INTRODUCTION

This document provides an overview of the software changes delivered in the 11.9.0 release of the Online RMS product and will assist with release preparation activities including:

- Internal staff training
- Customer release training
- Customer release notes
- Release announcement and promotion
- Online help and eLearning updates
- Updates to web site product information and product collateral

PRODUCT REQUIREMENTS

For best performance, we recommend a computer, laptop, or tablet purchased within the last 3 years; running an industry popular web browser that is actively supported by the browser manufacturer and connects to the internet using DSL, Cable, or 4G cellular. The browser must support TLS 1.2 or higher.

IMPORTANT NOTICE FOR ONLINE RMS AGENCIES

ONLINE RMS DESUPPORTS INTERNET EXPLORER (IE)

EFFECTIVE, 03 AUGUST 2021

Microsoft announced Internet Explorer (IE) 11 will stop working optimally with Microsoft 365 services on August 17, 2021. Additionally, Internet Explorer (IE) 11 desktop application will be retired by Microsoft and go out of support on June 15, 2022. Microsoft Internet Explorer (IE) is no longer supporting new web standards that are used by modern applications.

For this reason, Caliber no longer considers Internet Explorer (IE) a modern web browser and is no longer supporting Internet Explorer (IE) for use with Online RMS as of August 3, 2021. There are significant security and performance concerns with Internet Explorer (IE) 11 (see [Microsoft FAQ](#)). Agencies still using Internet Explorer (IE) should move to a modern web browser such as Microsoft Edge, Google Chrome, Mozilla Firefox, or Apple Safari for accessing Online RMS.

RELEASE MILESTONES

The following table contains the high-level release milestones for the Online RMS 11.9.0 release.

End Date	Milestone
23 Nov 2021	11.9.0 Sprint 1 Starts
07 Dec 2021	11.9.0 Sprint 1 Ends / Sprint 2 Starts / 11.8.0 Release Available
21 Dec 2021	11.9.0 Sprint 2 Ends / Sprint 3 Starts
04 Jan 2022	11.9.0 Sprint 3 Ends / Sprint 4 Starts
11 Jan 2022	11.8.1 Service Pack Available
18 Jan 2022	11.9.0 Sprint 4 Ends / Sprint 5 Starts
01 Feb 2022	11.9.0 Sprint 5 Ends / Sprint 6 Starts / 11.8.2 Release Available
15 Feb 2022	11.9.0 Sprint 6 Ends / Sprint 7 Starts
01 Mar 2022	11.9.0 Sprint 7 Ends / Sprint 8 (Stabilization Starts)
01 Mar 2022	11.8.3 Service Pack Available
15 Mar 2021	11.9.0 Sprint 8 (Stabilization Continues)
23 Mar 2021	11.9.0 RTO (Release to Training / Operations)
01 Apr 2021	11.9.0 Code Lock
05 Apr 2021	11.9.0 Release Available

RELEASE ANNOUNCEMENT

Online RMS 11.9.0 is coming soon! As part of our customer commitment for major updates, the Online RMS training/demo environments will be upgraded to version 11.9.0 on March 23, 2022, to offer customer evaluation two weeks prior to production release. **As a reminder**, the production release of Online RMS 11.9.0 will occur on **Tuesday, April 5, 2022**, at **1:00 a.m. (Eastern)**.

We highly recommend you watch the release overview videos to prepare for and learn more about all the new and exciting features and functionality coming to Online RMS in the 11.9.0 release. To watch each video, navigate to the Help Menu > Training Videos Library or click the **WATCH** hyperlink below.

Get a **firsthand look** at the 11.9.0 release by logging into your RMS online training environment beginning **Thursday, March 24, 2022**.

End-User Focused Videos:

- **General Enhancements** (Something for everyone. User Admin, NIBRS Submission, Incident Mapping Refresh, Known and Unknown Persons, Insurance Policy, Enhanced Held/Property & Evidence Check-out Display, MNI Duplicate Warning, and Warrant Search Map Display.) - [WATCH](#)
- **Add Offenses in Mass to an Incident Report** (Simplified and streamlined offense entry. A must watch video.) - [WATCH](#)
- **Incident Quick Complete Templates & Copy Incident** (Create templates to save time documenting common recurring crimes. Enhancement to import data from associated Incidents.) - [WATCH](#)
- **Incident Type Improvements** (Ability to require Offenses based on Incident Type. Default Incident Type based on selected Offense. Incident Type now included in summary displays.) - [WATCH](#)
- **Incident Searching** (Additional multi-select fields for improved searching.) - [WATCH](#)
- **Incident Report – Explanation of Offender Choices** (Refresher – Unknown Offender.) - [WATCH](#)
- **Custom Forms – Enhancement** (Configure Additional Display Details for improved awareness.) - [WATCH](#)
- **Calls For Service – Entry** (Screen redesign for improved use and efficiencies. New address entry & validation options.) - [WATCH](#)

Online RMS 11.9.0 includes enhancements and improvements that touch approximately **35 RMS components**, including **Incident Report Writing, Incident Routing, Incident/Event Mapping, Held Property/Evidence, Citations, Custom Forms, Personnel/Training, Master People, Calls For Service, Warrants, User Admin, NIBRS State Submission Compliancy, Application Interfaces (APIs), and Security upgrades**; among many other product enhancements, integration improvements, and issue resolutions. Customer obligations, operational efficiency improvements, data entry simplification, and user friendliness were all major considerations in the development of this edition.

Below are a few release highlights available in Online RMS 11.9.0. More information on features and functionalities available in the 11.9.0 release can be found under the Online RMS Help menu by reviewing the Table of Contents (TOC) section and by clicking on the Product Release Bulletin. Click Help > Online Help or simply click [HERE](#) to read more. A draft version of the PRB will be available on March 24, 2022.

