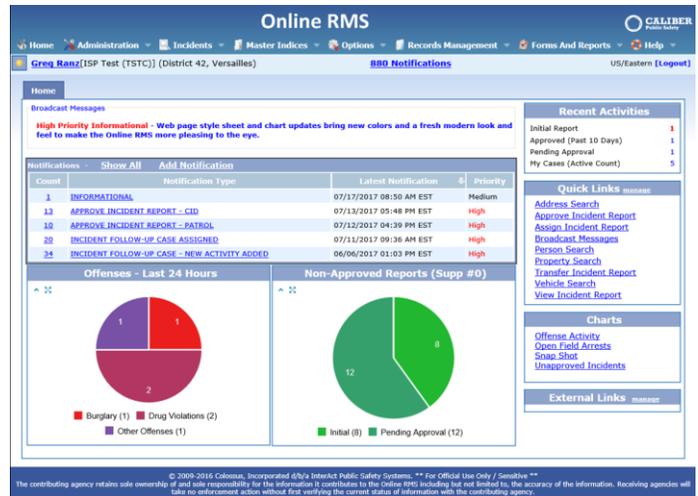

Figure 2: Home Page - After CSS Style Sheet Update

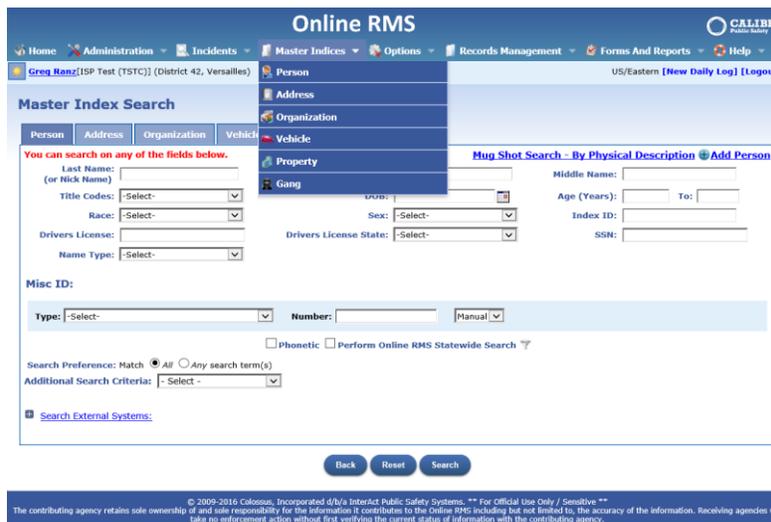

Figure 3: Updated Page, Menu, Tab, and List of Values (LOV) displays

Responder Safety is improved with the capability to switch to **Night Mode** when operating the Online RMS at night or low light situations. Switching between **Day and Night Modes** is easy to do by clicking the “**Switch to Night Mode**” button on the login page or clicking on the **Sun icon** located to the left of your user name displayed in the Online RMS header.

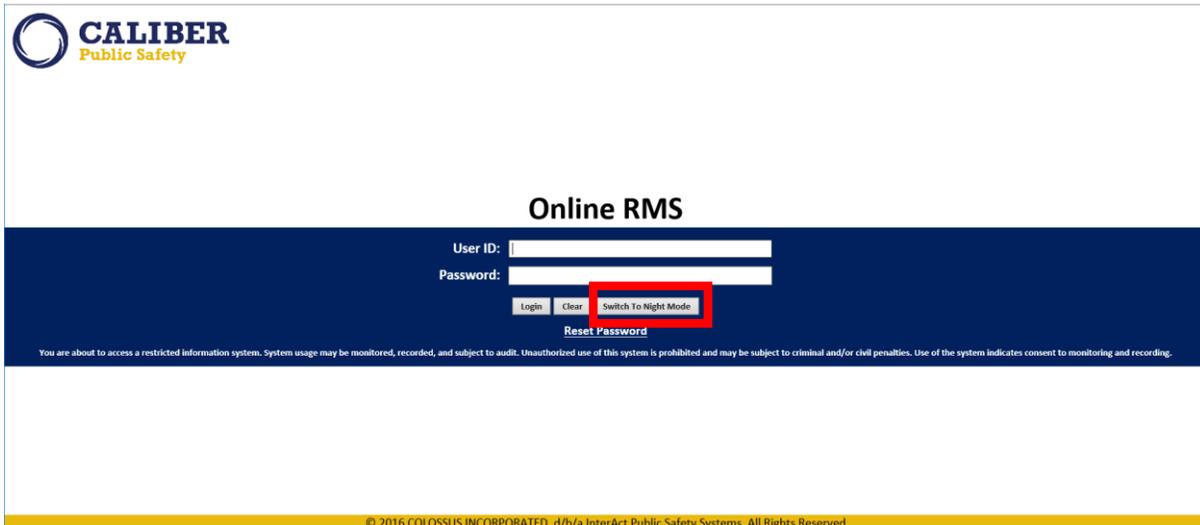

Figure 4: Login Page - Day Mode - Switch to Night Mode

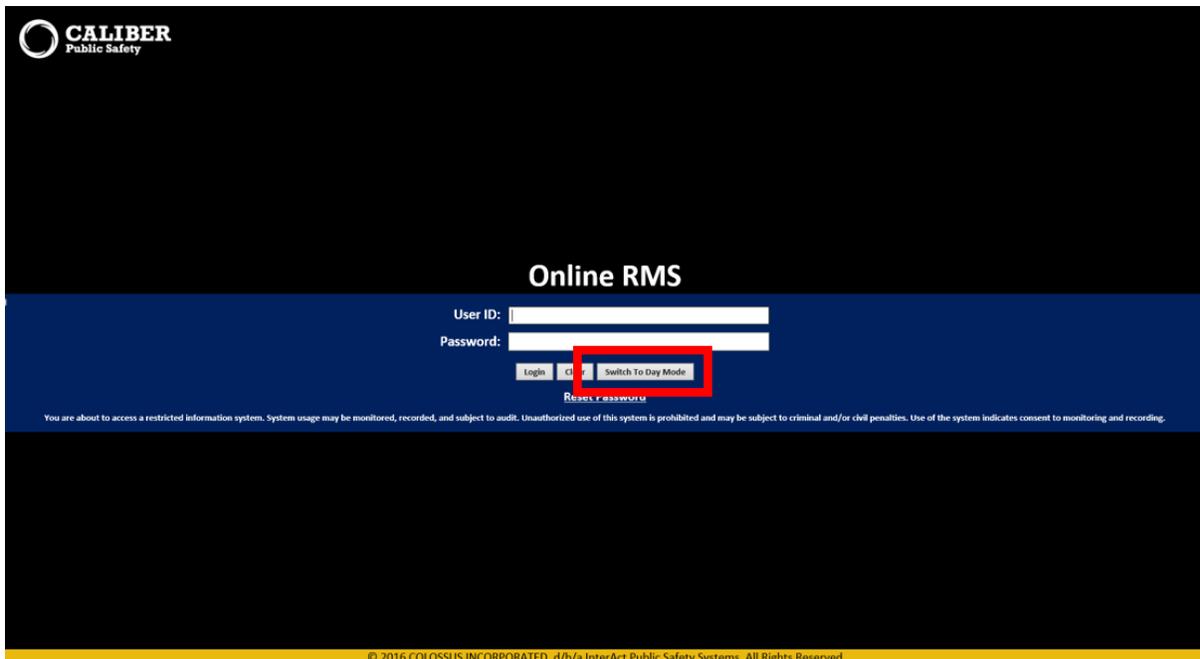

Figure 5: Login Page - Night Mode – Switch to Day Mode

Users can edit their **User Profile - Preferences Page** to define a day or night mode preference upon successful login to the Online RMS.

Default Search Agency

Users that find themselves consistently working in low light situations or assigned to night shifts can create a new web page favorite or desktop shortcut to open the Online RMS in **Night Mode**. This alleviates having to open the login page and take action to **Switch to Night Mode**. Use the following URL to open the Online RMS Production instance in **Night Mode**: <https://rms.public-safety-cloud.com/prod/?nightMode=Y> or add the following parameter to any Online RMS URL “**?nightMode=Y**”.

