INTRODUCTION

This document provides an overview of the software changes delivered in the 10.30.1 release of the Online RMS product and will assist with release preparation activities including:

- Internal staff training
- Customer release training
- Customer release notes
- Release announcement and promotion
- Online help and eLearning updates
- Updates to web site product information and product collateral

PRODUCT REQUIREMENTS

For best performance, we recommend a computer, laptop, or tablet purchased within the last 3 years; running an industry popular web browser that is actively supported by the browser manufacturer and connects to the internet using DSL, Cable, or 4G cellular. The browser must support TLS 1.0 or higher.

JIRA #	Client Ticket #	Summary	Type of Issue	Functional Documentation
IA-59154	N/A	Report parameters duplicated for Officer Daily Category Report	Bug/Defect	Software modification to remove duplicate reporting parameters that displayed on the Officer Daily Category Report.
IA-60441	00336550 00337555 00342595	Review Routing - Allow review Routing without an offense on report	Enhancement	<p>Software enhancement for post approval review routings to support:</p> <p>1) Route reports regardless of whether or not an offense is on the report. Review routing now supports routing by Incident Report Type without having an offense on the incident report.</p> <p>2) Allow review routes to apply to all offenses and incident report types on an incident report regardless of the number of each. If multiple offenses and/or incident report types have the same flow, then only one review flow should be created. The intent of this enhancement is to support separate reviews when a notification contains offenses and/or incident review types that have different review routes configured.</p>