RMS 11.9.0 Release Highlights:

- **More time for Patrol and Other Activities**
 - **Quick Fill Incident Templates** - Easily create reusable incident report templates that users can apply to quickly fill-in data for common crime occurrences such as shoplifting/retail theft from Walmart, etc. Create templates with Crime Summary, Incident Report Types, Dates/Times, Not Known Offender, Victim Names, Location, Officers, Employees, and Narratives.
 - **Copy from Associated Incident reports** - Building on the **Copy Incident** functionality introduced in the last release, users can now import data from incident reports that are associated directly to the original report. When more than one incident report is required due to various actors or crimes committed, the ability to duplicate details from the initial report will save officers time in filing reports and returning to other tasks. This improved copy feature allows users to import data into incident reports that were auto created from responding to a CAD Call for Service. Copy Crime Summary, Incident Report Types, Dates/Times, Names, Business Names, Location, Officers, Employees, Property (Not Associated with an Offense), Vehicles (Not Associated with an

- Offense), Associated Events (CFS, Field Arrests), Narratives, Attachments, and Custom Forms.
- **Mass Offenses** – Save time and improve the accuracy of data using the Mass Offense entry page. The new mass entry page streamlines the entry of offenses and required offense NIBRS questions. Use the offense search bar to find and select each offense involved. Once all offenses are selected, complete the offense details for the first offense and the values will automatically populate down to all other offenses.
 - **Always Advancing**
 - **Improved Accountability**
 - ✓ If your **agency admin** has configured **associations** between **Incident Types** and **Offenses**, adding an offense to an incident report will automatically add the associated Incident Type.
 - ✓ Help Text and Validation text added to clarify “**Not Known**” and “**Unknown Offender**” options.
 - ✓ Many agencies enter a **Drug Measure** value of “XX” – “Not Reported/Pending Lab Results” with a **Quantity** of “0” for initial entry of drugs on an original reports. To simplify subsequent updates, the supplement report workflow has been updated to allow a user to easily update the values when the lab results are returned, regardless of lock hours.
 - ✓ **Calls For Service Addressing** – Enhanced geo-coding options for address entry.
 - Integration with [What3Words](#) is available to quickly populate the location details from a caller.
 - Select to search and add an address from the Master Address using our standard RMS Google **Master Address geo-validation** integration.
 - **Google Places Auto-complete** is supported. This feature requires agencies to create their own Google Account for use of Google’s required API keys. Contact Caliber Support to help configure.
 - ✓ **Personnel/Training** –
 - **Training** - Enhanced to allow the deletion of courses that are created and not needed.

- New permissions for **Personnel Management**.
 - Allow a user to edit their Profile information and their Employee information. Users without these permissions will only be able to view their Profile and Employee information.
 - Separation of Add/Edit and View for Personnel and Trainings.
 - ✓ **Duplicate Employee Warning**. A new warning is introduced to prevent the duplication of Employee records. When First Name, Last Name, Sex, and Race are entered, the page will check for duplicate employee records matching these values. Authorized users can link and unlink employees from User Profiles.
 - ✓ **Custom Forms** – Enhance your use of the Employee module by creating custom forms for use and association to employee records.
- **Increased Awareness**
 - ✓ The Offense display columns on the Master **Person Summary** and **Incident Charts** page were **enhanced to show both Incident Types and Offenses**. This improved display will make it easier to identify reports based on the Incident Type.
 - ✓ **Custom Forms** – Enhanced option to select Field Titles and Values to display in a new **Additional Details** column when acting on or reviewing custom forms.
 - ✓ **Personnel/Training** - Enhanced to display columns for Course Type, Course Classification, and Required flag. Columns made sortable where supported.
 - ✓ **Held Property/Evidence** – Check-out destination value added to Current Location and Chain-Of-Custody Location fields.
- **Usability and Efficiency Gains**
 - ✓ **Calls For Service**
 - A redesigned page layout with side Bar menu, improves usability.
 - Multi-tab layout allows the opening of one or more CFS records and ability to easily navigate between records to view or add and manage data on open calls.
 - ✓ **Warrant Search** – Enhanced mapping and display of Warrant info. Up to 500 warrants can be displayed on the map at one time.

- ✓ **Vehicle Insurance** – Policy # no longer required for entry.
- ✓ **Person Search** – New Search option for **Known** vs **Unknown** persons. Default set to Known to limit initial searches to known people records. A **Known person** is defined as a person with a first **name**, **last name**, and **dob** or having a **driver's license number**. Change the Person search filter to **Unknown** or **All** to search for people records that do not have a first name, last name, and DOB or not having a driver's license number.
- ✓ **Incident Searching** -Additional multi-select fields for improved searching.
- ✓ **Incident Printing** –
 - Printing of Person Details reports will only allow selection of Master Person records that are **Known**.
 - Option to Print Fillable PDFs when available for Form Attachments.
- ✓ **Incident/Event Mapping** - An added refresh button makes it easy to reset the map for new searches.
- ✓ **Officer Daily Log Search** – Enhanced to allow the selection of a specific agency within a user's organization or to view "**All Agencies**" in the user's organization.
- **Federal and State Compliancey**
- **Evergreen Worry-free Technology Updates**
 - Technology and security updates required to make sure Online RMS remains secure and operating efficiently.
- **Miscellaneous Software Fixes and Resolutions**

We hope you share our enthusiasm for the production release of Online RMS 11.9.0. Please contact us by email at Products@caliberpublicsafety.com if you have any questions about the release.

Our Very Best,

Caliber Public Safety

NEW FEATURES & ENHANCEMENTS

Many new improvements have been included in Online RMS 11.9.0, based on customer feedback, contractual commitments, and revisions to Public Safety State and Federal standards. The overall goal of this version was to improve operational efficiencies, data management, and ease of use. For additional information on the enhancements and functionality described in this release bulletin, please consult the **Online RMS User** and **Admin Help documentation**.

ONLINE RMS 11.9.0 HIGHLIGHTS

Improvements in Incident Reporting

Quick Fill Templates: Easily create reusable incident report templates that users can apply to quickly fill-in data for common crime occurrences such as shoplifting/retail theft from Walmart, etc. Create templates with Crime Summary, Incident Report Types, Dates/Times, Not Known Offender, Victim Names, Location, Officers, Employees, and Narratives.

Authorized users can create templates from an existing incident report in their Organization/Agency and save it for personal use or make available to other users in their Organization/Agency. To use this feature:

- The user must be in the same Organization/Agency as the incident report agency.
- The user's role must be assigned incident permissions. (**Note: No roles have been assigned these permission for initial deployment. Agency Admins can assign the permission to roles as desired. If you need assistance with assigning this new permission, please contact Caliber Support**).

Permission	Function
Incident Templates - Apply a Template to An Incident	If granted, displays "apply template" option in the Actions menu on the Summary Tab when editing an incident. This permission should be assigned to User Roles that create incident reports and should have access to use templates.