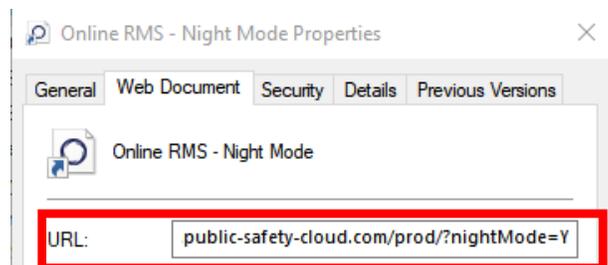

Figure 6: Example Shortcut Link for Night Mode

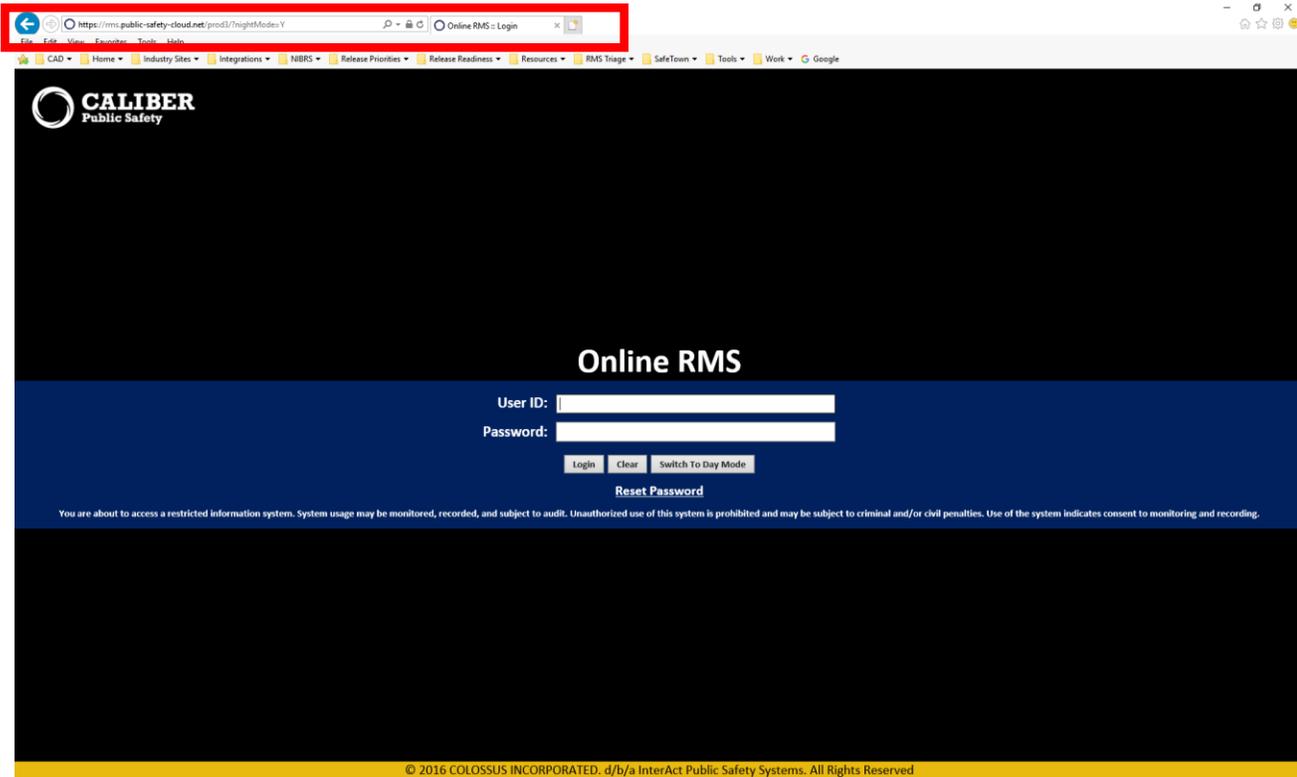

Figure 7: Online RMS URL Opened in Night Mode

NEW FEATURE – AUDITING

Enhanced Auditing

The **Auditing** feature allows agency administrators to configure and view audit information for data tables, notification actions, printed reports, and queries for persons, incidents and field arrests. Enhanced auditing empowers system administrators to audit on demand to ensure end-user best practices.

The **Auditing** feature will allow customers to audit the following kinds of data across an Online RMS schema:

- **Table Access** - inserts, updates and deletes)
- **Report Access** - printed reports for Incidents, Arrest, etc. as well as Custom Forms and ad-hoc reports initiated from the application
- **Search Access** - incident, person and arrests searches)
- **Notification Access** – creation, actions take and deletes

Captured Audit data can be viewed on the Auditing Search page or exported to an excel spreadsheet.

Please submit an RMS support ticket to client services if your agency is interested in using the enhanced Auditing feature. The Online RMS will be configured to allow agencies to configure auditing for the following tables for this iteration of auditing.

Table Names	Audit Actions
INCIDENT_PEOPLE	Create, Update, Delete
INCIDENT_PEOPLE_OFFENSE	Create, Update, Delete

Auditing - Configuration

A new feature for AUDITING must be granted to the user’s agency in order for the user to configure or view audit data. The feature will be granted to all agencies for initial rollout of this feature.

Online RMS provides the following permission categories for Auditing.

- **Auditing – Administration Landing Page**
- **Auditing – Configure Report Auditing**
- **Auditing – Search Report Auditing**
- **Auditing – Configure Table Level Auditing**
- **Auditing – Search Table Auditing**
- **Auditing – Configure Search Auditing**
- **Auditing – Search Audited Searches**
- **Auditing – Setup Notification Auditing**
- **Auditing – Search Notification Auditing**

The Administration Landing Page permission category grants access to the Auditing Admin Configuration page accessed from the Administration Home Page.

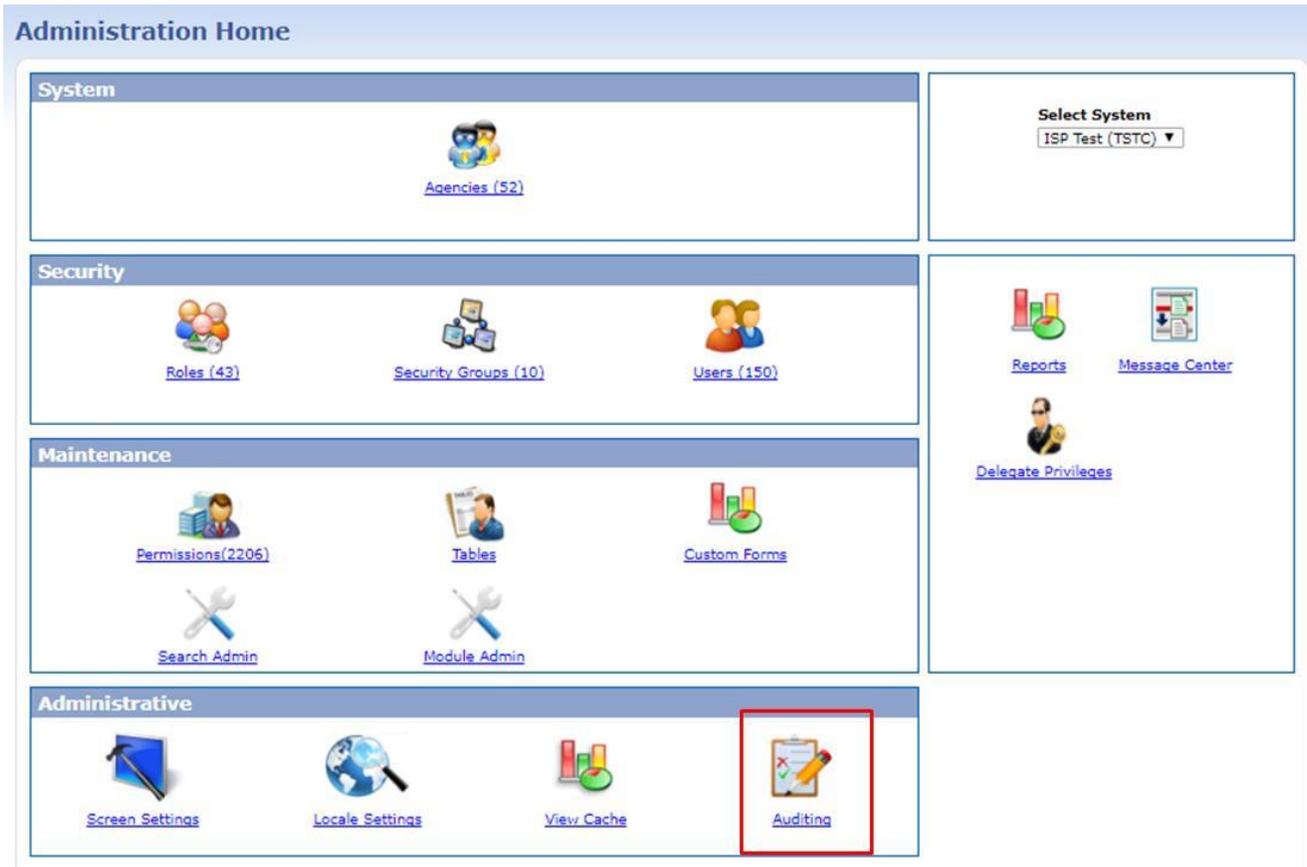

Figure 8: Admin Home Page – Auditing Configuration Access

The remaining permission categories grant access to corresponding configure or search links located on the Auditing Administration Configuration page.

All Audit permissions are granted to the SYSTEM_ADMIN and DBA for initial roll-out.

TABLE ACCESS AUDITING

Configure Table Access

To configure actions that are audited for tables, the system admin selects the **Table Access** link on the Auditing Administration Configuration page.

Figure 12: Auditing Admin – Search Table Audit Info

Online RMS displays a list of tables that are configured for auditing with at least one action set to yes or that have existing audit data. Select the **hand** icon for a table to open a new tab to query the table audit data. The user can enter various search criteria including table fields and values. RMS displays the transaction date, action, user, agency and all columns for audit data matching the search criteria. Old and New values are displayed for Update audit transactions. The user can modify the columns display as needed.

NEW FEATURE – EXPUNGEMENTS

Enhanced Expungement Processing

This first iteration to streamline **Expungement** processing will allow authorized users to **expunge an offender / arrestee from an incident report or expunge an entire field arrest**. Expunged records will no longer be visible throughout the Online RMS unless the user is granted permissions to view expunged details.

CONFIGURATION

Online RMS provides two permission categories for Expungements. **Expungement – Expunge Records** controls the ability to initiate the expungement. **Expungement – View Expunged Records** permission grants users the ability to view expunged records within Online RMS. Neither permission is granted to any roles for initial roll-out of this feature. **Note:** Please contact your system admin to grant these new permissions to appropriate roles in your Online RMS schema.

END-USER FUNCTIONS

Expungement was designed to be initiated from the **Master Person Summary Page** for both **Field Arrests** and **Offenders on an Incident Report**. Field Arrests Expungements apply to the entire Field Arrest. Incident Expungements apply to the offender as an incident report may have more than one offender.

Expunge Offender from Incident

The Summary tab on the **View Person** page displays an **Expunge column** in the Involved Incidents grid. If the master person is an **offender / arrestee** on the incident, the **incident is approved**, and the **user has Expunge Records permissions**, RMS displays a **red X** in the column for that incident.

