NEW FEATURES & ENHANCEMENTS

Online RMS 11.6.0 includes many new updates, based on customer input, contractual commitments, and Public Safety State and Federal mandates. The overall release focus was on increasing operational efficiencies, simplifying data management, and improving ease of use.

Please see Online RMS User Help and Admin documentation for more details on the enhancements and features highlighted in this release bulletin.

ONLINE RMS 11.6.0 HIGHLIGHTS

Property Management

Do more with Property Management. Building on a great foundation to bring you more.

1. **Evidence / Held Property** - In response to listening to our customers, the Evidence module was updated to retitle fields to bring the full capabilities of Evidence Management to use for managing both Evidence and Held Property. Action Icons, Page Titles, Field Labels, and Notifications now read **"Evidence / Property Management"**.

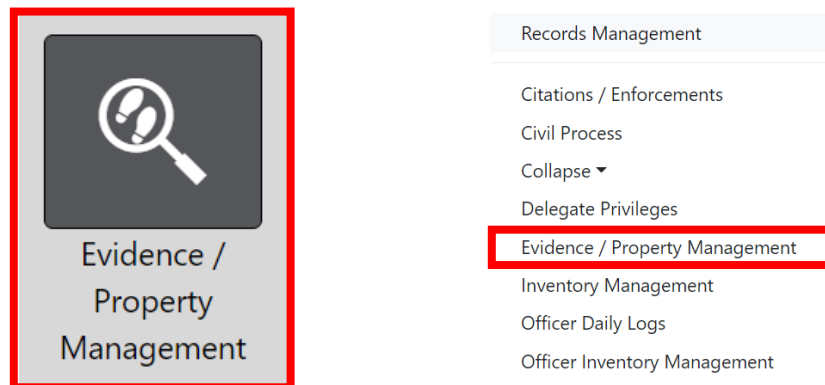

FIGURE 1: SAMPLE SCREEN-PRINTS OF NEW WORDING.

A new **"Type"** field allows users to distinguish between Evidence and Held Property when seizing or holding property in the agency's property room vault.

Property Room Admins can specify the **"Type"** for each property room location via the Agency Settings – Held Property Locations page. Setting a **"Type"** for the property location code will filter that location to only be available for items of property having a matching **"Type"** defined.

For Production release, the **"Type"** has been set to **Evidence** for all existing Property Locations. If your agency manages both Evidence and Held Property, then please have your Agency Admin add or update locations for holding Held Property in your Property room/vault.

For agencies using the Online RMS Evidence module, the **"Type"** field for existing property in the Property room can be updated to classify as "Evidence" or "Held Property". If not set, the "Type" field is required when performing actions such as Property Check-In. A Mass update action is also available to update the **"Type"** for existing property or make edits to the **"Type"** as needed.

If you need assistance in setting the **"Type"** field for existing property records in the Property Room Vault, please submit a support ticket including a listing of System IDs and the **"Type"** to be set for each record. A listing of property records can be exported from the Chain of Custody search page using the available search parameters and choosing the "Export to Excel" option

APPENDIX: SERVICE COMMITMENTS

Caliber Public Safety designs its processes and procedures related to its RMS system based on the service commitments that Caliber Public Safety makes to its business units, the laws and regulations that govern the system and the operational and compliance requirements that Caliber Public Safety has established.

Security, availability, confidentiality, and processing integrity commitments include, but are not limited to, the following:

Security Commitments

- Secure Socket Layer (SSL) FIPS140-2 compliant encryption is used to encrypt the transmission of data with Caliber hosted systems.
- Access to customer data is restricted to Caliber employees and/or subcontractors whose job function requires access.
- RMS Development, operations, and customer service personnel are required to maintain active CJIS certification.
- Systems are subject to vulnerability scanning.

Availability Commitments

- Caliber will maintain a highly available platform (99.9% uptime) that includes redundancy for critical system components except during planned downtime as communicated to users or unplanned downtime caused by circumstances beyond its reasonable control. In practice, Caliber routinely exceeds 99.99% uptime.
- User entity data is backed up daily and replicated to a secondary location.
- User entity data is maintained and stored within the United States.

Confidentiality Commitments

- Upon termination of services, Caliber will return confidential data to customers subject to the terms of the current RMS SaaS agreement.
- Caliber shall protect information designated as confidential from unauthorized access.
- Confidential data shall only be stored within Caliber's company information systems.

Processing Integrity Commitments

- The organization communicates requirements to user entities regarding the information, data or other specifications necessary to complete processing in alignment with standard business operations.
- Data processing requests are only performed as authorized by the user entity.
- Data shall be stored and maintained in the system with no unauthorized alteration.