Permission	Function
Incident Templates - Create and Manage Templates for Agency	<p>If granted, user can create a template from any incident within his agency (doesn't have to be the responsible user). May create the template as a "user level" or "agency level".</p> <p>User can edit his own templates, any user-level template for any user within his agency, any agency level template. Can edit name and description. For user level templates, can unselect thus making the template an agency level.</p>
Incident Templates - Create and Manage Templates for Org	<p>If granted, user can create a template from any incident within his organization (doesn't have to be the responsible user). May create the template as a "user level" or "agency level" or "org level"</p> <p>User can edit his own templates, any user-level template for any user within his org, any agency level template within his org, and org-level templates. Can edit name and description. For user level templates, can unselect thus making the template an agency level. Can change the agency of an agency level template. Can make agency level templates into org level templates and vice versa (done by changing the agency to/from the root agency).</p>
Incident Templates - Create And Manage Templates for User	<p>If granted, allows user to create templates from an incident the user is the responsible user for. Can only be created from edit mode. Can only be created as "user level" template for the user.</p> <p>User can only edit his own templates. Can only edit name and description.</p>
Incident Templates - create from Incident Report	<p>If granted, displays "create template" option in the Actions menu on the Summary Tab.</p> <p>To create templates, user must have BOTH this permission as well as one of the 3 create & manage permissions.</p>
Incident Templates - Edit Template Data	<p>At this time, this permission category is reserved for Caliber Support.</p> <p>If granted, "Edit Template Data" check box is displayed on Edit Template - user can modify the JSON directly.</p>

FIGURE 1: INCIDENT QUICK FILL TEMPLATE PERMISSION CATEGORIES

Authorized users with access to create templates will find the **Create Template** option under the **Actions** menu on the **Incident Summary** tab. The process only uses information from supplement 0.

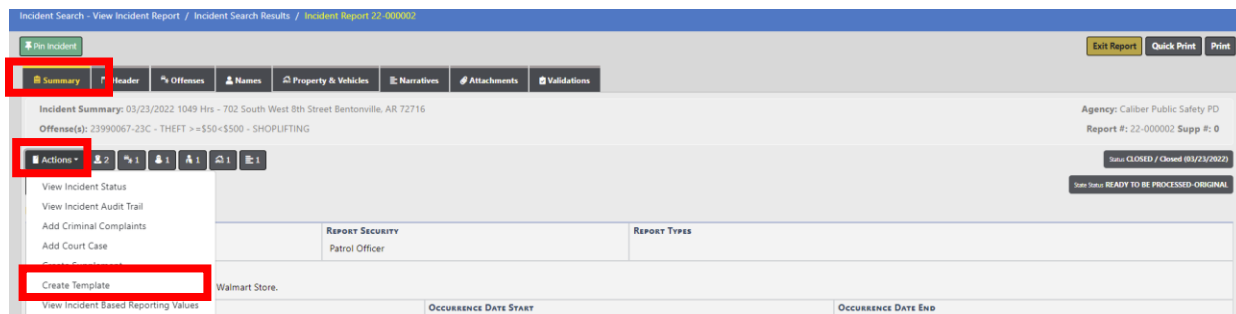

FIGURE 2: INCIDENT REPORT - ACTIONS MENU – CREATE TEMPLATE

Enter a Template Name, Description, and select from the below options for configuring the template:

- Media/Crime Summary
- Occurrence Location
- Offenses
- Not Known Offender (if used on report)
- Victims
- Narratives

Checking the **Limit to my User** checkbox will limit access to the template to the user that created the template. If your role has permissions and your RMS Agency is configured as a Multi-Agency Organization, you can select to limit the use of the template to a specific Agency or Select the Parent Agency to make available to all sub agencies.

FIGURE 12: ASSOCIATED INCIDENTS – IMPORT DATA FEATURE – SELECT DATA SCREEN

Mass Offenses: Using the new Incident Report **Mass Offense** entry process, you can save time and improve data entry accuracy when completing incident reports involving one or more offenses. The Mass Offense flow streamlines the entry of offenses as well as the appropriate offense NIBRS questions.

When browsing/navigating to the Offense Tab in Wizard mode, the Mass Offense screen is now the default. To identify and select each crime involved, use the offense search bar. Complete the offense details for the first offense once all offenses have been selected, and the values will automatically populate down to all other offenses.

For agencies that have Offenses linked with Incident Types, a new left-hand Sidebar menu will provide Incident Types that require an offense, as well as a list of associated Offenses for quick addition to the incident report.

The screenshot shows the 'Incident Mass Offenses' screen. On the left, a sidebar menu titled 'Required Offenses By Types' is highlighted with a red box. It lists three offense types: 'Theft >=\$1,500-\$20k - Shoplifting', 'Drugs Sale/Use', and 'Poss Marij >5lbs <=50lbs - 481...'. The main area displays the incident summary: '03/23/2022 1250 Hrs - 123 East Main Street Greenfield, PA'. Below this is a search bar with the text 'Search For An Offense Here. You Can Use This To Add As Many Offenses As You Want.' and buttons for 'Save' and 'Go Back'. A note at the bottom states: 'Add Offenses By Searching Using The Above Text Field. If Any Incident Types Which Require Offenses Exist On This Report, They Will Be Shown On The Left. It Is Recommended That You Select All Offenses You Want To Add Before Filling In The Details. Values From The First Offense Will Automatically Be Applied To Any Other Offenses Added Here. Use Single Offense Entry.'

FIGURE 13: MASS OFFENSE SCREEN – REQUIRED OFFENSES BY INCIDENT TYPE – SIDEBAR MENU

The Incident Type warning will be met by selecting a required offense.

The screenshot shows the 'Incident Mass Offenses' screen with a selected offense. The sidebar menu is still visible. The main area shows the incident summary and a search bar. Below the search bar, a table displays the details of the selected offense: '(23C Shoplifting) - 23990004-23C - Theft >=\$1,500-\$20k - Shoplifting'. The table has columns for 'OFFENSE STATUS', 'OFFENSE STATUS DATE', 'REMARKS', 'ATTEMPTED / COMPLETED', 'BIAS', 'TYPE OF LOCATION / PREMISE', and 'OFFENDER SUSPECTED OF USING'. The 'OFFENSE STATUS' is set to '-Select-', 'OFFENSE STATUS DATE' is '03/23/2022 1250', 'REMARKS' is empty, 'ATTEMPTED / COMPLETED' is '-Select-', 'BIAS' is '-Select-', 'TYPE OF LOCATION / PREMISE' is '-Select-', and 'OFFENDER SUSPECTED OF USING' is 'Click To Select'. Buttons for 'Save' and 'Go Back' are at the bottom right.

FIGURE 14: MASS OFFENSE – REQUIRED OFFENSE – VALIDATION MET

Use the **“Search For An Offense Here. You can Use This To Add As Many Offense As You Want”** Search Bar to add one or more offenses to the report. Search and select each offense.