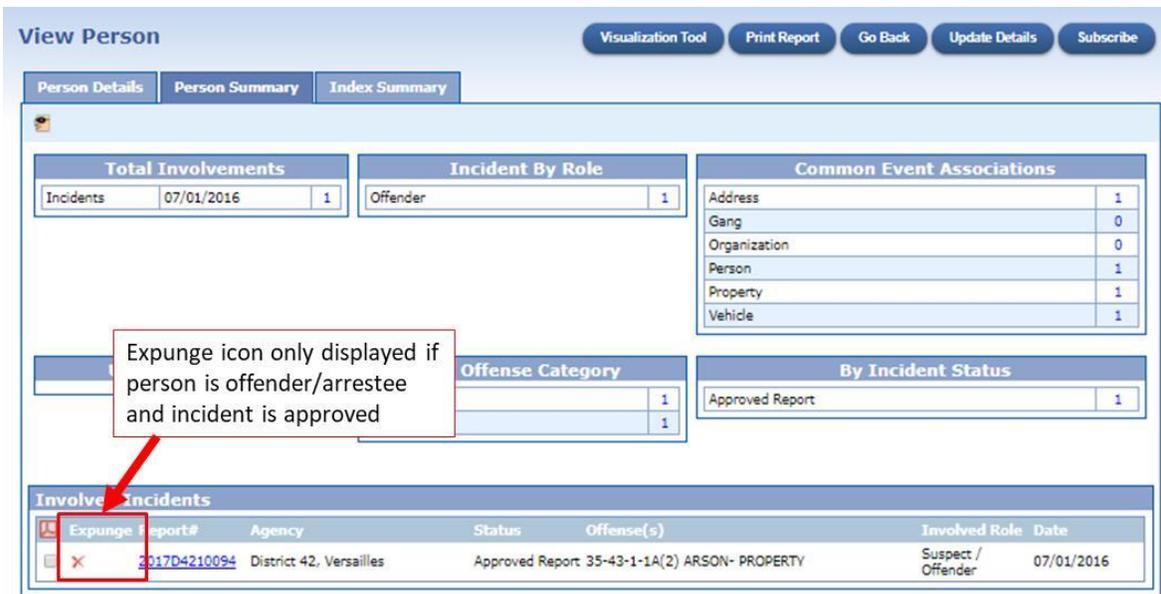

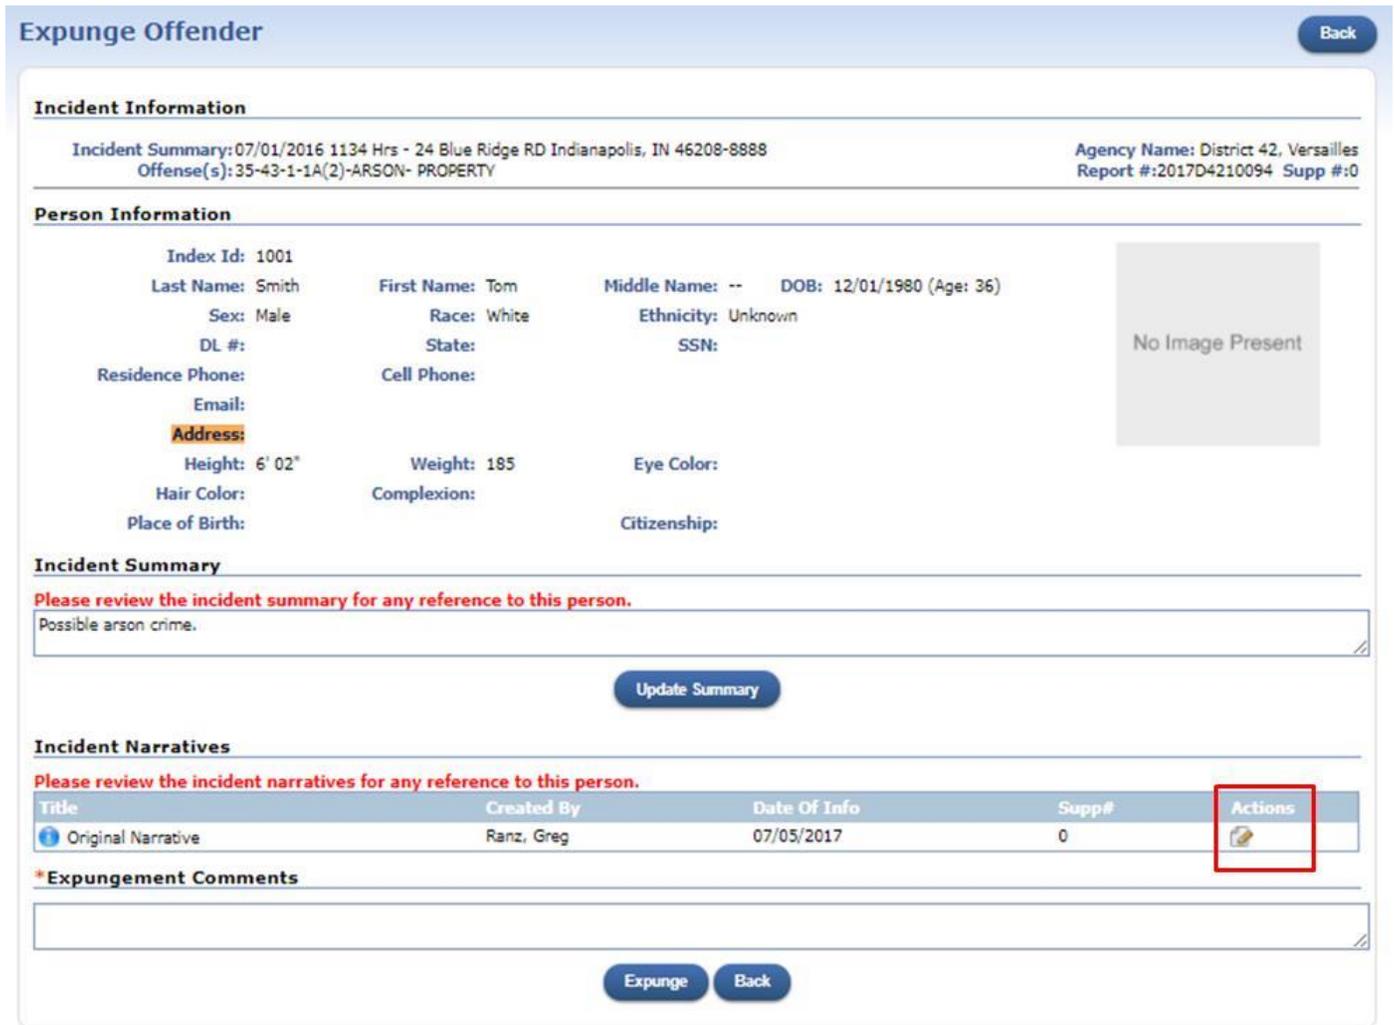

Figure 27: Person Summary - Involved Incidents - Expunge Icon

The user selects the **expunge** icon for the incident to **expunge the offender**. RMS displays the expungement page allowing the user to **edit** the incident report **media summary** and **narrative** text fields to remove text that relates to the identity of the person being expunged. To edit a narrative, the user selects the **edit icon** and edits the text as needed. Online RMS will save the original and the edited versions of the narrative. The user selects the **Expunge button** to finalize the expungement.

Select the **Back button** to cancel the expungement. Select the **Expunge button** to finalize the expungement. **Usability Note:** Selecting the **Update button** for media summary changes commits the changes. If the expungement process is cancelled, the user will need to manually update the media summary to its original version.

Expunge Back

Figure 28: Incident Expunge Person Page

The user is returned to the Person Details page after the expungement is complete. Users without the **Expungement – View Expunged Records** permission will not see the incident involvement and the involvement counts will not include the incident the person was expunged.

Figure 29: Counts Related to the Expunged Person are Updated for Non-Expunge Users

For a user with **Expungement – View Expunged Records** permissions: the involvement counts remain unchanged, the incident displays with a **[EXPUNGED]** tag, common events to people, organizations, addresses, vehicles and property remain displayed, and an **unexpunge** icon appears to reverse the expungement.

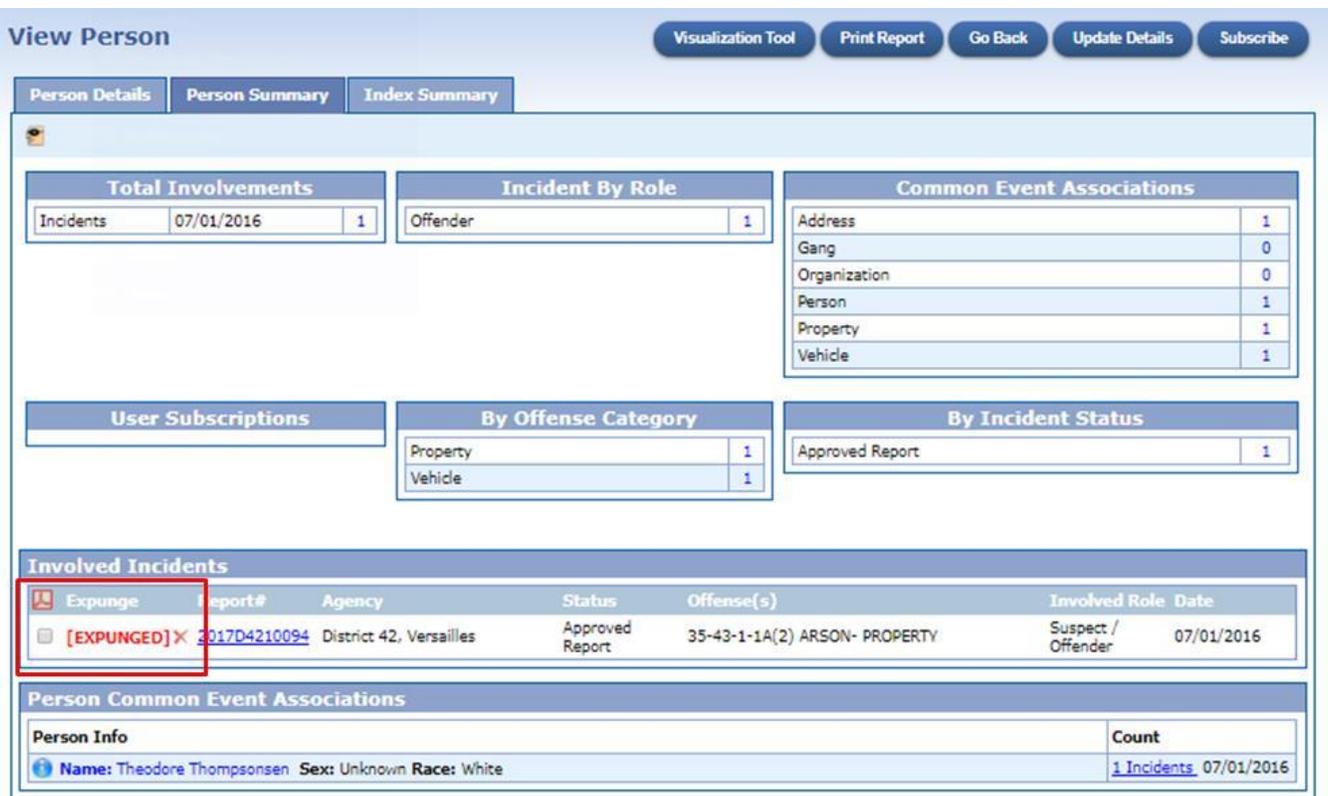

Figure 30: Person Summary - View for Expunged Authorized Users

For a user without **Expungement – View Expunged Records** permissions, the offender / arrestee’s name is replaced with the word **EXPUNGED** in the following places:

- Incident Summary Tab – Offenders Grid
- Incident Names Tab – Offenders Grid (no view icon)
- Incident Names Tab – View Victim page – Victim/Offender relationship
- Incident Property/Vehicle Tab – View Property page – Property Owner
- Incident Property/Vehicle Tab – View Vehicle page – Vehicle Owner
- Visualization – Incident Quick View – Offender Grid
- Incident Mapping – Incident Quick View – Offender Grid
- Case Management – Involved Names Grid
- Evidence Labels – Property Owner
- Evidence Lab Report – Suspect/Offender box

The above places will display the name with an **[EXPUNGED]** tag for users with **Expungement – View Expunged Records** permissions.

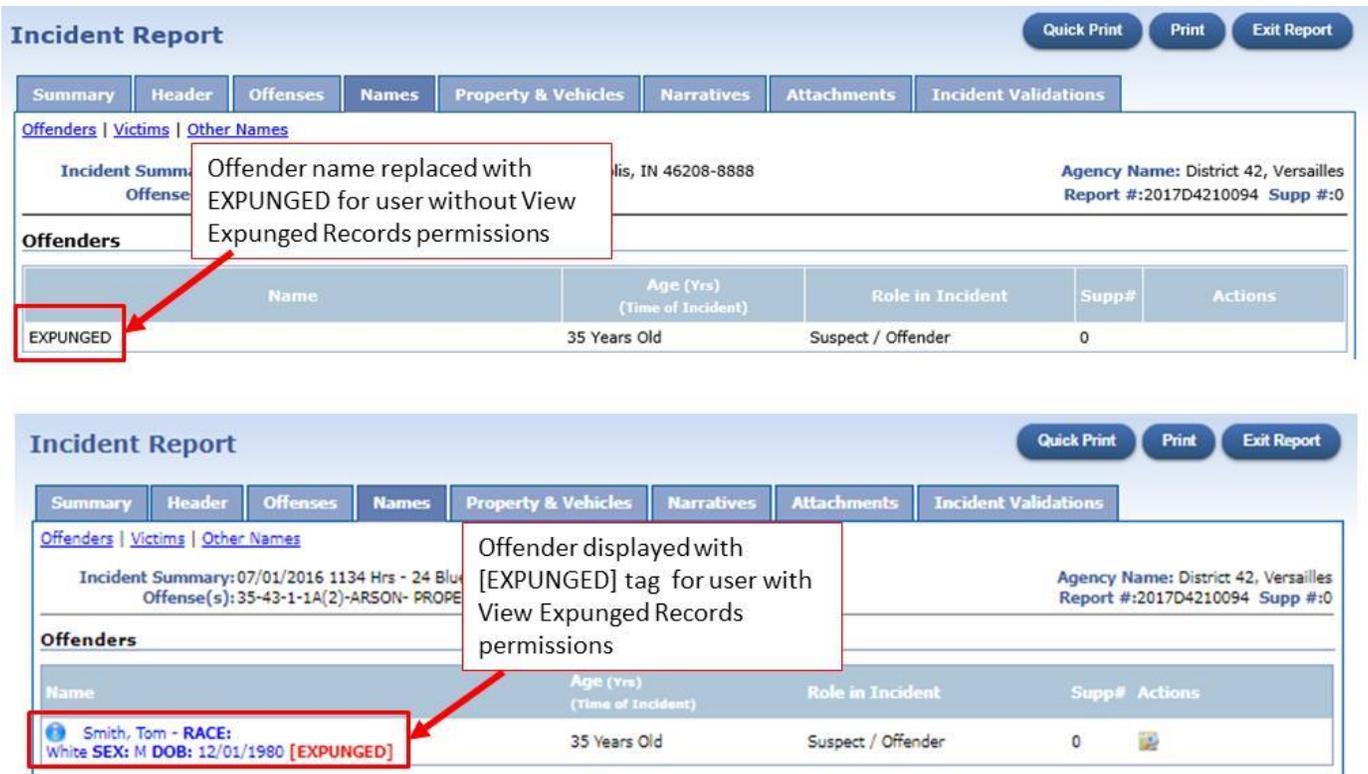

Figure 31: Incident Names Tab - Non-Expunged User View (top) and Expunged User View (bottom)

The following changes throughout the application will be applied for a user without **Expungement – View Expunged Records** permissions:

- Master Indices – Person Common Event Associations (offender is not displayed at all)
- Visualization – Offender / Arrestee to Incident link

- Visualization – Person Quick View – Person Summary tab (incident not displayed for offender)
- Photo Lineup – Person Quick View – Person Summary (incident not displayed for offender)
- Person Collapse – Person Quick View – Person Summary tab (incident not displayed for offender)
- Incident Search – Name / Combo additional search criteria (incident not returned when searching by offender)
- Incident Smart Search – by name (incident not returned at all)
- Incident Smart Search – by any other part of incident (offender not displayed / image not displayed)
- Case Search – Name additional search criteria (incident not returned when searching by offender)

Online RMS will display the above data with a [EXPUNGED] tag for users with **Expungement – View Expunged Records** permissions. Regardless of a user’s permissions, the print incident page will not display the expunged offender / arrestee’s name and quick print will not print the expunged offender / arrestee.

If incident narratives were updated during the expunge process, both the original and the updated narratives can be viewed by users with the **Expungement – View Expunged Records** permissions. Users without the **Expungement – View Expunged Records** permission will only see the edited expunged versions of the **Media Summary and Narrative**.

Expunge Field Arrest

The **Summary tab** on the **View Person** page displays an **Expunge** column in the **Involved Arrests** grid. If the master person is an arrestee and the user has **Expungement – View Expunged Records** permissions, RMS displays a **red X** in the column for that field arrest.

The screenshot shows the 'View Person' interface with several summary tables and an 'Involved Field Arrests' table. The 'Involved Field Arrests' table has a red box around the 'Expunge' column, which contains a red 'X' for the listed arrest.

Expunge	Arrest Number	Role(s)	Arrest Date	Agency	Charges	Incidents	Actions
X	1707563	Arrestee	06/01/2017 0600	District 42, Versailles	25-2.5-3-4 - PROFESSION/OCCUPATION- ACUPUNCTURE- UNLAWFUL PRACTICE		

Figure 32: Person Summary - Involved Field Arrests Expungements

Users with the **Expungement – Expunge Records** permission can select the **Expunge icon** to expunge a field arrest. The **Field Arrest narrative** can be edited to remove text that relates to the identity of the person being expunged. To edit a narrative, the user selects the **edit icon** and changes the text as needed. RMS will save the original narrative and the edited version of the narrative. Select the **Expunge button** to finalize the expungement.

PERSON COLLAPSE USABILITY ENHANCEMENTS

Person Collapse Usability Enhancements

A new streamlined design of the **Person Collapse** module provides agencies the capability to better manage master person names and remove duplicates. Enhancements to the **Organization / Business Collapse** module improve searches for businesses by **Business Number / Identifier**. The **Person Collapse** module has undergone some changes providing users with a new look and feel as well as added functionality to exclude any alias names not needed during the collapse process.

The basic options to collapse people remained the same:

- **Select a Person** OR
- **Specify Person Details to search for potential duplicates**

Online RMS

Select a Person

Similar to the workflow prior to this enhancement, users will be prompted to **search for and select a Master Person** as the **Primary Collapse Person**. Once a Primary Person has been selected, the user can then search for potential duplicates to be collapsed by selecting one or more Primary Filters and Optional Filters before clicking the **Search Matches** button.

Note: DOB and Creator Agency have been added as additional optional filters.

Search results based on filters selected will be shown in the **Duplicates to Be Collapsed** grid.

Primary Person Details

ID	Last Name	First Name	Middle Name	Race	Ethnicity	Sex	DOB	SSN	DL #	Creator Agency	Actions
936	Black	Bob		American Indian or Alaska Native		Male	06/01/1970	11111111		Indiana State Police

Showing 1 to 2 of 2 entries

Figure 37: Person Collapse Page

Specify Person Details For Potential Duplicates

Users can select **Primary and Optional Filters** to search for potential duplicate groups to collapse before clicking the **Search** button. **Note: DL #** (driver’s license) and **Creator Agency** have been **added as Optional Filters**. For clarity, **Start Date / End Date** fields have been renamed to **Creator Date**. Entering a date range will only compare Master Name records created during the specified time frame.

Search results are listed in the **Potential Duplicate Groups** grid. The capability to **sort by column headers** has been added to view records in ascending or descending order.

Click the **hand icon** in the Actions column to take action on a **Potential Duplicate Group**.