The screenshot shows the 'Incident Mass Offenses' screen with the search bar highlighted. The incident summary is '03/23/2022 1250 Hrs - 123 East Main Street Greenfield, PA'. The search bar contains the text 'Search For An Offense Here. You Can Use This To Add As Many Offenses As You Want.' and buttons for 'Save' and 'Go Back'.

FIGURE 15: MASS OFFENSE SEARCH BAR

Once all offenses have been selected, fill out the offense details for the top offense, and the data will automatically populate down to the additional offenses.

Calls For Service

The **User Interface (UI)** for agencies that use the **Manage Calls** module to enter Calls for Service has been redesigned for increased usability.

A left-hand **Sidebar menu** provides simplified access to **Create a New Call**, **Manage Screen Options**, **Drag and Drop Officers on Calls that you own (from Call List)**, and **Exit** the screen.

Call #	Call Date	Caller Name	Incident Location	Call Type	Call Priority	Status	User	Actions

FIGURE 18: CALLS FOR SERVICE – MANAGE CALLS – MULTI-TAB MANAGEMENT

The Call Map tab will display all geo-coded calls in the filter in a Map view.

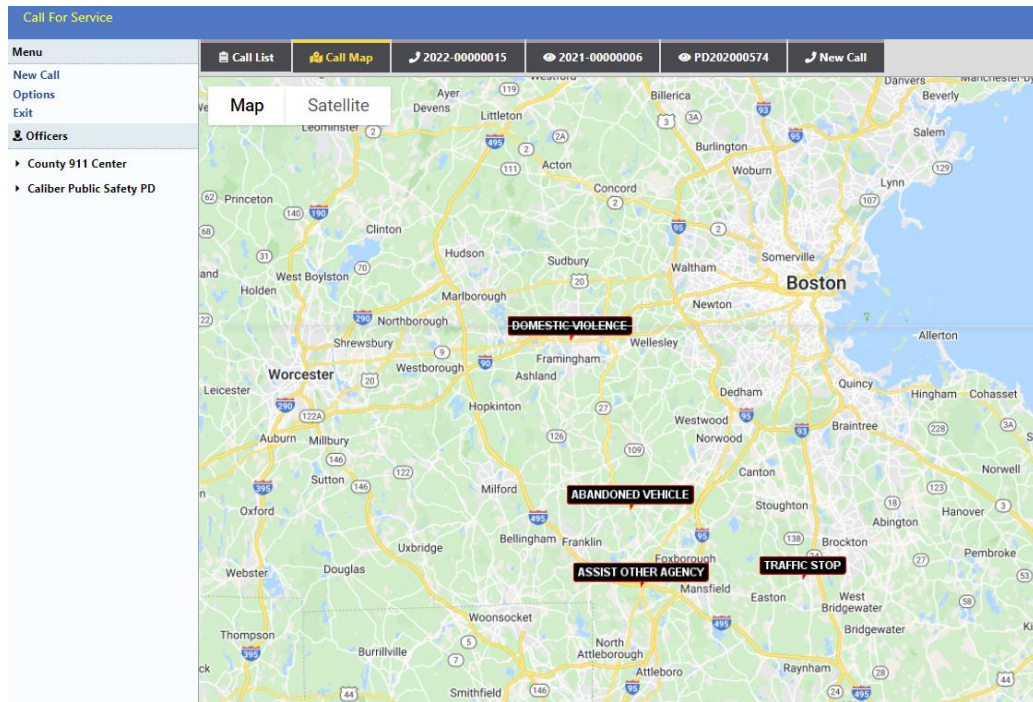

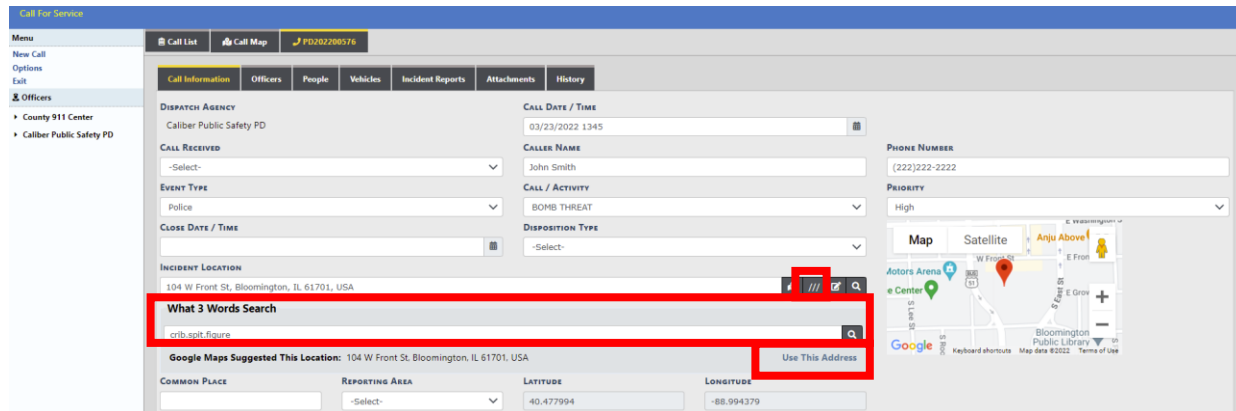

FIGURE 19: CALLS FOR SERVICE - MANAGE CALLS - CALL MAP

Enhanced geo-coding options for address entry.

- Integration with [What3Words](#) is available to quickly populate the location details from a caller when they provide the three words for their location.
- Select to search and add an address from the Master Address using our standard RMS Google **Master Address geo-validation** integration.
- Google Places Auto-complete** is supported. This feature requires agencies to create their own Google Account for use of Google's required API keys. Contact Caliber Support to help configure.

What3Words – Select the  icon to display the What 3 Words Search bar. Enter the three words received from the caller. Search to see the location on the map. RMS integration with Google maps will attempt to match the geo-coordinates with a Suggested address. Click on **Use This Address** link to use the suggested address as the CFS Incident Location.

Google Places Auto-complete – when enabled users can type into the CFS Incident Location field and suggested locations will automatically appear that match the key words entered. Suggested location will be based on locations in the vicinity of the user's location. This feature requires agencies to create their own Google Account for use of Google's required API keys. Contact Caliber Support to help configure.

CFS Address Search – Use the  icon to use information entered in the Incident Location field to search the RMS Master location file. If no address is found, the information can be reused to create a new address to link to the CFS record.

The CFS Edit  icon displays the formatted address in separate fields, allowing the user to modify or add additional details as required.

Incident Notes has been modified to log the date, time and user initials when entering a new comment. This enhanced process will reduce the chance of unintentionally typing over previous notes entered in the notes field. On the right, above the incident notes text section, there is a "Enable Editing" link that will make the text area editable. This will allow for modifications as needed.