Figure 39: Collapse Action Page

The following information applies to both *Specify Person* and *Specify Person Details For Potential Duplicates* workflows:

Users may perform a variety of tasks on the *Person Collapse* Action Page:

- **Change the Primary Person** by selecting the **double arrows icon** in the Primary Person Details grid. Users can search for and select a different primary person from the Master Index Search page.
- **Switch the Primary Person** with another name from the **Duplicates to be Collapsed** grid by clicking the **hand icon** for the person.
- **Mark a person as Not a Duplicate** by selecting this icon . This will ensure that any **future Person Collapses** will not list this person as a potential duplicate for the primary name selected and vice versa.
- **Remove a person** from the list of **Duplicates to be Collapsed** so that person is excluded from the collapse process. Select the **red X icon** to remove a name from being collapsed.

Figure 42: Person Quick View Tab

The **Next button** at the bottom of the **Person Collapse** action page will initiate the action to collapse the **List of Duplicates to be Collapsed** names with the selected **Primary Person**.

Warning messages have been added to notify user's when a data combination exists that should be verified before finalizing the collapse.

- Warning for - Primary person has less information than one or more people being collapsed.
- Warning for - Primary person information (DOB, SSN, Sex, or Race) does not match one or more duplicate records being collapsed.

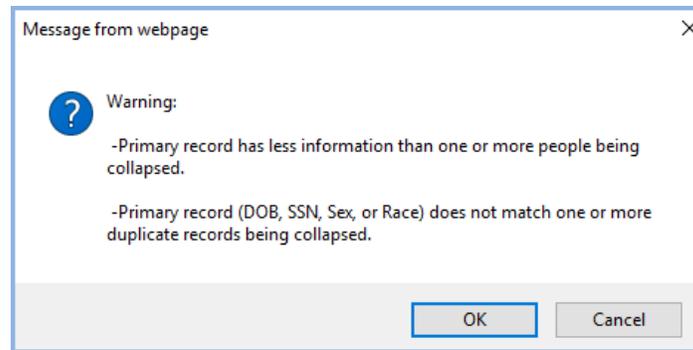

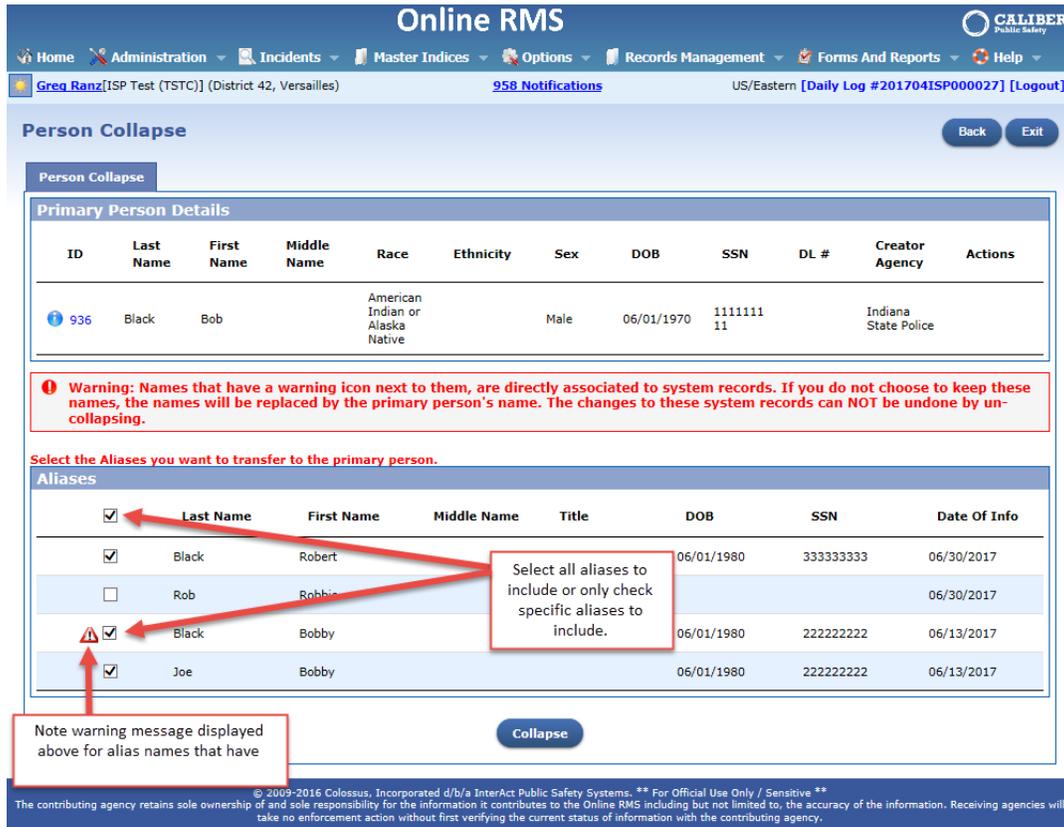

Figure 43: Collapse Warning Message

Select **OK** to proceed with the collapse or **Cancel** to cancel the collapse. A new step was added to the collapse process to allow users to verify if the collapsed name should be maintained as an **Aliases**. All name types (Primary, Alias, Maiden etc.) for collapsed persons will appear for evaluation. Users can select any aliases names by clicking the checkbox to add the name as an alias to the primary person.

Note: An **alert icon** next to alias names will appear if there are names associated with system records such as Incidents, Warrants, Citations, Field Arrests, etc. If the Alias name for these records is not selected to keep, the name will be replaced with the Primary Person's name in the event the records are later un-collapsed.

Select the **Collapse button** to finalize the collapse.

Primary Person Details

ID	Last Name	First Name	Middle Name	Race	Ethnicity	Sex	DOB	SSN	DL #	Creator Agency	Actions
936	Black	Bob		American Indian or Alaska Native		Male	06/01/1970	111111111		Indiana State Police	

Warning: Names that have a warning icon next to them, are directly associated to system records. If you do not choose to keep these names, the names will be replaced by the primary person's name. The changes to these system records can NOT be undone by un-collapsing.

Select the Aliases you want to transfer to the primary person.

Aliases

<input checked="" type="checkbox"/>	Last Name	First Name	Middle Name	Title	DOB	SSN	Date Of Info
<input checked="" type="checkbox"/>	Black	Robert			06/01/1980	333333333	06/30/2017

Permits Module Attachments

The **Permits Module** Edit page now supports the capability to associate PDF, Image, and MSWord **Attachments** to a permit record.

The screenshot shows the 'Edit Permit' interface. At the top, there are 'Go Back' and 'View Summary' buttons. Below is a navigation bar with tabs: 'People(1)', 'Organization', 'Properties', 'Vehicles', and 'Attachments'. The 'Attachments' tab is highlighted with a red box. The main form area contains fields for 'Permit Number' (PERMITPERSON03), 'Agency' (Region 1), 'Permit ID' (103), 'Permit Type' (GUN PURCHASE PERI), 'Status' (ORIGINAL), and 'Reason' (APPLICANT ARRESTE). There are also fields for 'Purchase Type', 'Application Date', 'Process Date', 'Issue Date', 'Processed by', 'Issued by', and 'Expire Date'. A 'Comments' text area is present. Below the form are 'Go Back' and 'Update' buttons. At the bottom, there are sections for 'People', 'Organizations', 'Property', 'Vehicles', and 'Attachments', each with an 'Add' button. The 'Attachments' section is highlighted with a red box. At the very bottom, there is a copyright notice: '© 2009-2016 Colossus, Incorporated d/b/a InterAct Public Safety Systems. ** For Official Use Only / Sensitive **'.

Figure 48: Permit Attachments

Custom Form Attachments

Custom Forms now support the capability to associate PDF, Image, and MSWord **Attachments** to a CFS event. Attachments can be added to any custom form in edit mode by selecting the **Attachments** tab.

The screenshot shows the 'Use of Force Form' interface. At the top, there is a 'Go Back' button. Below is an 'Incident' section with fields for 'Report #' (17-HCSD-0429), 'Report Date' (07/14/2017), and 'Agency' (District 42, Versailles). Below that is a 'Use of Force Form' section with tabs: 'Use of Force Form', 'Attachments', 'Audit Log', and 'Comments And Routing History'. The 'Attachments' tab is highlighted with a red box. Below the tabs, there is a 'Form Status' field (Initial) and a 'Print Use of Force Form Incident Report' and 'Print Form' link. The 'Form Details' section contains a 'Select an Officer' dropdown (SERGEANT-CAPTAIN-WIN Greg Ranz(Badge #: 9696) - District 42, Versailles) and a 'Security Level' dropdown (Patrol Supervisor).

Figure 49: Custom Forms Attachments Tab

Fleet Management Attachments

Fleet Management now allows officers with a current assignment to a vehicle to add **Attachments** to Fleet Vehicle assignment. The **Fleet Vehicle Attachments** section previously was only available to Fleet Managers. Users with a current assignment can add **Attachments** and edit or delete attachments that they added.

FIELD CONTACT ENHANCEMENT

Associate a Call for Service (CFS) to a Field Contact

The capability to associate a **RMS Call for Service (CFS)** event to a **Field Contact** streamlines the viewing of related information from CAD to Field Contact documentation in the Online RMS. The Field Contact Module was enhanced to support the association of a **Calls for Service (CFS)** event in **Edit** mode. A new data grid for Calls For Service appears at the bottom of the Field Contact page. A **'go to'** link is available at the top of the page. For consistent operation, this new capability was modeled after the **Field Arrest Calls For Service** section.

Use **'Select Existing Call'** to add a CFS record to the Field Contact. The CFS search page will auto populate with a date range within last **24 hours** and filter to **'Search Calls I've Responded To'**. If a CFS has no associated incidents the association to the Field Contact is automatically created and the user is taken back to the **Field Contact edit** page. If the CFS has associated incidents, a popup appears for the user to select incidents that should also be related to the Field Contact. Related CFS records are viewable from the **Field Contact View** page. In addition, the CFS association will print on the **Field Contact report**.

FIELD ARREST ENHANCEMENTS

Field Arrest Charge Enhancement - Default Bond Type and Amount

The **Field Arrest Module** can now be configured to **default a bond amount and bond type** for charge codes added to an arrest. This enhancement ensures bond amounts are entered correctly for agencies in States that have statutory bonds defined for specific charge codes.