FIGURE 20: CALLS FOR SERVICE – MANAGE CALLS – CFS/INCIDENT NOTES

Custom Form – Additional Display Fields

Getting more out of Custom Forms. Customer-sponsored enhancement allowing the selection of one or more fields on a Custom Form that can be used to offer more information to readily distinguish the Form when reviewing and/or acting on notifications.

Authorized users can choose which fields to display for Additional Details when creating a Custom Form. To pick fields for existing Custom Forms, disable the Form first and edit the individual Form fields. Sub Form fields are not supported.

FIGURE 21: CUSTOM FORM ADMINISTRATION - SELECT FIELDS TO DISPLAY IN ADDITIONAL DETAILS

Selected fields display as Additional Details when the custom form is displayed in My Forms screen (initial and rejected), Forms for Review, Form Search results, and Notifications (FORM REVIEW, FORM DISAPPROVED, and FORM REVIEW – INFORMATIONAL). Additionally, the Form Instance number was added as a column and to the Notification Details.

Name	Instance #	Additional Details	Type	Date Created	Status	Actions

General Application Enhancements

In response to listening to our clients we are pleased to feature these general application updates focused on improving data entry, data quality, and overall application usability.

Improved Accountability

- Unknown Offender** - Help Text and Validation text added to clarify “Not Known” and “Unknown Offender” options. Per NIBRS requirements, if all Sex, Race, and Age are Unknown, then the Offender should be entered as Not Known (00). If receiving this message, exit the page and select the **Offender Information Not Known** option or enter a known identifier for the suspected offender

Incident Summary: 03/23/2022 1250 Hrs - 123 East Main Street Greenfield, PA
Offense(s): No Offense Specified
Agency: Caliber Public Safety PD
Report #: 22-000003 Supp #: 0

If Sex, Race, and Age are all Unknown then exit this page and Select the Offender Information Not Known option.

FIGURE 23: NEW VALIDATION WARNINGS FOR INCIDENT REPORT - UNKNOWN OFFENDERS

2. **Improved Personel & Training Records Accountability** – A few usability items to enhancements the use of the Personnel and Training Modules.

- The Training Course Search Results have been enhanced to allow the deletion of courses that are created and not needed.
- New permissions added for Personnel Management. Users without these permissions will only be able to view their Profile and Employee information.

Category
User - Allow User to Update Their Employee Information
User - Allow User to Update Their Profile Information

- **Duplicate Employee Warning.** A new warning is introduced to prevent the duplication of Employee records. When First Name, Last Name, Sex, and Race are entered, the page will check for duplicate employee records matching these values.

Authorized users can link and unlink employees from User Profiles.

The screenshot shows the 'Employee Search / Employee Search Results / Edit Employee' page. It features a sidebar with 'Employee Info' and 'Training' tabs. The main area displays employee details for 'Maria Hill' from the 'Greenfield Police Department'. A red box highlights the 'User' section, which includes the email 'DEMO_ADMIN@IADDEMO.COM' and a button labeled 'Un-Associate User'.

FIGURE 24: MANAGE EMPLOYEE – UN-ASSOCIATE USER ACCOUNT

3. **Custom Forms** – Enhance your use of the Employee module by creating custom forms for use and association to employee records.

The screenshot shows the 'Attached Forms' section at the bottom of the employee management page. It includes a header 'Attached Forms' and a button 'Add Form' next to a dropdown menu currently set to '-Select-'.

FIGURE 25: EMPLOYEE MANAGEMENT - ATTACH CUSTOM FORM

4. **Improved management of the Personnel and Training modules** - Separate permission categories for managing access to Add/Edit and View Only. The Permission categories are self-explanatory.

- **Personnel Management Permission categories**

Category
Personnel Management - Add/Edit Agency Records
Personnel Management - Add/Edit Organization Records
Personnel Management - Add/Edit Schema Records
Personnel Management - View Agency Records
Personnel Management - View Organization Records
Personnel Management - View Schema Records

Training- Add/Edit Organization Records

FIGURE 27: PERMISSION CATEGORIES - PERSONNEL MANAGEMENT

- Incident Drug Measure & Quantity Updates** - Many agencies enter a Drug Measure value of "XX" – "Not Reported/Pending Lab Results" with a Quantity of "0" for initial entry of drugs on an original reports. To simplify subsequent updates, the supplement report workflow has been updated to allow a user to easily update the values when the lab results are returned, regardless of lock hours.

The screenshot shows the 'Incident Report - Open Supp' form. It includes fields for 'INDEX ID' (1358), 'CATEGORY' (Drug), 'DATE OF INFO' (03/23/2022), 'TYPE' (DRUGS / NARCOTICS - CONTROLLED SUBSTANCE), 'DRUG TYPE' (MARIJUANA), 'QUANTITY' (0), and 'MEASURE' (Not Reported (Sent to Lab)). There are also sections for 'ITEM DESCRIPTION' and 'OTHER COMMENTS'.

FIGURE 28: INCIDENT REPORT - OPEN SUPP – UPDATE QUANTITY IF "0" AND MEASURE IF "XX"

Increased Awareness

- Training Dashboard - Course Type and Course Classification columns** added Upcoming Courses, Expired Courses, and Near Expired Courses, as well as Manage Courses -> Search Course results. This will provide improved awareness of trainings that are mandatory / required for service.

The screenshot shows the 'Training Dashboard' with a table of courses. The table has columns for 'Course', 'Type', 'Classification', 'Agency', 'Location', 'Start Date', and 'Actions'. A red box highlights the 'Type' and 'Classification' columns for the first six rows.

Course	Type	Classification	Agency	Location	Start Date	Actions
Advanced Traffic Crash Investigation	Specialty Training	Voluntary In-Service Training				
Breathalyzer Training	In-Service Training	Department Mandated Training		LEA Training Center		
CPR and First Aid training	In-Service Training	Department Mandated Training		HCADC C/D classroom		
Domestic Violence	In-Service Training	State Mandated Training				
Use of Force Policy and Vehicular Pursuit Policy	In-Service Training	State Mandated Training	Caliber Public Safety PD			
Victim-Witness Services	Specialty Training	Voluntary In-Service Training

FIGURE 35: WARRANT SEARCH RESULTS – SHOW MAP BUTTON

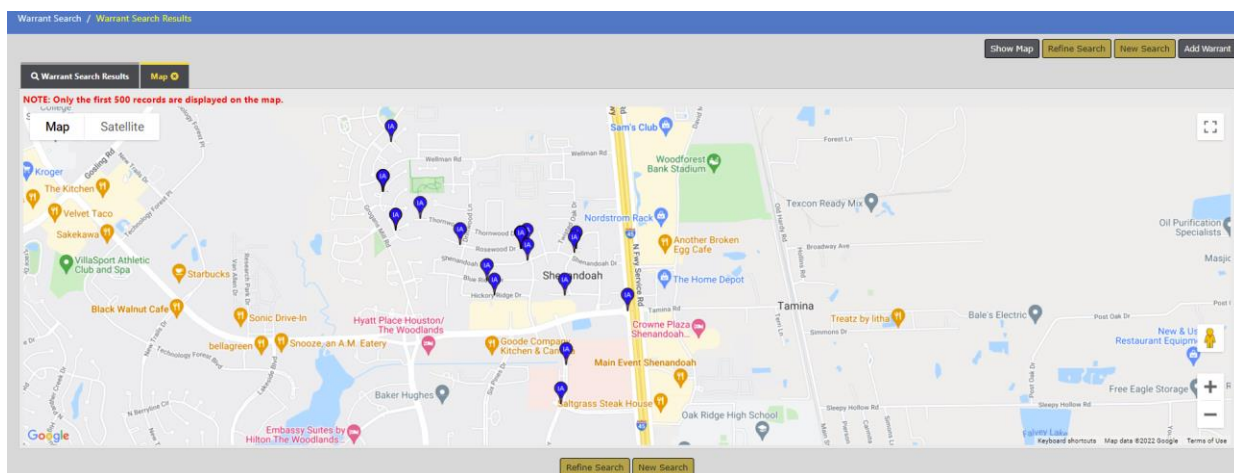

FIGURE 36: WARRANT SEARCH RESULTS - MAP DISPLAY WITH WARRANT MARKERS

- Clicking on a Warrant Pin/Marker will display additional Warrant Details with option to View or Edit based on user permissions.

FIGURE 37: WARRANT MARKER – ADDITIONAL DETAILS

- Incident/Event Mapping** - An added refresh button  makes it easy to reset the map for new searches.

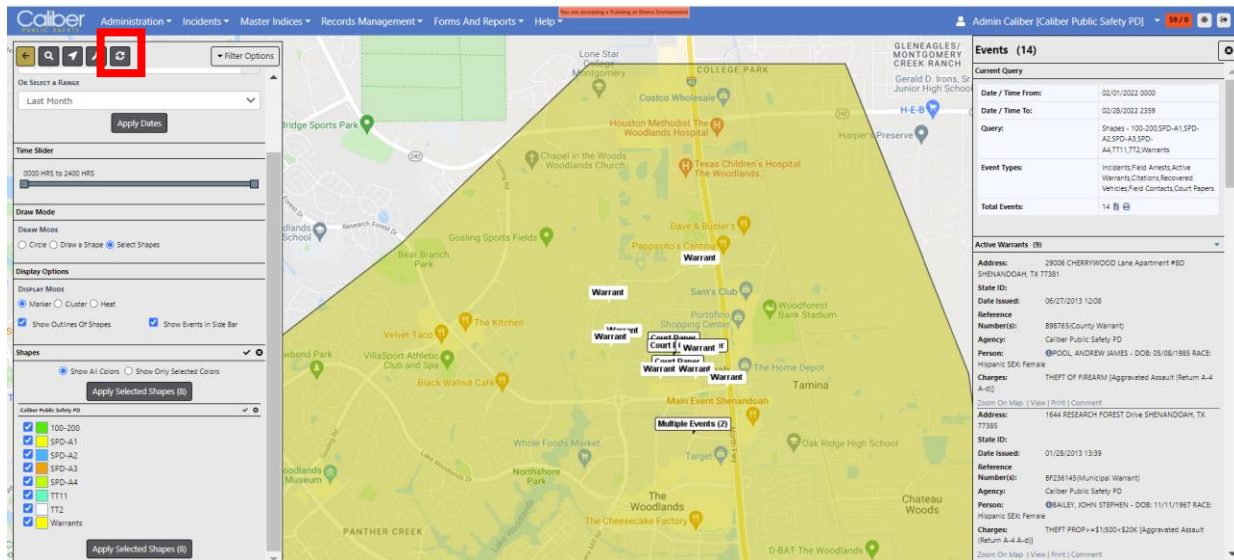

FIGURE 38: INCIDENT MAPPING – REFRESH BUTTON

- Incident Search** - Enhanced the Incident Search to allow multi-select values for Agency and Incident Status/Disposition List of Values (LOVs).

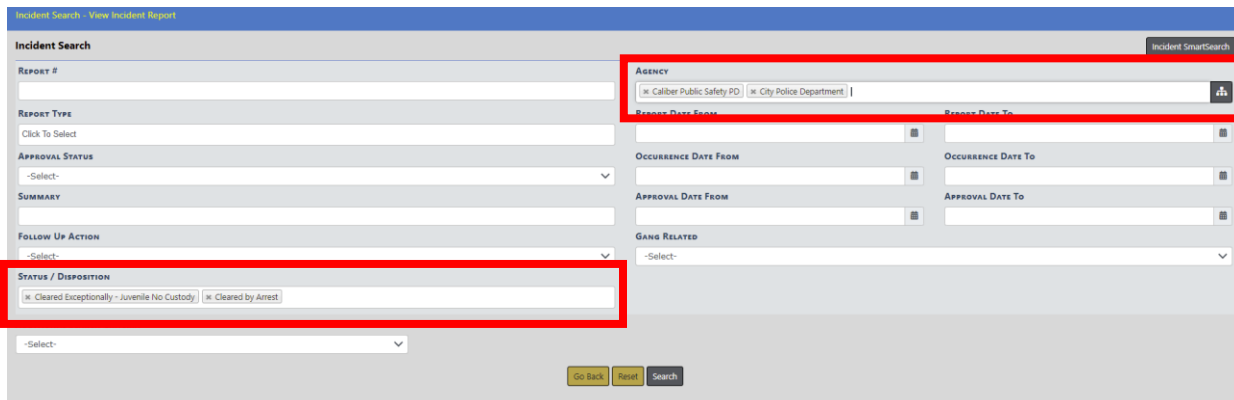

FIGURE 39: INCIDENT SEARCH – MULTI-SELECT LOVS FOR AGENCY AND STATUS/DISPOSITION

- Officer Daily Log Search** – Enhanced to allow the selection of a specific agency within a user’s organization or to view “All Agencies” in the user’s organization.