Configuration

Authorized users with permission to manage **Charge Category Codes** and **Charge Codes** have the capability to define a default bond type and/or amount at the **Charge Category Level** or for a specific **Charge Code**.

Select the Administration – Menu – Tables – RMS Tables – Either Charge Category Codes and Charge Codes.

Figure 52: Manage RMS Tables Page

To default **Bond** information for a specific **Charge Code**, Click on the **Charge Codes Icon** and Search and Select a **Charge Code** to Edit. On the Edit **Charge Code** page, add a default **Bond Type and/or Bond Amount**.

Edit Charge Code

*Required

* Charge Code:

Figure 54: Edit Charge Category Code Page with Default Bond Type and Amount Entered

Usability

When **adding a Charge to a Field Arrest**, if a charge is selected that has a **default bond type and/or amount** configured for the **Charge Category and Class** related to the charge code or directly at the **Charge Code** level, the bond amount and type will automatically populate for the user. The user can update the bond information as needed.

Figure 55: Field Arrest Add / Edit Charge – Bond Type and Amount Defaulted

If a user replaces the selected charge code with another charge code that has default bond information, the user will receive a prompt asking if the bond field should be updated with the default information or remain unchanged. Select **'OK'** to accept the default values or **'Cancel'** to manually enter the information.

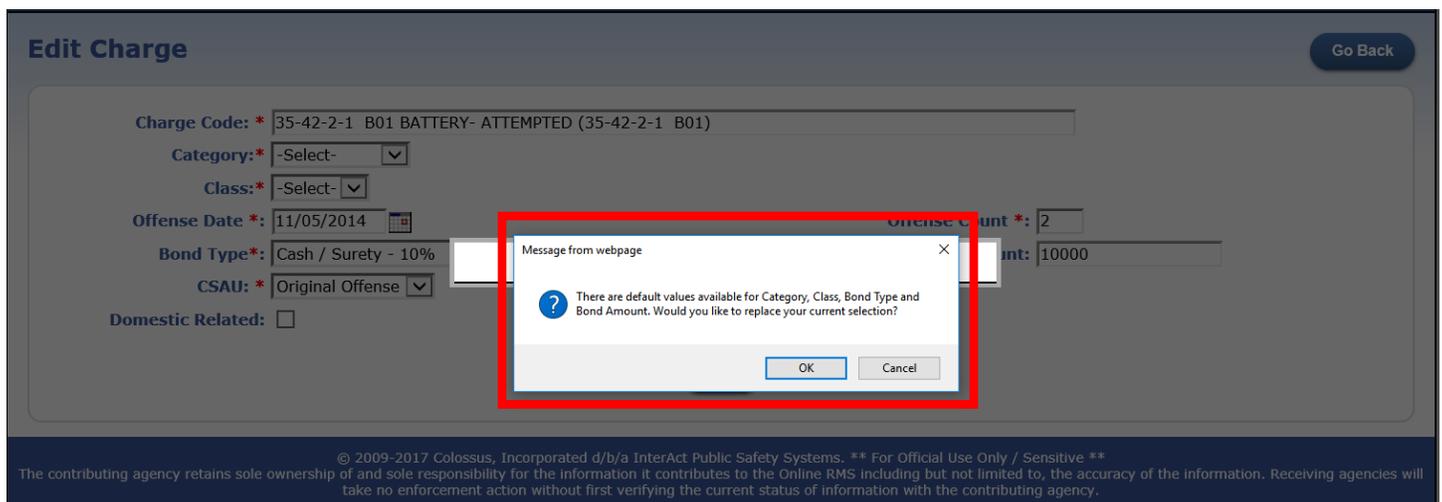

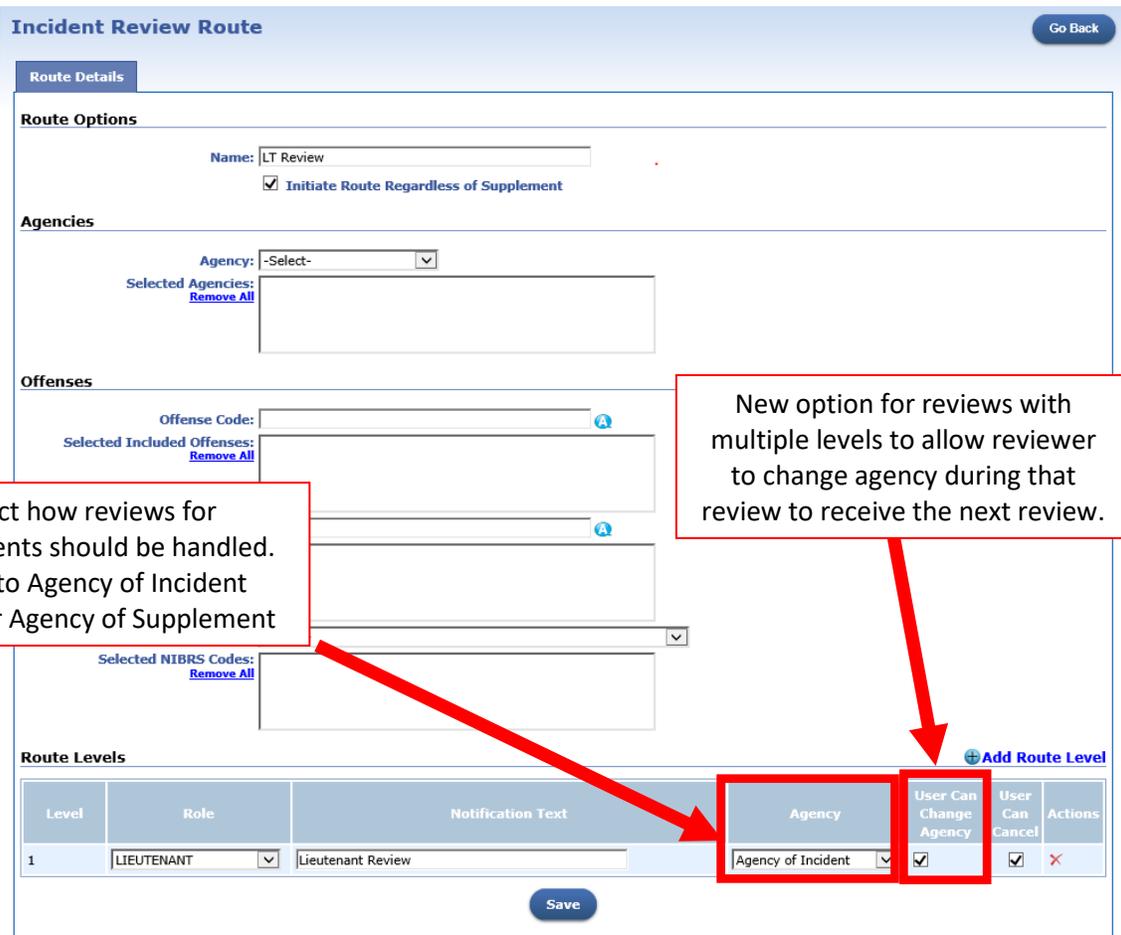

Figure 56: Field Arrest Edit Charges Page – Change Charge Code with Default Bond Information

INCIDENT REVIEW USABILITY ENHANCEMENT

Incident Review Routing Enhancement

The **Incident Review Routing** capabilities were enhanced to support routing a review for Incident Supplements to the either the **Agency of the Incident** or the **Agency of the Supplement**. For Routes having more than one review configured, the capability to **change the agency** to receive the next review or to **cancel a review** is also supported. This enhanced capability allows agencies more flexibility with Reviewing Incident Supplement and for Reviews configured with more than one review level.

[Save](#)

Select how reviews for supplements should be handled. Route to Agency of Incident Report or Agency of Supplement

New option for reviews with multiple levels to allow reviewer to change agency during that review to receive the next review.

Figure 57: Incident Routing Configuration page.

The **Incident Approval** page has been enhanced to display a **"Review Routes"** section. For each route that will apply to the incident, the approving user will see the route name and agency. If the option for **User Can Change Agency** is checked for the **Level 1** route the approving user will have the option to change the agency to receive the route review notification. Otherwise, the agency for the route is determined based on the **Agency of the Incident** or the **Agency of the Supplement**.

When taking action on reviews having multiple levels and the option for ***User Can Change Agency*** is checked a user will be able to select the agency to receive the next review. If the ***User Can Change Agency*** is not checked the agency to receive the next level will appear as a display only field.

INTEGRATION ENHANCEMENTS - APIS

INCODE Courts to Online RMS

Empowering the exchange of information to external systems that enhance local, regional, and state data sharing needs is paramount to the mission of Caliber Public Safety.

New Web Services to support warrant and citation data exchanges from Court Case Management systems has been added to the Online RMS library of Application Program Interfaces (APIs). This will be a one way interface from INCODE Courts to send new warrants, warrant status changes, and citations to Caliber Online RMS for loading into the RMS Warrant Management or Citation modules. Requires deployment of the INCODE Court “Real-time Warrant Export” or “Real-time Citation Export”.

APPENDIX: 10.28.0 PRODUCT CHANGE NOTICE (PCN) - DETAILED JIRA LISTING

TABLE A: RELEASE ENHANCEMENTS AND PRODUCT SOFTWARE ISSUE RESOLUTIONS

This table contains major product software issue JIRAs resolved in the 10.28.0 release along with product enhancement JIRAs.

JIRA #	Client Ticket #	Summary	Type of Issue	Functional Documentation
IA-32162	TTN111728 TTN115803 00342444	Barcode Scanners - Evidence Location Scan Enhancement	Enhancement	Enhanced the evidence location select fields to accept input from a barcode scanner. This enhancement applies to the evidence location select fields on the following pages: <ul style="list-style-type: none"> - Evidence search pages - Check in - Mass Check In - Change Location - Mass Change Location - Discrepancy Audit Report Page
IA-33731	00339840 00347444	SCR22099 Attachments For Various Modules (CFS)	Enhancement	Enhancement to add Attachments to the CFS and Permit Edit and Create pages.
IA-36845 IA-61636 IA-61765 IA-61911 IA-61938 IA-61950 IA-61976 IA-62143	144207	RMS Enhancement to Seal and Expunge Records - Investigate and Architect Solution	Enhancement	This first iteration to streamline Expungement processing will allow authorized users to expunge an offender/arrestee from an incident or expunge an entire field arrest. Expunged records will no longer be visible throughout the application unless the user is granted permissions to view expunged details.
IA-52470	InterWeb	CAD/RMS Spill-Pass Incident Questions to RMS	Enhancement	Interface enhancement to ingest questions captured in CAD and include in the CAD spill in the Online RMS CFS module. These are questions that are built within CAD for specific incident types. The CFS Incident Note will include the Questions and answers under the heading

				<p>'QUESTIONS' and the remarks/narratives under a heading 'REMARKS/NARRATIVES'. Within each group, notes should be sorted by the date/time.</p> <p>If multiple sets of caller information are generated, the extra call info will be at the top of the Incident Note under the heading 'ADDITIONAL CALLER INFORMATION'</p>
IA-53203	00145646 00156919 00339003	Custom Forms-Add Attachment Capability	Enhancement	This enhancement adds the capability to capture attachments on a custom form while in edit mode.
IA-54972 IA-55149 IA-56726 IA-61458 IA-61637 IA-62326 IA-62339 IA-62349 IA-62465	N/A	Person Collapse Enhancements	Engineering Enhancement	A new streamlined design of the person collapse module provides agencies the capability to better manage master person names and remove duplicates. The Person Collapse module includes added functionality for searching by DLN, searching using the standard person query page, viewing person details for potential matches, and the capability to exclude alias names not needed during the collapse process.
IA-55353 IA-61956 IA-62354	00153007 00338543	Add a Day / Night Mode	Enhancement	Web page style sheet and chart updates bring new colors and a fresh modern look and feel to make the Online RMS more pleasing to the eye. Responder Safety is also improved with the capability to switch to Night mode when operating the Online RMS at night time or low light situations.

IA-56138	00157792 00318405	Warrant Entry - Agency LOV Defaults to Parent Agency	Enhancement	Enhancement for multi-tiered agencies to display all agencies in the Original / Charging Agency List of Values (LOV). This change will allow the selection of a child agency such as a post, district, or barrack to denote as the Charging Agency for the warrant.
IA-56572	N/A	Send Notifications: Validation for Notification Description Text Box > 4000 does not handle special characters correctly	Bug/Defect	Resolved an issue with copying and pasting text into the Online RMS Ad Hoc Notification page resulted in an error message.
IA-56755	N/A	Org Collapse: Search by Organization Number	Bug/Defect	Resolved an issue where searching for Organizations to Collapse by Org # did not return expected results.
IA-57636	N/A	Associate a CFS to a Field contact.	Enhancement	The capability to associate a RMS Call for Service (CFS) event to a Field Contact streamlines the viewing of related information from CAD to Field Contact documentation in the Online RMS. The Field Contact Module was enhanced to support the association of a Calls for Service (CFS) event in Edit mode. A new data grid for Calls For Service appears at the bottom of the Field Contact page. A 'go to' link is available at the top of the page. For consistent operation, this new capability was modeled after the Field Arrest Calls For Service section.
IA-57796	162750	Michigan-IBR(MICR) - New XML Submission format - Analysis	Enhancement	Research JIRA for State of Michigan MICR (NIBRS) submission changes. The State of Michigan NIBRS program is moving to an XML submission based process. Analysis was completed to understand the Level of Effort required to implement this enhancement and prioritized for a future release.

IA-59381	N/A	Interface Development Services (Interface to Incode - Warrants)	Interface	InterAct Development Services (Interface to Incode - Warrants) INCODE Courts to Online RMS. This will be a one way interface from INCODE Courts to send new warrants and warrant status changes to Caliber Online RMS for loading into the RMS Warrant Management. Requires deployment of the INCODE Court "Real-time Warrant Export".
IA-59524	172280	Court Locations - Display court locations dropdown in alphabetical order	Enhancement	Updated the list of values on the Warrant Search and Court Paper Edit pages to display in alphabetical order.
IA-60342	337009	Field Arrest : Printing - System warrant charge description does not display on printed field arrest	Bug/Defect	Resolved an issue where the Charge Description, County, Bond Type and Amount values where not printed on the Field Arrest report for System Warrants (created in RMS) are associated to a field arrest.
IA-60693 IA-61481	37558	CAD To RMS Interface - Spill Vehicle information from CAD to RMS CFS Module	Enhancement	Vehicle information from CAD NG is now being stored in the Incident Notes field on the CFS in Online RMS. The vehicle data is placed in the ServiceCallNote XML section when the CAD XML is transformed to the structure used by the RMS CAD import. The import will then place the vehicle info into the CFS Incident Note under a heading 'VEHICLES', sorted by the effective date/time from CAD. A future iteration will support vehicle specific fields in the CFS module.
IA-60734	N/A	DLA STIG- Applications Enhancement for URL session IDs.	Engineering Enhancement	To facilitate enhanced security for DOD Information Assurance security policy (STIGS) this change removes embedded session IDs from URLs.

IA-60783	340943	Incident Reports - Default setting for "For Public Release"	Enhancement	<p>This enhancement adds the capability for agencies to configure if the "For Public Release" check box should default to being checked or unchecked when an incident report is created. This new default configuration is managed at the agency level from the Agency Settings page – Maint Value Settings – Add Value - 'INC_PUBLIC_RELEASE'. For roll-out, the setting is default to 'Y' for all sites.</p> <p>The "For Public Release" setting determines whether the wording "Not For Public Release" appears at the top of the RMS page and top of the printed report.</p>
IA-60822 IA-60823 IA-60824 IA-61050 IA-61052 IA-61053 IA-61054 IA-61639 IA-61766 IA-61770 IA-61934 IA-62428	N/A	Auditing - new Tables and changes to XML	Enhancement	<p>The Auditing feature allows agency administrators to configure and view audit information for data tables, notification actions, print reports, and queries for persons, incidents and field arrests. Enhanced auditing empowers system administrators to audit on demand to ensure end-user best practices.</p> <p>The Auditing feature within Online RMS that will allow customers to audit the following kinds of data across a schema:</p> <ul style="list-style-type: none"> • Table Access - inserts, updates and deletes) • Report Access - printed reports for Incidents, Arrest, etc. as well as Custom Forms and ad-hoc reports initiated from the application • Search Access - incident, person and arrests searches)

				<ul style="list-style-type: none"> • Notification Access – creation, actions take and deletes <p>Audit data captured can be viewed on the Auditing page or exported to an excel spreadsheet.</p>
IA-61098	N/A	Tow Impound: Impound Storage LOV shows values for Officer's Agency and not for Towing Agency	Bug/Defect	Resolved an issue where the Tow Impound Storage location was showing locations for the Officer's agency and not the Tow Impound agency. Towing locations are now shown for the agency owning the impound.
IA-61459	N/A	RMS WebPage CSS Update	Enhancement	Web page style sheet and chart updates bring new colors and a fresh modern look and feel to make the Online RMS more pleasing to the eye.
IA-61460	N/A	Continuation / Testing of IA-60734	Enhancement	Continued testing for security enhancement to eliminate session ids for URLs.
IA-61549	344206	Warrants - Warrant service not ending officer assignment	Enhancement	Enhanced the Warrant Module to automatically end an officer's assignment if an officer is directly assigned to the Warrant and the Warrant status is changed from an Active Status.
IA-61577	N/A	Equipment Make and Models not filtering in ODL Admin properly	Bug/Defect	On the ODL Administration page an update was made to the model auto-complete List of Values to filter by BOTH make AND Agency Code.
IA-61594	N/A	Update Google Image charts on Home page	Enhancement	The Google image charts on the home page for offenses in last 24 hours and incident agency status are no longer being supported by Google. This enhancements updates these charts to a new tool.
IA-61610	N/A	InterDEx Engineering Enhancement	Enhancement	Engineering enhancement to clean-up configuration for

				enabling InterDEx searches within Online RMS.
IA-61626	N/A	Utilize XSLT on middle tier - Java side changes	Engineering Enhancement	Engineering Enhancement for XSLT translations
IA-61627	N/A	Utilize XSLT on middle tier - Database changes	Engineering Enhancement	Engineering Enhancement for XSLT translations
IA-61630	344686	Fleet Management - Add ability for Officers to add attachments	Enhancement	Fleet Management now allows officers with a current assignment to a vehicle to add attachments to Fleet Vehicle assignments. The Fleet Vehicle attachments section previously was only available to Fleet Managers. Users with a current assignment can add attachments and edit or delete attachments that they added.
IA-61661	N/A	Warrant Search Results: Sort by status or state id	Bug/Defect	Resolved an issue on the Warrant Search Results page to support sorting by status or by state id.
IA-61678	344919	Incident - Warrant listing on summary incident report page not displaying alias name if used for a warrant.	Bug/Defect	Alias names selected on warrants will now correctly display in the incident report warrants section.
IA-61679	N/A	CAD Interface - Configuration fix for storing vehicles on CFS incident note	Configuration	Verify that the value for option code CALL_NOTE_TYPES_TO_CFS in the XML_DOCUMENT_OPTIONS table for doc_category_code CAD is 'QUESTIONS,VEHICLES' with a comma separating the note types. Create a CAD incident with one or more questions and vehicles. Verify that the RMS CFS Incident Notes field has the questions and vehicles. NOTE that no software changes were made, just the default configuration setting, so it's not necessary to re-test the full functionality of IA-61481.