The screenshot shows the 'Officer Daily Log Search' interface. It includes fields for 'DAILY #', 'STATUS', 'ASSIGNMENT', 'SHIFT', 'DATE FROM', 'DATE TO', 'POSTED', and 'REPORTING AREA'. The 'AGENCY' dropdown is highlighted with a red box, showing 'Caliber Public Safety PD' as the selected option. Below these fields are input fields for 'OFFICER' (First Name, Last Name, Internal # / Badge ID) and buttons for 'Go Back', 'Reset', and 'Search'.

FIGURE 40: OFFICER DAILY LOG – AGENCY SEARCH FIELD

- Person Search** – New Search option for Known vs Unknown persons. Default set to Known to limit initial searches to known people records. A Known person is a person with a first name, last name, and dob or having a driver’s license number. Change the Person search filter to Unknown or All to search for people records that do not have a first name, last name, and DOB or not having a driver’s license number.

The screenshot shows the 'Person Search' interface. It includes tabs for 'Person Search', 'Address', 'Organization', 'Vehicle', 'Property', and 'Gang'. The 'SEARCH FOR' dropdown is highlighted with a red box, showing 'Known' as the selected option. Other fields include 'LAST NAME', 'FIRST NAME', 'MIDDLE NAME', 'TITLE', 'DOB', 'AGE', 'RACE', 'SEX', 'INDEX ID', 'DRIVERS LICENSE', 'DRIVERS LICENSE STATE', 'SSN', 'NAME TYPE', 'CREATOR', 'CREATION DATE FROM', and 'CREATION DATE TO'.

FIGURE 41: PERSON SEARCH - KNOWN AND UNKNOWN PERSONS SEARCH FIELD

- Incident Printing** – Printing of Unknown Person Detail reports is automatically filtered to not include. Easily print fillable PDFs when configured for Custom Forms associated to the incident report.

The screenshot shows the 'Incident Print' interface. It includes a checkbox for 'Include Form Attachments' which is checked. Below this is the 'Form Attachment Options' section, which includes a checkbox for 'Use Fillable PDFs (Where Applicable)' which is also checked. The 'Select the forms you want included:' section shows 'Fillable PDF Testing - Admin Caliber' selected.

FIGURE 42: INCIDENT PRINT - CUSTOM FORM - FILLABLE PDF OPTION

APPENDIX: 11.9.0 PRODUCT CHANGE NOTICE (PCN) – DETAILED JIRA LISTING

TABLE A: Release Enhancements and Product Software Issue Resolutions

This table contains enhancement, software issue, and interface JIRAs contained in the 11.9.0 release.

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-58202	N/A	RMS - Upgrade jQuery	Engineering Enhancement	UI - Home Page	Technical Upgrade: Update JQuery to current version for improved security and usability.
IA-65942	365155	Title: Personnel Management - Edit employee record - make column headers sortable	Enhancement	Personnel	Software Enhanced: Added column sorting to all Employee grids where not previously present (only on date columns before). Exceptions are comment bubble columns, and Attachment file names. Other Info Attachments grid is also sortable, with the same caveats.

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-66693	368586	Permission - View only permission for Training and Personnel Management	Enhancement	Personnel	<p>Software Enhanced: Better management of Personnel and Training, Permission categories separated for controlling access to Add/Edit (Admin) and View Only.</p> <p>5. Personnel Management</p> <ul style="list-style-type: none"> - Add/Edit (Agency/Org/Schema) Records <p>6. Personnel Management</p> <ul style="list-style-type: none"> - View (Agency/Org/Schema) Records <p>7. Training - Add/Edit (Agency/Org/Schema) Records</p> <p>8. Training - View (Agency/Org/Schema) Records</p>

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-67291	374010	Personnel Management - Add USER ID to existing Personnel record	Enhancement	Personnel	<p>Software Enhanced: The User field on Employee Edit screen has a button which can either Un-Associate the current User account if present or Associate an existing User account.</p> <p>When associating an existing User account, a dialog will appear showing potential duplicates. A potential duplicate search will match on First Name, Last Name, and Middle/Middle Initial if present.</p>
IA-67667	N/A	2FA - and Caliber DBM emulation.	Enhancement	Admin	Internal Enhancement: Improve customer support for schemas enabled with Advanced Authentication.
IA-67824	N/A	Property Summary Tag additions	Bug/Defect	Master Indices	<p>Software Modification: More data for display in property summary tags:</p> <ul style="list-style-type: none"> • Drugs will display the quantity rather than value. • Documents - Added 'Account Name' • Guns - Added '# Rounds' • Currency - Added 'Amount' to reflect the total value

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-68181	377513	Incident Mapping - Add a refresh button to Incident Mapping page	Enhancement	Incident Mapping	Software Enhanced: A new refresh button appears on the incident mapping screen. The button is located on the top left toolbar. Clicking the button will warn the user that the map search values will be refreshed. Confirming the message will refresh the map.
IA-68187	N/A	Master Indices - Duplicate entry alert should stand out more	Enhancement	Master Indices	Software Enhanced: The Potential duplicate warning button that appears at the top right of all Master Indices entry screens will now appear Red rather than Yellow to visually alert the user.
IA-68207	N/A	Admin: "Error saving Local Offense Code" msg displayed when adding a code with lower case letters and associating a NIBRS code	Bug/Defect	Admin	Software Modification: Resolved an issue with entering and saving an Agency specific local Offense code.
IA-68472	N/A	Active Warrants - By Reporting Area Report - Print free text charging information.	Bug/Defect	AdHoc Reporting	Printing Improvement: Warrant report and Active Warrants AdHoc report were modified to include warrant charge information entered as free text.

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-68609	379626	Training - Ability to Delete unused Course	Enhancement	Personnel	Software Enhanced: Added the ability to delete Courses from the Manage Courses Search Results screen. Courses can only be deleted when there are no attendees or groups associated to the course and the course is currently open.
IA-69076	382407	Officer Daily Logs - Access Logs Across Agencies	Enhancement	ODL	Software Enhanced: Agencies configured as Organizations with sub-agencies can now select a specific agency or "All Agencies" when searching Officer Daily Logs.
IA-70071	N/A	Personnel Management - prevent duplicate employee	Enhancement	Admin	Software Enhanced: Added Employee and Officer duplicate warnings when adding new users through the single Add User screen or the Mass User Entry screen. When First Name, Last Name, Sex, and Race are entered, Online RMS will check for duplicate Employee and Officer records. If found, a warning button will appear in the top right allowing the user to review duplicates found and select a match to associate to the new User.

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-70689	392585	Incident Reports - Add ability to edit drug property Quantity & Measure values through Supp	Enhancement	Incidents	Software Enhanced: Many agencies enter a Drug Measure value of "XX" – "Not Reported/Pending Lab Results" with a Quantity of "0" for initial entry of drugs on an original incident reports. To simplify subsequent updates, the supplement report workflow has been updated to allow users with an open supplement to easily update the values when the lab results are returned, regardless of lock hours.
IA-70693	392578	Search Results - Allow setting the results default display value	Enhancement	Admin	Software Enhanced: The default number of records for screens with data tables (e.g., user management) has been updated to display 100 records. This does not impact traditional search screens.
IA-71381	N/A	CFS: Create Incident dialog box - Media Crime Summary is not required	Bug/Defect	Calls For Service	Software Modification: The Incident Crime/Media Summary field will validate when required if blank.
IA-71397	N/A	CFS: Narrative imported from CFS into incident does not have carriage return.	Bug/Defect	Calls For Service	Software Modification: Narrative text imported into an incident report from a CAD CFS spill will maintain carriage returns as entered.

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-72571	396731	Incident Printed Report Custom Forms – Print Fillable PDFs if available.	Enhancement	Incidents	Software Enhanced: A new option for printing fillable PDFs for custom forms is available on the Incident Report print options screen. It will appear for the list of forms having fillable PDFs when you select to include form attachments.
IA-72726	398003	Records Collapse	Bug/Defect	Collapse	Software Modification: Organization collapse updated to handle collapsing business with the same phone ID on both business records.
IA-72889	N/A	Collapse: Review use of Collapse - Basic Functionality permission and remove if no longer needed	Bug/Defect	Collapse	Software Modification: Refined available permission categories for collapsing Master Indices records. There are now 5 (five) collapse categories. <ul style="list-style-type: none"> • Collapse - Collapse All Master Index Records • Collapse Address • Collapse Organization • Collapse Person • Collapse Vehicle
IA-72926	N/A	Incident Review: Quick Print button workflow	Bug/Defect	Incidents	Software Modification: Updated the print dialog after selecting the Incident "Review and Print" option to provide a "Go Back" button. This button will take the user back to the Home screen.

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-72933	N/A	Master Indices: add person dialog creates vehicle description row with month of 0 if user populated nothing	Bug/Defect	Master Indices	Software Modification: Modified the logic to handle situations where vehicle information is included at the same time when creating a Master Person record.
IA-73153	404665	Incident report Offense Duplicated Causing validation errors	Bug/Defect	Incidents	Software Modification: Add UI blocking mechanism when saving an offense to prevent the possibility of duplicating an offense on an incident report.
IA-73185	N/A	Incident: Juvenile text and/or Juvenile Banner msg not displayed for Incident Person without DOB and Juvenile Age	Bug/Defect	Incidents	Software Modification: Improved the display of the Juvenile warning banner/message when an offender or a victim on the incident report is of juvenile age.
IA-73397	387124	Add Comment when Deactivating User	Enhancement	Admin	Software Enhanced: A comment must be entered to log the reason when a user is deactivated and if deactivated users are subsequently reactivated.

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-73481	RMS-I-206	New Permission for user to Edit their My Profile Information	Enhancement	Personnel	<p>Software Enhanced. Caliber Concepts – Customer Idea - RMS-I-206</p> <p>Two new permissions for Personnel Management. Users without these permissions will only be able to view their Profile and Employee information.</p> <ul style="list-style-type: none"> • Allow a user to edit their Profile information • Allow a user to edit their Employee information. <p>Additionally, the Employee screen was enhanced to allow association of Custom Forms. Expand upon the functionality of the personnel management by creating custom forms to create workflows and capture additional information.</p>
IA-73628	N/A	Warrants - Search Results Map Usability Enhancements	Enhancement	Warrants	<p>Software Enhanced. Warrant Search and Map display of Warrant info updated to display up to 500 warrants on the map at one time. Warrant info pins enhanced to display more data about the warrant with the ability to edit or view warrant based on user permissions.</p>

JIRA #	Client Ticket #	Summary	Type of Issue	RMS Module	Functional Documentation
IA-73637	N/A	Tow/Impound - Vehicle Type not defaulted when adding a new Vehicle but only if user had previously typed in Make/Model on Vehicle Search page	Bug/Defect	Tow Impound	Software Modification: Updated add vehicle workflow to retain vehicle type when creating a new master vehicle record after a search.
IA-73700	N/A	Field Arrest: Organization Additional Search Criteria is missing Street Name field	Bug/Defect	Field Arrest	Software Modification: Added Organization Street Name to Field Arrest - Additional Search Criteria.
IA-73757	407589	Incident Offender Clarification on using Unknown Offender or Offender Not Known option	Enhancement	Incidents	Software Enhanced: Help Text and Validation message added to clarify "Not Known" and "Unknown Offender" options.
IA-73830	N/A	Fleet: Refresh Fuel/Oil page (Add Fuel/Oil/Mileage Record not displayed) after self-assignment	Bug/Defect	Fleet Mgmt.	Software Modification: Improved usability of Fleet Management screen to auto refresh when adding a self-assignment.

APPENDIX: SERVICE COMMITMENTS

Caliber Public Safety designs its processes and procedures related to its RMS system based on the service commitments that Caliber Public Safety makes to its business units, the laws and regulations that govern the system and the operational and compliance requirements that Caliber Public Safety has established.

Security, availability, confidentiality, and processing integrity commitments include, but are not limited to, the following:

Security Commitments

- Secure Socket Layer (SSL) FIPS140-2 compliant encryption is used to encrypt the transmission of data with Caliber hosted systems.
- Access to customer data is restricted to Caliber employees and/or subcontractors whose job function requires access.
- RMS Development, operations, and customer service personnel are required to maintain active CJIS certification.
- Systems are subject to vulnerability scanning.

Availability Commitments

- Caliber will maintain a highly available platform (99.9% uptime) that includes redundancy for critical system components except during planned downtime as communicated to users or unplanned downtime caused by circumstances beyond its reasonable control. In practice, Caliber routinely exceeds 99.99% uptime.
- User entity data is backed up daily and replicated to a secondary location.
- User entity data is maintained and stored within the United States.

Confidentiality Commitments

- Upon termination of services, Caliber will return confidential data to customers subject to the terms of the current RMS SaaS agreement.
- Caliber shall protect information designated as confidential from unauthorized access.
- Confidential data shall only be stored within Caliber's company information systems.

Processing Integrity Commitments

- The organization communicates requirements to user entities regarding the information, data, or other specifications necessary to complete processing in alignment with standard business operations.
- Data processing requests are only performed as authorized by the user entity.
- Data shall be stored and maintained in the system with no unauthorized alteration.