IA-61706	N/A	Master Indices : Property Information - Property Summary tab doesn't show DOB	Bug/Defect	The Property Details Summary View - Person Common Event Summary now displays the person DOB.
IA-61727	00345302 00348966	Review Routing - Send notifications to the report approving agency not report owner agency	Enhancement	Enhancement to the Incident Approval Review process that allows Report Reviews to be sent to user's agency that entered the Incident supplement rather than the agency that owns the incident report.
IA-61737	N/A	Manage User: profile tab jurisdiction error message	Bug/Defect	Resolved an issue where an invalid error message was sometimes being displayed when updating user information via the User's My Profile Management page.
IA-61745	N/A	Increase Retention time for EJS FLASHBACK	Configuration	Increase Retention time for EJS FLASHBACK form 72 hours to 1 month. Flashbacks are used to save changes in Incident Narratives.
IA-61747	N/A	NIBRS Victim Type Required - Validation Message Usability Update	Bug/Defect	Enhanced the NIBRS validation messages to display a separate warning message for Person Crimes and Property Crimes for Required Victims. Person Crimes must have a person. Property Crimes may have a person or business / organization.
IA-61777	345491	Master Indices : Address -City name is not displaying properly	Bug/Defect	Resolved an issue with City names having an apostrophe where not being displayed properly.
IA-61810	N/A	XML Upload via Web Service - Split Documents	Enhancement	Interface Enhancement to process a single XML document that contains multiple

				core records (i.e. Incidents, Citations, Warrants, etc.).
IA-61836	N/A	Field Arrest Search Page Display Issue	Bug/Defect	Resolved an issue where the search results page for Field Arrest displays outside of the application margins.
IA-61840	N/A	Incode Citation Interface - XSLT Development	Interface	New web services interface to support ecitation data exchange from the INCODE Courts System to Online RMS. This is a one-way interface from INCODE Courts to send citation data to the Caliber Online RMS for loading into the RMS Citation Management module. Created a new XML translation to convert Incode Citation document into the standard RMS XML format.
IA-61850	346111	Tow/Impound - Add Disposition and Release Date to printed report	Enhancement	Per agency request, the Disposition and release date have been added to the tow/impound report.
IA-61864	N/A	Field Arrest Charge Enhancement - Default Bond Type and Amount	Enhancement	States commonly have statutory bonds set for certain misdemeanor and traffic offenses. Most officers do not know the statutory bond type and amounts and are required to look up the information prior to arresting a person on a charge. This enhancement allows a default bond type and amount to be designated for a Charge Category/Class or directly to a specific Charge Code for use in the Field Arrest Module.
IA-61929	N/A	InterDEx - Enhancement to Include an Agency specific Identifier for InfoExchange Queries	Enhancement	The Online RMS was enhanced in 10.27.1 to support queries of InfoExchange adapters in the InterDEx network. Currently the From communication from Online RMS includes the Agency Name (Description). This enhancement implements

				a new data field in the agencies table to store an Agency identifier that is provided to IX change queries that clients can't modify. The agency name is also configured on the IX side to restrict or allow some data sources based on an Agency Name.
IA-61938	N/A	Flag RMS Systems For Solr ASync	Engineering Enhancement	Turn on ASync Solr functionality for all customers to maximize performance for Solr syncing.
IA-61943	N/A	Add Misc ID Type to Warrant XML Translation	Bug/Defect	Added Misc ID Type to CMS Warrant XML Translation. Driver's license information is not being stored during the warrant upload process.
IA-61947	345327	Warrant - Saving warrant causes the displayed Charge Class to change	Bug/Defect	Resolved an issue where Charge class and category were not defaulting properly on the warrant add and edit pages.
IA-61954	N/A	XML Interfaces - Test 10.28 changes to XML processing using the web service	Enhancement	Changes to the XML import process were implemented in 10.28 that required significant logic changes to both the web service and the database package.
IA-61970	N/A	RMS Release Install Table update for 10.28	Configuration	RMS Release Install Table update for 10.28
IA-62143	155964	Person Collapse - Add ability to search by OLN	Enhancement	Enhancement to add the capability to search for persons to collapse by OLN/DLN.
IA-62179	348072	VIBRS - Error 352 - Property Offense Code default when None or Unknown Property Loss type	Bug/Defect	Resolved an issue with Virginia State specific VIBRS reporting for handling property status submissions where status equal to None or Unknown.

IA-62206	N/A	Database --> Solr Encryption In Motion - UTL_HTTP Enhancement	Engineering Enhancement	Implemented encryption for Solr UTL_HTTP processes.
IA-62227	00347918 00348158	Indiana Odyssey Interface - Change to process "Other Data Change"	Enhancement	<p>This issue concerns the changes that are pushed from the Odyssey interface to RMS dealing with "Other Data Changes". Currently for these types of changes, the RMS will Recall the warrant(s) with the changes involved and create a new warrant with the updated information and the status that is pushed from Odyssey. The customer currently will change the status of certain warrants to a status of "Held Out of County" for example. When these warrants are changed by "Other Data Change" from Odyssey, the system will Recall the warrant and create a new one with a status of Active instead of the status updated manually in the Online RMS.</p> <p>This enhancement applies only to "Other Data Change" updates from Odyssey and will continue to Recall the warrant having the change, create a new warrant in its place, and keep the warrant status as set in the Online RMS when the "Other Data Change" was received.</p>
IA-62239	N/A	CAD Interface - XSLT v2.0 stylesheet for testing only	Engineering Enhancement	Generate an XSLT 2.0 stylesheet that can be used for regression testing the transformation of XML in the web service using XSLT v2.0. This stylesheet will be based on the CAD Standard XML stylesheet but will utilize an XSLT 2.0 function and be generated as XSLT 2.0. It can then be used to verify that 2.0 stylesheets can be applied

				successfully by setting the XSLT_IN_WEBSERVICE option to 'Y' for the CAD interface and sending a CAD NG Standard XML submission to the web service..
IA-62240	N/A	Fix long session script to change nvl value compares	Engineering Enhancement	Engineering Enhancement to change nvl value compares to allow for monitoring of tasks that are running long but don't have client_info information available.
IA-62253	N/A	Fillable PDF - Add ability to set time format	Enhancement	The "Date and Time" Field in custom forms now supports date formats to specify military or AM/PM times. As example: {VALUE MM/dd/yyyy h:mm a} the 'a' at the end adds the AM/PM.
IA-62299	N/A	Hybrid Interface - Investigate Process Hung in Tx200	Bug/Defect	Investigation and analysis of the Hybrid interface used to pass person information from the Enterprise Jail Management System to Online RMS. The findings of this investigation will be implemented in a future release.
IA-62324	N/A	Warrant: Actions icons misaligned in Warrant Search Results page	Release Defects	Resolved an issue where the actions icons were misaligned in Warrant Search Results page when selecting a system warrant to associate with a Field Arrest.
IA-62337	348857	ODL - Printed report not printing equipment description	Bug/Defect	The ODL printed report will not print the Equipment Description rather than the Equipment Codes.
IA-62413	349138	Incident Report - Master Indices Level 3 index security not enforced	Bug/Defect	Updated security logic for Incident People. Master names having indices security set to 3 will only be viewable on the incident report if a user has a master indices security of 3.
IA-62449	349138	Incident Report - Master Indices Level 3 Incident Search	Bug/Defect	Updated security logic for Incident People. Master names having indices security set to 3

				will only be viewable in the Incident People search results for users having Master indices security of 3.
IA-62463	N/A	XML Testing - 61954 Continuation	Enhancement	Engineering item to continue testing on XML interface changes.
IA-62552	00350121	AJAX Fields - Auto Complete caching performance	Bug/Defect	Updated AJAX caching to improve performance and return of results when typing quickly in the field.
IA-62693		Incidents: HeaderTab page in non-wizard mode overflows outside of right border when creating a supplement	Bug/Defect	Updated the Incidents HeaderTab page to display within the main page margins.
IA-62621	350457	Update Script to clear ARREST_CHARGE_CODE_MODS table	Enhancement	Update script to improve use of Warrants select Charges List of Values (LOV). This update will remove charges from the arrest_charges table from displaying in the LOV. The LOV will still display values from the Charge_Codes table.
IA-62682		Citations: Actions column in Attachments grid is not light blue (inconsistent with other columns)	Bug/Defect	Updated column color in the Citations View page attachments grid.
IA-62609	350379	Case Management - View mode shows code for activity type instead of description	Bug/Defect	Improved the Case Management Follow-up Investigation view page to display the activity type description rather than the ID.
IA-62504	349879	Case Management - Heading for Case Load search results displays incorrectly	Bug/Defect	Updated the page header text on the Supervisors Case Management review page.
IA-62552	350121	AJAX Fields - Auto Complete caching results are causing issues	Bug/Defect	Enhanced the Incident Offense, Citation Charge, and Arrest Charge AJAX list of values (LOV) filter as you type fields to be more responsive.
IA-62631		Michigan MICR Update to Add Location Code of Cyberspace (58)	Enhancement	The Michigan MICR application supports the new FBI code of Cyberspace (58). This new code has not been added to the Michigan Schemas.

IA-62322	348611	Evidence - Unable to dispose of property	Bug/Defect	Improved the Evidence entry page to resolve an issue where pasting copied text exceeding the field limit of 4000 characters caused an issue creating a chain-of-custody record.
IA-62593	350300	InterDEx - Search by SSN getting mixed results searching with and without dashes	Bug/Defect	Improved external search logic to remove dashes from SSNs when searching for a person when SSN is entered on the Master Person Search page.
IA-62560		Field Arrest and Warrant Charges: Remove message for clearing the values when adding a new charge to the field arrest	Enhancement	Removed an unnecessary notification when adding a charge to a field arrest for the first time that has a default bond. The warning message will now only appear if changing a charge on the field arrest and the charge that is selected has a default bond amount or type.
IA-62437	340943	Incident Reports - Change default setting on For Public Release for CAD spills	Enhancement	<p>This enhancement is related to IA-60783 – Default “For Public Release” when creating an incident report. The CAD spill integration to create an incident from a CAD interface was enhanced to use this new maintenance setting. This new default configuration is managed at the agency level from the Agency Settings page – Maint Value Settings – Add Value - 'INC_PUBLIC_RELEASE'. For roll-out, the setting is default to 'Y' for all sites.</p> <p>The "For Public Release" setting determines whether the wording "Not For Public Release" appears at the top of the RMS page and top of the printed report.</p>
